22nd Annual **ON PROPERTY BULL & FEMALE SALE**

COMMENCING AT 1.00PM, FRIDAY 12TH FEBRUARY 2021
On Property near Willaura Victoria AND via AuctionsPlus

CONSISTENCY | PREDICTABILITY | POWER | PERFORMANCE

A warm welcome to our 22nd annual on property Bull and Female Sale.

For many 2020 will be a year they would like to put behind them. The way we live and conduct business was altered by COVID-19. It created an interesting time with a slowdown, a lock down, a winding back of the wheels of industry. Throughout the ordeal those of us in agriculture can be grateful for being involved in this important industry. Many being fortunate enough to be able to continue to work and further our enterprises.

The saying that something good always comes out of something bad may have relevance here. If you could credit COVID-19 for one positive thing it may be that it forced the fast-paced 24/7 365 world to slow down, allowing people to take stock, to reassess. It enabled people in many cases to spend more time with immediate family and highlighted more of what is important, friends and family. It seems the world paused for a moment and I hope this in some way will hold us all in good stead as we enter this new year.

2020 also saw the strength of the cattle market rise to a new platform of pricing. The flow on effect being some incredibly competitive and healthy bull sale results last spring highlighting the confidence that underpins the industry.

Since our last sale there have been some highlights. Among them attending the Rosedale Sale in May for the first time in 9 years and securing three sires for our young female programme. It was great to see James and the Millner Family programme progressing so well.

Our connection with Palgrove Charolais continued when they purchased our top price bull last sale, Mount William Plumb for \$18,000 via Auctions Plus. Ben Noller had made the trip down to inspect the Bulls prior to this. This Mt William Sire was the high selling Bull in Victoria for 2020. Victorian sales last year averaged \$6052 for Charolais Bulls.

It is worth mentioning Palgroves incredible auction result in September when they Averaged \$19,766 for 94 Charolais Bulls topping at \$64,000. This sale ranked in the top sales for all breeds in Australia. Five Hannibal sons sold in this sale topping at \$26,000. Hannibal is still going strong at Mount William rising 9-year-old. We have some standout Hannibal bulls in this year's sale. We have some exciting Palgrove genetics flowing thru in the next few years in Palgrove Moderator and Palgrove Nitro progeny.

At home we have had an incredible season. La Nina brought us good late winter and spring rains and they have continued! It is amazing to see clover still hanging on in some of the pastures at Christmas time. Our cattle look magnificent, right across the board. We weaned our calves just prior to Christmas with the top Bull calf coming off his mother at 491kg. The whole draft, including bulls and heifers, averaging 383kgs.

This year we present 40 smooth growthy performance 2-year-old bulls featuring a good spread of bloodlines. Including Palgrove Hannibal, JWX Downtown, Mt William Lizzard, Silverstream Geddes, Mt William Kakadu, Waterford Loyal and Rangan Round up. In addition, 5 quality yearling Bulls by Palgrove Nitro.

As well as our strong selection of bulls we have a neat line up of heifers stacked with the latest Mt William Genetics in their pedigrees. A line up of 19 PTIC Refined Heifers and 6 proven breeding females PTIC to new sire Rosedale Puma. We think highly of Puma and anticipate the progeny from these females to be of a high standard.

We will be selling under the usual conditions; that is on property at 1pm on the second Friday in February and via Auctions Plus. We will be following all government directions with regards to COVID-19 protocols.

We would like to take this opportunity to thank all past and present clients for there support. Without your support we cannot invest and back ourselves in this industry. At Mount William we work hard to bring you leading Charolais genetics and to breed the types of cattle that are both versatile and performance oriented to help you improve your bottom line. We still get paid on weight in the cattle game, and Charolais are continuing to do a fantastic job at enhancing profitability in the beef industry.

Finally, our hearts go out to all who have lost loved ones during the pandemic. And we would like to take this opportunity to remember a wonderful mother and grandmother Dianne Mary Lloyd (Victoria's Mother) who passed away in March. She attended our field day some years ago and always showed an interest in the Mount William Sale.

If you have any queries of any kind, we would love to hear from you. We wish you all the best for 2021.

