*Optimum Carcase Specifications*

*Growth and Carcase*

*Enhance your Genetic Gain*

## *Welcome to Futurity*

Welcome to our 12th Annual On Property Sale and thank you for taking the time to preview our 2020 catalogue. The 50 sale bulls are the pick of over 100 retained for sale in 2020. This year we also have 23 females catalogued for those wishing to start a seedstock operation or complement their existing program.

What a wonderful time to be in beef with record high prices and favourable seasonal conditions for most of eastern Australia. Well done to those that did the hard yards to retain their core breeding stock during the drought.

You will notice that Shorthorn beef has moved from Breed Plan to IGS the International Multibreed genetic evaluation for the supply of Genetic evaluation. The change has not altered the way the cattle are described very much it has just given the breed access to some very economically important trait measurement like Stayability (Female longevity). It has also given the breed access to genomic technology. With the aid of genomic technology and carcass data collection through the JBS Thousand Guineas program Futurity has embarked on a period of accelerated genetic gain. Thank you to the commercial producers and JBS who partner with us on this.

Once again we will be offering the freight subsidy to ensure the coordination and transport is cost efficient and your purchase arrives safely. How it works – at settlement you can nominate to pay \$100/ bull and Jason will organise to have them delivered within NSW borders and to Roma no more to pay.

### **About the Bulls**

I am very happy to be able to say the bulls this year have been prepared with no grain for this year's sale. We were fortunate enough to have some forage sorghum in for them for the summer and from then they have been running on grazing oats prior to sale.

Our goals have always been simple "provide cattle that add value and profitability throughout the supply chain". Easy care cattle for the cow calf producers, cattle that have rapid growth in the feed yard and cattle that have excellent carcass characteristic and eating quality for the processor and retailer.

We are very confident this is the most even and functional line of bulls we have offered at Futurity and are confident of their capabilities when compared with other shorthorns or other breeds. The bulls will pass on their excellent genes for calving ease, fertility, longevity, growth and carcass data and are a very docile group.

The bulls have been run in one contemporary group for all their data recording. Bulls with PP have been tested homozygous polled and will only breed polled calves, even when joined to a horned cow.

### **About the Females**

Due to many producers beginning a rebuilding phase after the drought we have decided to offer 20 female for the first time in five years. We also have guest vendor Tojon Shorthorns with 3 females.

The heifers we have selected are at the top end of our program. They have been selected from sire lines that are breeding very well for us and some exciting first season sires. We are confident all the heifers will go on to be top breeders and there's many top show prospects amongst them.

**Cow Dispersal of 2010 and 2011 drop cows.** This group of cows are the last of the cows from there age group that we will be continuing to breed from. Like many breeders, our older age groups of cows have been reduced substantially due to the drought, so these girls are the hardiest and best producers of their year drop. The sale of these females represents a once only opportunity to purchase top proven females.

We encourage viewing of the cattle prior to the sale if possible. We will be hosting a **Beef Technology Day and Bull walk on Thursday 6th August**. We believe this is an investment in your business. Seek to find the best combination of genetics, performance data and physical attributes to improve profitability in your herd. Your investment now will reap rewards in the future. We would like to assist in advising you on the purchase that will be most profitable for your operation so please ask if you would like any assistance. We invite you to come along and enjoy our hospitality.

Kind Regards  
Jason, Kylie, Riley and Jess

# REFERENCE SIRES

## FUTURITY MASTERPLAN M314

Colour: Red Ident. No.: JJJM314

Sire: YAMBURGAN HECTOR J423 (P) Red

Dam: LAKE HAWDON APPROVAL F57 (P) Red

We selected Master Plan M314 to use on heifers as a yearling due to his curve bending data set, doing ability, volume, and an incredibly quiet disposition. This young sire has exceeded our expectations on the progeny he is breeding, they definitely have more volume and capacity than their contemporaries, faultless temperaments and amazing birth weight to growth ratios. We continue to use this young sire on both heifers and cows.

IGS EPD's as of 10/7/20

## YAMURGAN ANZAC L278

Colour: Roan Ident. No.: YY L278

Sire: YAMBURGAN OSSIE E65 (P) Red

Dam: YAMBURGAN MAYFLOWER F82 (P) White

We purchased for \$42000 in 2017 due to his superb structure, feet, disposition and profitable data set. He is breeding easy care cattle with plenty of growth and carcass quality. We have used Anzac on heifers and cows with success and believe his progeny will have excellent maternal function.

