# THE 2021 JOANNA PLAINS SALE

WHAT A YEAR OF CHANGE.  
AND JUST WHEN WE THOUGHT  
LIFE WAS GETTING BACK TO NORMAL,  
ANGUS AUSTRALIA RELEASED NEW  
INDEXES FOR THE MID-DECEMBER  
RUN JUST AS WE WERE WORKING  
ON THE CATALOGUE, SO WE HAD  
TO RE-DO IT FROM SCRATCH.

We have included these new Indexes in the catalogue and there has been some major re-ranking of individuals and sires mainly due to increased pressure (downward) on mature cow weight. We have included our comments on these changes in the catalogue, we welcome the increased focus on cow size, it's a logical step and an important trait for any breeder.

We have always maintained a strong focus on getting calving ease, growth and moderate maturity patterns as a priority, so the changes in indexes are more reflective that cow size has a big influence on cost of production and fertility.

**Please note 83% (43/52) of this year's Sale bulls are rock-solid calving ease bulls suitable for heifers!**

This time last year we were weaning these boys at Hopetoun and life was tough, with no feed and we had been carting water for 6 months. Anyway, one thing us farmers are good at is adapting. It has been difficult with the Victorian border closures, we haven't been able to get to WA all year but appreciate all the support from so many good people to get us through. Special thanks to Bevan Ravenhill, Col Thexton and our Hopetoun staff, Brad Rees, Francisco Ghio, Florencia Boasso and Johnnie Dichiera (WA General Manager, Central Agri Group).

It is fantastic to see the breeders that have battled hard over the years now receiving record prices for their years of hard work and staying the course. These good times are an opportunity to set your sails for future generations. We feel these Sale bulls set the foundations for future generations of productive cow herds that produce quality beef.

Thirty years ago no one would have envisaged we could create cattle that excel in every part of the supply chain like these bulls do!

# 2021 JOANNA PLAINS SALE INFORMATION

This year's 4th Annual Joanna Plains Sale is once again held on-farm at Joanna Plains, Cataby at the Marianas Backgrounding Complex, with the entrance off Mimegarra Road (see map on page 31) at 11am Friday 29th January 2021. Nutrien Ag Solutions are the selling agents. Bulls will run through the ring in Lot order as per the usual auction system.

The Joanna Plains Sale is interfaced with Auctions Plus so anyone can view the prior to the Sale by appointment and bid on-line.

## Highlights of 2021 Joanna Plains Sale Bulls:

- Bulls average in the Top 8% of the breed for Domestic (DOM) and 4% for Heavy Grain (GRN) Indexes
- Top 30% of breed for 400D Growth and still breed average Mature Cow Weight (MCW)
- Rock-solid calving ease bulls with 43/52 (83%) of bulls are rock-solid calving ease bulls ✓ suitable for heifers
- Elite proven carcass genetics - bulls average in top 7% for marbling (IMF) and top Eye Muscle Area (EMA)

Joanna Plains Sale Bulls, Many Peaks, October 2020

## SOME SUPERB BULLS IN THIS YEAR'S SALE AND WORTH MAKING NOTE OF AS POTENTIAL STUD SIRES.

Lot 1 Lawsons Method Q1000. Powerhouse bull that was Bevan's pick for Lot 1. Wide-flanked and super disposition, Q1000 is the bull that grabs your attention from a visual and numbers standpoint, he ranks in the top 5% of the breed for Heavy Grain Index (GRN) and Domestic Index (DOM), top 10% for 400D Growth and top 3% for EMA.

Lot 2 Lawsons Prophet Q1041. Stud sire prospect here and one of our picks as an up and coming young sire. Q1041 is one of the highest Heavy Grain Index (GRN) and Angus Breeding Index (ABI) bulls in the Angus breed (top 1%) and the #1 GRN/ABI in Sale and one of the highest to be offered for Sale in Australia in 2021 for ALL Indexes! Q1041 is the #4 ranked GRN Index in the Angus breed for all Q drop bull calves, top 1% of the breed for ALL Indexes. The #2 ranked 400D bull in the Sale at +108, top 5% of the breed for 400D and IMF plus top 10% for 600D Growth.

Bulls have been run at Bevan Ravenhill's farm at Many Peaks, near Albany and still running on grass and silage leading up to Christmas. All bulls have been independently semen tested and structurally assessed for semen and structure.

