

DAWN OF THE DECADE
CHAROLAIS FEMALE SALE

March 25th 2021

GLENLEA PHEONIX (P) R/F

Top price Glenlea Clermont Sale 2020 \$25,000. Age in photo 2 years, 1070kg.

GLENLEA JUST RED (P) R/F Q408E

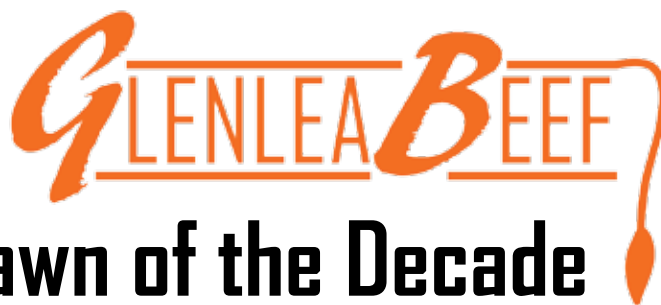

Yearling Bull, 16 Months in photo.
Sold for \$9000 Clermont 2020.

GLENLEA JUST RED Q406E (P) R/F

Top selling Yearling Bull, \$12,500 at Fairfield Roma Bull Sale September 2020 (Glenlea were guest vendors). This bull was out of a red cow. Age in photo 17 months, 812kg with Rod Binny and buyer Angus McGilvray, Womblebank Pastoral, Injune.

Sons of JUST RED are selling extremely well. We have an outstanding line up of daughters in this sale that are from the very top of the herd. His daughters will be producing our leading bulls well into the 2020's.

Welcome to Glenlea Beef's 2021 "Dawn of the Decade" CHAROLAIS FEMALE SALE

This is our 4th Bi Annual female sale and this sale is also the largest offering we have ever catalogued. All lots represent our continued commitment to selecting cattle with natural doability, BREEDPLAN performance recording and all the physical traits that are not measured by BREEDPLAN but are so important to all producers to keep making productivity gains.

As an online only sale we take great care and spend many hours describing these physical traits in our comments for this catalogue, so you, the buyer can expect that the lots you buy are as represented, especially when combined with video footage of all lots and the catalogue photos. We sell so many cattle every year sight unseen by description to our clients and doing that continuously really does create a critical mindset to assessing our own cattle.

GLENLEA is celebrating 49 years of continuous Seedstock Production in the Charolais Breed in 2021, and 48 years as a member of the breed society.

What an exciting time in the cattle industry and especially the seedstock business, with producers everywhere down on stock numbers, now more than ever all producers are seeking extra genetic value in all their cattle, with higher performance Charolais bulls attracting very high pricing in all sales, both at Auction and in the paddock.

To produce these high-performance bulls, you need quality females, and we are sure everyone interested in Charolais Cattle will be able to find some that suit them in this sale.

The sale has something for everyone, we have reached into the core of every section of our female herd, to offer females that will go on and produce performance progeny in your herds, establish cow families that persist indefinitely that you rarely sell and to produce bulls that are sold early and out of the top group in paddock with little or no preparation, or at sales with full presentation to fully express their genetic potential.

Every single female in this sale we would be happy to stay in the herd and continue to breed from! We have gone through female by female in the cow herd that is based at our properties at Coffs Harbour and Dorrigo with the intention of offering females from our leading proven cow families, from our emerging elite newer cow families and others that will achieve those levels of recognition in the future.

Shandon Glenlea Q-Brick (P)

15 month old son of new sire OW Glenlea North (P) out of Glenlea Jimmy Daughter. Sire prospect for 2021. Lot 58 has bull calf at foot with the same genetic combination and is a great calf. Q-brick is also a grandson of a full sister to Lot 1C.

Glenlea Muscles Q70 (P)

August 2019 born, 14 months old in photo. Sire prospect for 2021. His Dam is offered at Lot 55 with a bull calf By Glenlea Just Red.

GLENLEA BEEF

Our sales have always been structured to offer great value for money which has been the basis of all our female sales in the last decade. So will again offer interest free payment terms, all details on the sale information pages.

Our terms offer just help's you get started or restock, the reason why we have clients come back time and again to access our females, is because they BREED ON and are very profitable. A number of buyers from our last two sales have purchased females with bull calves and sold the Bulls the next year for more than the purchase price of both cow and calf.

