

The Dorper Sheep Society of Australia notified Burrawang Dorpers and White Dorpers that use of the word 'Indicative' should be replaced by the word 'Possible' in reference to the rams in this sale, who were 2-6 weeks shy of 10 months old when inspected and therefore not eligible to be officially typed, as explained in the introductory pages of the catalogue.

While online listings have been modified, the following PDF catalogue and print catalogues were already produced and in circulation prior to notification, so continue to include 'Indicative' rather than 'Possible'.

# Burrawang

**DORPER & WHITE DORPER STUD**

*COMMITTED TO BREED EXCELLENCE*

## **17th On Farm Sale**

Monday March 22 2021 11am

Inspections from 9am

## How to Purchase Online

[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

To facilitate online purchases, Burrawang's On Farm Sale will be interfaced with AuctionsPlus. AuctionsPlus requires that all new registered AuctionsPlus buyers complete Buyer Induction Training prior to bidding. AuctionsPlus recommends that all intending bidders have completed their registration and training 24 hours prior to auction.

For more information, visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au) and look for this symbol

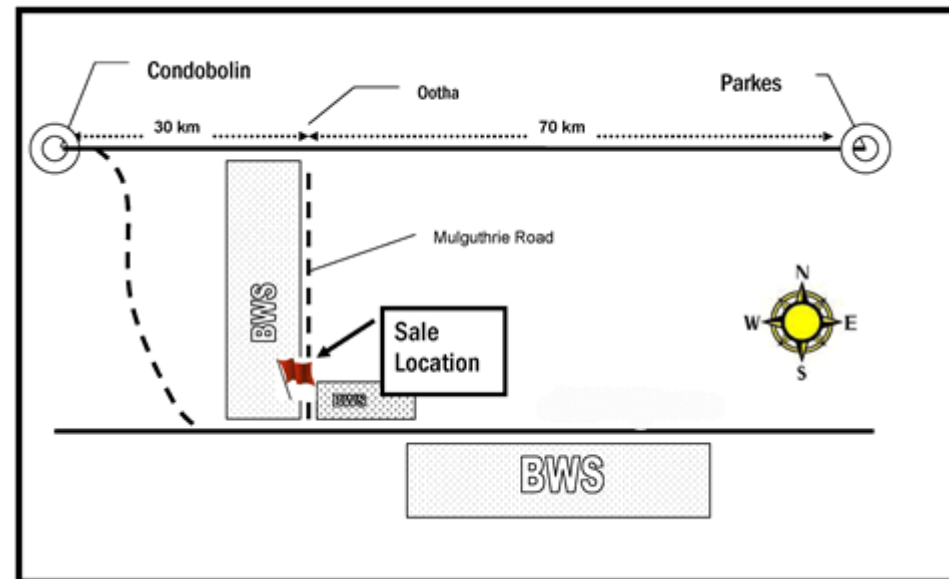

## Attending In Person

### Covid Safe Sale

For the protection of all attendees, Burrawang's On Farm Sale will be conducted in compliance with relevant Covid-19 safety regulations and requirements in effect on the day of the sale as managed by BR&C Agents under the agency's Covid Management Plan. Interstate attendees should check with their state authorities to ensure compliance with travel requirements or restrictions.

### Sale Location

Burrawang Dorper and White Dorper Stud is located on Burrawang West Station, in central NSW and the sale arena is at 314 Mulguthrie Rd Ootha NSW.

## Sale and Referring Agents

BR&C Agents will conduct the sale; contact Darren Old on 0459 980 591 for more information. A 5% commission is available to outside agents who refer buyers in writing at least 24 hours in advance of the sale. Notice can be made via email to [dold@brcagents.com.au](mailto:dold@brcagents.com.au).

## Burrawang Contacts

For more information about Burrawang Dorpers and White Dorpers contact Mal Brady on 0428 500 027, Graham Pickles on 0418 112 888 or Stud Master, Wicus Cronje on 0475 892 862.

## Purchase Pick Up and Deliveries

Buyers attending the sale in person are encouraged to take purchased rams with them at the conclusion of the sale. For those buyers who are unable to do so and for online buyers, please contact Mal Brady on 0428 500 027 in advance of the sale or as soon as possible thereafter, to organise pick up from Burrawang West Station. **All rams are to be picked up by Friday March 26 2021. All due care will be taken for the safety and health of your purchased rams prior to pick up however, to protect your purchase, you may wish to consider insuring your rams from the conclusion of the sale on March 22.**

## About Burrawang Rams

### Quality Control Process

Burrawang uses an uncompromisingly strict standard of quality when selecting animals offered for sale. Our quality control standards are applied throughout each animal's life to ensure animals offered for sale meet the Breed Standard of Excellence for structural correctness and carcass quality. **Only the best of the best rams are on offer at our On-Farm Sale.**

