STUD EWES 2021

Welcome to the

22ND CHANDPARA SOUTHDOWN SALE

11.30am Wed Oct 27 2021. On property: Caddy's Lane, Tylden, 3444

Health

8/20: Glanvac 6-in-1 25/9/20: Glanvac 6-in-1, Gudair vacc 11/1/21: All: Triguard drench. Rams: 5 in 1 vacc 17/5/21: Rams: Dynamax controlled release capsules. 15/6/21: Ewes: Dynamax. 28/9/21: All: Triguard drench.

The Chandpara flock is footrot, lice and Brucellosis-accredited free. All sheep are approved vaccinates, and the flock has a MN2V (2003) status under the OJDMAP G-ve denotes Gaucher negative. This year's lambing percentage stands at 168% lambs surviving and thriving beyond 2 months of age. Low fertility and poor reproductive performers are not tolerated and are culled. Every effort has been made to present these sheep for sale in a healthy and fertile state. Due to biosecurity reasons, sold sheep cannot be returned. They represent a significant investment and as such, livestock insurance is strongly recommended.

Scanning

This year the rams were scanned on May 17th 2021. Scanners assess sheep at around 8 to 12 months of age for weight (LW), eye muscle width (EMW), eye muscle depth (EMD) and fat measurement, which allows us to calculate the eye muscle area (EMA). From these data a within-flock Meat Index is allocated to each sheep which in turn allows the rams to be ranked accordingly. The prefix 'A' in the ranking denotes the Autumn drop rams who were ranked separately.

Sire Notes

Clifton Downs 241/10: Always leaves his stamp on his progeny: great muscling, beautiful hind quarters and length. This ram was the top priced ram at the Canterbury (NZ) Elite Ram Sale 2012, and since then has gone on to win the Supreme Meat Sheep Award at the Christchurch Show, defeating over 600 other sheep to claim the title.