Our females have had no special preparation, so you know they will go to your place and go forward in condition and develop further. They have been run on coastal Sub Tropical pastures, and like coastal pastures all up the eastern seaboard, they are nutrient deficient and cattle rarely achieve the weights they would inland, given similar seasonal conditions. Our cattle are selected to perform in this environment and thrive where ever they go. The exceptions in this catalogue are the older unjoined heifers as a group, the autumn 2019 heifers and a handful of cows and calves that are identified in the catalogue. The ready to join heifers were born on the coast and weaned, supplemented with dry lick on dry winter pastures then taken west of the divide at 12 to 14 months, on pasture only with no supplementary feeding. The Autumn heifers have been fed grower pellets in the paddock.

On behalf on the whole team of people that contribute to making Glenlea Beef work as the diversified seedstock business it is, we welcome you to join our growing team and look forward to assisting you with your purchases, which is the start of our relationship, and helping you develop your program. From ultra sound scanning you next group of heifers and bulls, assistance with marketing your cattle, advising on sire selection and mating choices or in any other way we can.

No luck required!

Regards,

Roderick Binny

Glenlea Kenworth Q76 (P)

October 2019 born, 13 month old in photo sire prospect for 2021. His Dam and half-brother offered at Lot 47.

Glenlea Honorable P80 (P) R/F

Dark Red sire Honorable - 2.5 years old a week out from his first mob of cows His Dam and half-brother offered at Lot 43. P80 sold for \$9000 at our 2020 Clermont Sale.

Sale Information & Conditions

The sale will be a live audio event, which means you will not see the auctioneer on the screen but will be able to hear him. Each lot video and still photos will be playing while that lot is auctioned.

Bidding online through any platform is reliant on strong, secure internet connection. We recommend that if yours is in any way prone to drop outs or sometimes unreliable for any reason, to drive to your nearest agent office and bid from there. Being let down on your pick lot and having to try and reconnect may result in you missing out. We hear this story after every online auction we are involved in.

PHONE BIDDING: Not confident in the online process? Just call the vendor or agent and we will arrange to have a person dedicated to you to bid over the phone where you can hear the auctioneer selling.

JBAS: JBAS 7 NSW

OUTSIDE AGENT REBATE: 2% rebate to all agents introducing buyers before the sale in writing to Sale Agents and settling within 7 days.

SUPPLEMENTARY SHEET: Will be provided before sale through various media and agents, online with Auctions Plus and at www.glenleabeef.com.au

VACCINATIONS: All cattle have been blooded (3 germ), pesti virus and 7 in 1. Older calves have had both 7 in 1 shots, calves born after 1/1/21 will have had one 7 in 1 vaccination only. These 2021 born calves will not be Blooded(3 GERM) or pesti virus.

TRANSPORT: Delivery to Toowoomba or Albury will be arranged for the week after the sale by Sale Agents with the vendor, to move as many cattle as possible together. Maximum cost of \$150 per head for heifers/dry cows and \$250 for cows and calves. Drop off to major centers along the route may be possible, all that logistics will be worked out post sale and we will do our best to accommodate all requests. Other destinations will be arranged as economically as possible. We take great care in delivery of our cattle to purchaser's and all efforts will be made to move stock safely, quickly and economically. However as always, its purchaser's responsibility from fall of hammer and we highly recommend insuring your purchases.

INSURANCE: Contact selling agent to arrange.

FROZEN EMBRYOS: 50% pregnancy guaranteed if implanted by recognized E.T. specialist tech. embryos stored at Bovine Breeders, Armidale NSW. Purchaser responsible for shipping.

FLUSHES FROM DONORS: guarantee minimum of 6 embryos from flush, all freezable embryos over six owned by purchaser. Vendor reserves right to implant any non-freezable embryos. All flushes to be done at Glenlea properties and managed by Glenlea staff, except for any flushes sold for overseas export, this work will be done at an export approved center. All costs of flush, drugs etc (approx \$700), freezing cost of embryos (approx \$40 each) and semen all paid by purchaser. If second flush required to achieve minimum guarantee, all costs to be paid by purchaser, all other terms same as above. Glenlea is able to arrange recipient cows and manage the transfer of your embryos to 90 day pregnancies and then arrange delivery of the recipients to your property, full service. Ask about process and costings.

VIDEOS: all lots will have a video available for viewing on our website and Elders by mid March.

