The Update

I extend a warm welcome to new and past clients to Southend's 25th annual on property sale. A milestone sale with the biggest and most exciting catalogue of cattle to be offered to date. At Southend I am continuing to breed a true 100% pure silver Murray Grey with the focus from conception through to consumption. Cattle with a soft silver coat, good carcass, fertility, growth and calve with minimal complications. These are the cattle that I strongly believe suit our diverse environment, industry demands, and will further this stud and breed.

This past season in Katanning has been another challenging year, with another late start and very little spring rain. The cattle have come through in ok condition, with the older and youngest stock doing it the toughest, as expected. Looking at the horizon for a wet 2021.

Our 25th sale will consist of 40 autumn and spring drop bulls, 10 registered spring drop heifers and 60 unregistered heifer which are sold in lots of 5 head. Another genetically diverse line up with 9 sires represented. The first sons to be offered by Carlinga Mordred with 16 sons represented. Carlinga Mordred was purchased privately in 2018 for \$20,000 from NSW. There are also some very exciting combinations of new and old genetics coming through this year with sons from the 2001 born Southend West Rowan. Sons to be offered also by Southend Double Barrel and Southend Narssist also.

I believe that this is one of the most exciting line ups of bulls and heifers we have offered, with new and older combination of genetics. I have been able to achieve this by investing and using some of the best sires in Australia through natural mating's and AI. Moving into the future, I hope to produce even more top quality bulls using embryo transfers which I find very exciting, putting 18 embryos to potentially drop in 2021. This year we will offer 11 spring drop bulls. Calving cows in spring can increase our number of calves on the ground by spreading peak feed demand. I would love to hear your thought on spring drop bulls.

There has not only been a lot of breeding going on in the paddock. Amy and I welcomed our third son Conrad Roy Wise born on the 21/10/2020. Exciting times to come in our family and farming future.

I am very proud to be offering such a quality line of cattle. With fantastic buoyancy in the market, there are exciting times to come. I would like to wish you all the best for the coming season, hopefully it's a great one.

What a cracking bull to start the sale. Quarry is an very powerful West Rowan son. He has presence and great sires appeal with depth, thickness, sound structure and a large volume of soft flesh all wrapped up in a sleek soft coat. A bull that could suit any operation with a tremendous female line on his dams side (possible one of the best females on the farm). The complete package very highly recommended.

A very eye catching high growth bull. On of the younger autumn drop bulls making the top 5 in all weight intervals, proving he has the ability grow. Not only a big growthy bull he has plenty of carcass to go with it as shown in his raw scans. His dam is a very stylish cow that always puts everything into her calf.

QT exhibit possibly the most carcass and red meat content that we have offered. With a whopping 130ema and an outstanding volume of hind quarter. He is a bull that will put weight for age, carcass and appeal into almost any herd. Being one of the heaviest weaners his not a bull that I would just pigeon hole in the roll of breeding carcass as his dam has proven to be a good milker. Well worth a look.

Oakley Madonna C32 (PB)

Kelso Babalone B15 (PB)

Dam: ONWARD JENNIFER E26 (PB)

Onward Jennifer 106th (PB)(AI)

Jarvis was purchased out of the top of the range sale in 2016. We used him over stud and commercial heifers with good success as his calves have lower birth weights and are very vigorous at birth. Early maturity and ability to lay down fat make him a very appealing bull to use over heifers. He also has very balanced and has good sound foot structure.

Narsisst is one of the most exciting sires we have had. With the ability to breed stunning feminine females and outstanding bulls. His EBV figures are justifiably outstanding and has the structure and temperament to go with it. This is the type of bull we wish to breed in the future hitting all the criteria. Only spring drop calves to be offered this year, with many more in the pipeline.

Bundaleer Opal L39 (PB)

West Rowan was Southends leading sire through the 2000s breeding many outstanding bulls and females. He had not been used for a long time due to the saturation of the genetics. I have been using him over a select group of more modern type of murray greys females. His progeny are noticeably very quiet temperament and natural thickness with great carcass.
