SALE INFORMATION

VENDOR'S WARRANTY

- All Sale Bulls and Females are fertile.
- Bulls are capable of Natural Service.
- Where disease or injury occurs after leaving the sale, which causes infertility or
 inability to serve, or in multiple mating situations, this warranty does not apply.
- Any claims to fertility to be accompanied by a veterinary certificate within 10 months. Each vendor reserves the right for a second independent veterinary opinion at the vendor's cost.
- All other claims or issues causing problems are warrantied for up to three years. For terms and conditions please speak to individual vendors.
- This warranty does not replace an insurance policy and we strongly recommend you insure your purchases.

REBATE: 4% rebate to outside agents accompanying their clients (Commercial 1%).

INSURANCE: Please note: Purchases from any Stud Sales are **not covered** under your Elders Vendor/Purchaser Transit Scheme. If you want cover **make sure you insure under a Stud Stock Policy.**

RAW DATA: Scanned on 17th November 2020 with Max Bowman.

INSPECTIONS: Welcomed from **12pm** on sale day or prior to sale by contacting the vendors.

FREE FREIGHT: Of 150 kms from the Arki property, on all bulls. Where multiple bull lots are purchased to the same district, we will freight 150 kms per bull.

BUYER'S INSTRUCTION SLIP: Must be completed by all successful purchasers and registered with the selling agent on completion of sale or **No delivery.**

TRANSFERS: All registered lots will be transferred to the respective purchaser free of charge.

WHEN COMPARING BREEDS OUR EBV FIGURES ARE ONLY FOR WITHIN THE MURRAY GREY BREED

EBVs are a tool that will help you to make more thorough decisions when you are choosing breeding stock. In this catalogue you have access to EBVs for fertility, weight for age and carcase. The best way to make sure of this information is firstly to decide YOUR breeding goals and secondly to select animals with EBVs that match those criteria. Most importantly inspect each animal visually to see if it conforms to your criteria for structural soundness.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for damage. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth.

200-Day Growth EBV (kg) This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

GREEN TRIANGLE SALE

We welcome you to our 11th Annual Green Triangle Sale, a joint venture between two siblings. Geoff & Kate Buick of Arki, established in 1973, and Anthony & Denise Fabris of Beeamma, established in 2002.

Well this past year has been very tough, with Covid-19, emotional and time consuming looking after Dad, and unfortunately in November we lost Dad to his battle with cancer. Luckily the season has been very good, and the sale bulls look good.

We will be interfaced with AuctionsPlus again. So login to www.auctionsplus.com.au or come to the Arki property on 31st March.

This year's draft of sale bulls display magnificent phenotype and presence while showing great carcass traits. Their physical shape and style is well backed up by some outstanding data.

If you want high growth bulls with some grunt, there are bulls with 600 day growth better than top 1%, 200 and 400 day growth better than top 5%. For all your heifers or calving easy needs we have Birth weight as low as +2.5 while breed average is +3.6 along with gestation length in the top 1%. For breeders running self-replacement herds we have milk figures to top 5%, scrotal size to top 1% and for those concentrating on carcass we have Retail Beef Yield at top 5%, EMA at top 5% and 8 bulls with positive fats. This means we have sires to cover most markets.

The genetic packages on offer are very diverse with 11 sires represented in 26 bulls. We use a selection of top end older and young sires by AI.

The commercial heifers are also looking good, starting to heavily spring up now they are due to calve from the 15th February onwards.

So why not shop at the Green Triangle Sale where all the risk is removed — you get great genetic diversity along with performance data to suit all markets.

We look forward to seeing you at the Green Triangle Sale on Wednesday March 31st if allowed, otherwise you can shop on AuctionsPlus and we will meet you on delivery of your purchases.

All cattle are fully guaranteed for structural soundness and fertility, have a J-BAS score of 6 and tested negative for Pesti Virus, plus vaccinated with 7 in 1 and Vibrio. They are sire verified DNA tested, so you can buy with confidence.

If more testing is needed this can be arranged before traveling starts.

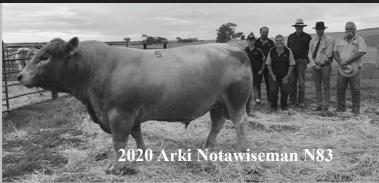

For more information and enquiries please contact

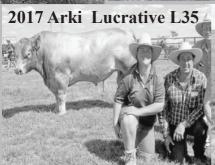

Geoff and Kate Buick 0438 582 071 arkimg@bigpond.com Denise and Anthony Fabris 0407 566 341 beeamma@bigpond.com

We do a lot more for your cattle.

Elders markets more than 2.3 million cattle each year and offers a full range of animal health products and services to ensure the most productive stock. When it comes to selling, we also offer the

- Traditional Auction offers access to regular sales with extensive competition, with quick and secure payment of sales proceeds.
- Over-the-hooks Elders association with key processes presents a variety of over-the-hooks (OTH) options for producers.
- On-Property/Private Sale Producers have the ability to minimise risk through Elders obtaining a price for livestock on-farm with prompt delivery payment at the agreed price upon delivery.

- Feedlots Elders operates feedlots in NSW (Killara), and Victoria (Charlton), with 85-90% of the cattle passing through them marketed on back-to-back contracts.
- Auctions Plus Electronic selling system for livestock that offers national competition, allowing buyers to log into and participate in the live sale, anywhere in Australia.
- Forward Contracts Elders forward contracts are available for feeder cattle and over the hooks grades, for all NSW, VIC & SA producers (subject to timing and availability).

For more information on any of these selling options please contact the team at Elders Naracoorte on o8 8762 2022.

What makes your new sire good value for money?

When looking to purchase a new or replacement sire for your enterprise, there are a couple of decisions you need to make. First you have to choose a bull or bulls which suit your business, incorporating key points, e.g. structure and desired industry traits which can improve the profitability of your herd.

With that done we now come to the hard part of the process, "what is the value of your new sire?" Look we would all like to buy the best animal possible for the cheapest price, but buying your new sire on price only can cost you thousands, as you can get a bull which does not suit your cows sending your enterprise backwards.

A good rule of thumb is your new sire will be cheap or good value at the cost of 5 to 7 of your calves.

For example: Your bull is used over 40-50 cows/year for 4 years with a conception rate of 92%, therefore producing 148 to 184 calves over his 4 years of working life (making 5-7 calves very good value for your new sire).

Or, you're only a small breeder owning 10 or less cows, therefore your bull could last between 8 to 10 years of working life with a conception rate of 95%, so producing 76 to 95 calves (still making 5 to 7 calves very good value for your new sire).

Now with this in mind you will probably have more chance of purchasing your first choice of the bulls on offer?