ACCURACY OF CATALOGUE AND SUPPLEMENTARY SHEET: every effort is made to be as accurate as possible, however mistakes can happen in the construction of the catalogue and printing of sale catalogues/supplementary and we will resolve any issues but make no warranty.

GUARANTEE: all joining age females are sold as fertile breeders, calves at foot are excluded both heifers and bulls from any guarantee. If there is an issue with a breeding age female we will simply work out a solution with the purchaser that is satisfactory to all parties, we stand behind our cattle and just fix a problem if and when it occurs simply and easily.

TERMS PAYMENT OFFER:

50% of purchase price will be invoiced from Elders with normal payment terms. Glenlea offer interest free terms for 4 months T.A.P. on 50% of the purchase price. Invoices will be issued by Glenlea direct to purchaser at end of June with payment due 14 July 2021, interest may apply if not paid by this date. We reserve the right to take PPSR security over the NLIS Tag and Tattoo, no animals will be transferred with the Charolais Society until paid for in full. **Buyers wishing to take advantage of this offer must confirm their intention with agents or vendor prior to sale and you will be advised in writing when approved, please don't leave that conversation to the last minute!**

Can't make the sale?
Register in just seven easy steps and log onto AuctionsPlus to bid from anywhere on your phone, tablet or desktop.

- 1 REGISTER ONLINE**
FREE once off registration for all auctions.

- 2 COMPLETE BUYER INDUCTION**
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.

- 3 VIEW CATALOGUE**
Stock history, photos, videos, pedigrees and more. You can also favourite lots you are interested in.

- 4 ENTER AUCTION**
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer. Auctions can end after 30 minutes so get in early.

- 5 Auto bid**
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.

- 6 CONTACT SELLER**
If successful, contact selling agent to arrange payment and delivery. Or if you are the highest bidder you can log into your dashboard to meet the reserve.

- 7 PAYMENT**
Via the selling agent's terms and conditions.

- 8 DELIVERY**
Arrange transport of livestock at your expense.

~ Glenlea Beef ~

Background, Bloodlines, Breeding Strategy & Customer Service

Australian Charolais breeders have embraced performance recording as other countries have reduced their efforts, I have seen this first hand in north America. Our data now is more accurate and detailed, making looking overseas less likely to add genetics that take your herd forward in genetic development than using **Australian evolved genetics that are the best in the world for our environments and markets** with large amounts of individual data to help us as seedstock producers, identify positive influences.

Glenlea beef is now a large seedstock enterprise, including JV herds total over 500 Charolais females. We have been using **Australian bred sires** to continue the evolution of the herd over the last 10 to 15 years with limited use of overseas sires. Where you will see overseas as well Australian sires in the Glenlea herd is in our E.T. program using **exclusive proven sires** in very specific planned matings to produce elite progeny from our highest genetic merit females, our donors! Our frozen embryo lots in this sale are a feature.

Our genetic base of the Glenlea herd is now as diverse as the breed in Australia, with a blend of many bloodlines and different phenotypes to produce an Australian type Charolais. We have a degree of type variation, which is necessary with our range of markets and geographic footprint, from higher growth and yield types for northern markets over bos indicus cows to more moderate, early maturing types that suit more southern markets, but all assessed through the same process for all economic traits. This will be evident through the catalogue and comments, and EBV's on individual lots will highlight this.

Our breeding strategy is to produce powerful performance cattle in a medium to moderate frame score with a complete carcass. By that we mean above average yield, EMA, fat cover and IMF%. Measuring birthweights to be able to assist our bull clients to make the best selections for their operation and maintaining calving ease through BW and early gestation length.

Maternal strength focus on fertility, milking ability with great udders and moderate sized teats for longevity. While we are primary a terminal breed, in northern markets especially, Charolais x heifers are retained in there 1000's, so as seedstock producers we must always have our customers and in turn their customers in the front of mind in our breeding decisions, as those decisions ripple down the supply chain and leave big impacts, both positive and negative.

Polled genetics have progress in our breed to match horned bloodlines for every economic trait. Our herd still has a number of horned females and these are joined to homozygous polled sires. 98% of our calves born in the last 5 years are polled, many homozygous, and all testing will be available in catalogue or supplementary sheet.

