## How to Purchase Online

[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

To facilitate online purchases, Burrawang's On Farm Sale will be interfaced with AuctionsPlus. AuctionsPlus requires that all new registered AuctionsPlus buyers complete Buyer Induction Training prior to bidding. AuctionsPlus recommends that all intending bidders have completed their registration and training 24 hours prior to auction.

For more information, visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au) and look for this symbol

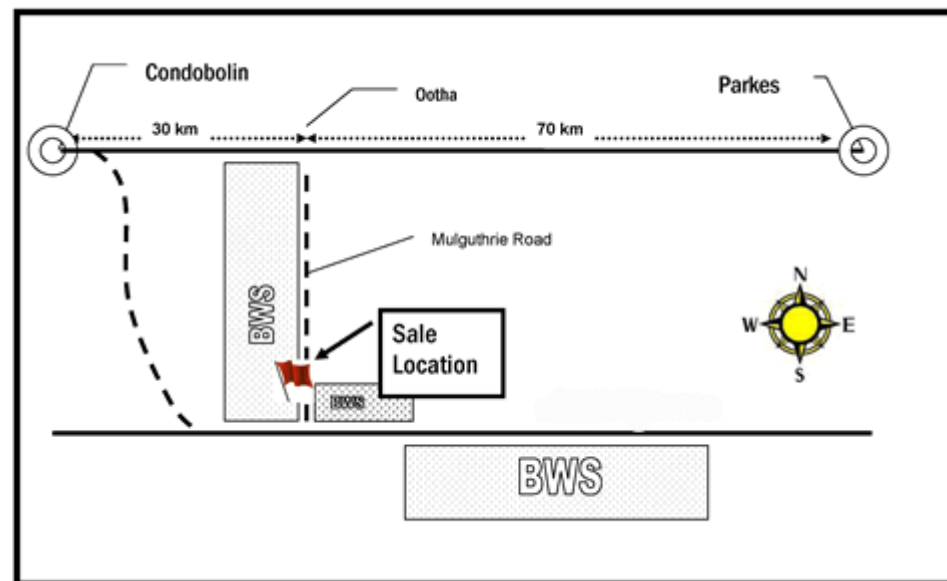

## Attending In Person

### Covid Safe Sale

For the protection of all attendees, Burrawang's On Farm Sale will be conducted in compliance with relevant Covid-19 safety regulations and requirements in effect on the day of the sale as managed by BR&C Agents under the agency's Covid Management Plan. Interstate attendees should check with their state authorities to ensure compliance with travel requirements or restrictions.

### Sale Location

Burrawang Dorper and White Dorper Stud is located on Burrawang West Station, in central NSW and the sale arena is at 314 Mulguthrie Rd Ootha NSW.

## **Sale Agents**

BR&C Agents will conduct the sale; contact Darren Old on 0459 980 591 for more information.

## **Burrawang Contacts**

For more information about Burrawang Dorpers and White Dorpers, contact Mal Brady on 0428 500 027, Graham Pickles on 0418 112 888 or Stud Master, Wicus Cronje on 0475 892 862.

## **Purchase Pick Up and Deliveries**

Buyers attending the sale in person are encouraged to take purchased rams with them at the conclusion of the sale. For those buyers who are unable to do so, please contact Mal Brady on 0428 500 027 in advance of the sale or as soon as possible thereafter, to organise pick up from Burrawang West Station. **All rams are to be picked up by Friday October 15, 2021.**

FREE DELIVERY of purchased rams for AuctionsPlus buyers is available to the following destinations:

- Cunnamulla in Queensland
- Mildura and Swan Hill in Victoria
- Renmark in South Australia

FREE DELIVERY of purchased rams for AuctionsPlus buyers from WA, is available to Dubbo. We will hold rams for WA buyers until transport can be organised from Dubbo to WA.

**All due care will be taken for the safety and health of your purchased rams prior to pick up however, to protect your purchase, you may wish to consider insuring your rams from the conclusion of the sale on October 11.**

## **About Burrawang Rams**

### **Quality Control Process**

Burrawang uses an uncompromisingly strict standard of quality when selecting animals offered for sale. Our quality control standards are applied throughout each animal's life to ensure animals offered for sale meet the Breed Standard of Excellence for structural correctness and carcass quality. **Only the best of the best rams is on offer at our On Farm Sale.**

## **Independent Typing and Catalogued Comments**

This group of sale rams were independently inspected by Australian and South African qualified breed inspector, *Philip Van Schalkwyk*, on September 9<sup>th</sup>, 2021. The result of Mr Van Schalkwyk's inspection of each animal is reflected in the top right corner of each listing in the catalogue.

