How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

WELCOME

Welcome to 12th Kurra-Wirra Annual Northern Sale

This year we have seen unprecedented optimism in the cattle industry. After spending the week at The Australian Beef Expo in Rockhampton in May this year, it was clear the national confidence in Agriculture is solid and with any luck, that is how it will remain. It was fantastic to catch up with existing clients from all around Australia and meet a lot of people within the industry.

We are extremely proud to offer 113 quality bulls for your inspection at our 12th annual Northern Bull Sale. This year's draft of bulls, like other years, have been bred using what we believe to be the most important commercial principles – fertility, functionality, capacity to thrive in diverse climate regions and the ability to satisfy a variety of market specifications.

A highlight from the year was the success of a long-term client, Russell Poole in the Westec Steer Trial. The pen of steers sired by Kurra-Wirra bulls performed very well where the pen came first for weight gain in the 100-day grass trial and first for weight gain in the Morton & Co 100-day feedlot trial. It's reassuring to quantify what clients have said over the years that our calves feed beautifully that reach turn-off weights quickly.

Technology has revolutionised the way we go about breeding our cattle. From day 1 with birthweights and udder scores we collect all the growth, carcass, fertility and structural data we possibly can all throughout the animal's life. This information gets forwarded to the \$Profit database where it spits back EBV's. These EBV's are made more accurate by the use of genomics, allowing us to use more yearling bulls, speeding up our genetic gain.

What makes this \$Profit selection unique is, in addition to the standard traits such as birth, weaning weights and carcass assessments which are revenue traits, it also looks at feed efficiency and cow maintenance; which can impact costs significantly. The biggest improvement is its balance; it recognises the benefits of hybrid vigour in a breeding system, and does not assume "more is better".

Traits are not linear, and realising this and that more is not better is an important component of this index. For example, Milk is good to a point which will give you weaning weight, however too much milk affects fertility especially in marginal areas. Note: we did not have \$Profit at the time of joining with the bulls in this sale.

The ability to test our cattle for the Slick Coat Gene is another tool that has transformed our breeding program. The Slick Coat Gene is a dominant gene carried by the Senepol breed resulting in a slick, shorter hair coat. This is beneficial in hot and tropical environments as the short hair length allows for heat loss and an increased sweating rate, overall allowing for better regulation of internal body temperature. Studies show animals with the Slick Coat Gene wean heavier calves, milk more, graze more, more resistant to ticks and are more fertile. The ability to test for the Slick Coat Gene has allowed us to increase the Red Angus and Angus content of our Senepol cattle while maintaining the ability to thrive in marginal areas.

We would like to take this opportunity to thank James Lilburne for his continued support of Kurra-Wirra for over two decades now. Our program wouldn't be at its strength today without his hard work.

As we look at the bulls catalogued for you today, the yearling calves at home and the joining currently in play, we feel that the direction Kurra-Wirra Cattle is justified in no uncertain terms.

If we can be of any assistance, please don't hesitate to call. We look forward to seeing you on sale day.

SALE INFORMATION

Sale information Inspection

All bulls will be available for inspection by prospective purchasers from 8.00am sale day.

Location/Time

Sale to be held at the Barcaldine Saleyards on Friday 1st October 2021, commencing at 10.30am

Rebate

A 2% rebate will be offered to outside agents introducing buyers and settling within 7 days of the invoice. Agents wishing to nominate buyers must do so by email/phone to James Lilburne or the selling agent 24 hour prior to the sale.

Selling System

Sale of animals will be conducted under Open Cry Auction terms and conditions, and interfaced sequentially online with AuctionsPlus. Please ensure to register with the selling agents and/or AuctionsPlus to obtain a buyers number if you are considering making a purchase. Successful purchasers are requested to give written advice to the selling agents regarding transport arrangements at the conclusion of the sale.

Auction Plus

Buyers will have the option of bidding off site, or on site using AuctionsPlus if they wish. Note this will be sale by video auction - sequentially sold from lot 1 through to 113. All lots will have photos and/or video uploaded to AuctionsPlus by mid September. Please register your trading details with AuctionsPlus prior to sale day. Download the AuctionsPlus App onto your smart phone or tablet. You are ready to bid.

