LOT 10 OAK DOWNS OYSTER Q135

LOT 13 KERLSON PINES MILESTONE Q167

## WELCOME

Welcome to our tenth annual sale. We appreciate the support that we have received from existing and new clients over the last nine sales and this year we are proud to again offer 60 top quality , structurally sound, easy doing sires for your appraisal. Please take note that all bulls have been semen tested and fully vaccinated to the Zoetis Star Breeder program standard , giving you complete confidence in the reproductive integrity and health of the bulls on offer.

This year all bulls have again been Genomic DNA tested to increase accuracy of breedplan, all bulls are sire verified and tested free of any known genetic conditions and poll tested so that homozygous polled animals can be identified. If you would like any help with your sire selection, or have any questions, we will be very happy to assist and remember if you cannot make it sale day, our auction is interfaced with AuctionPlus, so you can bid from anywhere with internet connection.

Regards,

**THE FAMILIES OF KERLSON PINES

# SALE INFORMATION

## LOCATION

Sale to be held at Kerlson Pines' new property, "Telpara", 389 Nicholls Road, Keith SA. Just south of Keith on Riddoch Hwy, turn right onto Mount Charles Road. After 8km turn left onto Cantara Road (Keith aerodrome at intersection). After 4.5km turn right onto Nicholls Road. "Telpara" is a further 3.8km on left. See map on page 42.

## INSPECTION

From 12 noon on sale day . Private inspections may be arranged at any other time by appointment. Sale bulls will also be on display during the SA Beef Week Field Days at both Oak Downs and Kerlson Pines on Tuesday 9th February.

## DELIVERY

Free delivery within 400km radius of sale venue. While every care will be taken, no responsibility can be accepted by the vendors while awaiting delivery.

## HEALTH

All sale bulls are officially Government confirmed as Brucellosis and T.B. free and have a Johnes status of J-BAS 6 , free to all states except WA. All bulls are STAR BREEDER accredited , having been PI tested negative for Pestivirus, vaccinated with Pestiguard,Vibrovox and Ultravax 7 in 1 and have been backlined with Dectomax . All lots have been semen tested by Nationwide Artificial Breeders.

## INSURANCE

Buyers are reminded that purchases become their responsibility at the fall of the hammer. The vendors recommend insurance of all purchases for up to 12 months and for transit. The selling agent will have an insurance representative at the sale.

## GUARANTEE

All bulls guaranteed to be fertile and capable of natural service (excluding injury) for a period of 12 months after date of sale. Bulls will be replaced or credited upon vet inspection and certificate.

## REBATE

3% rebate to outside agents who attend the sale with or on behalf of their client(s) and settle within 7 days of the sale. Agent is to co-sign the buyer's instruction slip.

1% rebate to outside agents not attending the sale but who introduce their client in writing not latter than 12 hours prior to sale and settle on buyers behalf within 7 days of the sale.

## GST

GST is to be added onto the purchase price at the fall of the hammer. You will be invoiced purchase price plus GST.

## ACCOMMODATION

Accommodation is available in Keith, Bordertown and Naracoorte.

## LUNCHEON

Light luncheon and refreshments will be available.

# STAR BREEDER PROGRAM

## BUY WITH CONFIDENCE

### KERLSON PINES / OAK DOWNS

#### 10<sup>TH</sup> Annual Bull Sale Tuesday 23rd February 2020

All bulls at the sale will be STAR BREEDER program accredited. This program aims to maximise the reproductive integrity and health of stud stock.

Each STAR BREEDER certified animal at the sale has been:

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ Vaccinated against Pestivirus (BVDV) to ensure they are protected from the effects of this infection
- ✓ Vaccinated against Leptospirosis, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ Vaccinated against Vibriosis, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals presented for sale will not introduce preventable reproductive diseases into your herd.

For more information talk to your Zoetis Cattle Representative, call 1800 963 847 or visit [starprogram.com.au](http://starprogram.com.au)

Your Zoetis Cattle Representative is:

GARY GLASSON  
0418 812 457

# EXPLANATORY NOTES FOR BREEDPLAN EBV'S

## ESTIMATED BREEDING VALUES (EBVS)

EBVs for the growth traits are calculated in kilograms. The EBV is the best estimate of an animal's genetic merit for that trait.

## ACCURACIES

Accuracies are presented with every EBV and give an indication of the amount of information that has been used in the calculation of EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

## GROWTH EBV

**MILK:** 200 day milk EBV (kg) is an estimate of an animal's milking ability. For sires, the EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

**200:** 200 day growth EBV (kg) is calculated from the weight of the animals taken between 80 and 300 days of age.

## BIRTH

**BWT:** Birth weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

## 400

400 day weight (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best estimate of an animal's genetic merit for yearling weight.

## 600

600 day weight (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

## EMA

Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area at the 12/13th rib of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

## RUMP

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

The Poll Hereford Group Breedplan Estimated Breeding Values contained in this sale catalogue were compiled by ABRI from data supplied by the breeders. Neither Herefords Australia nor the ABRI oversees or audit the collection of this data.

# EXPLANATORY NOTES FOR BREEDPLAN EBV'S

## DESCRIPTION OF THE NEW HEREFORDS AUSTRALIA SELECTION INDEXES

Each of the new selection indexes describes a different production/market scenario and relates to a typical commercial herd using Hereford bulls. Producers are advised to use the selection index that most closely aligns to their production system. All four selection indexes are focussed on maintaining and improving eating quality. Significant premiums are applied for increasing marble score up to a marble score of 3. Pressure is also applied to early life growth to maintain low ossification scores and good MSA compliance. In addition, each selection index targets the following specifications.

**Southern Self-Replacing Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing purebred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 18 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Self-Replacing Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a Bos indicus based cow

herd. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 18 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

**Southern Baldy Maternal Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos taurus females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 18 to 19 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Baldy Terminal Index** – Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos indicus/Tropical females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 18 to 19 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

# Livestock insurance that fits

In the livestock business, we understand it takes years to breed and produce your stock, which is why it pays to make sure you're protected if the unexpected occurs. Elders Insurance offers a wide range of risk protection options in one policy to cover any livestock enterprise you may be involved in. As we all know, there is always an inherent risk when transporting livestock but many of us forget about the risks while they are in the paddock. With every season and area being different it is important to consider all of the potential risks to your livestock and ensure you have suitable cover in advance for unforeseen circumstances involving your valuable livestock assets.