BREEDPLAN is a genetic evaluation tool now over 30 years old and proven across many breeds and countries. We no longer print a detailed general explanation in our catalogues for bull sales or female sales as that information is available at the touch of your phone screen or click of your mouse! We are happy to explain any of the finer points of EBV's as they relate to the Charolais breed and specifically to our cattle, just call and ask! In the comments of each lot, you will see our summary of the EBV's printed for that lot.

Customer Service is at the heart of what we do, we spend much of our time travelling to clients both commercial and stud to help with a full range of services. Buying a Glenlea female is the start of our relationship not the end, we provide many services to all our clients from the most basic to full stud breeding and marketing support. Your success is our success, just as the people who have given testimonials in this catalogue and the many in previous catalogues.

PHOTO: Glenlea Just Red (P) R/F (age in photo 7.5 years, Feb 2021) has been joining with different mobs of cows continuously since June 2019.

COMMENTS: Most consistent stud sire we have used in 48 years of stud Charolais breeding. All progeny are red, so is Homozygous Red. Also Homozygous Polled. Growth, perfect balance of muscle and fat cover, fine hair type, big strong feet. His sons have been our highest selling bulls in our history and his daughters will produce our leading bulls and females well into the 2020's.

PHOTO: Glenlea Honorable (P) R/F Photo at 5 years, joining cows.

COMMENTS: Impact sire that adds extra overall mass to all his progeny, as powerful a sire as we have used ever in the stud. Progeny have amazing docility, breed leading growth and muscle. BREEDPLAN trait leader for 200,400- and 600-day weight. In the Top 10 sire used in the breed in 2019 by breed registrations. Sons have sold to \$18,000 daughters to \$11,000. We will continue to use this sire in our A.I. program for years to come to add mass, bone and growth to females that get a little to refined in their type.

Photo at 3 years old, joining cows.

COMMENTS: Exciting new sire out of the top priced female at our 2019 sale CHAROL 72nd (\$12,250) loaded with performance, and muscle on a medium frame. Co-owned with Shandon Charolais at Dorrigo. His first sons will be sold in 2021 and they are outstanding types, his progeny in this sale are calves at foot that will grow out into highly valued animals for their new owners. **Top 5% all growth traits**
Top15%EMA and Top 20% MILK.

Lot 8A: 7 month old calf sired by Glenlea Just Red and her Dam Lot 8B.

ABOUT LOT 1 TO 15

The management of these females is in two distinct groups, lot 1a,2a,4a,5a,11a and 15a were all weaned in December as per our normal early weaning program at 5 to 6 months of age. 3a, 6a,7a,8a, Lot 9, 10a, 12a, 13a and 14a all were left on the Dams due to the extreme rainfall events through later December and January, only supplement being a Dry Lick. Hence the early weaned females present with higher body condition, but dry udders. The wet cows are at the end of lactation and the big calves don't let much milk fill in the udder for photo and have less body condition, calves are thumpers however!

These lots feature our best Glenlea Just Red (P R/F daughters born in 2020. Along with other outstanding individuals, these are the herd building females and we will never again offer a draft of Glenlea Just Red daughters and cows PTIC to him like this offering.

Nigel and Roderick at the 2017 Huon/Challambi sale where Glenlea Purchased top priced bull, Challambi Muscles (P) a reference sire in this sale.

Testimonial from Nigel Spink *Challambi Charolais, NSW.*

Challambi Charolais commenced in 2010. The stud was started on embryos, which were purchased from Roderick Binny, owner of Glenlea Charolais. These embryos were all implanted and became our first registered females, building the foundation of our current herd. These females have gone on and produced outstanding progeny.

In 2012 we purchased a quality female that was immediately turned into a donor and has formed our current line of Nolana females. These genetics continue to grow in numbers within our herd with females becoming in herd dams and bulls that are easily marketed.

In 2017 Rod purchased Challambi Muscles, the highest selling bull in the Huon Challambi bull sale, and in 2018 he also purchased the highest selling bull Challambi Norman, both these bulls are breeding quality progeny in the Glenlea herd. We purchased a donor Glenlea Desire B47 at the Glenlea 2017 offering, this old cow has brought us some great progeny, with more expected in 2021.

Rod is our chosen scanning technician annually, scanning our bulls and females which gives us valuable information to take our cattle forward.

Recently, we have been using the AI sire Glenlea Just Red PP to infuse more dominant red genetics in to our herd, this bull is breeding all red and powerful progeny.

