## Welcome

to our Inaugural On property bull sale. This year we have made the decision to offer all of our sale bulls on one day on property, at Dinninup Farms. Offering our customers a single event where they can fill their Venturon Bull requirements irrespective of breed has been a long term goal of Venturon Livestock.

This sale is a significant milestone in the Venturon Livestock journey. Venturon commenced in the seedstock industry in 1994 with the Charolais herd. This was a natural progression as our family has a multi generational commitment to agricultural production starting in England and extending to Western Australia. The passion passed through the generations has only intensified as we utilise modern technology along with good old fashioned cow sense to produce industry relevant genetics across our cattle and sheep programs.

Venturon Livestock continually search the world for new and exciting genetics. Our goal is to source genetics that are industry relevant to complement the Venturon cow herd. By doing this it ensures our customers are provided with genetics that will keep them at the forefront of Australian beef industry and the markets they supply.

At Venturon, our business is built on long standing relationships which value honesty and integrity in their breeding programs. We pride ourselves on our female herd and feel that this is one of the assets that sets us apart from our competitors.

In the past twelve months we have exported genetics from our herd to New Zealand and North America.

Within our herd we utilise embryo transfer as much as we can. We feel it is a great way to highlight successful matings and replicate them to ensure we are supplying the best product we can. We work closely with our ET Technician, Dr Richard Hall of Golden Arm Genetics to select our leading genetics.

We are thankful for the guidance and knowledge provided by Richard on our 'Venture' into the Angus breed. Our Angus herd has benefited greatly through ET, with elite and exclusive imported genetics from the DSK herd.

The knowledge and genetics Chris and Helen have given us access to, right from the heart of their herd, has helped us significantly within our Angus program.

Showing is a part of our business that we thoroughly enjoy. Our cattle are shown successfully around Australia. Our most recent successes being Supreme Charolais Exhibit at the 2019 Adelaide Royal show, Grand Champion Charolais bull in 2018 and 2019 and 2019 Grand Champion Charolais female at the Adelaide Royal show and Reserve Senior Champion Charolais female Sydney 2019. We utilise showing to market our cattle and showcase what we see as our best genetics.

The 2021 draft of Venturon bulls have been blessed with good seasonal conditions and have had a light silage based preparation for this event. The bulls have been raised and run in large management groups.

The bulls will be offered in a condition that we believe allows them to be athletic, and fertile resulting in higher calving percentages.

This year's sale team have been handpicked from our entire drop of 2019 born bulls and we feel they will stand the assessment of the most astute cattle producer.

We stand behind our brand, and use our bulls within our own commercial enterprise. This ensures our bulls maintain a relevance to the markets that our clients sell to. You can put your trust into a program that is breeding for the same markets you are!

We welcome you at any time, by appointment, to view the sale bulls. Please give Harris a call on 0488 493 713 or Andrew on 0429 379 135 to arrange an inspection time. Our herd is open and we would love to show you through the female herd.

We look forward to seeing you sale day, Friday February 26th, 2021. Please join us for a complimentary lunch prior to the commencement of the sale. If you have any questions regarding the sale team, please don't hesitate to get in touch.

Harris, Anne & Andrew

[elders.com.au](http://elders.com.au)

**Venue**

The sale will be held on property, Venturon, Sambell Road, Boyup Brook and online with Auctionsplus.

**The Sale**

The selling system we will be utilising will be a video sale. The sale shed is located right next to the bull pens. Bulls will be penned with the ability to view and walk through them. The Auctioneer will sell the bulls by auction with a video of each bull projected onto the screens located in the sale shed, rather than running the bulls through a ring. This system we feel, is buyer and animal friendly and works well with modern occupational health and safety requirements.

**Terms and Conditions / Auctionsplus**

The sale will be conducted under the Elders terms and conditions displayed on sale day. Potential buyers are to ensure they have registered with the selling agent and received a bid card prior to the commencement of the auction. This sale will also be interfaced with Auctionsplus, so if you wish to utilise this platform, please make your self familiar with the terms and conditions or talk to one of the selling agents if you require assistance. Please ensure if you wish to use this platform you understand the system, appropriate connectivity and pre register 24 hours prior to the commencement of the auction. This will allow parties unable to attend the sale to bid remotely on lots they may be interested in.

**Inspection & Sale Time**

The bulls will be yarded and available for inspection from 11am on Sale Day Friday February 26th. Selling to commence at 1pm sharp. Private inspection of the sale team can be arranged prior to sale day by contacting Harris Thompson on 0488 493 713 or Andrew Thompson on 0429 379 135. All times in the catalogue are displayed on AWST.

**Supplementary Sheet**

Supplementary sheets will be available on sale day or by prior request.

**GST**

All lots are sold exclusive of GST. GST will be added to the auction sale price of each lot prior to invoicing.