Rob, Victoria, Hugo & Rupert

ACCOMMODATION

SHEARERS QUARTERS

On Property accommodation:

There are 8 refurbished rooms available to rent thru Air BnB. Hot showers and communal breakfast room. Please visit Air BnB for details or contact William Abbott on 0448 886 258 or email willabb@gmail.com

RED GUM COTTAGE

On Property accommodation:

Stunning country style modern 2 bedroom cottage fully furnished available to rent. Continental breakfast provided. Please visit Airbnb for details or contact Victoria Abbott on 0499 039 090 or email firetrap22@hotmail.com

ALTERNATIVELY, Ararat is approx 30 minutes away and Halls Gap in the Grampians is approximately 40 minutes away. Both have a wide variety of accommodation. Well worth a visit.

CONDITIONS OF SALE

- All animals will be offered at auction. If not sold, they will be retained by the stud.
- Inspection any time before the sale can be arranged with Rob Abbott.
- Telephone bidding available by contacting Agents Ross Milne or Shelby Howard, prior to sale.
- Registration transfer fees are the responsibility of the vendor.

AUCTIONSPLUS: The sale will be interfaced with AuctionsPlus. Before you can bid in an auction, you MUST be registered. Registration and connection to an auction over the internet is completely FREE! Please ensure you register at least 2 business days prior to the sale. Visit the AuctionsPlus website for more information – <http://auctionsplus.com.au/>

FERTILITY GUARANTEE: Bulls are sold as fertile and capable of natural service. All bulls are semen tested and reproductively structurally assessed by AB Nationwide. Any claim on a bull must be made within 12 months after sale date and be accompanied by a Veterinary Certificate. The Veterinary report must state that, the bull has not suffered any injury or maltreatment which could have affected his breeding ability since delivery to the purchaser. Bulls which do not breed will be replaced by an animal of equal value or a credit less salvage value at the next sale. This clause will be strictly adhered to. Strictly no cash refunds. We are only too happy to assist you with your selection. 2021 Sale heifers are due to calve August / September 2021.

All females are sold as guaranteed breeders. Where a Purchaser submits a Veterinary Certificate to the Vendor within 12 months of the date of sale, that a female of joinable age is infertile and in his/her opinion has not suffered any injury or maltreatment which could have affected her breeding ability, the Female will be replaced by an animal of equal value or a credit less salvage value at the next sale. This will not apply where an attempt has been made to transfer embryos from the female. All Heifers will be pregested via a scan prior to sale day. Certificates available. PTIC does not guarantee a live calf. A small percentage of heifers will absorb a pregnancy and Mount William Charolais are not liable in the event this occurs. An arbitrator appointed by the Auctioneers will settle any dispute.

HEALTH: The Mount William Herd is J-Bas 8. All Animals have been drenched and vaccinated with 7 in 1, Pestiguard and Vibrio in accordance with the Pfizer STAR BREEDER program. All sale Bull have been tested negative for Pesti Virus. The Mount William Herd has been tested negative for Pesti Virus. If you are concerned about the presence of Pesti Virus in your herd we suggest you consult a vet regarding a vaccination programme. All animals derive from an accredited Free T.B. and Brucellosis Herd. Any test required by interstate purchasers will be done at Mount William, at costs to the Vendor.

DELIVERY: Transport will be the responsibility of the Purchaser. Mount William will work in conjunction with McEwan's Livestock Transport to reduce transport costs to purchasers. Please speak to us or our Agents about your transport requirements.

INSURANCE: Insurance is available. We encourage you to consider insuring your purchase. Please speak with either Elders or Charles Stewart Dove Agents.

REBATE: The Vendors agree to a rebate of 3% to outside agents who attend the sale or buy on behalf of their clients and settle within 7 days. A rebate of 1% to outside agents introducing approved buyers to the vendor prior to the sale and settling on their behalf within 7 days. Phone call, text message or email must be received prior to the sale.

PLEASE NOTE: This catalogue has been compiled with all due care and attention, however we or our agents cannot be held liable for the accuracy, use or interpretation of the information in this catalogue. People entering the property for the purpose of the sale do so at their own risk.