COMMENTS: Glenlea Janet 126th(P) Double Polled, Red Factor,40 years of predictability in the cow family! Strong phenotype, above average bone, strong jaw and muzzle, perfect teat placement, ideal shape and angle of foot, fine hair coat and looseness of hide, this heifer has extra overall yield coming from her strong Dam, critical in her sons attracting higher returns, but still soft enough to lay down plenty of fat cover. Outstanding EBV's to back up her physical strength, Top 15% growth with all positive carcass traits well into the top 20% of breed. A clear Show and Donor prospect, her dam and grand dam have both been Donors, racking up ten's of thousands of dollars from progeny sales. Her earning potential during her lifetime is unlimited. To maximize this we are here to help in any way we can, ask about the possibilities.

COMMENTS: Full flush in Glenlea Janet 91st. Medium framed, Great doability, extra bone and overall meat yield, perfect udder and teats, performance genetics, consistency of production and strength of phenotype. Her dam was the best daughter we bred from Violet Hills Zachariah (P) purchased for \$20,000 way back in 2006 at the national sale, and she produced amazing progeny for us. This cow, sired by trait leading RP RIO D15E, reference sire in this sale, has produced outstanding progeny, her first calf is a feature female in this sale at Lot 21. Her second heifer was sold as part of our Private Sale Elite Heifer offering during winter of 2020 and sold at 12 months of age in a parcel of 3 heifers to start a new stud. She has been flushed twice, once as a heifer successfully and in 2020 for 11 freezable embryos. **EBV's show below breed average BW, well above average growth traits and top 10 to 15% for all carcass traits.** She is a 4th generation donor. Two full sisters are working in other studs, Taylor at Nowra and Shandon at Dorrigo and both are leading females in those herds, producing herd sire prospect sons. If you missed out on lot 1a and 1b, don't miss out here, buying flushes is always a great value for money way to access leading genetics. See the sale information pages for full details on purchasing flushes in this sale, including our ability to transfer embryos into recipients for you. **Flush to be done spring 2021 - 50% purchase price normal Elders terms, balance of purchase price due when flush is complete.**

COMMENTS: Like lot 1a, destined for the donor paddock in anybody's herd! Growth, extra softness, good bone, excellent feet, strong polled head, fine hair coat and loose hide, perfect underline and udder placement, very gentle nature. Her length of body and strength of topline are big parts of what makes her so attractive. Combining the "Isabella" and "Janet" cow families. **A Tremendous set of EBV's, moderate BW with top 10% across all growth traits as well as carcass weight, fat cover and IMF% and she reflects those numbers in her physical makeup.** She will be competitive in any show ring in 2021 and beyond. Her dam is from a famous cow family within the breed that has produced stud sires, royal show champions and donor females in several leading studs around Australia. As with lot 1A, her earning potential is unlimited in her lifetime, and the type of female one could build an entire stud around. We are happy to discuss her future with you and how best results could be achieved. **HOMOZYGOUS POLLED**

24/11/20 to 31/1/21**

COMMENTS: Glenlea Isabella 2nd (P) we are offering this proven Elite Donor cow FOR OUTRIGHT SALE. She is the 3rd generation donor in her cow family. Her dam produced several herd sires for us including Glenlea Jimmy reference sire in this sale, an outstanding Low BW Bull sold to Diamond L Charolais, Nanago, QLD) and Glenlea Jonah(P) R/F our top priced bull in 2016. We also purchased another son from Challambi Stud that they produced from her, and is a reference sire in this sale Challambi Norman (P). Isabella's sire RP Rio D15E is a BREEDPLAN trait leader for many traits, reference sire in this sale. Very sound in every way, she is in the prime of her life, with many years of production ahead of her. This cow has produced outstanding progeny, her first P2E was champion interbreed heifer at the 2018 Lismore show (largest on North Coast) at 8 months. Her second heifer was part of our Elite heifer offering in 2020 and sold for \$9000 at 13 months. We have frozen embryos on hand and pregnancies on the way. Great footed, fine hair type, strong polled head, tremendous udder and perfect teats, extra length and extra fat cover. This cow's future earning potential is enormous! **Her EBV's speak for themselves, breed leading, Low BW with top 10% for all growth traits and top 10% or better for all carcass traits.** Joined to GLENLEA JUST RED (P) 24/11/20 to 31/1/21 calf will be a full sibling top lot 2A! Buy them both and add an Elite cow family to your front paddock with all the marketing done!