**Outside Agent Rebate**

Venturon offer a 3% outside agent buyers rebate to those who nominate their client in writing to the selling agent 24 hours prior to sale and settling within 7 days. Agents must attend the sale with or on behalf of their client on sale day to assist with their purchase.

**Phone Bidding**

If you require phone bidding please get in touch with one of our team prior to sale day or talk to one of the selling agents.

**Insurance**

At the fall of the hammer, Venturon recommend insuring all purchases. Insurance risk of animals sold at auction, transfers to the purchaser at the fall of the hammer, including animals remaining on the vendor's property. Therefore, purchasers should insure their animals at the completion of the sale. Stud animals are not covered by commercial livestock insurance in Western Australia. There will be an insurance representative onsite sale day to assist you with this.

**Registration Status / Transfers**

If the animal is listed as registered, it is available for society transfer at the vendor's expense. If you require society transfers, please indicate on the buyers instruction sheet.

**Animal Identification**

All bulls are branded and/or tattooed as per breed society regulations. All lots are permanently identified in accordance with the National Livestock Identification Scheme (NLIS). Sale lots will have a sale tag on sale day.

**Refreshments**

Refreshments will be available on sale day.

**Catalogue Photographs**

All sale photographs taken on farm, mid January 2021. Thanks Kane Chatfield, Farm Weekly.

**Angus Genetic Conditions**

Angus bulls have their Genetic Condition status shown on their lot. Further information on Angus genetic conditions can be found on the Angus Australia website [www.angusaustralia.com.au](http://www.angusaustralia.com.au)

## Health

Venturon Livestock is a JBAS 8 accredited herd. All the bulls in the sale are eligible for entry to all states and territories in Australia. The Bulls in the sale are sold under the Zoetis Star Breeder program and have been vaccinated with 7 in 1, Pestigard and Vibrovax and have been drenched with Dectomax. All sale bulls have been tested negative for pestivirus. All bulls have been semen tested and scrotal measurements have been taken by Nutrien Breeding Services, Bunbury, WA.

## Sale Bull Notes

Please note the sale bulls have been run in three different management groups. Which management group bulls have come from will be listed on the supplementary sheet. The bulls have been worked by dogs, vehicles and motorbikes their entire life so when introducing them to new management practices please acclimatise them to it gently. The bulls have not been worked by horses.

## Health and Safety of Visitors

All of the bulls within the sale have undertaken a strict temperament selection process. The bulls are quiet to handle under conditions they are used to in their groups. Sale day poses a range of new things to the bulls that they may not be accustomed with, so please take all care when viewing the bulls. Please be alert for the potential of bulls fighting within the pens. We do not by any means expect the bulls to be aggressive, but the new environment and large number of people can upset even the quietest of bulls. Please do not crowd the bulls or loiter inside the pens, and please use common sense within the pens when viewing the bulls. Please do not hesitate to talk to any of our team or the sale staff if you require assistance in the bull pens, we will be more than happy to help. Visitors enter the sale pens at their own risk. No children are to enter sale pens, and no dogs are allowed on sale day.

## Delivery

Venturon offers free personal delivery within 500km of Venturon. All other transport within WA will be coordinated by Venturon to major centres. We will ensure the bulls are delivered as soon as we can after the sale, there will be no delivery on sale day.

## Eastern States:

Venturon will coordinate and cover half of the transport costs on route to Falls Livestock Depot, Finley NSW through Falls Livestock Transport. Please get in touch with us for any more information on our transport offers.

Upon taking delivery of your new bull, we recommend you have a companion animal or a group of animals for him to go into. It is a big thing for the bulls going into a new environment out of their groups, so we recommend you help make this transition as stress free as possible for them.

## The Venturon Guarantee

All the bulls sold at Venturon come with "The Venturon Guarantee". They come with a two year guarantee in the rare event a bull is found to be infertile or unable to breed cows, provided the problem is not caused by injury or disease after taking delivery from Venturon. Upon request, a veterinarian Certificate must be provided by an accredited Veterinarian. Venturon will replace with another sire or refund the purchase price of the bull less the salvage value of the bull.

## Sale Catalogue Disclaimer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Data submitted to the Breed Societies may have errors in it which cannot be detected without further DNA testing. For this reason, users ought to consider if they need to obtain independent testing of the relevant animal (if possible) to ensure the data is accurate. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Murray Grey Beef Cattle Society, Charolais Society of Australia, or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Guide to Angus Suffix System

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

# : DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

# BREEDPLAN EBV Explanations

## EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

## Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

## TRAITS

**Calving Ease EBVs (%)** are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**CE % Dir = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

**CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

**Gestation Length EBV (days)** is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination & hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length & therefore easier calving & increased growth after birth.