**Mt William Charolais
Annual Bull & Female Sale**

**Always on the second
Friday in February.**

Estimated Breeding Values (EBVs)

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Direct = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Domestic Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- **less than 50%: Low accuracy.** EBVs are preliminary and could change substantially as more performance information becomes available.

- **50-74%: Medium accuracy.** Usually based on the animal's own records and pedigree.

- **75-90%: Medium-high accuracy.** Some progeny information included. EBVs may change with addition of more progeny data.

- **more than 90%: High accuracy** estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

Trait Leader for EMA, Trait Leader for IMF. Top 1% for Rib Fat, Top 5% for 400 & 600 day weight, Carcass Weight, Milk and Calving ease daughters. Top 15% Gestation Length, Top 20% for 200 day weight and Scrotal size. A phenomenal set of EBVS to back his on ground performance.

COMMENTS: Hannibal was one of the sale features in Palgrove's 2014 sale. He is a polled red factor ET bull by Canadian National Champion PCC Sudden Impact. His donor Dam produced 6 sons, sold to Australian Studs for a \$23,000 average. He has an exceptional pedigree, is a sensible mature size with natural thickness, plenty of softness and a sleek coat. His growth and carcass EBV's are outstanding. Hannibal's notoriety has grown significantly in the past two bull selling seasons. 20 of his sons averaged \$10,850 at Mt William and in 2017 six sons averaged \$19,000 and topped the sale at \$40,000 at Palgrove. Hannibal is one of those bulls who simply breeds true to form, above expectation, and has proven to be a standout for the modern Charolais breed. Hannibal's genetics are sought after and made their way to New Zealand in 2019.

SILVERSTREAM T89 083020089B (OAN T89B)

COMMENTS: Geddes has proved to be very successful export sire for the NZ stud Silverstream Charolais. His semen was exported to Canada following in the footsteps of Silverstream Evolution. Geddes sired two of the highest priced bulls in Canada in 2015-16 Sos Chuckwagon and High Bluff Casanova. Geddes continues to be a major seller for Semex. We used Geddes in our AI programme for his bone and thickness and have been very impressed by his progeny, heifers and bulls.

Pictured: Blelack Digger, Sire of Kakadu.

COMMENTS: We retained Kakadu from our 2014 drop of bulls. His Sire Digger produced our top selling bull in 2016 at \$17,000. He was chosen for his conformation, clean front end, power and muscle content. His Dam E107 is a beautiful polled Boss female who delivers consistent quality progeny. Kakadu has three drops of calves on the ground and we have been suitably impressed with his progeny. He is a very powerful bull with substance who moves well and has always had a good temperament.

PALGROVE RECKON 64 (PK D326E)

COMMENTS: Nitro was purchased as a yearling from Palgrove in 2018 for \$13,000. His Sire Palgrove Justice was retained by Palgrove as one of the best Silverstream Evolution sons they had bred. Nitro has plenty of substance, good polled Sire appeal and structure. We have used Nitro over heifers successfully and are really happy with his progeny. 5 yearling bulls on offer are all sired by Nitro.

WATERFORD CHIFFON C20 (WET C20E)

COMMENTS: Loyal was purchased as a top priced bull in the 2017 Southern Breeders Sale. His Sire Palgrove Hermes has bred exceptionally well for Waterford and Loyal's half-brother Waterford Neon Lights was crowned Supreme Charolais exhibit at the 2019 Royal Melbourne Show and went onto to win Interbreed Senior Champion Bull. Loyal has a good frame, clean front end, good skin and a good temperament. He is breeding well, producing both quality bulls and females for Mount William.

PARINGA TOP GRADE J308 (TOL J308E)

DAM: ROSEDALE RUBY L22 (MR L22E) (P)

ROSEDALE RUBY F17 (MR F17E) (P)

COMMENTS: Rosedale Puma was purchased in May this year for \$11,000. He is an impressive thick, deep soft bull, with a lovely polled outlook combined with an amazing set of EBV's. His sire Ascot Knightly was purchased by Rosedale for his carcass attributes growth and intramuscular Fat. Puma was joined to Heifers this season at Mt William and is the joining sire for this year's PTIC females.