COMMENTS: Glenlea Rebbly 24th (P) is an Elite heifer in every sense of the word. Deep bodied, early maturing, fine coated with nice loose hide, strong head and jaw, excellent feet, extra fat cover, great teat and udder placement and still with overall thickness and a very gentle calm nature. She will compete in the show ring and has that eye appeal that catches your eye in the paddock every time. From a very the renowned REBBY cow family that has produced all descriptions of show champions, high sellers and Stud sires. **EBV's reflect her type with great early growth and moderating mature size, with excellent carcass figures.** Her Sire "Lethel" is 100% Fernvale breeding that is very rare today and has produced excellent progeny for us with Rebbly 24th being one of his most outstanding daughters to date. Lifetime earning potential from this heifer is massive and we are happy to help you achieve your goals.

Acc	60%	68%	75%	67%	67%	68%	65%	63%	60%	52%	55%	52%

COMMENTS: This female born under Glenlea management as part of a joint venture in 2013 has been an outstanding producer for us. 3rd generation donor, Deep bodied, broad muzzled, medium framed, great milker, very gentle nature with extra fat cover and very low BW! Her EBV's reflect all this as well as early maturing and moderate mature size. **Top 3% of breed for Low BW, Rump Fat and IMF%.** She has worked very well with the powerful sires she has been joined to, with close to \$50,000 in progeny and embryos sales in the last 3 years! Her 2018 natural calf, Glenlea Quartermaster (P) R/F sired by Glenlea Honorable sold at our Clermont, Qld bull sale in October 2020 for \$18,000 to Charnelle Charolais as their next herd sire. Earlier in 2020 an E.T. son Glenlea Pistol (P) sired by Silverstream Holster (P) was purchased by Allednaw Charolais, we have another daughter, Glenlea Rebbly 21st (P) GLE N13 sired by Tattenhall Impecable that has had two outstanding progeny already by Glenlea Just Red, she may well be the next Rebbly in the donor herd! With more frozen embryos stored and pregnancies on the way. This is an opportunity to access genetics from an outstanding individual backed by generations of outstanding producing females. It's very hard to value a Flush like this, but I am sure the purchase price will seem cheap when the calves are born! **See the sale information pages for full details on purchasing flushes in this sale, including our ability to transfer embryos into recipients for you. Flush to be done autumn 2021.**

COMMENTS: This heifer is another outstanding individual. Extra carcass yield, bone and over all thickness, wide polled head with strong jaw and wide muzzle, lovely nature, excellent feet. Moderate to medium frame. Has been an eye appealing heifer since the day she was born. The first calf born by "Pistol" and showing the ideal combination of his softness with her Dam's massive carcass. Her Dam is from a very long line of "Charol" cows, another of Glenlea's most prolific with 40+ years of production, and was selected as our pick of the heifer calves at the 2018 Allednaw female sale, she has not disappointed with her first heifer, combining the "Rebby" and "Charol" cow families. **EBV's are outstanding showing excellent growth and carcass data all well above average with moderate BW.** Show ring, Donor paddock, foundation female, Charol 130th has the class to do it all.

Acc	48%	73%	72%	65%	62%	60%	51%	54%	50%	42%	47%	42%

COMMENTS: Her cow family history is so predictable that we flushed this female in October 2020 after she produced lot 4A. The Glenlea "Charol/Carol" cow family has over 40 years of production history. The dam of P82 is in the top 1% of the breed for EMA and Beef Yield and top 5% for all growth traits. Carol P82's fertility, calved at 2 years combined with breed leading terminal characteristics of massive carcass, overall yield, bone, medium frame with early maturity, ideal size udder and teats and Homozygous Polled, and with her eye appeal elevates her to donor level. She was 1st in the senior heifer section of Lismore heifer Classic in 2019. Sire needs no introduction "Justice" is one of the best Evolution sons in the country, sons have sold to \$40,000 + at Auction, with many progeny now recorded and impressive carcass EBV's. She can add that extra level of overall yield to her progeny and she is Homo Polled, you could flush her to any sire in the breed and get all polled calves! A natural selection to produce sale topping sale bulls in northern markets. **HOMOZYGOUS POLLED. Flush to be done spring 2021 - 50% purchase price normal Elders terms, balance of purchase price due when flush is complete.**

