# TAMAROO ANGUS

We invite you to our 19th annual autumn bull sale.

Presenting a line-up of 21 quality performance recorded bulls grown on our Cygnet property in Southern Tasmania.

At Tamaroo our aims remain the same, to produce high quality bulls with a genetic profile which is very fertile and functional with high growth rates and a moderate maturity pattern, without forgetting the importance of carcase quality and performance. We have always had strong focus on temperament calving ease, great feet & structural soundness.

Our bulls are bred to suit our commercial clients beef production programs & market requirements, with the restocking rate of Australia's herds on the rise, we are happy to sell our bulls nationwide with confidence.

Our cow herd is run under commercial conditions, consisting of 150 low maintenance Angus females. These have all earnt their place in our herd and have the genetic ability to compliment and improve our clients breeding programs.

We are proud to be offering another strong line of quality bulls in this year's sale. These bulls include some performance breed (AI) sons, representing some industry leading AI sires used in our 2018 (AI) program including: Te mania Emperor E343 who stands by himself in the Australian angus industry, he covers all bases with an extremely good combination of EBV's, structure, phenotype, and docility. Emperor is still currently ranked as the No. 6 registration sire for progeny recorded in the last 2 years & may well be the most progeny tested bull in modern angus' sires. His females in our herd are outstanding & happy natured. We have continued to use MAR Innovation 251 in our breeding program for his ability to increase body capacity and width of base to our cattle. He consistently produces fantastic stand-out females that exhibit extremely good temperament and feet. Also on offer are sons of Granite Ridge Kaiser K26, Matarui Reality 839, Karabar Docklands D62, LCC Sultan GO41.

We are very impressed in the way our sale bulls that are sired by our own home bred Tamaroo bulls, & our purchased sire Landfall Gatsby K150 are performing alongside these AI sons. This gives us confirmation that our genetics are also ticking all the boxes. These home-bred sires have great disposition, they have been bred from the heart of our autumn breeding herd and produce easy doing cattle to withstand a range of Australian conditions at hand today.

#### All cattle are:

- Tested free of Pestivirus
- Vaccinated according to recommendations with Pestigard and Vibrovax prior to sale
- Drenched with Eclipse pour on 17/02/21
- Scanned by Bovine Scanning Services Pty Ltd (Lonnie Stone) 13/01/21
- Semen tested and have had their penis checked by Robertson's Livestock Service 12/02/21

Good relationships with our clients are essential to our business, we enjoy hearing our clients breeding outcomes and welcome feedback every year.

We appreciate you taking the time to view our catalogue and hope you will be able to attend our sale. The sale will also be available online through Auctions Plus. Please don't hesitate to contact us if you have any questions.

Warm Regards,

The Harvey Family

  The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
  - In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
  - Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale night, the saleyards and the surrounding environments. 25.
  - The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the

#### CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

- This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaugh-tered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
- The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
  - le at auction:

    pass DAFF and other regulatory authority requirements and inspections at
    the time of slaughter; (DAFF refers to the Federal Government Department
    of Agriculture, Fisheries and Forestry)
  - are of merchantable quality:
  - carry an NLIS device in accordance with State law;
  - in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the NVD, the livestock will have those characteristics or will be fit for the particular purpose or market, and
  - all information in any NVD provided by the vendor is true, complete and correct in all material respects.
- Offect in an inaterial respects.

  In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
- However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the live-stock at their next highest and best use.
- In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
- Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
  - (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
  - the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially leopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
- The auctioneer is liable to the buyer in respect of any breach of the vendor's war
  - any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale
  - any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
  - any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

#### **CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE**

- This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption in its due to a condition in the animal which the buyer establishes, by the DAFF certificate, existed prior to the fall of the hammer.
- A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
- Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
  - a certificate is issued by DAFF which states the relevant NLIS RFID tag num-ber and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
  - the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and
  - if the condemnation is due to chemical residue the certificate follows testing in a DAFF approved laboratory which establishes maximum residue limits in excess of the Australian limit. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:
  - bruising,
  - (b) fever,
  - partial condemnation, or
  - emaciation
