WELCOME

Once again, this year things in the sheep industry have been affected by Covid.

With mainland shows and sales being cancelled again, buying and selling online appears to be the new normal.

We do, however, in Tasmania miss the opportunity to show the true potential of our sheep to those interstate buyers.

Fortunately, the Sunnybanks and Faraday Park studs have built a reputation for breeding, and we have been able to navigate the Covid hurdles with great success at the online auctions and local shows.

It is always satisfying when buyers who have purchased in the past come back and buy again. It proves our genetics are working.

Each year we continually strive to improve our breeding stock, ensuring only performing ewes are retained. We are selective in introducing bloodlines, concentrating on structurally correct sheep and muscling producing quality sires that will continue to breed on. We have been involved in AI programs to maximise the best genetics available.

Our breeding stock is culled each year to ensure quality stock is retained to achieve maximum potential. We pride ourselves on producing quality high yielding and structurally correct rams which have proven to sire quality lambs showing early maturity, growth and thickness.

I will again this year be donating proceeds from the sale of a ram to the Peter McCallum Foundation in memory of my mate Tony Badcock.

Paul Day

LAMBPLAN TRAITS

Abbreviation	Trait Name	Abbreviation	Trait Name	Abbreviation	Trait Name
BWT	Birth Weight	PWWT	Post Weaning Weight	C+	Carcass Plus Index
WWT	Weaning Weight	PFAT	Fat Depth	TCP	Terminal Carcase Production Index

TERMINAL CARCASE PRODUCTION (TCP) INDEX

Key Points:

- Carcase Plus has been an important index for the sheepmeat industry but it has been found to have a negative impact on eating quality. Because of this and the industry's focus on delivering high eating quality outcomes for consumers, the index will be retired in March 2020.
- Carcase Plus will be replaced with the Terminal Carcase Production Index. To assist in the transition between indexes both Carcase Plus and Terminal Carcase Production will be available for the 2019 ram buying season.
- The Terminal Carcase Production (TCP) index will give similar improvements in growth and lean meat yield as Carcase Plus while also maintaining eating quality.

What is the new TCP index?

Indexes help producers select animals for use within a breeding program when there are a range of traits of economic or functional importance. This ensures that genetic gain in one trait is not made in isolation from other traits. Using indexes in ram purchasing decisions allow producers to make balanced genetic progress towards more profitable sheep.

The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling)

Sunnylands Charollais

In 2015, Sunnybanks entered into an exciting venture with Nigel and Diana Wade of the Capelands Stud, Table Cape which saw the beginning of Sunnylands Charollais'. This venture will see the first pure bred Charollais lambs born in Tasmania. Both families have over 65 years combined stud sheep breeding experience and have introduced Charollais' into their breeding programs.

Sunnybanks and Capelands studs are Poll Dorset, White Suffolk and Ryeland breeders respectively. Successfully providing both stud and commercial breeders with terminal sires, both studs believe the opportunity exists to introduce the Charollais breed into Tasmania, giving commercial breeders the opportunity to purchase Charollais sires locally.

The Charollais' fast finishing and early maturing qualities are fast becoming a popular choice of sire for commercial breeders. Their ease of lambing capabilities makes sires ideal for use over ewe lambs and maiden hoggets. Long carcasses with great loin and hind quarters are dominating markets with Charollais cross lambs regularly topping sale prices nationally.