Burrawang's Stud Master, Wicus Cronje, has provided comments about each ram in the sale. His comments as well as supplementary performance and pedigree information, are included in each lot listing.

## **Performance Measurements**

Eye muscle depth (EMD) in mm and rib fat depth (Rib Fat) in mm, as shown in each lot listing, were measured by Sheep Genetics (LambPlan) qualified scanner, Trevor Pearce at various intervals including early post weaning (EPW), post weaning (PW) or yearling stages, and on September 13, 2021. EPW is defined as 120 to 210 days old, PW is defined as 210 to 300 days and yearling is defined as 300-400 days old. Average daily weight gain is provided for the period between each weighing as shown by ADG (kg/day). Age at time of measurement is provided in the catalogue.

## **Eye Muscle Shape**

With the assistance of Sheep Genetics qualified scanner, Trevor Pearce, Burrawang has been recording the shape of our animals' eye muscles as well as eye muscle depth (EMD). While eye muscle depth is a good indicator of carcass quality, the shape of the muscle is equally important to meat yield. Shape is scored from 1 to 3 with 3 indicating the most productive shape.

Our stud and commercial breeding selections now incorporate this important production indicator. Each of the rams on offer was scored by Trevor Pearce and the score is shown in the information for each lot.

## **Super Breeder Dams**

One of the many significant production advantages provided by Dorpers, is the rate at which the breed can reproduce. As non-seasonal breeders, Dorpers can produce at a faster rate than seasonal breeders. To ensure our stud flock performs at the rate expected of the breed, most of Burrawang's stud production is based on multiple sires, natural, group joining; much like commercial joining.

This allows us to validate how well each ewe naturally performs. To maximise production, the ability to reproduce quickly is important, but so is the ewe's ability to raise her lambs. We track both capabilities along with other qualities and performance measures.

Within the pedigree tree of some lot listings, blue text appears to indicate that the dam is a known "Super Breeder". This designation is based on natural joining only so does not include artificial joining, such as Artificial Insemination or Artificial Insemination for Embryo Transfer, to represent the ewe's abilities most accurately. To be designated as a "Super Breeder", the ewe must have lambed each time she was joined and raised all lambs born. In addition, she must meet at least one of the following criteria: had multiple births in 2 consecutive years, had 2 multiple births and a single birth in 3 consecutive years, lambed twice within 7 months, or lambed three times within 17 months.

Not all dams in the catalogue have had the opportunity to become a "Super Breeder" so lack of designation as such, is not necessarily an indicator of underperformance.

### **Working Rams**

Some of the rams offered for sale were used as sires in recent stud and/or commercial joinings. It is our policy that all rams offered in our On Farm Sale are tested prior to sale; **all tested negative for Ovine Brucellosis in September 2021.**

### **Health, Presentation and Ready-to-work Condition**

- To ensure the animals are healthy, all of them received Glanvac® 6 in 1 vaccination at tailing, weaning and at prescribed regular intervals including on September 6<sup>th</sup>, 2021. On that same day, the rams also received Cydectin® Plus Tape drench.
- Burrawang's flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring 2/28/22.
- Burrawang's OJD status is MN1; clear of OJD with certificate NS21021.
- To facilitate assessment of conformation at sale, unless otherwise noted, most rams were shorn in mid-August.
- Rams are presented in good condition with a healthy amount of body fat, so they are ready-to-work.

### **Satisfaction Guarantee**

Burrawang is committed to customer satisfaction. These rams are guaranteed fertile so you can buy with confidence. We are happy to guarantee your satisfaction with either money back or a replacement.

Weaning	111 days	29.5	N/A	N/A	N/A
PUTIN is a T4 Stud son of RUSSIAN and a BORIS daughter; he has been used in BURRAWANG's stud breeding program. If you want fast maturing, heavy lambs with good carcasses, good loin development, long rumps and deep flanks, PUTIN is the ram for you. Plus he has a lot of good body fat on his big carcass. His 44mm EMD is impressive; even at post weaning his EMD was in the top 10% of his drop.

