

Ladies in Black

Female Sale
March 22nd 2021

OS.

OSullivans

Black Limousin

Welcome

As a family we are really excited to present this opportunity to our fellow Limousin breeders.

This year marks 30 years of involvement with Limousin cattle for us, and we can not think of a better way to celebrate the occasion than to open our herd and offer you the opportunity to access every female older than six months.

We are extremely proud to be involved with and a part of the Limousin breed over such a long time. It has been fantastic to see the breed progress over the years, and no doubt there will be lots of progression to come.

Make no mistake we are not going anywhere, we are going to continue to breed Limousin cattle well into the future. We are too passionate about our cattle and the Limousin breed not to.

In order to continue our involvement we have collected embryos from a number of females that we offer to you. There are five females that we are not ready to part with, so we offer you the opportunity to work with us and flush these females to the bull(s) of your choice. Similarly, there are a further six lots that we offer you the pick of two females with OSullivans retaining the other.

To compliment the offering we have included eight sire prospects. A select offering that in our view compliment the females in this catalogue or any Limousin herd.

It is with great pride that we present this opportunity to you, an offering that has been put together over the past 30 years of breeding Limousin cattle.

Mick

Sale Information

Inspection

All sale cattle will be displayed for inspection from 9:00^{am} - 5:00^{pm} AEST on Saturday 20th & Sunday 21st March 2021, and from 9:00^{am} AEST on Monday 22nd March 2021. Prior inspection can be arranged by appointment with Mick or the agents.

Video Sale

The sale will be conducted via video auction. Videos of all lots will be available at blacklimousin.com.au/sales and AuctionsPlus two weeks prior to sale.

AuctionsPlus

The sale will be interfaced with AuctionsPlus giving those who are unable to be in attendance the ability to purchase online. For details on how to register and bid on AuctionPlus see details on page 8.

Bid Card

Any intending purchasers will be required to register and receive a bid card. This can be completed at sale day office prior to the commencement time.

COVID-19

This is a COVIDsafe event, please see our COVID-19 policy on page 7.

Health

All the sale cattle have been vaccinated with Ultravac 7-in-1 and 3-germ blood. The OSullivans herd is accredited free of TB and Brucellosis and have a J BAS 6 accreditation.

Movements

All sale cattle are eligible to travel to all states and territories except for WA. All sale cattle will have had the required pre-inspection treatments and will be clear of cattle tick. An accredited certifier will be on site to inspect and clear cattle, enabling them to be moved into tick free areas at the conclusion of the sale.

Delivery

Delivery is available at the completion of the sale by arrangement with vendor or agents. Free agistment, at the purchaser's risk, is available until 30th April 2021.

Transport

There will be livestock carriers in attendance. We are happy to assist in the arrangement of transport throughout Australia.

Insurance

Insurance can be implemented at the conclusion of sale, we strongly recommend at least 6 months insurance.

Catering

Food and refreshments will be available at the sale venue throughout the event.

Directions

Search for "OSullivans Black Limousin" in either Google or Apple Maps for directions.

Accommodation

There is accommodation available at Gatton, Ipswich or Willowbank. Both Toowoomba and Brisbane are within a 1-hour drive.

Flights

You will be met on arrival of your flight, provided you contact the agents with your arrival times at least 3 days prior. Commercial flights operate daily to both Brisbane and Toowoomba airports.

Terms & Conditions

The sale will be conducted under stud stock auction terms and conditions displayed at the sale office, and taken to be read.

Disclaimer

Due care has been taken in compiling this catalogue, however responsibility lies with prospective purchasers to determine its accuracy.

Please bring this catalogue to the sale

COVID-19

The health and wellbeing of registered buyers, agents and workers is our highest priority. To ensure their safety, we are advising that entry to the “Ladies in Black” event should be limited to essential attendees, which will be determined by the vendors and agents hosting the sale.

Anyone experiencing cold or flu symptoms are requested to stay away from the facility altogether.

Every attendee will be required to register their attendance with the agents at the sale office before being permitted entry (including all workers). If an attendee’s presence is deemed non-essential, entry may not be granted.

