## Purchase Pick Up and Deliveries

Buyers attending the sale in person are encouraged to take purchased rams with them at the conclusion of the sale. For those buyers who are unable to do so and for online buyers, please contact Mal Brady on 0428 500 027 in advance of the sale or as soon as possible thereafter, to organise pick up from Burrawang West Station or to take advantage of free bulk delivery to one of the following locations: Dubbo NSW, Cunnamulla Queensland, Mildura/Swan Hill Victoria or Pinnaroo South Australia. **All rams are to be picked up or delivered by Friday October 16 2020. All due care will be taken for the safety and health of your purchased rams prior to pick up or delivery, however, to protect your purchase, you may wish to consider insuring your rams from the conclusion of the sale on October 12.**

## About Burrawang Rams

### Quality Control Process

Burrawang uses an uncompromisingly strict standard of quality when selecting animals offered for sale. Our quality control standards are applied throughout each animal's life to ensure animals offered for sale meet the Breed Standard of Excellence for structural correctness and carcass quality. **Only the best of the best rams are on offer at our On-Farm Sale.**

### Independent Typing and Catalogued Comments

This group of sale rams were independently inspected by Australian and South African qualified breed inspector, ***Philip Van Schalkwyk***, on September 19 2020. The result of Mr Van Schalkwyk's inspection of each animal is reflected as 'Type' in the catalogue. Though old enough by sale date, a small number of the rams on offer were too young, by a few weeks, to be officially typed according to the breed standard on September 19; however, Mr Van Schalkwyk inspected these rams on the day and approved them for sale.

## **Performance Measurements**

Weight, eye muscle depth and rib fat depth included in each animal's information, were measured by Sheep Genetics (LambPlan) qualified scanner, Trevor Pearce at various intervals including early post weaning (EPW) or post weaning (PW) and on September 21, 2020. EPW is defined as 120 to 210 days old while PW is defined as 210 to 300 days old. Average daily weight gain (kg) is provided for the period between each weighing as indicated by ADG (interval). Age at time of measurement is provided in the catalogue.

## **Eye Muscle Shape**

With the assistance of Sheep Genetics qualified scanner, Trevor Pearce, Burrawang has been recording the shape of our animals' eye muscles as well as eye muscle depth (EMD). While eye muscle depth is a good indicator of carcass quality, the shape of the muscle is equally important to meat yield. Shape is scored from 1 to 3 with 3 indicating the most productive shape.

Our stud and commercial breeding selections now incorporate this important production indicator. Each of the rams on offer was scored by Trevor Pearce and the score is shown in the information for each lot.

## **Working Rams**

Some of the rams offered for sale were used as sires in recent stud and/or commercial joinings. It is our policy that all rams offered in our On Farm Sale are tested prior to sale; **all tested negative for Ovine Brucellosis in September 2020.**

## **Health, Presentation and Ready-to-work Condition**

- To ensure the animals are healthy, all of them received Glanvac® 6 in 1 vaccination at tailing, weaning and at prescribed regular intervals including on August 24, 2020. On that same day, the rams also received Cydectin® drench.
- Burrawang's flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring 2/28/22.
- Burrawang's OJD status is MN1; clear of OJD with certificate NS18176.
- To facilitate assessment of conformation at sale, unless otherwise noted, most rams were shorn in late August 2020.
- Rams are presented in good condition with a healthy amount of body fat so they are ready-to-work.

## **Satisfaction Guarantee**

Burrawang is committed to customer satisfaction. These rams are guaranteed fertile so you can buy with confidence. We are happy to guarantee your satisfaction with either money back or a replacement.

<p>2020 National Supreme Champion Ram, RODEO, is as impressive as a proven sire as he is in the show ring. He's a "photocopier" of a breeding sire, throwing consistently high quality offspring. He's structurally sound, very correct, has a high quality head, high quality cover and lots of muscle without being overly muscled. RODEO has a very impressive body length and unusually strong topline. His feet are exceptionally strong. Born a twin, RODEO's bloodline brings together the best of Cronje and Mickey Phillips. 6 of RODEO's offspring are in this sale. Semen retained for own use.</p>

<p>Stud sire, 6GUN, is a proven sire who is structurally sound and has exceptionally good feet and strong hocks. He is considered one of the top breeding rams in Australia at this time based on the consistency of structural soundness in his offspring of both sexes. 6GUN was born a twin and his pedigree is quite unique in Australia; pure Cronje bloodline. 6 of 6GUN's offspring are in this sale. Semen retained for own use.</p>

Stud sire, GENERAL, is a well muscled ram with good body fat who is very deep and has great spring of rib. His dewlap is indicative of good body fat and high growth rate; as reflected by his EP weight which was in the top 10% of his drop. GENERAL has a very masculine shape enabling him to carry heavy muscling while retaining his structural soundness. 4 of GENERAL's offspring are in this sale. Semen retained for own use.

Stud sire, THRILLER, has a deep body, deep flank, wide loins and beautiful long muscles in the hindquarter. He's very safe in the forequarter, structurally correct and moves smoothly. THRILLER's pedigree combines one of Burrawang's most productive and consistent sires with one of the stud's best performing dams. THRILLER and his offspring (2020 drop), demonstrate high growth rates. THRILLER's EP weight was in the top 10% of his drop. Semen retained for own use.

Weaning	87 days	36.5	N/A	N/A	N/A	
<p>Stud sire, BIG SHOT, is out of a very rare and, unfortunately deceased sire, LOCO, who bred a small but consistent group of Type 5 Stud rams during his very short breeding life. BIG SHOT is proof that BURRAWANG'S breeding selection works; he has a long body, is wide over the hindquarter without being too wide in the hocks, has a beautiful, safe forequarter and highly sought after, clean shedding cover. BIG SHOT has long muscles coming way down on his legs and carries his heavy muscling easily, moving very freely. His neck is notably long, thick and masculine and his high quality head is long and strong. BIG SHOT's offspring (2020 drop) show great promise. Semen retained for own use.</p>

Weaning	110 days	42.2	N/A	N/A	N/A

Stud sire, CRUMBLE, is a very impressive, free-moving and well-balanced, older ram. He has exceptional body length and an exceptional topline, especially for his body length, which is reminiscent of his dam's full blood brother, BURRAWANG 101020, and of his MGSire, THE DOC. CRUMBLE is very safe in his forequarter, has great spring of rib with good head quality. Testament to his breeding capabilities, many of CRUMBLE's rams have sold well in previous sales and his young 2020 offspring are coming along beautifully. Semen retained for own use.
