# WELCOME...

## To Bowman Performance Genetics Second On Property Sale.

Welcome to the 2021 Annual Bull Sale. What an exciting year it's been in Beef! An insatiable "grass-driven" demand from re-stockers - coupled with a solid appetite of our major trading partners in Japan, South Korea and the USA - will bode well for our industry moving forward. The EYCI (Eastern Young Cattle Indicator) continues to break records, now sitting at 884 c/kg cwt, a jump of more than 300 c/kg cwt on 12 months ago. The long-awaited rains in Queensland and Northern NSW finally delivered in January/February, driving hot competition for young cattle. This has created a restocking and rebuilding frenzy never seen before, which many forecasters and economists believe will take ten years to return to pre-drought numbers. A revised estimate for U.S. beef production predicts a decline in fed-cattle slaughterings, an increase in feed costs, lower production and an improvement in packer demand. The present unpredictable trade with China should stimulate a welcome demand for Australian product, especially the lucrative 90CL (grinding beef) market.

Increasing interest in Bowman Performance Genetics has seen many sale-topping markets, especially with our own lines presented at the Leongatha VLE in December 2020. The yearlings that sold from our commercial arm - The Ridge Pastoral - topped the steer section in c/kg, selling to a repeat purchaser over the past three years. The steers are monitored regularly and are achieving the highest weight-gains in their contemporary groups, from other leading herds around the State. These grass-finished cattle are not only leading daily growth, but hitting the profitable MSA targets. Positive fat scores in our Genetics are allowing their progeny to finish faster, and on the breeding side maintain body condition for rapid re-joining. We believe a unique, highly valued product is being created, with the main point of difference being a fully grass-fed only Sale Bull. In our experience, this "grass fed only" bull has a greater hardiness. In turn this leads to less issues with breakdowns and heated joints, which can be a result of rapid finishing.

We believe this year's crop of bulls to be the most consistent and heavily fleshed animals bred to date. New leading powerhouse sires such as Baldrige Beast Mode 074, Musgrave 316 Stunner, Bowman Nashville N47 (son of Millah Murrah Loch Up L133) and Bowman Manhattan M6 (full ET brother to Ascot Hallmark), will deliver extra "thump" into your cow herds through increased muscle content and shape. Trusted previous sires reinforce the direction we are heading, and are creating a magnificent line of future matrons. All with world class dams and pedigrees behind them, as seen in the catalogue.

Genomic testing continues to place us at the forefront of genetics, allowing for earlier breeding decisions, parentage verification and more accurate estimated breeding data. Closely related animals with similar raw data are repeatedly separated on figures through this genomic analysis, which can only give the producers greater reliability in their genetic selection. These modern-day tools, along with generations of "cattlemanship", assessing structure, shape and doing ability, consolidate to form this unique, classic modern day Angus.

We look forward to hosting you on the Open Day, Saturday 6th March and on Sale Day Friday 12th March. Naturally, private inspections are available by appointment. May the good seasons and prices continue!

Warm Regards, Glenn Bowman

# SALE INFORMATION...

## INSPECTION

Open Day Saturday 6th March 10am – 4pm. Bulls may be inspected prior to the sale by contacting vendors or selling agents. Cattle available for inspection from 10am on sale day.

## REBATE

4% rebate to outside Agents introducing buyers in writing 24 hours prior to the sale.

## GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price, plus GST.

## AUCTIONS PLUS

Auctions Plus will be available on sale day. Please register 24hrs before the sale.

## HEALTH QA

The bulls are ready for immediate use.

We have treated them as follows:

- Double Vaccinated with 7 in 1
- Double Vaccinated with Vibrovax
- Easy dose applied prior to sale
- Pestiguard Vaccinated
- DNA tested to prove they are not PI (Persistently Infected) with Pestivirus.
- Bowman Performance Genetics are EU accredited.
- Bowman Performance Genetics has a J-BAS 6 certification under the supervision of the Maffra Veterinary Centre. All bulls are clear to enter Victoria, Tasmania, Queensland and Northern Territory.

## INSURANCE

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for the first six months of working life. There will be a number of options available through Elders Insurance at the venue.