Payment Options

Settling of accounts will be facilitated by the selling agents. Payment options include payment by cheque, EFT or credit card on day of purchase, or within normal trading terms.

Fertility

Every sale bull has passed a thorough fertility examination. This assessment includes a full crush side semen morphology test, palpation of the reproductive organs which includes inspection of penis for warts and abnormalities. Scrotal circumferences is also measured. These examinations were conducted by Drew Pickford - NATIONWIDE ARTIFICIAL BREEDERS.

Guarantee

Kurra-Wirra guarantees the structural soundness and fertility of all bulls sold. The guarantee is that if a bull should prove to be infertile or breaks down, for reasons other than injury, misadventure, disease, mismanagement or negligence, the vendor will provide you with a satisfactory replacement, if available, or issue a credit equal to the purchase price minus the salvage value. The credit may be used to purchase an animal at a future Kurra-Wirra Sale. Contact James Lilburne for further information.

Health of Bulls

All bulls have been semen tested and had a through fertility examination. All bulls have had the following vaccinations:

- 7-1
- Vibrovax
- Pestguard
- Botulism
- BEF (3-day Sickness)
- Tick Fever (Blooded)

Supplementary Sheet: Supplementary sheets will be provided by individual vendors on the day of the sale.

GST

GST will be added on to the purchase price of the bull at the conclusion of the sale.

Sale Day Safety

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks associated with cattle handling.

PLEASE NOTE ENTER THE CATTLE PENS AT THEIR OWN RISK

AUSTRALIA'S \$PROFIT INDEX

The unique \$Profit breeding value ranking system, not only compares all breeds equally, but compares hybrid composite multi breed animals as well.

What makes this \$Profit selection even more unique is, in addition to the standard traits such as birth, weaning weights and carcase assessments which are revenue traits, it also looks at feed efficiency and cow maintenance; which can impact costs significantly. The biggest improvement is its balance; it recognises the benefits of hybrid vigour in a breeding system, and does not assume "more is better". Traits are not linear, and realising this and that more is not better is an important component of this index.

We will continue to work with ABRI for Breedplan Analysis EBVs on the pure bred registered animals, and now can also offer an additional selection tool, \$Profit Index.

To deliver positive outcomes to livestock producers, and in particular being able to offer our customers the best available global genetics, providing a \$Profit Index is the perfect tool. By linking our herd in, and comparing them to 1.4 million plus animals currently on the system, buyers can be confident we are comparing apples with apples.

Explanation for across breed EBVs (ABE)

Across Breed EBVs are published for all the Senegus bulls in this catalogue. These Across Breed EBVs predict differences expected in performance of future progeny of these bulls. All the Across Breed EBVs can be used to compare the Senegus within this catalogue.

Birth Weight (BW) ABE

is the weight of progeny at birth, expressed in kg.

Weaning Weight (WW) ABE

is the weight of progeny at weaning, expressed in kg.

Yearling Weight (YW) ABE

is the weight of progeny at yearling age (12 months of age) expressed in kg.

Milk (MK) ABE

This is the best indicator of a bull's daughter ability to milk. It measures the difference in weaning weight between bulls' progeny solely due to milk.

Scrotal (SC) ABE

is calculated from the circumference of the bulls' scrotum.

Back Fat (BF) ABE

is the ultrasound based ABE for back fat in mm.

Rib Eye (RE) ABE

is the ultrasound based ABE for rib eye area, expressed in cm squared.

Marbling (MB) ABE

is the ultrasound based ABE for marbling.

Carcase Weight (CW) ABE

is the expected progeny differences in bulls progeny for carcase weight, expressed in kgs.

Mature Weight (MW) ABE

is the predicted mature weight of daughters. This ABE is the best indicator of daughter size.

Intake (IN) ABE

Is an estimate of the amount of feed that the bull's progeny will consume over a 112 day feeding period. Animals with lower IN ABE figures will consume less throughout their life.

Feeder Gain (FG) ABE

predicts the feedlot efficiency of the bulls' offspring. Bulls with lower FG ABE figures will produce progeny that feed more efficiently.