### **Bulls Ready to go to Work**

All bulls have been independently semen and morphology and structurally assessed by Dr Jessica Shilling, Albany. Lawsons Angus have the strongest Industry Three Year Guarantee for Structure and Fertility. This is not a guarantee for injury or death and we recommend buyers insure bulls immediately after the completion of the Sale. The Bulls are JBAS-8 and free to travel to all States and Territories. The Sale bulls have been vaccinated with Ultravac 7 in 1, Vibriovax, Pestiguard and MH & IBR.

### **Videos and Photos of bulls**

Photos and videos are now uploaded on Auctions Plus and Angus Australia.

### **Free Delivery**

We are offering free Delivery of the Sale Bulls to regional centres in WA. In most cases we will deliver free to the farm address provided. We are also offering free delivery to Yea, Victoria for Eastern States buyers.

### **Registering for the Sale on AuctionsPlus**

Please ensure you register with Auctions Plus at least 24 hours prior to the Sale. Please click here for Auctions Plus Sale Operating Conditions and Sale Terms.

Outside agents rebate of 2% is available to agents that pre-register clients or are the nominated settling agent on Auctions Plus.

Harry Lawson

## IMPORTANT CHANGES TO BREEDPLAN IN DECEMBER 2020 WITH NEW VERSIONS OF ALL INDEXES RELEASED – EXTRACTS FROM ANDREW BYRNE, ASA 16TH DECEMBER 2020

Angus Australia's Breed Development & Extension Manager, Mr Andrew Byrne explained that the selection indexes were last revised in December 2014 and so updating of the selection indexes is important in ensuring the selection indexes remain relevant to the genetic requirements of the current beef supply chain.

"Firstly, all the economic and production assumptions that underpin the selection indexes have been updated to reflect current production systems and markets" said Mr Byrne.

"And secondly, the software that is used to calculate the selection indexes has been upgraded to a newer version that includes a number of considerable improvements by comparison to the previous version".

Four selection indexes are routinely published for Angus animals within the TransTasman Angus Cattle Evaluation, being the Angus Breeding Index, Domestic Index, Heavy Grain Index and Heavy Grass Index.

The selection indexes are economic indexes and balance the genetic merit of animals for individual traits to produce an overall "score" of an animal's combined genetic value. The selection indexes are "whole chain" indexes, taking into consideration the relative economic importance of different traits across the entire beef supply chain, from conception to slaughter.

"The updates that have been made to selection indexes will result in some re-ranking of Angus animals, along with a considerable increase in the spread of selection index values between animals", said Mr Byrne

The selection indexes that are published for Angus animals are derived using a software program called BreedObject.

BreedObject has been developed over several decades by researchers at the Animal Genetics & Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, with funding support from Meat and Livestock Australia Limited (MLA).

The updates scheduled for mid-December utilise the latest version of BreedObject software, known as BreedObject version 6, which has also been adopted recently by other breed associations, including Herefords Australia and the Australian Wagyu Association.

By comparison to previous versions, BreedObject version 6 incorporates improved modelling of the feed costs associated with the maintenance of the female breeding herd throughout the year.

Other improvements include, among other things, improved modelling of young animal growth, enhanced modelling of carcase market specifications and values, and inclusion of net feed intake as a specific trait in the breeding objective that is modelled.

The most notable change resulting from the new software version is an increase in the emphasis that is placed on mature cow weight within the selection indexes, meaning animals with high Mature Cow Weight EBVs will not rank as highly on the selection indexes as to what they did previously.

"Using the Angus Breeding Index as an example, the emphasis placed on mature cow weight increases from 4% to 17%", Mr Byrne said.

"The updated selection indexes will still result in a positive response for traits like calving ease, female fertility and carcase value, but aim to have a more balanced approach between growth and mature weight".

"So while the indexes will still result in an increase in the growth of Angus animals, mainly to decrease the age at which Angus animals meet target specifications, the indexes should maintain mature weight constant, rather than resulting in the continual increase that has been observed in the weight of mature Angus females", explained Mr Byrne.

Further information on updates that have been made to the selection indexes that are published on Angus animals is available by clicking on the links below, or by contacting staff at Angus Australia.