## GENOMIX AND SINGLE STEP BREEDPLAN

The EBV's on each bull incorporate their genomic analysis. Referred to as "Single Step", the inclusion of genomic analysis reduces the pedigree dependence

of the Breedplan model. Single Step tends to spread the data on each bull and it is possible for full brothers (flush brothers) to have very different post Single Step analysis EBV's, despite their raw data being quite similar.

## SEMEN RIGHTS

All bulls are sold with 80% semen rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands. However by keeping a 20% share, it gives us, as a breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties. It should be noted that instances of bulls becoming big revenue spinners from semen sales are rare. By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale. Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale. Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from any bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

## DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

## FERTILITY

All bulls have been semen tested by Ian Moreland of Studcare Genetics.

## CATERING

Please join us for complimentary morning tea, lunch and after sale drinks.

## BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good condition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems can occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

## REGISTRATION

Ownership transfer of the bulls will be registered by the vendors with Angus Australia, provided accurate transferee details are supplied with the Buyer's Instruction Form. With this form, please be sure to provide: NLIS number, Angus Herd ID (if applicable) and specify if the purchasing herd is EU accredited.

## FEEDING AND MANAGEMENT

The bulls have received pasture and hay only throughout their lives. At no stage have any of the bulls received grain or substitute of any description.

The bulls have been handled with dogs, UTV's, horses, utilities and on foot. None of the bulls has had its feet trimmed.

## WARRANTY

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date to the purchaser ("Warranty Period"); and

The vendor will either:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Bowman Performance Genetics Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus the salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has

suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls, which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

## HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risks associated with cattle handling.

**VISITORS ENTER THE CATTLE PENS  
AT THEIR OWN RISK  
CHILDREN MUST NOT ENTER THE YARDS**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. A playful nudge can be quite harmful. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not overcrowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

On three separate occasions I have visited Capitalist on stud at Billings, Montana and each time he has impressed me with his muscle expression, structure and foot shape. Capitalist catapulted the **Musgrave Angus Stud**, in Illinois to the forefront of worldwide genetics in 2016, breeding many sale toppers and sons that have gone on to produce outstanding cattle globally. After inspecting the Capitalist progeny at **Musgraves**, I was excited to introduce these genetics immediately upon return. A calving ease sire with carcass EBVs near the top of the Angus breed.

One of Australia's most astute cattle breeders, the late David Plant informed me of Chisum 255 during his visit to the United States in 2016. The following year Chisum 255 was a must see as part of my regular inspections. He was an extremely impressive sire, oozing natural thickness, spring of rib, depth, width and tremendous fill right down the thigh. His progeny were equally as impressive visiting **Heiken Angus** in Montana. Chisum 255 is a fantastic carcass bull with EBVs in the top 10% for Eye Muscle Area (EMA), rump fat, docility and outstanding feet.

An outstanding son of the 2016 highest selling bull, Millah Murrah Loch Up L133 (\$85,000). N47 is the calving ease specialist (top 14%) and was chosen as the “pick” bull of the “N” draft. Originating from the prolific Abigail family and boasting a Milk figure in the top 7%, Nashville is breeding the house down with feminine replacement females and thick, meaty, powerful sons. After now finishing his third joining season, he has maintained terrific shape, doing ability and flawless feet and structure.

Stunner was selected as the standout bull at Genex, Billings, Montana in 2017 and was the “lead off” and top-selling bull at Musgraves, USA at \$83,000. Like his sire, Capitalist, he has the ability to breed on, producing progeny with tremendous muscle shape, extension and eye appeal. His daughters exhibit marvellous udder quality, milking ability and capacity. Stunner progeny are in high demand worldwide and rank number one in the breed for registrations in Canada. 400 and 600 day weight top 8% & 9%, Docility top 8% and Carcase weight top 5%.

Australia was purchased as an embryo from the

**Aberdeen Estate** dispersal and was formed by crossing two of the Angus greats in Te Mania Emperor E343 and Ardrossan Wilcoola Z31. He nears the top of the breed in dollar index values, calving ease, fertility and foot structure. Australia has been artificially inseminated over hundreds of heifers in our commercial herd with outstanding calving success.