Why \$Profit helps

“With over 20 traits and so many measurements, buying the best bull has become really confusing. Every bull is good on some traits and weak on others. The challenge is figuring out how each of those traits is going to impact your bottom line. This is where \$Profit value comes in.”

How \$Profit works

“\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. The model assumes you will keep 30% of your heifers as replacements and that you retain ownership on the remainder of calves through finishing and sale.

The model then factors in all of the effects on both income and expense to come up with a net profit figure for each bull. \$Profit allows you to compare any two bulls and calculate the difference in profit that they are expected to generate in you herd.”

- Leachman Cattle, Colorado

What traits are included in \$Profit?

\$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is a list of what is included and its effect:

Revenue traits

Calving ease = more calves
Weaning & yearling EBV = more weight
Fertility (days to conception) = more weight and more calves
Carcase weight = worth more
Marbling = value based premiums
Eye muscle area = more yield is more meat

Cost traits

Cow mature size = bigger eats more
Cow intake = more intake costs more
Feedlot feed efficiency = cost of gain

Some traits are not so easily characterised for \$Profit. Milk, for example, is a good thing until you get too much. When over +25, milk has a more negative effect on fertility that it has a positive effect on weaning weight.

Brown Oracle B112

Brown Oracle B112 has been a game changer for the Kurra-Wirra Senegus Program. Oracle came to our attention when he ranked near the top levels for the \$Profit Index, and exhibits excellent calving ease, explosive growth and muscle.

He is \$22,305 \$Profit putting him in the top 0.5% of the database. Weaning and Yearling in the top 1% and Rib Eye Area in the top 0.1%. We retained 3 yearling bulls for use in the stud last year and will retain more this year. He is one of the leading Red Angus sires in the USA.

Kurra-Wirra Caribbean G98

G98 is a double slick gene sire that has had a huge influence over our herd. Weighing in over 1400kgs in his prime, he is an absolute freight train. \$9,000 \$Profit with Scrotals and Rib Eye in the top 2% we have really valued what he has done. KW M35 is a bull with sons in the sale where G98 is his sire.

Kurra-Wirra Sebastian J274

KW J274 is a combination of BRINDLEY PARK SEBASTIAN W402, and legendary Red Angus sire, Leachman King Rob. A fantastic combination of Senepol and Red Angus of our foundation blood lines.

Kurra-Wirra Shadow Boxer J191

J191 has a \$11,500 \$Profit with over 250 progeny recorded in the stud. A son of Senepol, Eaglehawk Shadow Boxer out of a foundation cow who has produced slick, great bulls in this sale and some excellent females that are very fertile.

BPSW402 Brindley Park Sebastian W402

The most influential bull our program has been. Over 400 calves registered in the stud, you will see a lot of maternal sires of the bulls in the sale. A pure Senepol but like one we have not seen before. He is an ET from USA by the famous Senepol Sire, Hercules. He was active and working with perfect feet and mobility at age 15.

Kurra-Wirra Marble Bar N145

N145 is a monster bull. Weaning and yearling weight in the top 6% out of Milwillah Marble Bar, who is one of the most influential Red Angus sires Australia has seen. We have seen extreme width in the heifers retained in the stud.

Kurra-Wirra Federer J290

This bull is a son of the great Australian Red Angus Sire, GK Federer F23, who won the All-breeds champion at the Australian show circuit.

Kurra-Wirra Sebastian K19

KW K019, is a son from the great BRINDLEY PARK SEBASTIAN W402. He displays excellent, feet and structure with power. His daughters are great breeders with fantastic longevity.

Kurra-Wirra King Rob L372

Similar breeding to KW J274 with the combination of BRINDLEY PARK SEBASTIAN W402, and legendary Red Angus sire, Leachman King Rob. He is carrying the slick gene which is impressive for an animal with such high red angus content.

Kurra-Wirra RED SENEGUS

Lot 1- 62

AR = RED ANGUS
SE = SENEPOL
AN = BLACK ANGUS

1 Kurra-Wirra Shadow Boxer Q71
