NOTICES

AGRICULTURE AND RELATED RESOURCES PROTECTION ACT 1976 SHEARING OF IMPORTED SHEEP

In conformity with instructions issued by the Agriculture Protection Board, all sheep imported in the wool for this sale, must be shorn prior to delivery.

Suitable arrangements have been made by the Royal Agricultural Society for all such sheep to be shorn. The sheep will be shorn and held pending available transport at the risk and cost of the Purchaser. It must be understood by all buyers that shearing arrangements must be entirely in the hands of the Royal Agricultural Society, and for obvious reasons no Purchaser can be permitted to provide his own shearer. Shearing will commence one (1) hour after the sale is finished.

STOCK DISEASE (REGULATIONS ACT) SURVEILLANCE QUARANTINES

All sheep imported from the Eastern States will be subject to quarantine by the Agriculture Western Australia. Sheep purchased to remain in Western Australia will be subject to continuing surveillance quarantine until required treatments and inspection have been completed.

LIVER FLUKE

All sheep consigned to the Agriculture Region of WA must be treated under the supervision of a vet or stock inspector with an approved liver fluke treatment (Triclabendazole) between 14 and 28 days prior to movement. At least fourteen (14) days after treatment a faecal sample must be collected and tested negative for liver fluke eggs (faecal egg sedimentation test). The stock inspector or vet must collect the sample.

FOOTROT

All sheep coming to Western Australia from the Eastern States will be put under surveillance quarantine for footrot. This quarantine is for three (3) to fifteen (15) months depending on the arrival time in Western Australia. Any movement of quarantine sheep requires a permit to move. All Exhibitors must inspect stock prior to delivery at the Showground to ensure that no signs of footrot are present. The risk of introducing footrot can be reduced by correct surveillance for at least one (1) month after returning from the show.

HEALTH CERTIFICATES

Interstate Health Certificates for sheep consigned to the Eastern States from sales or exhibition will be available from officers of the Department of Agriculture on the Showground.

OVINE BRUCELLOSIS

Owners of flocks accredited free of ovine brucellosis should ensure that exhibited sheep are kept separate from non-accredited sheep.

NVD/WAYBILLS

Owners are reminded that all stock in transit in Western Australia must be accompanied by a NVD/Waybill as required by the Stock (Brands and Movement) Act.

WOOL SAMPLES

AGRICULTURE PROTECTION BOARD REGULATIONS

Samples may not be taken unless authorized and supervised by the Department Inspector.

TIME TABLES

In order to ensure the efficient conduct of the sale it will be run to a timetable. The sale will be conducted without an interval for luncheon, but for the convenience of all concerned, refreshments will be available handy to the sale pens.

OVINE JOHNE'S DISEASE

Flocks without a substantial status within the Ovine Johne's Disease Market Assurance Program are ineligible to send sheep to WA. For details and enquiries contact Agriculture WA on (08) 93683370.

REMOVAL OF SHEEP

- . By road, exit Claremont Showground.
- . Locally bred and born sheep only.
- . Removal is to commence after completion of the sale between the following times:
Friday 1st October: 3.30pm until 5.30pm
Saturday 2nd October: 8.00am until 10.00am

Note: The arranged delivery of the sale sheep is to be taken during the above times, if special arrangements are required this can only be arranged through the Royal Agricultural Society of Western Australia and the purchaser.

TRUCKING INSTRUCTIONS

NO verbal instructions will be accepted nor acted upon.

Please complete Buyers Instruction slip and hand into agents office.
