***THE BALANCED BREEDING PROGRAM
BENDING THE GROWTH CURVE***

EST 1882

GLENTREVOR

HEREFORDS

Welcome to Glentrevor Herefords 139th year of operation.

Firstly, once again we would like to thank all our loyal customers & friends for their continued support of our program. Over the years our philosophy has remained unchanged with our program being based on a commercially orientated and balanced approach to breeding with strong emphasis on low birth weight, calving ease, structural soundness, high maternal, growth, fertility, yield, meat quality and docility. This enables us to continue '**Bending the growth curve**' and gives our clients more live calves on the ground. Along with high fertility, these are the major profit drivers in any herd.

As in other years all the bulls will be sold using the Helmsman Selling System, however this year we will also be working in conjunction with Elders & AuctionsPlus. Due to this we will be running on a very structured time frame with the sale commencing strictly at 11.00am. So please allow yourself plenty of time to inspect the bulls & do your homework beforehand & have plenty of notes on your preferences in case you miss out on your first choice.

We have included an easy to follow 8-step-guide as all intending purchasers will need to be registered with AuctionsPlus prior to the commencement of the sale; whether attending on sale day or not. A full catalogue including more photos & videos of all the bulls will also be available on the AuctionsPlus website. If anyone has any questions or concerns, please do not hesitate in contacting us prior to the sale.

We offer outside agents a 2% rebate when they introduce buyers to the selling agent at least 24 hours prior to the sale & attend on sale day. If outside agents do not attend on the day the rebate will be reduced to 1%.

We invite you to join us on Monday, 15th February 2021 at 'Curraghmoehr' with enquiries and inspections prior to this day extremely welcome. A light lunch & refreshments will be supplied.

AuctionsPlus®

Australia's Livestock Marketplace

Can't make the sale?

Purchase online in eight simple steps!

Log on to AuctionsPlus and bid on your phone, tablet or computer.

1

REGISTER ONLINE

Free once off registration for all auctions.

2

COMPLETE BUYER INDUCTION

The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.

3

VIEW CATALOGUE

View photos, videos, pedigrees and more.

4

ENTER AUCTION

Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.

5

AUTO BID

Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.

6

CONTACT SELLING AGENT

If successful, contact selling agent to arrange payment and delivery. The agent contact details will be available in the catalogue header.

7

PAYMENT

Via the selling agent's terms and conditions.

8

DELIVERY

Arrange transport of livestock at your expense.

All bulls contained in this 'Glentrevor' catalogue are to the best of our knowledge, fertile and structurally sound. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure at any time in the next 36 months we will:

(a) provide you with a satisfactory replacement if available or (b) issue you with a credit equal to purchase price minus salvage value that may be used to purchase any animal in future 'Glentrevor' sales.

This is not a life insurance policy. Normal care needs to be taken, as we cannot replace an animal that is injured or dies for any other reason.

The Group Breedplan Estimated Breeding Values (EBV'S) contained in this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither Herefords Australia Limited, nor the ABRI oversee or audit the collection of the data.

Australian Hereford Selection Indexes

There are currently four different selection indexes calculated for Australian Hereford animals.

These are: • Southern Self-Replacing Index • Southern Baldy Maternal Index • Northern Self-Replacing Index • Northern Baldy Terminal Index.

Each selection index describes a different production/market scenario and relates to a typical commercial herd using Hereford bulls. Producers are advised to use the selection index that most closely aligns to their production system. All four selection indexes are focussed on maintaining and improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance. In addition, each selection index targets the following specifications.

Southern Self-Replacing Index

Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate

cost is applied for cow feed costs during the annual feed shortage period.

Northern Self-Replacing Index

Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a Bos indicus based cow herd (e.g. flatback). Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

Southern Baldy Maternal Index

Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos taurus females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 20 to 22 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

Northern Baldy Terminal Index

Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd (e.g. flatback) using Hereford bulls over Bos indicus/Tropical females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 20 to 22 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

IBMS Genetic Type Summary & Structure Assessment

All Glentrevor Bulls have been inspected and assessed on the Independent Breeding & Marketing Service Type/Structure System by Dick Whale. All Bulls in this catalogue were considered acceptable for soundness and muscling.

Stature: evaluation of bulls for frame size. A Maturity pattern of 25 is an average frame Bull. This may be influenced by age of dam, particularly 1st calf heifers. Scores greater than 25 indicates larger frame.

Capacity: evaluation combines depth of fore rib along with spring of rib and width of chest floor, as well as depth of flank. Scores greater than 25 indicates larger capacity.

Body Length: evaluation of body length from withers to pins. Scores greater than 25 indicates longer body length.

Front & Back Feet: evaluation of front & back feet is based on a scale from 1-9, with 5 being ideal. Scores greater than 5 are leading towards scissor claw set & scores less than 5 are leading towards open claw set.