PW	230 days	47.5	0.2	29	3
Weaning	111 days	24	N/A	N/A	N/A
CRACKSHOT is a T4 Stud son of 6GUN and has been used in BURRAWANG's breeding program. With a head like his, you cannot go wrong; a remarkably strong jaw that signals the strong body that follows, right through from front to back. Structurally, he is perfect; he has a good topline, long rump and carries a lot of meat. His EMD at post weaning was in the top 20% of his drop.					

LOT 4		DORPER 200718		Commercial T3	
Age 15 mths	Wt 102 kg	EMD 39mm	Rib Fat 6mm	EMS 3

Yearling	321 days	72.6	0.14	33	3.5
Weaning	88 days	39	N/A	N/A	N/A
Sired by GENERAL on a BRUMBY daughter, this is a ram with tremendous carcass, length, depth and weight. At weaning his weight was in the top 20% of his drop and he continues to be at the head of his pack. If you want heavy lambs that grow fast, this is one you should consider. We used him in our commercial joining and his lambs are being born now; he is a really good commercial ram.					

LOT 5		DORPER 200831		Commercial T3	
Age 14 mths	Wt 102 kg	EMD 36mm	Rib Fat 6.5mm	EMS 3

Weaning	63 days	47.5	N/A	N/A	N/A
This ram is a good example of THOROUGHbred'S offspring; he has the trademark length, depth and width, as well as the strong head. He is a very masculine, T4 Stud ram who carries a lot of body fat with his muscle. He has a tremendous carcass and outstanding early growth rates with a wean weight in the top 10% of his drop at 47.5 kg. If you want fast growing lambs to finish very early and be off your farm very quickly with a lot of body weight, this is your ram.

PISTOL absolutely stamps his offspring as evidenced in this ram's quality head, long neck, long body, absolutely awesome carcass, amazing inner and outer twists, his great sprung of rib and his safe structure. If not for the black on his hind legs, he'd definitely be a T5 stud. His 35mm EMD at post weaning was in the top 10% of his drop and his dam is a super breeder. Highly recommended for any commercial breeder.

He is a T4 Stud and a twin son of PHILL and a dam whose pedigree tracts to Kasteel Monty. Like PHILL, this ram has the carcass... he has length, very good depth, with a long rump and impressive inner and outer twists with a lot of good body fat, plus remarkably good pigmentation and skin. A highly recommended ram.

Ex-Sire PALE ALE is one of 6 rams sired by LOCO, who have been used as sires in BURRAWANG's stud breeding program. He is a ram with a lot of depth, length, deep flank, good sprung of rib and a very good topline; his progeny are looking great. PALE ALE repeats the qualities of the KEG bloodline; really deep long barrel, long neck and long rump. The carcass qualities of this ram are exceptional and he will give you the carcass qualities you're looking for from the breed. <b>Semen retained by BURRAWANG for own use and export.</b>

<p>PISTOL is an absolute powerhouse when it comes to his offspring. He has added to the strong foundation of his legendary sire 6GUN's bloodline and firmly established himself as an outstanding sire in his own right. We have a lot of PISTOL's offspring in this sale; they all have good heads, long bodies and amazing carcasses that can make you a lot of money. He breeds offspring with safe forequarters, long rumps, very good sprung of rib and deep bodies. Plus, they are all wet with good body fat and soft coats, and have a wonderful temperament. Those are all the traits you want from an excellent money-making, meat machine of a sire. He is an excellent breeding ram and an aggressive joiner who has twice as many offspring as the other sires in group joinings. In addition, he has a very high percentage of multiples. What a wonderful opportunity to get hold of such a great animal who has already proven himself many times over. <b>Semen retained by BURRAWANG for own use and export.</b></p>						

# NEXT BURRAWANG RAM SALE

<p>A really special T5 Stud ram who can do well for any breeder and for the industry. He is a twin and represents two of BURRAWANG's strongest bloodlines. Based on his breeding, his sound structure, his size and masculinity for age, the amount of meat he carries and his high quality head, he promises to do well for any stud. His bloodlines have been well proven to produce outstanding offspring. A son of PHILL and grandson of <i>PIET (2019 National Supreme Exhibit)</i>, this ram's dam is a super breeder KEG daughter. He clearly shows attributes of both sides of his pedigree; a high quality head, long body, a lot of meat, tremendous structure and growth rates. His post weaning weight was in the top 10% of his drop.</p>					

