

Malleevale Contender Meat Goats

Purpose Built

Friday 8th October 2021, 1pm

Welcome to the 2nd annual on property Malleevale Contender Meat Goat Sale, we would like to thank you for taking the time to view our 2021 catalogue. It is with great pleasure to introduce what we believe to be the top 5% of bucks from the 2020 drop.

Our goal has always been very simple “Produce animals that add value to the herd”. We believe that our animals have the excellent carcase characteristics that are easy care with the ability to have rapid growth and capability to fatten on grass.

The history of the does started 20 years ago with a rangeland base that was crossed with Boer and Kalahari Reds, before too long we felt that we couldn't find good enough quality bucks that increased weight and muscle or would hold up in the feet to be able to cover country. We found that we were only introducing problems such as feet and poor udders by using outsourced bucks so we started using our own.

Around 6 years ago with the help of Paul Hamilton we introduced Myotonic genetics to increase muscle through the forequarter, over the rib loin and hindquarter. We instantly noticed the value that they were adding to the carcase and after a couple generations we were producing animals that we were extremely impressed with.

About the bucks

These bucks have been paddock reared in a broad acre farming rotation. They were weaned onto Lucerne in February and then moved onto forage Oats on the last week of July to sale. We are confident of their capabilities when compared with other breeds. The bucks will pass on their excellent genes for birthing ease, fertility, structure, growth, and carcase quality and they are a very docile group.

Your investment now will reap rewards in the future. We would like to assist in advising you on the purchase that will be most profitable for your operation so please ask if you would like any assistance.