## COMMENT FROM LAWSONS ANGUS ON NEW INDEX RELEASES

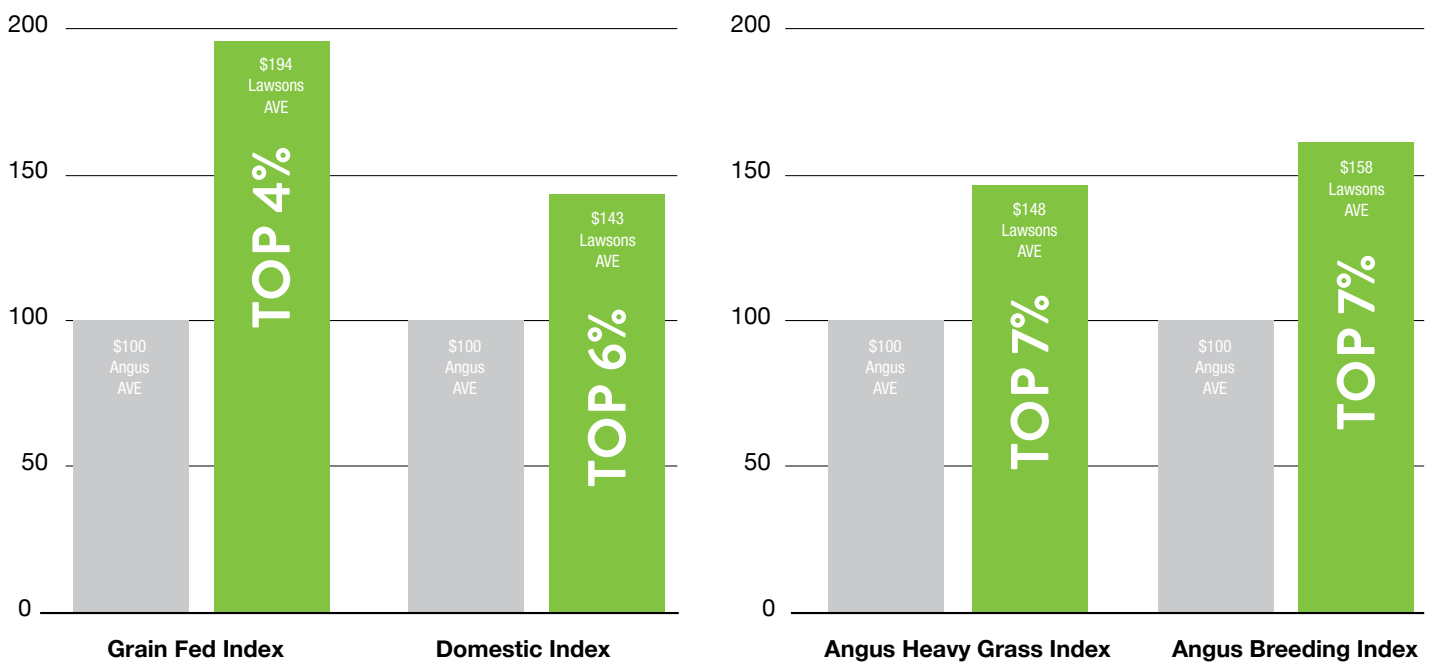

Previously the Indexes have not reflected the importance of cow size and selection on Index alone often provides wide variances across all traits and tends to blow mature cow size out.

We welcome the changes and appreciate it's never easy to get collective agreement on significant changes like these, however, even though these changes are advantageous for Lawsons Angus we feel there needs to be some further fine tuning to get them more reflective of commercial reality and better prioritise economic weightings (including feed efficiency).

As we always say, please continue to look at individual traits and set thresholds and goals around these traits (rather than use Indexes to set your goals) as these EBVs are very accurate, allow comparison between bulls, studs and allows breeders to compare between years and consider the genetic merits of their current bull team and where they should focus going forward.

Stud sire prospect here and one of our picks as an up and coming young sire. Q1041 is one of the highest Heavy Grain Index (GRN) and Angus Breeding Index (ABI) bulls in the Angus breed (top 1%) and the #1 GRN/ABI in Sale and one of the highest to be offered for Sale in Australia in 2021 for ALL Indexes! Q1041 is the #4 ranked GRN Index in the Angus breed for all Q drop bull calves, top 1% of the breed for ALL Indexes. The #2 ranked 400D bull in Sale at +108, top 5% of the breed for 400D and IMF plus top 10% for 600D Growth.

We like Q1021 from every dimension, visually very appealing and outstanding from an on-farm profitability and end-product value. Q1021 is one of the elite top 1% of the breed for Heavy Grain Index (GRN), Angus Breeding Index and Heavy Grass Index, top 5% for Domestic Index (DOM), top 6% for IMF and EMA. You can see the butt shape and thickness coming through on the Anticipation maternal side.

Angus breeders often use the term "Angus type", we like the type of these Momentous x Sure Fire sons and have used this mating widely for the simple reason it works at every level. Q055 typifies what we mean, fantastic phenotype and numbers in a consistent, predictable package. Q1055 fits that description well and ranks in the top 10% of the breed for Heavy Grain Index (GRN) and Domestic Index (DOM), top 5% for IMF and top 3% for EMA.