## FUTURITY FULLY LOADED F109 (P) (AI)

Colour: Roan Ident. No.: JJJF109

Sire: THE GROVE KINGSWOOD W731 (P) (ET) (AI) Red

Dam: FUTURITY GRAND CARNATION W28 (P) Red

We purchased this old war horse back in 2017 to use physically because the job he continues to do for the shorthorn breed. Fully Loaded has stood the test of time, producing over 300 registered progeny in 16 herds with his data continuing to improve.

# REFERENCE SIRES

## FUTURITY EDGED IN STONE K148 (P) (AI)

Colour: Red Little White Ident. No.: JJJK148

Sire: YAMBURGAN ZEUS H140 (P) Red

Dam: FUTURITY CHICARGO'S ENIA C38 (P) Red

What a sire Edged in Stone is turning out to be, his progeny speak for themselves with their consistency of quality. We have never had a sire that produces so much maternal function in the way of calving ease and doing ability combined with carcass data that is surpassed by none in the breed. Edged in Stone was what we believed to be our best Zeus H140 son that we bred. We continue to use him as one of our main AI sires. He is a Maternal Brother to Futurity Game Changer who was our top priced bull in 2013 selling to Southcote Shorthorns. Edged in Stones progeny are well sought after averaging \$12000 in last year's sale.

IGS EPD's as of 10/7/20

	CE	BW	WW	YW	Milk	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	API

## YAMBURGAN HECTOR J423 (P) (HBR)

Colour: Red Ident. No.: YY J423

Sire: YAMBURGAN ACHILLES (P) (AI) (SFA) Red

Dam: YAMBURGAN VELVET G113 (P) Red

PP

The true all-rounder. We purchased Hector in 2015 to use on cows. After the light birth weight calves produced we have used him as a main heifer sire through AI and continued to use him on cows. His progeny are obviously light at birth have high growth rate, easy doing and have excellent meat quality. Hector's progeny are very quiet, are excellent structured and sound footed.

IGS EPD's as of 10/7/20

## CRATHES HASTINGS H42 (P) (HBR)

Colour: Red Ident. No.: TCPH42

Sire: CRATHES DENON (P) Red

Dam: CRATHES ENIA 6TH (P) Red

PP

Hastings was selected to us in our herd due to his excellent carcass data and the longevity of his line. This Western Australian sire is producing cattle that excel in meat quality traits. His first sons at our last years sale were well received, topping at \$22000 and averaging \$11000.

## **MATERNAL EPDS**

### **CALVING EASE DIRECT (CE-D)**

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

### **CALVING EASE MATERNAL (CE-M)**

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

### **MILK**

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

### **MATERNAL WEANING WEIGHT**

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

### **STAYABILITY (STAY)**

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

### **DOCILITY**

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

## **GROWTH EPD'S**

### **BIRTH WEIGHT**

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

### **WEANING WEIGHT – ADJUSTED TO 205 DAYS**

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

### **YEARLING WEIGHT – ADJUSTED TO 365 DAYS**

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

## **CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE**

### **CARCASE WEIGHT**

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

### **RIB EYE AREA**

Reported as square inches relative to the average. Higher values are usually more favourable.

# UNDERSTANDING THE IGS EPD SUITE

## FAT

Reported as inches of back fat relative to the average.

Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets.

## YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores.

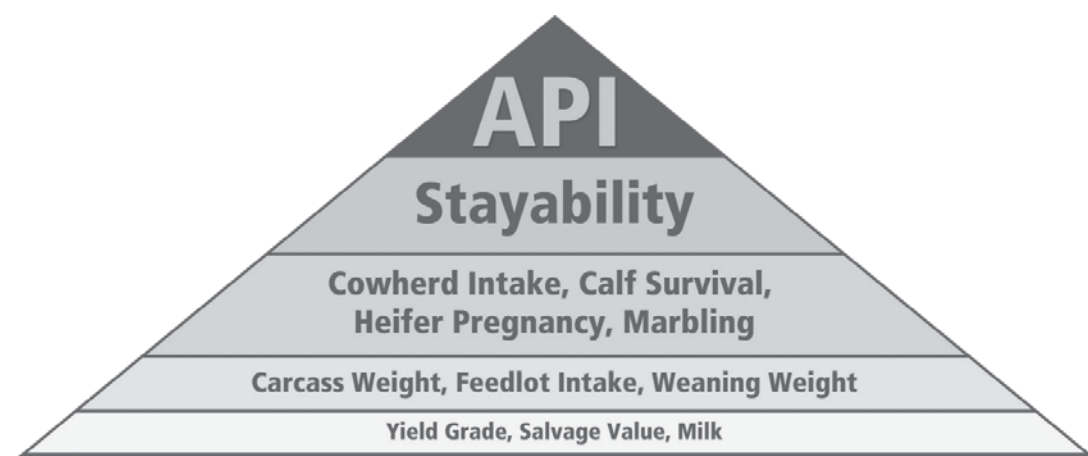

Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

## MARBLE SCORE

Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

## ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

## UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

# ELITE HEIFERS AND PROVEN DAMS

The heifers we have selected are at the top end of our program. They have been selected from sire lines that are breeding very well for us and some exciting first season sires. We are confident all the heifers will go on to be top breeders and there's many top show prospects amongst them.

Cow Dispersal of 2010 and 2011 drop cows. This group of cows are the last of the cows from there age group that we will be continuing to breed from. Like many breeders, our older age groups of cows have been reduced substantially due to the drought, so these girls are the hardiest and best producers of their year drop. The sale of these females represents a once only opportunity to purchase top proven females. AI joining details for each Lot are noted and include last years sale topper Futurity Prophecy and second top price Futurity Next Level. They were then depastured with Futurity Northern Dancer N325. Guest vendor Trojon Shorthorns are presenting 3 heifers by Futurity bloodlines.

For enquiries contact Trent Johnstone 0438522198.

## FUTURITY MASTERS ENIA Q106 (P) (HBR)

Born: 24/07/2019 Colour: Red Little White Ident. No.: JJJQ106

YAMBURGAN ACHILLES (P)  
YAMBURGAN HECTOR J423 (P)  
YAMBURGAN VELVET G113 (P)  
**Sire: FUTURITY MASTERPLAN M314 (P)**  
LAKE HAWDON COMMANDER C29 (P)  
LAKE HAWDON APPROVAL F57 (P)  
LAKE HAWDON BABY APPROVAL (P)  
THE GROVE KINGSWOOD W731 (P)  
FUTURITY F118 (P)  
**Dam: FUTURITY ENIA N99 (P)**  
FUTURITY MELITIA'S LEGEND W17 (P)  
ROYALLA F457 (P)  
FUTURITY ENIA J73 (P)  
FUTURITY CHICAGOS ENIA G12 (P)

NOTES: This is likely to be the best female breed at Futurity for her drop. We really admire the volume, length of body and wedge shape of this female. Masters Enia Q106 is a standout because of her temperament and outstanding performance data. She excels across all profitable traits and is a female you could base your herd around.

**Top 1% Docility**  
**Top 4% API Index and Calving ease**  
**Top 5% Birth weight**  
**Top 10% Maternal calving ease**

TURANVILLE CHICAGO Z82 (P)  
FUTURITY CHICAGOS RUBY H79 (P)  
FUTURITY KENOS RUBY F63 (P)

NOTES: Top shelf female by super sire Futurity Edged in Stone. We were reluctant to sell any of his daughters as they are breeding so well but in the interest of shared genetic gain we are offering two top shelf ones. EIS Ruby Q184 is super thick topped, big barrelled and smooth fronted and has an excellent data set which will insure the popularity of her progeny. This young female has turned the heads of those that have seen her.

# SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** - Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. If a bull does not possess a reasonable fertility, although not totally infertile any claim shall be considered on its merits by the vendor and his Veterinarian. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Female Guarantee:** Females are guaranteed fertile for natural joining for 6 months post sale with the exception of Embryo transfer, illness or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.  
**All bulls have been tested negative and vaccinated against Vibrio, Bovine Pestivirus and 7 in 1.**
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason, Terry or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
- **Intending buyers please note-** Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** - Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Freight Rebate & Delivery** – Bull deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma Qld. This will only apply if freight arranged by Jason or Terry. While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery.
- **Personal transport** - we can arrange transport to and from “Glen Ayr” please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation-**  
Warrigal Gardens B & B  
Baradine - 02 68431765  
Acacia Motor Lodge  
Coonabarabran - 02 68421922  
Camp Cypress  
Baradine - 02 68431035
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
  - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
  - The Vendors will not be responsible for an errors or omissions in this catalogue.
  - GST will be added on the fall of hammer to purchase price.
  - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale

## IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy, All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.