### Independent Typing, Indicative "Typing" and Catalogued Comments

This group of sale rams were independently inspected by Australian and South African qualified breed inspector, ***Philip Van Schalkwyk***, on February 27<sup>th</sup>, 2021. The result of Mr Van Schalkwyk's inspection of each animal is reflected in the top right corner of each listing in the catalogue. Though most animals in the sale are now old enough to be officially typed, some were too young by 2 to 6 weeks, to be officially typed according to the breed standard on February 27<sup>th</sup>. Mr Van Schalkwyk inspected all rams on the day, approved them for sale, typed those old enough to be officially classed and provided an indication of quality for those too young to be officially classed on the day. Unofficial indications are included as "Indicative Stud T5", "Indicative Stud T4" and "Indicative Commercial T3".

## **Performance Measurements**

Weight, eye muscle depth and rib fat depth included in each animal's information, were measured by Sheep Genetics (LambPlan) qualified scanner, Trevor Pearce at various intervals including early post weaning (EPW) or post weaning (PW) and on February 27, 2021. EPW is defined as 120 to 210 days old while PW is defined as 210 to 300 days old. Average daily weight gain (kg) is provided for the period between each weighing as indicated by ADG (kg/day). Age at time of measurement is provided in the catalogue.

## **Eye Muscle Shape**

With the assistance of Sheep Genetics qualified scanner, Trevor Pearce, Burrawang has been recording the shape of our animals' eye muscles as well as eye muscle depth (EMD). While eye muscle depth is a good indicator of carcass quality, the shape of the muscle is equally important to meat yield. Shape is scored from 1 to 3 with 3 indicating the most productive shape.

Our stud and commercial breeding selections now incorporate this important production indicator. Each of the rams on offer was scored by Trevor Pearce and the score is shown in the information for each lot.

## **Super Breeder Dams**

One of the many significant production advantages provided by Dorpers, is the rate at which the breed can reproduce. As non-seasonal breeders, Dorpers can produce at a faster rate than seasonal breeders. To ensure our stud flock performs at the rate expected of the breed, most of Burrawang's stud production is based on multiple sires, natural, group joining; much like commercial joining.

This allows us to validate how well each ewe naturally performs. To maximise production, the ability to reproduce quickly is important, but so is the ewe's ability to raise her lambs. We track both capabilities along with other qualities and performance measures.

Within the pedigree tree of some Lots, blue text appears to indicate that the dam is a known "Super Breeder". This designation is based on natural joining only so does not include artificial joining, such as Artificial Insemination or Artificial Insemination for Embryo Transfer, to most accurately represent the ewe's abilities. To be designated as a "Super Breeder", the ewe must have lambed each time she was joined and raised all lambs born. In addition, she must meet at least one of the following criteria: had multiple births in 2 consecutive years, had 2 multiple births and a single birth in 3 consecutive years, lambed twice within 7 months, or lambed three times within 18 months.

Not all dams in the catalogue have had the opportunity to become a "Super Breeder" so lack of designation as such, is not necessarily an indicator of underperformance.

## **Working Rams**

Some of the rams offered for sale were used as sires in recent stud and/or commercial joinings. It is our policy that all rams offered in our On Farm Sale are tested prior to sale; **all tested negative for Ovine Brucellosis in February 2021.**

## **Health, Presentation and Ready-to-work Condition**

- To ensure the animals are healthy, all of them received Glanvac® 6 in 1 vaccination at tailing, weaning and at prescribed regular intervals including on February 27<sup>th</sup>, 2021. On that same day, the rams also received Cydectin® Plus Tape drench.
- Burrawang's flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring 2/28/22.
- Burrawang's OJD status is MN1; clear of OJD with certificate NS21021.
- To facilitate assessment of conformation at sale, unless otherwise noted, most rams were shorn in late August 2020.
- Rams are presented in good condition with a healthy amount of body fat so they are ready-to-work.

## **Satisfaction Guarantee**

Burrawang is committed to customer satisfaction. These rams are guaranteed fertile so you can buy with confidence. We are happy to guarantee your satisfaction with either money back or a replacement.

## Lot Layout Guide

He's just as meaty as his sire, PHILL, and is going to grow out into a very big ram. He'll really do well for commercial farmers by producing meaty, strong growing, fat lambs. His wean weight and PW EMD are in the top 20% of his peer group. Used recently in commercial joinings, his dam is a "Super Breeder" and he's 1 of 3 rams on offer sired by PHILL, a proven sire also on offer.