**Birth Weight EBV (kg)** is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV (kg)** is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV (kg)** is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV (kg)** is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV (cm)** is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Eye Muscle Area EBV (sq cm)** is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

**Rib Fat and Rump Fat EBVs (mm)** are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV (%)** indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat EBV (%)** is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

## Selection Indices

Selection indices are calculated for market specifications. Index values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system. More information is available on selecting animals using a selection index. The Index values are derived using BreedObject technology. More information is available from the BreedObject web site.

**IMPORTANT: EBV's are breed specific and cannot be compared across breeds. Only compare Charolais to Charolais, Angus to Angus, Murray Grey to Murray Grey.**

# Charolais BREEDPLAN

## Selection Indices

Charolais selection indices are calculated for three market specifications, namely, Domestic, Export and Northern Terminal.

**Domestic Index (\$)** - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

**Export Index (\$)** – Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

## Selection Indices

Angus selection indices are calculated for four market specifications, namely, Domestic, Export and Northern Terminal.

**Angus Breeding Index (\$)** - ABI - estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

**Domestic Index - Dom** estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcass weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

**Heavy Grain Index - GRN** - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcass weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

**Heavy Grass Index - GRS** - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcass weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

# Murray Grey BREEDPLAN

## Selection Indices

There are three different selection indexes calculated for Australian Murray Grey animals. These are: Vealer Terminal Index, Supermarket Index, Heavy Grass Fed Steer Index

**Vealer Terminal Index - VTI** - Estimates the genetic differences between animals in net profitability per cow joined for an example crossbred commercial herd (i.e. using Murray Grey bulls over British bred females) targeting vealer production. Vealers are finished on grass and marketed at 365 kg live weight (average 200 kg HSCW and 9 mm P8 fat depth) at 10 months of age. Daughters are NOT retained for breeding and so no consideration is given to maternal traits (i.e. calving ease daughters, female fertility, mature cow weight).

**Supermarket Index - Sup** - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting production of steers for the domestic supermarket trade. Steers are either finished on grass, or grain fed for 70 days, and marketed at 470 kg live weight (average 260kg HSCW and 12mm fat) at 15 months of age. Daughters are retained for breeding.

**Heavy Grass Fed Steer Index - Grass** - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting pasture finished steers for heavier grass fed markets. Steers are assumed marketed at 620 kg live weight (340 kg HSCW and 14 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding.

Breed Avg. EBVs for 2018 Born Calves. Percentile Range available at Murray Grey BREEDPLAN <http://breedplan.une.edu.au>

Venturon

**Hamish (P)**

Comments: Hamish is a bull who has far exceeded our expectations and his calves just keep getting better. Hamish's calves have added muscle shape whilst retaining fat cover in a moderate package. We are really excited to see his first daughters within the stud coming into production after already having two crops of commercial cross bred females milking. Hamish has 3 sons in the sale that are all worthy of inspection as stud sires.

Winn Mans

**Skaggs 663X (P)**

Comments: The Canadian superstar. Semen rights exclusively owned by Palgrove Charolais stud QLD and WA semen rights owned by Venturon. We selected Skaggs in Canada in 2015 after viewing him in the pasture at CK SPARROW FARMS. His daughters blew us away with their functionality and easy doing ability with exceptional udder quality. His sons have so much power and shape and we are very pleased with his sons in the sale.

Sparrows

**Kingston 139Y (P)**

Comments: Australian rights exclusively owned by Venturon and LVH- Fairfield. Sired by the breed legend, Winn Mans Lanza. The high selling Canadian Charolais sire at \$CAN155,000. Progeny are Low birthweight and short gestation with quick growth and plenty of softness. Daughters are coming into production and breeding the house down.

Venturon

**Next Generation (P)**

Comments: Our new and upcoming walking sire by the great Kingston 139Y. We retained New Generation for his overall thickness, excellent feet and softness whilst being packed into a moderate low birthweight package. He is also a maternal brother to the \$16,000, Venturon Motivate who sold to the Bardoo Charolais stud in 2018.

Cooara

**Mission Man (P)**

Comments: We purchased Mission Man privately from the Campbell family, selecting him as the pick of their bull drop. He is a bull we added to our program for his excellent carcass traits and his strong maternal backing. Sired by Mac 2244 we knew he was going to breed on well. His sons have added shape whilst maintaining softness in a polished package.

Venturon

**Magnum (P)**

Comments: Magnum is our go to heifer bull. He is a bull that possesses so much shape, short gestation and small born calves which made him ideal as an outcross option for our heifer matings. His dam would have one of the best udders within our herd.

# Angus Reference Sires

Baldrige

## Beast Mode B074

Comments: Beast Mode is a sire whose progeny have taken the nation by storm. He has sired high sellers all across the country in a range of different environments. Beast Mode's impressive dam Baldrige Isabel Y69 highlighted our interest in using this sire. She is a female we wanted to have in the pedigrees of our program. Australian Trait Leader for 200WT, 400WT and 600WT.