Once onsite, attendees must practice social distancing by creating a 1.5m distance from others, exercise good hygiene. i.e. wash hands with soap and water for at least 20 seconds and use hand sanitiser (which has been placed in key locations).

Visitors from the same household will be permitted to sit beside each other. In all other circumstances the 1.5m distancing requirements will apply.

Additional measures include the availability of disposable gloves and masks and increased cleaning during peak periods.

We recognise that the management of this pandemic is continually evolving, with measure that can sometimes change on a near-daily basis. We will continue to monitor and implement any recommendations and control measure advised by the Australian and Queensland Governments.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

Opportunity to Flush

Lots: 5, 10, 16, 29, & 58

The highest bidder on these lots has the right to flush the respective female twice to the bull(s) of their choice. With the ability to select from the OSullivans sire battery or provide semen prior to the commencement of programming.

Costs associated with the programming and flushing of donor females will be covered by OSullivans, **the purchaser is responsible for all freezing and storage costs incurred.**

A minimum of ten freezable embryos are guaranteed. Should the minimum of ten embryos not be collected from the two flushes, the purchaser has the right to a further flush, or a refund pro rata.

Females will be flushed following calving their current pregnancy, as noted in catalogue.

Pick of Pair

Lots: 1, 8, 9, 17, 18, & 59

The "Pick of Pair" lots each have an "A" and "B" lot.

The highest bidder on these lots has the right to choose which female they would like, with OSullivans retaining the other female.

If you are at the sale, you must nominate your purchase(s) in writing to the agents at the sale office prior to leaving the venue.

If you have purchased via AuctionsPlus or via phone, you have until 11^{am} Tuesday 23rd March 2021 to nominate your purchase(s) in writing to the agents.

OS. Advantage

OSullivans offer a wealth of experience in the seedstock industry; our family has been breeding seedstock for several generations.

We have been breeding Black Poll Limousin cattle for 30 years and have been leaders in the improvement of docility, do-ability and fertility in the Limousin breed.

At OSullivans we specialize in breeding Black Poll Limousin and Bremer Black (Limousin/Brangus) cattle that are commercially relevant in today's beef industry.

We firmly believe cow families are the backbone of any herd; all great breeding bulls come from great cow families.

Therefore, when dispersing the famous Kensal herd we bought back daughters and embryos of the very best cows from the best families to start a small but elite stud herd under the OSullivans banner.

All our females, both cows and heifers, calve unsupervised and unassisted. If they don't, they don't stay in our herd.

We are members of BreedPlan and submit 200, 400, & 600-day weights, docility, scrotal and EMA, Fat and IMF scan data for analysis by ABRI.

We can provide advice on all animal husbandry matters as well as offering classing and genetic selection services.

Breeding Philosophy

At OSullivans we specialize in breeding Black Poll Limousin cattle that are commercially relevant in today's beef industry.

In our breeding program we have set high goals:

- High docility (good temperament) - meaning easy to handle calves that settle quickly and ultimately do better.
- Structural soundness (longevity) - for bulls that service more cows for more seasons and cows that actively produce for longer.
- Fertility - big testicular bulls that get more cows in calf quicker and produce daughters that reach puberty earlier and cycle quicker after calving.
- Weight for age with calving ease - meaning live calves that grow quickly and weigh heavier at market time.

- Muscle and high dressing percentage - for sought after calves at premium prices.
- The ability to finish quickly - resulting in cattle that can take full advantage of seasonal flushes or quicker turn around in the feedlot.
- Well suspended udders with good teat size - meaning sound udders that last longer and teats that calves can easily suckle.

We firmly believe these are the traits that result in easy care cattle which are functional and practical and help to drive a profitable beef enterprise!

OSullivans aim to breed seedstock that have the ability to produce a quality profitable article for the progressive beef producer.

Guarantee

OSullivans stand behind their product 100%. Our clients use our genetics with the peace of mind that we are only a phone call away should it be required.

All our cattle carry the OSullivans client satisfaction guarantee. If you have a problem, we will do our best to fix it, we are only a phone call away.