Front & Back Pastern: evaluation of front & back pastern is based on a scale from 1-9, with 5 being ideal. Scores greater than 5 are leading towards lower pastern & shallow heel & scores less than 5 are leading towards stronger pastern & more depth of heel.

Side View: evaluation of side view is based on a scale from 1-9, with 5 being ideal. Scores greater than 5 are leading towards sickle hocked & scores less than 5 are leading towards straight hocked.

Rear View: evaluation of rear view is based on a scale from 1-9, with 5 being ideal. Scores greater than 5 are leading towards cow hocked & scores less than 5 are leading towards bow legged.

Muscle Score: this is a visual assessment of an animals combined width of rump and hind quarter with secondary consideration to forearm muscling.

SCORE	5	10	15	20	25	30	35	40	45	50	55
EQUIV. MUSCLE	D-	D	D+	C-	C	C+	B-	B	B+	A-	A

Do Ability: this ability to lay fat under similar environmental conditions. Scores greater than 25 indicates easier doing cattle. Scores less than 25 indicates harder doing cattle.

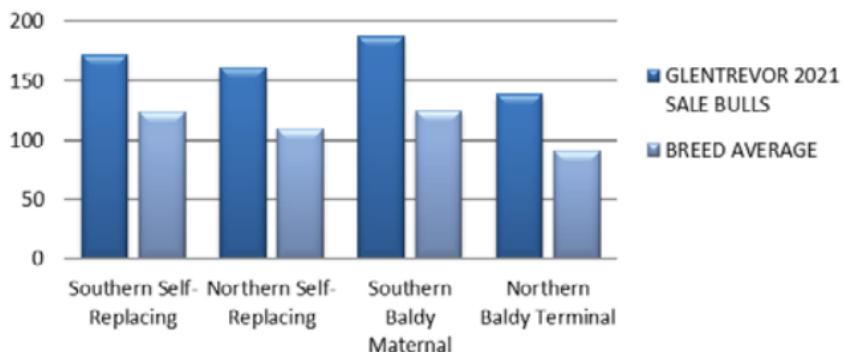

Sheath: evaluation of sheath is based on a scale from 1-5, with 5 being a clean, tight sheath close to the body & 1 being an extremely pendulous sheath.

Explanation of Terms

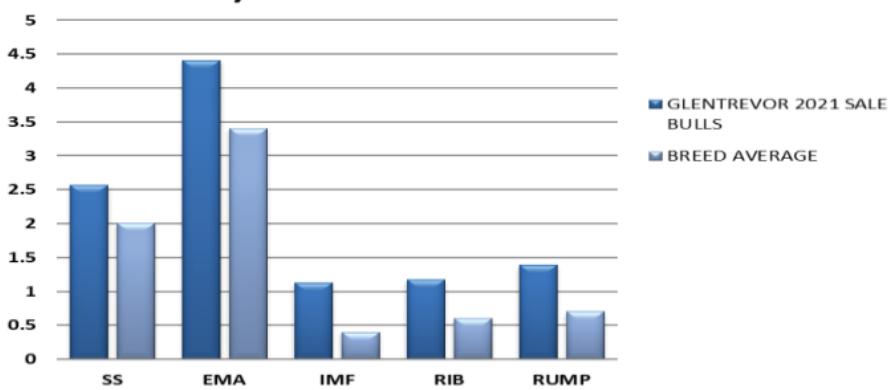

Height: the actual physical measurement of the bull at the hips taken during fertility examination. It is the best indicator of potential mature size of any animal.

Testicle Circumference: the actual physical measurement of the bulls testicles and is used to calculate the fertility level of the bulls daughters. Based on the calculation that every 1cm increase in the scrotal size means the daughter will cycle 4 days earlier.

Calving Ease EBV

Gestation Length

- The ‘Glentrevor’ herd is registered with Herefords Australia and transfer of registration may be arranged by request, fully Breedplan recorded.
- Figures in this catalogue may change slightly when the January 2021 update on Breedplan is processed...therefore we recommend you visit the Herefords Australia website for the latest information.
- All bulls were carcase scanned by Liam Cardile of LRC Livestock (Holbrook) on 09/09/20 Ph: 0409 572 570.
- All bulls have been muscle scored and assessed for structural soundness by Dick Whale of Independent Breeding and Marketing Service Pty Ltd (Wangaratta) on 18/12/20 Ph: 0427 697 968.
- All bulls have been Sire Verified & Genetic Conditions Free using Genomic Testing.
- All bulls have been Serving Ability & Semen Tested.
- All bulls have had their height, and testicle circumference measured on 03/01/21.
- No bulls are hoof trimmed or assisted at birth, all bulls are pasture reared and dehorned or polled.
- All bulls have been vaccinated with Pestiguard.

Q107, Q122, Q153 & Q163 were all used in our 2020 mating program & ‘Glentrevor’ reserves the right to collect 100 straws of semen for within herd use & will retain 50% semen rights.
