

MONTEREY SALE INFORMATION

PLEASE NOTE — LOTS 33, 34, 35A, 38, & 39 are NOT HALTER BROKEN

The weather has been against us and the heifers, though quiet, are not broken to the halter.

Monterey cattle are free to enter all States.

All MONTEREY sale cattle are tested free of BVDV and are from a JBAS 8 herd.

All females are guaranteed PTIC (heifers PTNIC), free of BVDV, in excellent health and fit for transport. The bull is likewise free of BVDV, semen tested, in excellent health and fit for transport. In addition, the bull LOT 45 is fully vaccinated with 7 in 1, Pestiguard, Vibriovax and is a proven breeder (see calf on LOT 18A).

Purchasers need NOT organise their own transport as we will co-ordinate the transport to the Eastern States and will provide generous freight assistance from Monterey to Wodonga, Finley and Melbourne and places in-between.

There is no need for you to have to deal with the paperwork – that will be handled at this end.

All cows & bull selling for \$5000+ will have a freight subsidy where we will pay 50% of the freight to the nominated destinations and for places in-between.

Heifers qualify for the same subsidy and where more than one heifer is purchased the price can be pooled. ie 2 at \$3000=\$6000 – we pay half.

Purchasers are guaranteed delivery will cost no more than \$600 + gst to the nominated destinations.

Our sale cattle are transported by either Doug Giles or Falls Transport.

Feel free to contact us if you have any other questions.

Regards,

Gary and Julie