All lots in this catalogue are registered on the ALBS database and will be transferred to the successful purchaser upon written request.

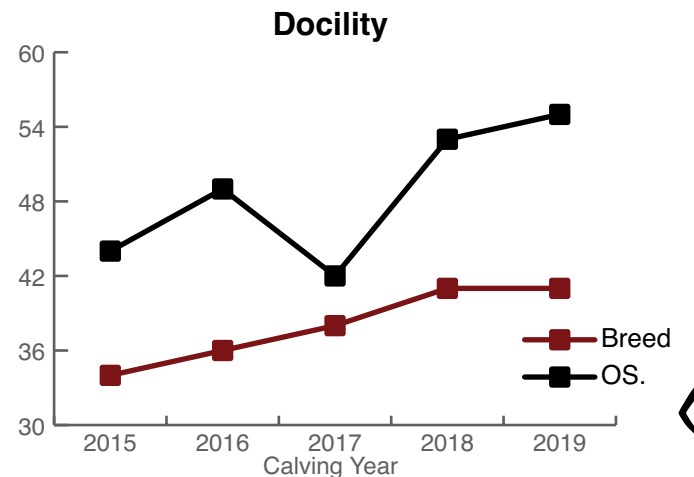

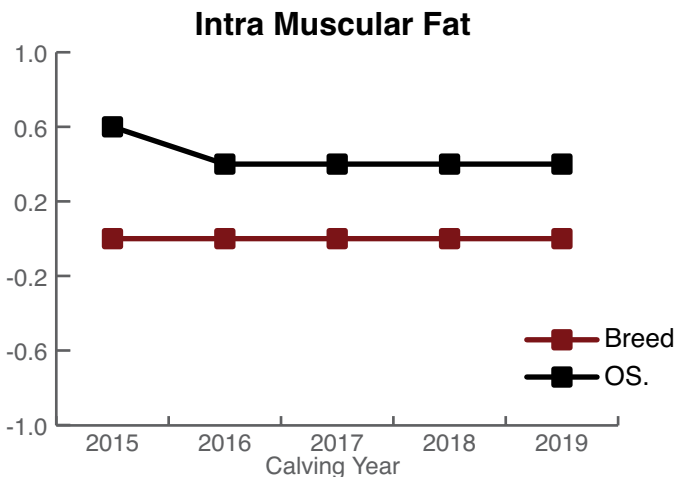

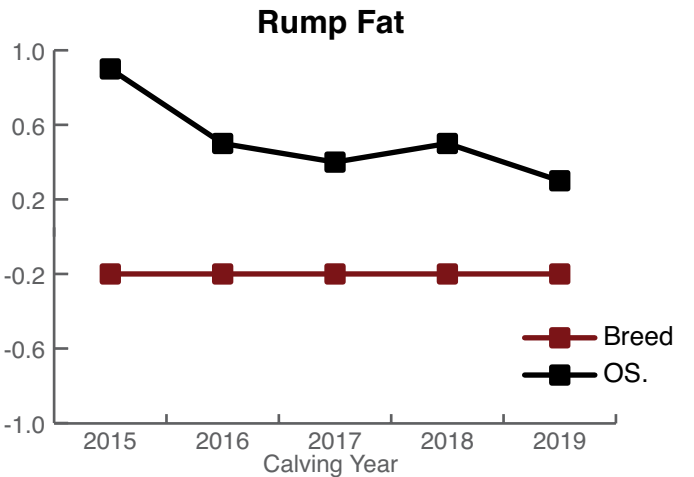

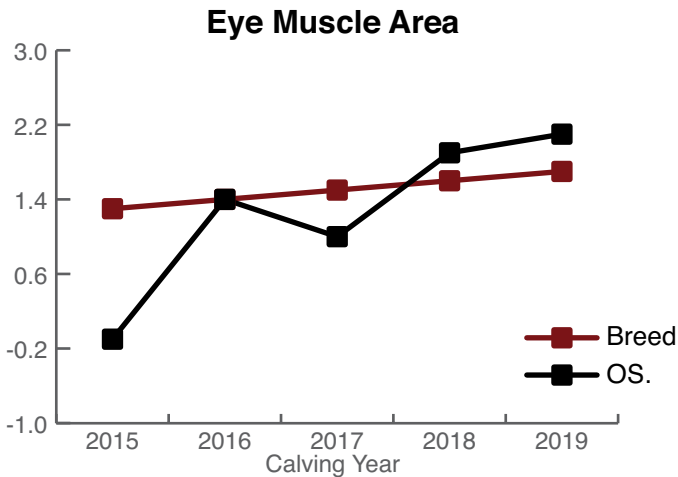

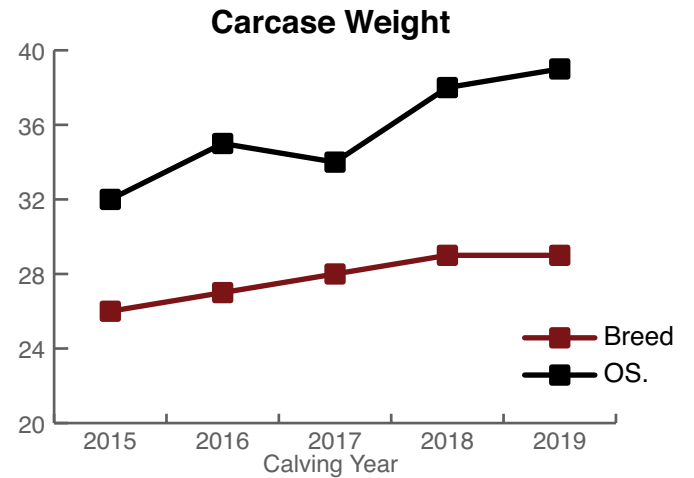

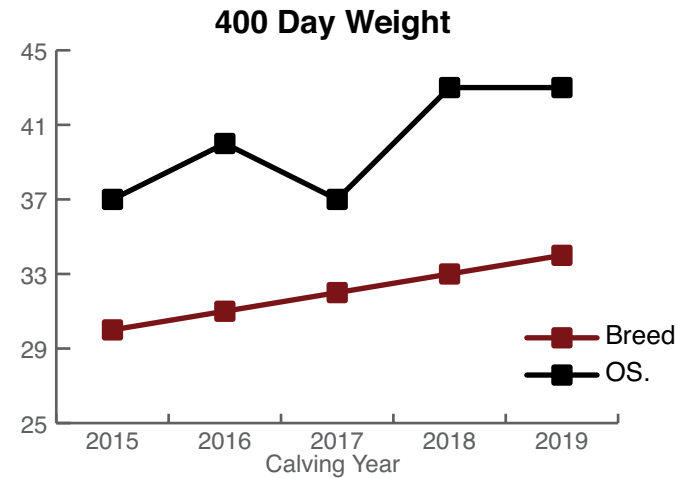

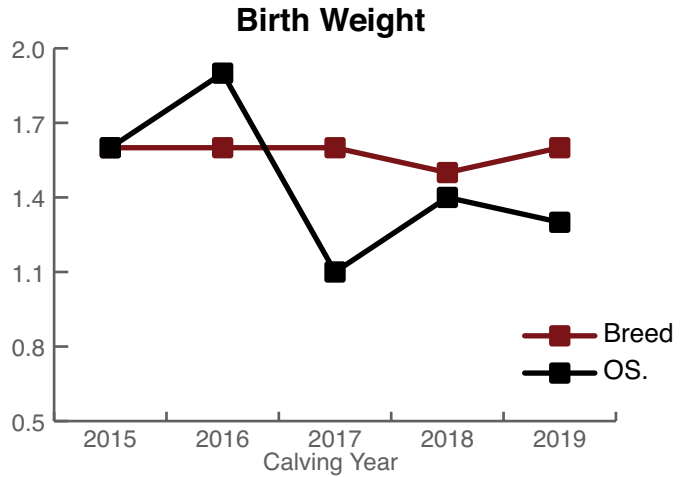

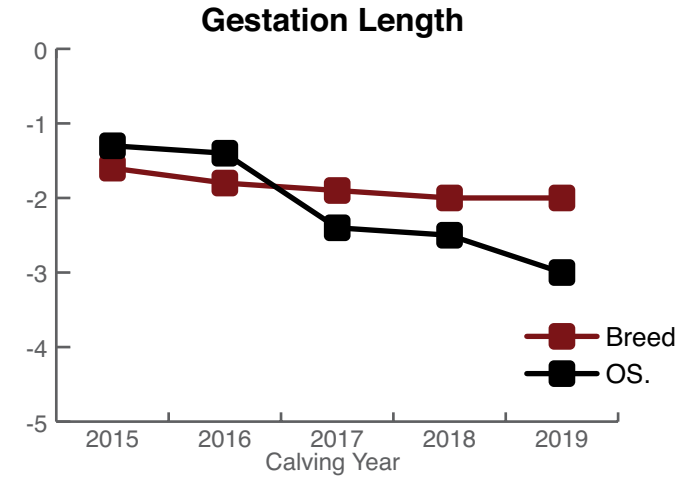

We are members of the Limousin Assurance Program, a breed society backed fertility and docility warranty.

For terms and conditions of the Limousin Assurance Program visit www.limousin.com.au

OS.

Genetic Trends u Breed

Technical Information

UNDERSTANDING EBV'S

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBV's are provided for the following traits:

Gestation Length

Ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBV's and longer by positive EBV's.

Birth Weight

Indicates the genetic potential for birth weight. Positive EBV's indicate higher birth weights and negative EBV's indicate lower birth weights of progeny.

200, 400 & 600 Day Weight

Gives us an estimation of the animal's genetic potential for growth.

Milk

A key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size

Indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase Weight

Ranks animals for carcass weight.

Eye Muscle Area

Ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat

Ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump Fat

Ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Intra Muscular Fat

Ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility

Is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBV's indicate a higher proportion of progeny that will be scored as docile and negative EBV's indicate a lower percentage of progeny being scored as docile.

COMPARING EBV'S

The EBV's for Limousins cannot be compared with EBV's for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

BREED AVERAGE EBV'S FOR 2019 BORN CALVES

	Gest	Bwt	200wt	400wt	600wt	Milk	Scrtl	Cwt	EMA	Rib	Rump	IMF	Doc
EBV	-2.0	+1.6	+20	+34	+47	+7	+1.0	+29	+1.7	+0.0	-0.2	+0.0	+41

ACCURACIES

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

DISCLAIMER

The Estimated Breeding Values (EBV's) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Technical Information

UNDERSTANDING SUFFIXES IN THIS CATALOGUE

Horn Status

(HP) Homozygous Polled by DNA test, (2P) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour

(HB) Homozygous Black by DNA test, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status

(PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PD) Proto Diseased, (PU) Proto Untested.

F94L

(AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

GENE HERITABILITY

Most characteristics of cattle like growth, milk, and fertility are controlled by multiple genes. A few traits such as pollness, and colour are controlled by a single set of genes, enabling the outcome of a particular joining, in regard to these traits to be accurately predicted.

POLL GENE

- An animal that is naturally without horns is called a poll.
- The poll gene is dominant and the horn gene is recessive
- A poll animal can carry a pair of poll genes this is called homozygous poll.
- Or, a poll gene and a horn gene this is called heterozygous poll.
- Some heterozygous animals have scurs.
- A horned (or dehorned) animal carries a pair of recessive horn genes.
- A homozygous poll animal will always pass a poll gene onto its progeny; therefore, all progeny of a homo poll animal will be poll, even if the other parent is horned.
- A heterozygous poll animal will pass either a poll gene or a horn gene to its progeny with a 50% chance of either. It follows that on average any poll animal will produce 50% poll progeny from horned parents and 75% poll progeny from polled parents.
- A horned animal will always pass a horn gene to its progeny.
- There is a DNA test available to test for homozygous poll.

SCUR GENE

- Scurs are a horn like growth that are attached to the skin rather than the skull. Scurs are normally quite short and blunt and can often take 12 months or longer to become evident.