LOT
5A

During our planned week for catalogue photos we had over 330mm of rain - raining every day for over 14 days except for a morning here and there and 1 fine day. Despite taking catalogue photos prior to this period, a handful of photos were not available at time of printing. All will be updated in the online auctions plus catalogue prior to sale and videos will be online hopefully two weeks prior to sale at: www.glenleabeef.com.au

COMMENTS: This Elite heifer has eye appeal, thickness, softness, fine hair coat, perfect structure feet, teats with broad polled head, great jaw and muzzle, moderate frame and early maturity. Darker red factor, both sire and dam are Red, she will breed mainly Red even when joined to white bulls. Her eye appeal, strength of topline make her an easy heifer to add to the front paddock of any stud in the country. **EBV's are very balanced with moderate BW above average across all growth traits with well above average EMA, Beef Yield and positive fat cover.** Great earning potential is this heifer!

COMMENTS: Miss Estella 145 (P) R/F is matron of the herd, **FOR OUTRIGHT SALE** has produced outstanding progeny. Moderate framed, heavy milking, early maturing, fine hair coat, excellent udder and teats, perfect structure she will last for years yet. Her most notable daughter Glenlea Estella 15th (P) R/F was Grand Champion female at the 2020 Charnelle sale and sold to Wildes Pastoral, NSW for \$11,000 at 13 months of age. Sired by "DEE V8" Interbreed and Horden trophy winner at the 2010 Sydney show, a polled IMPAIR son. Her dam was a heavy milking very sound MR PERFECT daughter, a great cross of French and USA bloodlines, and the Estella cow family she is from is one of the most well known and best producing in the breed in Australia. **EBV's show well below Breed average BW, top 20% 200 day growth, with all above average carcass traits.** Due to her being managed for several years in the now dispersed Waterfall herd, not all of her progeny were recorded on her production record. Joined to GLENLEA JUST RED (P) R/F 24/11/20 to 31/1/21 this calf will be a full sib to LOT 5A. Great pair to keep together in the front paddock! **HOMOZYGOUS POLLED.**

GLENLEA ELSA G24E (GLE G24E) (P)

COMMENTS: An Elite heifer this time from the "Elsa" cow family, another of our oldest cow families with 40+ years of history. Someone wanting to start a stud with some of the best Red Factor Charolais genetics could just buy all these Elite JUST RED daughters and you would be there in one step, capitalizing on 49 years of breeding and selection! This heifer will grow into a good framed powerful big cow, like all the "Elsa's" has that same very correct structure as do the "JR" progeny. Wide topline, great hair type, loose skin and perfect teat placement, with a very neat shoulder and great neck extension. **EBV's show moderate BW with top 15% for growth traits and all positive carcass traits above breed average.** I challenge anyone to find a group of same sired Red Factor Polled Heifers anywhere in Australia to match these, with the EBV's and cow family history that they have, that the breeder would be prepared to sell! It just doesn't happen, other than at a dispersal sale and when that happens there is rarely any service and support to help you get the best out of your investment. We share our best with new and old clients that's why they perform at the top of the many stud herds they are in across the country. **HOMOZYGOUS POLLED**

**PTIC to GLENLEA JUST RED (P)
R/F for a winter born calf in 2021.**

COMMENTS: Elsa M39E Dam of 6A. FOR OUTRIGHT SALE. This cow has her whole productive life in front of her, good frame, lovely neat shoulder and great neck extension, ideal udder and teat set up, longer polled head and great feet, she will breed into her teens! Has produced the outstanding heifer previous lot. Her first calf was a river cross from neighbor's bull that wasn't realized until born and was not recorded on the breed data base. **EBV's are an ideal curve showing moderate BW around breed average, growth and IMF% in top 5% to 10% of breed, Top 15% EMA and MILK with top 20% Fat cover.** Dam G24 is a very high beef yielding female, catalogued as lot 64, Grand Dam is Elsa V14, an Impair daughter and Donor that was a magnificent deep bodied cow that left outstanding progeny. Sire has left a great line of high performance females, several of which feature in this sale including this Lot 41 and 42. **Due May / June.**

GLENLEA NOLANA 33RD (GLE C66E) (P)

