**AuctionsPlus**

Buy and Sell stock nationally

Unable to join us in Trafalgar South  
on Sale Day?  
Watch, listen & purchase online.  
register on Auctionsplus.com.au

SALE LOCATION | 292 Trafalgar South Rd  
Trafalgar South, Victoria

**PRE-SALE INSPECTION**

The bulls are available for pre-sale inspection at our Open Day on Thursday 7th October, 10am to 3pm, and from 11am on sale day. Prior inspections are welcome by private appointment. Sale Day will run in line with current Covid-19 guidelines.

**SALE BULL - LOT 30**

Please note Lot 30 is a Commercial Bull and information on this bull will be available at both our Open Day and at the Sale.

**AUCTIONSPLUS**

The auction is fully interfaced live with AuctionsPlus for those interested buyers who can't make the sale. Please register your interest early to avoid disappointment.

**HEALTH OF SALE CATTLE**

All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibriosis, Pesti Guard (BVD), and drenched prior to the sale.

**ABSOLUTE ANGUS GUARANTEE**

All sale bulls have been DNA Tested and Sire Verified, and independently structurally assessed by Liam Cardile, Beef Excel, to maximise the quality of stock on offer at the sale.

All sale bulls have also been independently inspected by Dick Whale, Breeder Genetics. Dick will be available on Sale Day if you would like any further information on any of the sale bulls. Genomics information on all sale bulls will also be available at the sale.

To the best of our knowledge the bulls offered are in sound working order as at the time of sale. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 12 months, Absolute Angus will:

1. Provide you with a mutually agreeable replacement if available, or
2. We will issue a refund equal to the purchase value minus any salvage value, or
3. Issue you with a credit equal to purchase price minus salvage value to purchase any animal from Absolute Angus within a 2-year timeframe.

Please note in some cases a veterinary report may be requested. Normal care and good husbandry practices must be observed as a replacement, or a credit, is not available if a bull is simply injured or dies for any other reason. The guarantee is for the value of the bull without interest, costs, or damages.

**INSURANCE**

We recommend you insure animals against injury, for transit and potential loss of use in the first joining season. Please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. An insurance service will be available on sale day.

**SAFETY**

All sale bulls are generally quiet to handle under normal conditions however care must be taken during sale day as crowd pressure may change their behaviour. Please use caution and be alert. All visitors enter the cattle display yards at their own risk. Children are not permitted to enter the bull display yards.

**DELIVERY OF SALE BULLS**

Absolute Angus provide a free delivery service within a 100-kilometre radius from the sale location. Further travel distances can be arranged by negotiation. Please fill out your delivery and insurance instructions.

**OUTSIDE AGENT REBATE**

A 2% rebate is paid to outside agents, introducing a buyer, and settling within 7 days.

**DISCLAIMER**

Absolute Angus has taken great care in ensuring the information provided in this catalogue is accurate however we take no responsibility for the accuracy and/or interpretation of the information in this sale catalogue.

# WELCOME

WELCOME to our 3rd Annual Spring Bull Sale.

I'm pleased to be holding our 3rd Annual Spring Bull Sale and present to you the stud's best line-up of bulls we have offered yet.

The 2021 sale bull team sailed through this year's wet cold winter and are looking magnificent. They handled the tough hilly terrain and weather conditions well and are ready to go to work.

Featuring in the sale are a range of sons from renowned Angus sires who present with enhanced data, softness & structural correctness.

The 50 yearling and 24-month-old bulls have genetics from some of the best sires in the industry including Baldrige Command, GDAR Regulator, Landfall Keystone K132 and the stud's own sire, Absolute M110 whose dam is a Lawsons Bartel Cow and his sire, Landfall Westward J169.

Buyers looking to improve their herds with ready-to-work bulls who present with leading traits such as calving ease, growth, fertility, carcass weight and fat cover, both rib and rump, will have a range of bulls to choose from on Sale Day.

Our breeding program continues in its' development with progeny on the ground this year from sires purchased in 2020, including Landfall Leonardo P145, Te Mania Prime P586 and Landfall Prominent P317.

AI Sires used in the 2020 breeding program include Sitz Stellar, Bon View ET calves, Enhance Fireball, SAV America & a sire who continues to impress, Baldrige Command.

These top sires have introduced softness, structure, phenotype and great data to the herd.

Landfall New Ground N90 whose progeny will be selling in the Autumn 2022 bull sale are looking impressive, along with Landfall Keystone and Sitz Stellar sons and daughters.

It is pleasing the foundation herd continues to produce great genetics and a testament to our commitment and investment to breed great cattle that deliver at market.

Structure, phenotype, depth, resilience & geographical adaptability remain at the centre of our breeding focus.