Granite Ridge

## Maximus M34

Comments: We purchased M34 as our foundation Angus herd sire at the 2018 Granite Ridge Sale, SA. We wanted a sire that was going to give us a strong base to start with and produce an even made line of cattle. After viewing at their on property field day we were happy with his docile temperament, muscle shape and great foot structure. This is the first crop of sons we have offered by him. We are loving their added muscle dimension and power whilst being made in such a refined package. We are eagerly awaiting his first daughters to come into production in March.

S A V

## Birthstone 8258

Comments: Birthstone is from the world renowned Schaff Angus Valley herd in America. His progeny are built thick, structurally sound and with great temperaments.

# Murray Grey Reference Sires

Mighty

## Next Best Thing

Comments: Next Best Thing is by far the best Murray Grey animal we have raised in our 20 years of breeding, if not one of the best animals we have bred. Unfortunately we lost NBT to a freak accident late 2019, so this is one of the only chances to obtain a son from Venturon. NBT was Supreme Murray Grey Exhibit at Perth Royal Show, Supreme Bull in Show at Wagin Woolorama and the Upper Blackwood Agricultural show, Interbreed Beef Bull at Brunswick Ag show and Senior Champion Murray Grey bull at Adelaide Royal show all in 2018.

Rouchelle

## King of Hearts

Comments: We purchased Hearts from the Rouchelle Stud, NSW after he was awarded Supreme Murray Grey exhibit of the 2016 Murray Grey Junior Stock show. We had admired King of Hearts since seeing him on his Mum the previous year. Heart's progeny are born low birthweight, have great carcase quality and grow into impressive sires. His first son sold at auction, topped the Murray Grey offering at the WALSA 2020 Supreme bull sale.

Mighty

## Magnum

Comments: Magnum is a surefire heifer mating option by Karakara Balfour. We retained Magnum due to his excellent length of body and low birthweight easy calving attributes. His dam is one of our highest milking cows who has such a great track record of excellent progeny. His two sons in the sale are spitting images of him. Magnum's progeny can only be registered as commercial due to a mix up with hair samples, only realised once the bull was deceased.

**VENTURON KEYSTONE (VE7 K14E) (P)**  
Trait Leader: 200 Wt, 400 Wt, 600 Wt  
Interbreed Junior Champion Male Perth Royal 2015  
Sire of

# VENTURON QUIZ MASTER Q37 (P)

Born: 02/05/2019

Tattoo: VE7 Q37E

**SIRE VERIFIED**

WCR SIR FA MAC 2244 (OAU B2244E) (P)

**S: COOARA MISSION MAN (CX5 M7E) (P)**  
COOARA HALO (CX5 H5E) (P)

KEYS ALL STATE 149X (OAU F2787E) (P)

**D: VENTURON KIRSTY (VE7 K23E)**  
LINKLETTER Z10E (LJA Z10E)

Comments: We are excited to start the sale with the first son we have offered by Cooara Mission Man M7. Q37 is a stout made low birthweight bull that is backed by an exceptional Keys All State daughter, K23. K23 consistently breeds the house down, with two sons retained as herd sires. Top 5% of the breed for low birthweight.

**D: VENTURON JULIET (VE7 J13E) (P)**  
VENTURON GAYLE (VE7 G35E) (P)

Granddam: Venturon Gayle

Comments: Appropriately named Qantas, because he is going places. We absolutely admire the overall make up of this bull: he's big topped, soggy made with so much horsepower. Q17 was Multi-breed Junior Champion bull in Show at Wagin Woolorama 2020. His dam, Juliet J13 comes from one of our greatest female lines, and constantly raises a top calf, including this year's bull calf Venturon Ricky Bobby R6. Qantas is sure to be a real crowd favourite come sale day. Top 1% of the breed for 200, 400 and 600 day weights and MCW, top 5% for Scrotal and Rib Fat.

# AuctionsPlus

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

## STAR BREEDER PROGRAM

# BUY WITH CONFIDENCE

Venturon Livestock

Branding the next generation

### Venturon Livestock Inaugural Sale

Sambell Road, Boyup Brook

26<sup>th</sup> February 2021

All bulls at the sale will be STAR BREEDER program accredited. This program aims to maximise the reproductive integrity and health of stud stock.

Each STAR BREEDER certified animal at the sale has been:

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ **Vaccinated against Pestivirus (BVDV)** to ensure they are protected from the effects of this infection
- ✓ **Vaccinated against Leptospirosis**, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ **Vaccinated against Vibriosis**, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals presented for sale will not introduce preventable reproductive diseases into your herd.

For more information talk to your Zoetis Cattle Representative, call **1800 963 847** or visit [starprogram.com.au](http://starprogram.com.au)

Your Zoetis Cattle Representative is:
