## **2021 PRODUCTION SALE TEAM**

135 Dorper and White Dorper Rams (9-14 months old).

4 Amarula Dorper Stud Sires for sale

22 Stud Dorper ewes

Amarula breeds early maturing, hardy rams with a focus on commercial enterprises, with emphasis on the production traits of fertility, quick growth and carcass, with a moderate adult weight. This year, thanks to a great season, they have been grown out on grass. Better than dust! Rams are visually assessed for conformation, as well as performance recorded.

Dams are the heart of a stud and due to the drought, only the best remain. Our goal is to breed ewes, that in turn breed rams, to fit their environment. Our mostly dry environment can only support so much growth, size and milking ability. The larger the adult, the more they eat to maintain themselves. A more moderate sized ewe will be as fertile and rear lambs, on a smaller feed intake.

Fertility is the key. Amarula ewes are joined when the oldest lambs in the group are 8 weeks old. Joining is for 5 weeks. Lambs are weaned and the rams are removed at the same time. Most ewes have lambed every 6.5 to 8 months. We have achieved a pregnancy rate averaging 130% to 150%, depending on the number of maidens. This is at least a 200%+ lambing per year (working on 3 lambings in 2 years).