PALGROVE BELLE 21 (PK P158D)

COMMENTS: Roundup's first drop of bulls and heifers hit the sale ring in our anniversary sale in 2019. He was the standout and top priced bull in Rangans 2016 bull sale. We purchased him originally to go over heifers but he has developed into a formidably powerful sire. 48cm scrotal at 22 months an incredible set of EBV's he has a number of grunt'y sons in this years draft. An exciting sire who is leaving a great drop of females in the herd.

MOUNT WILLIAM QUINCEY (AI) (P)

TATTOO: BS Q30E

DOB: 13/03/2019

COMMENTS:

A cracking Downtown Son, the first offered by Mt William. He is long and smooth and has a fantastic disposition. Quincey is Medium Maturing well-muscled polled bull who oozes quality. In June, a Downtown Son topped the Silverstream Charolais Sale in NZ at \$26,000. Downtown had limited release in Australia and Mt William were fortunate enough to secure semen. **Homozygous Polled.**

MOUNT WILLIAM QUAKE (P)

TATTOO: BS Q50E

DOB: 19/03/2019

COMMENTS:

This is a seriously high quality bull. Hard to fault, he is thick, balanced, has a lot going for him. Genetically he is an impressive outcross drawing on the raw power of Scottish bloodlines in Digger, combined with one of Mt William's top cow families which goes all the way back to Palgrove Quintero. Early maturing, powerful, long, deep and thick set. An impressive bull; hard to let go of. Semen share retained. **Homozygous Polled.**

MOUNT WILLIAM QANTUM (P)

TATTOO: BS Q157E

DOB: 15/04/2019

COMMENTS: A very stylish bull. A white Hannibal son with plenty of appeal and great sire outlook. Smooth shoulders and a great balance of power. Hannibal's genetics in combination with G157's credentials including 7 progeny in 7 years with heifers sold to studs and consistent high performance bulls. As a calf we noticed him and followed the journey. We think he has all the background to breed well in any situation. We retained semen from this bull as we felt he displayed all of Hannibals credentials in a moderate yet powerful package. An early maturing, thick set, well muscled easy doing smooth bull not to go past.

Acc	61%	52%	57%	55%	54%	51%	+\$37	+\$61	+\$33	

COMMENTS: A thumping Geddes son who was top weaning weight as a calf and has been consistently the heaviest in the draft at various weight intervals. Out of a larger framed Dam Quail will add that extra frame and no shortage of bone to his progeny. He has a good disposition big scrotal and will put that traditional Charolais constitution into his progeny. High fat and good IMF raw data.

MOUNT WILLIAM KIAMA K34 (P)

TATTOO: BS K34E

DOB: 14/03/2014

COMMENTS:

Kiama is a beautiful deep long smooth bodied cow. Refined front, good structure. A productive cow. On the dams side she goes back to V13E one of Mt Williams best cows. A 6 year old cow, 5 calves in 5 years.

MOUNT WILLIAM MINI GUN (R/F)

TATTOO: BS M60E

DOB: 25/03/2016

COMMENTS:

A neat well fleshed, well balanced productive cow, that would slot right into any herd. A red factor cow, a great genetic blend with Hannibal and E90 on the Dam side. She was from a great line of Rosedale Boss Females who were in the top performing females in the past decade at Mt William. A 4 year old cow, 3 calves in 3 years.

MOUNT WILLIAM NATASHA N39E (P)

TATTOO: BS N39E

DOB: 20/03/2017

COMMENTS:

Natasha is a feminine neat, refined fronted female that will develop further. Her sire E-Tag had terrific structure. Her Dam is a prolific breeder with 7 calves in 7 years. She is a 3 year old cow having had one calf. Great Future Potential.

PTIC to Rosedale Puma.

MOUNT WILLIAM MIFFANY (P) (R/F)

TATTOO: BS M140E

DOB: 16/04/2016

COMMENTS:

An extremely long, deep, red factor Hannibal daughter with a refined front end. She is a classy outfit. On her Dam side plenty of quality including Palgrove Yemen and Talgoona V8. A 4 year old cow 2 calves in 2 years.

PTIC to Rosedale Puma.