The 2015 tour to the United States included a visit to the world

famous **Schaffs Angus Valley (SAV)**. Renown to me, eclipsed his full ET (Embryo Transfer) brothers, also in use at SAV. He transmits extra frame, body length, muscle expression and neck extension into his calves. His progeny combines moderate birth weights with phenomenal phenotypic quality, breed-leading performance, superior structure and excellent disposition. Renown is the product of the most valuable mating's ever created in the SAV program.

We were delighted to track down Black Pearl

at **Brinkley Angus Ranch**, Missouri in 2015. His progeny were the standout calves at the renowned **Sydenstrickers Angus**, that year. He maintained an imposing body mass, impeccable structure and natural doing ability. Along with Complement, Black Pearl has the ability to transmit "curve bending" attributes in addition to eye muscle and carcase weights near the top of the breed.

**Can't make the sale?**  
**Log onto AuctionsPlus to bid from**  
**anywhere on your phone, tablet or desktop.**

1

**REGISTER ONLINE**

Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.

2

**COMPLETE BUYER INDUCTION**

The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.

3

**VIEW CATALOGUE**

Photos, videos, pedigrees and other information will be available in the online catalogue.

4

**ENTER AUCTION**

Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.

5

**AUTO BID**

Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.

6

**CONTACT SELLING AGENT**

If successful, contact selling agent directly after the sale to arrange payment.

7

**DELIVERY**

Arrange transport of livestock at your expense.

*Contact AuctionsPlus on (02) 9262 4222  
or [www.auctionsplus.com.au](http://www.auctionsplus.com.au)*

# STAR BREEDER PROGRAM

## BUY WITH CONFIDENCE

The STAR BREEDER program aims to maximise the reproductive integrity and health of stud and commercial stock.

A STAR BREEDER certified animal has been:

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ **Vaccinated against Pestivirus (BVDV)** to ensure they are protected from the effects of this infection
- ✓ **Vaccinated against Leptospirosis**, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ **Vaccinated against Vibriosis**, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals will not introduce preventable reproductive diseases into your herd. For more information talk to your Zoetis Cattle Representative, call **1800 963 847** or visit [starprogram.com.au](http://starprogram.com.au)

**Be confident. Be sure. Buy a Star Breeder Bull.**

Used over stud heifers it was a difficult choice between Q74 and Q66 his full ET brother for joining. It's remarkable what Beast Mode is doing for the industry in Australia, a bull we will be using for years to come! Suitable for Heifers/Cows. Top 6% Calving Ease, top 9% Feed Efficiency and top 12% 200 & 400 Day Growth.

Generations of incredible Millah Murrah donor cows are behind Q116, right back to the great matriarch Brenda Y33. It's no coincidence these cows continue to pop up throughout the catalogue. They are the foundation building blocks for a tremendous female herd. Suitable for heifers/cows. Top 12% Calving Ease and Gestational Length.

I've inspected S Chisum 255 and his progeny on several occasions at Heiken Angus, Montana and was suitably impressed with the females he was producing. Moderate, square, wide hipped females, injecting the same quality milking ability into their calves. This bloodline is the real deal!

Carcase, Carcase and more carcase in Q89's pedigree, combined with prolific Princess W38 makes a wonderful combination. Carcase weight top 9%, EMA top 10%, Rump Fat top 13%.

\* The percentile bands represent the distribution of EBVs across the 2018 drop Australian Angus and Angus-influenced seedstock animals analysed in the Mid August 2020 TransTasman Angus Cattle Evaluation .

# DISCLAIMER AND PRIVACY INFORMATION

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ids.....

.....  
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

# THANK YOU...

A big thank you to all those who have supported the progress of Bowman Performance Genetics, in particular the steadfast encouragement of my family.

Thank you to all buyers and underbidders; all the very best with your new purchases. We look forward to developing strong relationships with you in the future and hearing about the progress of your herds.

We would be delighted if you would join us for some refreshments after the sale.

Glenn.