LOT 29		WD 191440 JUNGLE KING		Stud T5

Weaning	78 days	30.5	N/A	N/A	N/A	
<p>This son of RUSSIAN and a 6GUN daughter is an impressive young, T5 stud ram. He has a very good head but, most outstanding about him are his body length, the length of his neck and his overall balance. He has remarkably meaty inner and outer twists yet, despite carrying so much meat, he has exceptionally strong hocks, is structurally so correct and walks like a dream. He is a very special ram who can benefit any stud or commercial operation. His bloodlines are known for sound structure, great carcass quality and high fertility; this young ram has all the right stuff to build on that reputation.</p>

Weaning	79 days	30	N/A	N/A	N/A
A twin son of PHILL and a super breeder dam, this T5 Stud ram has a lot of presence. He has a very good quality head, a long body and very good skin. He carries a lot of meat, is well balanced and moves very easily. This ram can benefit any breeder, stud or commercial based on his versatility, his meat production capacity and his ease of movement.					

**LOT 36 WITHDRAWN**

**WIN \$5000** worth of BreedELITE data gathering equipment and management software for your stud! This prize includes training, set up, and a 1-year subscription provided by this year's major sponsor, BreedELITE. Entry form available on page 22 and [www.burrawangdorpers.com.au](http://www.burrawangdorpers.com.au)

This is a T5 Stud son of BULLSEYE and a super breeder BRUMBY daughter, making him a beautifully linebred ram from the OLD MATE line. Like BULLSEYE, this ram carries a lot of meat with a long body and very impressive hindquarter including strong inner and outer twists. He has a good strong head for his age. Consistent with his breeding, this ram's lambs will be small when born and grow out quickly, making him safe to use on maidens.

A T5 Stud ram who is a twin by BULLSEYE and a MOONWALK daughter. Typical of BULLSEYE's offspring, this ram carries a lot of meat and, structurally, is very, very good. He is very impressive, especially at the back and right through into his shoulders. He walks smoothly and easily, has well developed loins, good shoulder muscling and a remarkable back end. This is a really impressive ram. Just as we have several of BULLSEYE's sons in our stud as sires because he breeds so well, this ram can be a benefit to any stud.

One of the youngest rams on offer and a twin son of <i>RODEO (2020 National Grand Champion Dorper Ram)</i> who, just like his sire, has great length and width. He is very impressive for such a young ram...so structurally right in the front and the back with good feet and a very good sprung of rib. He is also wide at the back with very well developed loins. All in all, a very good ram for any stud...he can improve the quality of many offspring.

<p>Wow! The first of twin T4 Stud rams on offer in the sale, this young ram has an eye muscle depth of 40mm. He boasts the best qualities of his sire WINK and of his maternal grandsire, DRUID. The combination of these two bloodlines works perfectly; he has the really masculine head and body depth from his dam's side with the long body and rump of his sire's side.</p>

Out of RUSSIAN, he's a big commercial ram with a tremendous long rump and long body and carries a lot of meat with his body fat. His performance measurements have been impressive since weaning in the top 10% of his drop for weight. He continued to perform well through post weaning when he weighed in the top 20% and had EMD in the top 10% of his drop. He's very safe and a great choice for commercial breeding! Highly recommended.

Another PISTOL son! PISTOL absolutely stamps his offspring, one looks just like the next and all demonstrate quality in the head. But, the most impressive feature about all of PISTOL's lambs, including this young T4 Stud ram, is the sound structure of the shoulders. In addition, they have length, lots of meat and a lovely temperament.

A triplet whose super breeder dam, from MICHAEL JACKSON, raised all three lambs very well. Interestingly, this T4 Stud ram was sired by THOROUGHbred, his brother was sired by PISTOL and his sister was sired by THRILLER...talk about a ewe with strong appeal! In regard to this young T4 Stud ram, the combination of THOROUGHbred and MICHAEL JACKSON bloodlines has again produced a very well balanced ram with a lots of meat and body fat. His dam 170829, is also dam for one of BURRAWANG's new sires, TRIPLE SHOT.

BRADLEY and a HOOK daughter produced this impressive young ram. He looks a lot like his sire and carries a lot of meat, which is no surprise given his paternal grandsire is *PIET (2019 National Supreme Exhibit)* whose bloodline is well known for consistent sound structure and high quality carcasses. True to his breeding, this ram has a good head, long body, great outer and inner twists, a lot of width and depth from end to end, and a very good shedding cover.