- The scur gene is a dominant gene in males but a recessive gene in females.
- A scurred animal is heterozygous poll.

COLOUR

- In a similar way as the poll gene the black gene is dominant and the red gene is recessive.
- A black animal can carry a pair of black genes this is called homozygous black.
- A black animal can carry a black gene and a red gene this is called heterozygous black.
- A red animal always carries a pair of red genes.
- For solid colours the following applies;
- A homozygous black animal will always pass a black gene onto its progeny; therefore, all progeny of a homo black animal will be black, even if the other parent is red.
- A heterozygous black animal will pass either a black gene or a red gene to its progeny with a 50% chance of either. It follows that on average any black animal will produce 50% black progeny from red parents and 75% black progeny from black parents.
- A red animal always carries a pair of red genes and will always pass a red gene to its progeny.
- The above can be affected by other complicated colour patterns, or diluting.
- A DNA test is available for testing for the black gene.

Notes: Masterplan is doing a wonderful job for us. He has exceptional length, great depth of body and capacity, superb temperament, and perfect feet. He is passing these qualities on to his progeny. His EBV's back up his phenotype and show the calving ease of his progeny. Superbly bred from the great Krystal family, his dam was a broad ribbon winner at the Limousin National and Adelaide Royal and his flush sister was a broad ribbon winner at the Sydney Royal. We have used Masterplan extensively. A son Pilsener P26 (dam is Lot 37) was used as a yearling over the "P" drop heifers.

Notes: Hayne Plane has been a most consistent sire for us. Bred from the great Pearl family, his granddam V88 was top price (\$21,000) of the Kensal dispersal in 2007, his dam made \$7,000 at 7 months old and his full sister is Lot 10A in this sale. He produces structurally correct cattle with heaps of length and volume.

Notes: Kid Rock was selected as our pick of the "K" drop from Mandayen. We are super particular about the cow families behind our sires and the Abigail family is one of the best. The U2 cow is elite with numerous sons used in stud herds throughout Australia. Kid Rock produces tremendous length and great tops in his progeny, massive scrotal size in his sons, and his daughters have very well attached udders with good teat size, consistently rearing heavy calves. As his EBV's indicate, Kid Rock progeny have exceptional weight, EMA, fat cover, IMF, scrotal size, milk and docility.

Traits Observed:

Notes: Backstage is a calving ease specialist, short gestation and low birth weight. His daughters milk particularly well with good udders and great teat size. His progeny have plenty of shape and good depth of body. We were pleased to be able to partner with Wulf Cattle and secure the Australian and New Zealand rights for Backstage who was the top price bull at the Symes Brothers sale. Agrigene are our marketing partners.

Traits Observed:

Notes: Uppermost has been very consistent for us. His daughters have great volume, are easy doing and have fantastic milking ability. We have used sons with very pleasing results. We were impressed with Uppermost when he was a high selling yearling in the Wulf Cattle sale and then went to the States to see him and his first calves when he was a 2 year old, we liked what we saw and also were impressed with his dam and granddam. Interestingly his great granddam is the dam of the great old bull, Wulfs Explosion, who is the sire of Abigail U2, Kid Rocks dam.

Notes: Buyer has the right to choose either 17A or 17B, with the remaining female being retained by OSullivans. The opportunity to select between two H11 daughters. L27 is as good as we have! Thick and deep like her dam, she has a great udder and is structurally spot on. Her top of the drop bull calf will be weaned and will stay with us. A real donor cow prospect here! While P62 carries some extra scale, and also displays a thick top. We like her a lot, she will make a top cow to build a great family on.

L27 - Depastured with Masterplan 15/11/20.

P62 - Pilsner P26 bull calf at foot SULPS14 born 29/01/21. Will not be rejoined prior to sale.

Traits Observed: CE, 200wt, 400wt, SS, Fat, EMA, IMF, Doc

Notes: We love this long, big volume young bull. He has been a standout since birth and out of a great cow. He combines calving ease, high weight for age, massive EMA with outstanding docility. He has stud sire written all over him. We offer the opportunity to choose between his dam and his full sister at Lot 9.
