2021 NARACOORTE SHORTHORN BULL SALE

FEATURING 57 PERFORMANCE RECORDED BULLS
VET CHECKED, SEMEN TESTED, AND ZOETIS STAR ACCREDITED

Sale Thursday 25th March, 2021 at 1.30pm

Pathfinder Sale Complex, Tivers Road

18km west of Naracoorte off the Naracoorte Lucindale Road (follow the signs)

Please bring this catalogue to the sale

www.shorthornbeef.com.au

2021 Naracoorte Shorthorn Bull Sale

All vendors aim to maximise the reproductive integrity and health of their stud stock by adopting the STAR program - this is **Steps Taken Against Reproductive disease**.

Each STAR certified animal in this catalogue has been

- ❖ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ❖ Vaccinated against BVDV to ensure they are protected to the effects of this infection
- ❖ Vaccinated against Leptospirosis, a potential reproductive and WH&S risk for cattle handlers
- ❖ Vaccinated against Vibriosis, a sexually transmitted cattle disease
- ❖ Given 2 vaccinations to ensure they have immunity established prior to leaving these premises
- ❖ Issued with a STAR certificate – valid for 12 months

You can be confident that every step has been taken to ensure that these animals presented for sale will not introduce preventable reproductive diseases into your herd.

For more information contact Gary Glasson - 0418 812 457.

Sale will be run in strict compliance with current Covid-19 protocols.

2021 NARACOORTE SHORTHORN BULL SALE

SALE TERMS & CONDITIONS

HEALTH All herds have a J-BAS 6 or better score. All bulls have been vet checked and semen tested. Bulls have been vaccinated with 7 in 1 Vibriovax & Pestiguard as per Zoetis STAR program.

BULL GUARANTEE It is a condition of sale that Vendors warrant that all bulls are to be sold as fertile and capable of natural service within 6 months of the date of the sale;

The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 12 months of the sale date:-

- a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. The bull is infertile or incapable of natural service;
 - ii. There is no evidence that the bull has suffered any injury or illness subsequent to being sold to the Purchaser which could affect his breeding ability
- b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

NUMBERS SYSTEM TO APPLY Prospective buyers and their agents must register for a buying number prior to the commencement of the sale.

- **DISCLAIMER** The Committee and/or their agents do not give any warranty as to errors and omissions if any in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.
- **PUBLIC LIABILITY** Any person attending the sale does so at his/her own risk. All persons attending the sale release the Committee and vendors from all actions and demands due to any loss, death, damage or injury occurring on the premises. The Committee and vendors are not responsible and have no liability for any death, or injury to any person or any loss of, or damage to any person attending the Sale, their property or otherwise.
- **INDEMNITY** All persons attending the sale agree to indemnify the Committee or vendors from and against any liability, loss, damage, expense or claim which the Committee or vendor may incur, including to a third party, during or after the Sale in all respects.

OUTSIDE AGENTS REBATE A 3% rebate is offered by the vendors to all outside agents who register in writing 24 hours prior to the sale, purchase and pay within the terms of settling agent.

THANK YOU TO:

**Castec for donating the product awarded to the buyer of the highest priced bull.
Zoetis for donating product awarded to a buyer in the lucky draw.**

UNDERSTANDING IGS EPDS

(Please note, EPDs are correct as at February 5, but are updated on a weekly basis.)

MATERNAL EPDs

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDs

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birth weight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birth weight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birth weight.

CARCASE EPDs – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this is requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

COLOUR INDEX

- 1 Red
- 2 Roan
- 3 White
- 4 Red Little White
- 5 Red & White

UNDERSTANDING SHORTHORN IGS EPD'S

The Shorthorn IGS Genetic Evaluation - Powered by BOLT offers a full suite of EPD's for Maternal, Growth, Production and Carcass Traits. IGS is the largest genetic evaluation for beef cattle in the world and IGS EPD's measure the genetic merit of an animals progeny.

SHORTHORN IGS EPD'S EXPLAINED

EPD	MEASURE	TRAITS
CE-D	%	CALVING EASE DIRECT - % OF EXTRA UNASSISTED BIRTHS IN HEIFERS. POSITIVE VALUES ARE MORE FAVOURABLE.
CE-M	%	CALVING EASE MATERNAL - % OF EXTRA UNASSISTED BIRTHS IN 1ST CALVING HEIFERS. POSITIVE VALUES ARE MORE FAVOURABLE.
BWT	POUNDS	BIRTH WEIGHT - POUNDS OF BIRTHWEIGHT.
WW	POUNDS	WEANING WEIGHT - POUNDS OF WEANING WEIGHT ADJUSTED TO 205 DAYS.
YW	POUNDS	YEARLING WEIGHT - POUNDS OF YEARLING WEIGHT ADJUSTED TO 365 DAYS OF AGE.
MILK	POUNDS	MILK - POUNDS OF WEANING WEIGHT OF DAUGHTERS PROGENY DUE TO MILK PRODUCTION.
MWW	POUNDS	MATERNAL WEANING WEIGHT - POUNDS OF WEANING WEIGHT OF DAUGHTERS PROGENY DUE TO MILK AND GROWTH.
STAY	%	STAYABILITY - % OF DAUGHTERS REMAINING IN THE HERD AT 6 YEARS OF AGE. POSITIVE VALUES ARE MORE FAVOURABLE.
DOC	%	DOCILITY - % OF PROGENY RECEIVING A DOCILITY SCORE OF 1 (IDEAL). POSITIVE VALUES ARE MORE FAVOURABLE.
CWT	POUNDS	CARCASS WEIGHT - POUNDS OF CARCASS WEIGHT.
REA	SQ. INCHES	RIB EYE AREA - RIB EYE AREA IN SQUARE INCHES.
FAT	INCHES	RIB FAT - RIB FAT IN INCHES.
YG		YIELD GRADE - UNLIKE RBY%, LOWER YIELD GRADE SCORES ARE MORE FAVOURABLE.
MS		MARBLE SCORE - DIFFERENCES IN CARCASS MARBLE SCORES. POSITIVE VALUES ARE MORE FAVOURABLE.

ALL PURPOSE INDEX

API	\$ PER HEAD	API \$INDEX - SIRS USED IN SELF REPLACING COW HERD WITH PROGENY MARKETED FOR BOTH QUALITY AND YIELD.
RANK %	%	RANK % - EPD RANKING RELATIVE TO SHORTHORN PERCENTILE BAND. LOWER % VALUES USUALLY MORE FAVOURABLE.

UNDERSTANDING RANK %

EPD Values are a critical function, however to use EPD's correctly, it is important to first understand how the EPD Values ranks relative to the breed average. To make this process easier, the Rank % Value is published with each EPD and \$Index and tells you where each value ranks relative to breed average.

With the exception of EPD and \$ Index Values that may exceed or your thresholds for that trait, breeders should concentrate on the Rank % itself, as the critical value.

Supporting your business.

Next time you are thinking about a partner for your livestock business, think Elders. Marketing over 1.6 million cattle and 8 million sheep each year by our livestock specialists located across Australia and overseas, ensures we have access to the relevant information and trends that will affect your business.

Our team will assist you to select the right sales option, whether that be through online or traditional channels, to ensure the best price is achieved. We can also work with you on improving productivity to gain more meat, wool or milk from your stock, as well as sourcing stock or land, or providing finance options to maintain cash flow. That's why Elders is the right choice to help you make more possible.