Our aim is to continue to improve the studs' maternal line strength using the above-mentioned sires and future investment in other elite sires to achieve these goals.

Working alongside the Absolute Angus team is a high calibre team of livestock professionals including Elders Stud Stock, Alex Scott & Staff and Outriders Media. Their contribution and support ensure the ongoing and long-term development of the Absolute Angus stud.

Look forward to seeing you at our both our Open for Inspection Day and on Sale Day. We are interfacing the sale with AuctionsPlus for those clients who are unable to join us in Trafalgar South on Friday 15 October.

Thank you for your ongoing support and interest in Absolute Angus.

Best Regards

Anthony

# PREMIER STUD SIRES

## MILWILLAH RIMFIRE R1023

We continue to invest in the best bulls the industry has to offer with the recent purchase of Milwillah Rimfire R1023 for \$80,000.

A son of S Powerpoint WS5503 & Angus royalty in his dam line we are excited to see this promising young sires' genetics on the ground in 2022.

## LANDFALL DISCOVERY Q543

## LANDFALL KEYSTONE Q750

Adding genetic depth to future stud herds are sons from renowned sires Keystone & Discovery.  
KEYSTONE Q750 - Blue Ribbon genetics with all top performing Australian Angus sires & out of New Ground N90's dam by Matauri Reality.  
DISCOVERY Q534 - A great pedigree; a Landfall Discovery son & dam is by Landfall Hank. Two valuable young sires joining the stud team.

We are very excited to have on the ground this year progeny from sires purchased in 2020, including Landfall Leonardo P145, Te Mania Prime P586 & Landfall Prominent P317.

All Sires used in the 2020 breeding program include Sitz Stellar, Bon View ET calves Enhance Fireball, SAV America & a sire who continues to impress, Baldrige Command.

These top sires have introduced softness, structure, phenotype & great data to the herd.

## LANDFALL LEONARDO P145 - ONE TO WATCH

**2020 - JOINED TO Q HEIFERS BY LD CAPITALIST 315, SYDGEN ENHANCE & BALDRIDGE COMMAND.**

Purchased in March 2020 for the top price of \$33,000.

## TE MANIA PRIME P586

**2020 - JOINED TO Q-HEIFERS BY ARDROSSAN EDMUND K165**

Purchased in September 2020 for \$20,000.

## LANDFALL PROMINENT P317

**2020 - JOINED TO THOMAS UP RIVER & EF COMPLEMENT DAUGHTERS.**

Purchased in September 2020 for \$30,000.

Acquiring & investing in specially selected pedigree sires & females with genetic depth & the right performance data is paying dividends & supports our unique breeding program's emphasis on phenotype & data.

# POWER, PRESENCE & PROVEN PERFORMANCE

## LANDFALL NEW GROUND N90

**THIS BULL NEEDS NO INTRODUCTION.**

**HE IS A LONG, DEEP BODIED BULL WITH HUGE SIRE APPEAL & AWE-INSPIRING PRESENCE.**

- NEWGROUND HAS AN EXCEPTIONAL COMBINATION OF PHENOTYPE & EBV'S INCLUDING LOW BW, HUGE GROWTH, +6.4 SCROTAL, +30 DOCILITY, POSITIVE FAT & +3.3 IMF!
- SIGNIFICANT ANGUS MATERNAL PEDIGREE FEATURING WORLD LEADING ANGUS SIRE; REALITY, EMPEROR, INFINITY, REAGAN, 036, SCOTCHCAP, M032.
- NEWGROUND'S SONS & DAUGHTERS ARE LOOKING IMPRESSIVE & SELECT SONS WILL BE AVAILABLE TO PURCHASE AT OUR 2022 AUTUMN SALE.

**Purchased March 2019 in partnership with ABS Australia for the record Tasmanian Angus price of \$75,000.**

**Notes:** Regulator the first Regulator son of the sale. Regulator has done well in the herd. His sons are above average performers and are moderate for birth and have eye appeal and thickness. His daughters have nice tidy udders and good feet quality. I like the depth of body and spring of the rib that they exhibit. They cows have a feminine look which I like and strive for.

# BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF. LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY AND SUCCESS WITHIN YOUR BREEDING HERD.

## PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

## DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

## IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

## ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning .

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

MATING NEW YOUNG BULLS

MANAGING OLDER HERD BULL

DURING MATING

NORTHERN AUSTRALIA

# BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

## MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

## MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

## DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

## NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

## ADAPTATION

The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

## PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

## CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

## MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.

Information is provided by the Department of Primary Industries NSW. For further information visit the DPI web site: [www.dpi.nsw.gov.au](http://www.dpi.nsw.gov.au). or [www.angusaustralia.com.au](http://www.angusaustralia.com.au). Further reading - Buying Angus Bulls