Hard not to get excited when you see Momentous and E7 in a pedigree and the numbers and looks of Q1010 confirm why, he ranks in the top 5% of the breed for Heavy Grain Index (GRN), EMA and IMF, top 10% for Domestic Index (DOM) and top 2% for EMA.

Another super attractive, well balanced, Momentous x Sure Fire. We like punching out large sire lines of elite, consistent, predictable bulls that we know will hit the top end of any production system and supply chain. There is a good reason Momentous is one of the most widely used bulls in Australia and some astute breeders from Pemberton that own the bull could also see the potential. Momentous still holds the record at \$33,000 for the highest selling bull by auction in Western Australia. Q723 is in the top 5% of the breed for Heavy Grain Index (GRN), EMA and IMF, top 10% for Domestic Index (DOM).

Retaining semen marketing rights and 50% revenue sharing interest.  
 Q1003 is one of the elite top 1% of the breed for ALL Indexes, top 10% for IMF. #2 for Domestic Index (DOM) Index in Joanna Plains Sale. Both Prophet and Bartel's true value is now more fairly recognised as the newly released Indexes try to consider the true costs and impacts of mature cow size on feed costs and fertility.

These Method sons really grab your attention, Q1053 ranks in the top 10% of the breed for Heavy Grain Index (GRN) and Domestic Index (DOM).

Q972 ranks in the top 5% of the breed for IMF. Momentous and Novak pedigree combines two of the best bulls bred for Lawson's Angus, both bulls rose to the top in tough contemporaries, are super sound and have stood up in large contemporaries giant the best proven performance sires in the world. We only get excited about a few bulls a year that we think can take on the might and power of a global Angus population. We got it right with both Momentous and Novak. Momentous dam was also an elite donor and still going in our Victorian herd.

Q1028 ranks in the top 10% of the breed for Heavy Grain Index (GRN), top 5% for IMF and top 3% for EMA. You can see we like the Momentous x Sure Fire combination and Q1028 is the perfect example of why, lots of growth and performance in a moderate maturity pattern and packed with muscle, marbling and high yielding carcase traits.

Q981 sits in the top 10% of the breed for Heavy Grain Index (GRN), Domestic Index (DOM) and EMA. These boys really do represent the top end of the Angus breed, and no exception here. Judd and E7 are two of the most attractive phenotype bulls we have used and Momentous progeny are also visually appealing and super sound.

Well balanced growth curve and numbers in this exciting smooth looking Judd son. Q1009 is #1 Calving Ease Direct (DIR) bull in Joanna Plains Sale at +11.4, top 5% of the breed, top 5% for Heavy Grain Index (GRN) and Domestic Index (DOM). Note very moderate Mature Cow Weight (MCW), which is now more heavily weighted in the new release of Indexes to try and get the seedstock industry to recognise big cows eat more and crash harder in tough times!

Q1072 oozes muscle and balance, #3 EMA bull in Joanna Plains Sale at +13.2, top 1% of the breed plus top 10% of the breed for Heavy Grain Index (GRN) and Domestic Index (DOM). Only two sons of the legendary Ayrvale Bartel E7 sell in Joanna Plains Sale (Lots 43 and 25), Bartel E7 has 6,358 progeny registered in Australia and 2,190 are bred by Lawsons Angus! E7 has shot back up the rankings on latest release of Indexes due to his exceptionally well balanced growth curve. E7 is top 1% on ALL Indexes and still hard to beat for his unique balance of traits and superior carcass traits.

Stout bodied Momentum x Intensity. Q682 is the equal #2 highest IMF bull in Sale at +4.5 (top 1%) and massive EMA at +10.7 (top 4%). Top 10% of the breed for Heavy Grain Index (GRN).

Top 10% of the breed for IMF, top 7% for EMA. Momentous and Novak pedigree combines two of the best bulls bred at Lawsons Angus, both bulls rose to the top in tough contemporaries, are super sound and have stood up in large contemporaries giant the best proven performance sires in the world. We only get excited about a few bulls a year that we think can take on the might and power of a global Angus population and were justified in the selection of both Momentous and Novak.

Top 5% of the breed for IMF. Some breeders talk cow families, and yes cows are the backbone of any beef herd, however, what really drives genetic progress in commercial herds is choosing the right sires as the sires have a much greater impact over their lifetime than individual cows. We like stacking generations of top proven performance sires, this accelerates genetic progress and gives us (you) the high level of predictability and consistency at commercial level, which is what counts in the long run.
