COMMENTS

Quokka is a younger bull out of a heifer. Quokka is a handy well balanced bull with a strong topline. His extra length and that extra bit of shape make him a sound choice for those wanting to retain heifers whilst finishing steer progeny as heavy grass fed or pursuing younger short fed market options. Vaccinated with 7 in 1, Markmin, Beachport and B12 & Selenium. BVDV Tested free

Please remember to be COVIDsafe.
Please adhere to signs and instructions
on the day and any Government
Guidelines on the day.

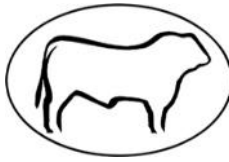

Care of your New Sire

Congratulations on your purchase of a new sire. The management of your new sire will influence his productive life and his input into your breeding program.

A few helpful suggestions to consider.

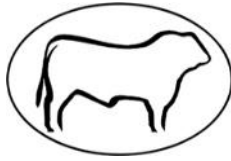

1. As he has been running with his litter mates for some time, it is advisable to place him in secure yards with another animal or two (preferably steers or joined heifers/cows) and feed him hay for a few days before putting him out into a paddock.
2. When paddock feed is not sufficient to maintain your bull's weight, supplement his diet with good quality hay. This is especially important prior to the first joining as your new sire is young and still growing.
3. Do not over work your new bull and observe him throughout joining. He will work best in a mob on this own.
4. Bulls need a break. After joining take him out of the cows and put him on quality hay.