COMMENTS: This time an Elite "NOLANA" heifer, again a GLENLEA cow family with 40 + years of history. Maximum growth while still maintaining excellent fat cover, 3/4 sister to LOT 1A and 2A just a little younger. Will grow out into a good framed, deep bodied cow. Fine hair type, excellent structure, great feet, perfect teat placement, extra neck extension and refined shoulder. EBV's are at the top of the breed, top 5% or better for all growth, top 10% IMF%, well above average EMA and top 25% Fat Cover, a real performance young female! Its so hard to breed heifers of this caliber and then sell them, most breeders wouldn't dream of letting their top group of heifers go to auction, but nothing we do is by chance, every mating is planned to give the highest probability of being an Elite calf and we back ourselves to be able to reproduce heifers of this class again in the future. Some of our testimonials in this catalogue show that we have done this for our stud clients when assisting in planned joinings.

PTIC to GLENLEA JUST RED (P) R/F

COMMENTS: Glenlea Nolana 94th dam of lot 7A. FOR OUTRIGHT SALE. This young cow is one that has always been a bit special, very gentle. Good frame, extra length, tremendous udder and teats, extra fine hair coat, great feet, outcross maternal pedigree, and in the prime of her life. Her first calf was a maximum power Glenlea Honorable son, bull that sold privately, her second calf, a heifer by "Muscles" reference sire, we are retaining. Dam was a Myall Yamma daughter, the only one we had, a sire that had the highest fat cover scans we have ever seen in the breed in a 2year old bull at a Royal show, and his daughters were amazing milkers. Her sire is the trait leading RP RIO D15E reference sire. EBV's are top 1 % for all growth traits, top 5% for carcass weight, top 10% for EMA and top 15% for Milk and Fat Cover. She always gives her all to her calf and my not look as beefy in the photos and video but she is a performance champion! PTIC to GLENLEA JUST RED (P) R/F calf will be a full sibling to Lot 7A due winter 2021. Another great pair to keep together! Due July / August.

COMMENTS: This Elite heifer exhibits extra softness just like her Dam. Great eye appeal, has caught my eye since the day she was born. Length of body, lovely polled head with broad muzzle. Great feet and perfect teat placement, wide topline, flawless structure and gentle nature. A show heifer for 2021/22 and then into the front paddock to breed high value progeny! Like all the "JR" daughters she has a refined, neat shoulder set, and wedge shaped body. Her Dam is our best "Forged from Steel" daughter. **EBV's have a growth in top 20% and all positive carcass traits above breed average.**

Joined to Glenlea JUST RED (P) R/F due winter 2021, so once again calf will be full sibling to lot 8A.

COMMENTS: FOR OUTRIGHT SALE. Deep bodied, lots of volume, extra doability, excellent milker with very sound teats will last well into her teens. Fine hair type, great feet, excellent temperament, good frame. Her 2018 heifer was a feature heifer in our 2019 sale, her 2019 bull is in the Top group of our early season bulls. Her Sire is Branch View Forged from Steel (P) R/F mouthful of name but a great breeding bull, purchased in 2012 for \$16,000 a high price at that time. We rate this female as one of his very best daughter's in the herd. Her dam was a strong polled female by a Full French sire with some of the best French bloodlines ever imported to Australia and the grand dam was one of our great breeding females. This cow has donor potential. **Due July / August.**

RANGAN PARK REDEMPTION E42 (RAN E42E) (P)

SIRE: GLENLEA JUST RED (GLE J5E) (P)

DAM: GLENLEA SELECT PURE ANGUS J24 (GLE J24) (P)

GLENLEA JANET U6E R/F (GLE U6E) (P)

COMMENTS: A truly unique heifer, sired by GLENLEA JUST RED (P) R/F out of one our leading Angus cows that we produce Charolais composites with. JR is Homozygous Red Charolais bull meaning that he doesn't carry the white diluter gene that makes Charolais white, hence when crossed with a black Angus the progeny are black, additionally JR is Homozygous Polled and of course so is the Angus Dam, making this heifer Homozygous polled as well. We believe this to be the first time a black, homo polled registered Charolais composite heifer has ever been offered for sale in Australia. She is thick, early maturing and has a great carcass, structurally excellent and could be the basis of a black Charolais composite program! Her EBV's are very preliminary, but show extreme Low BW with good early growth and reduced mature size. We will submit her 200 day weight for BREEDPLAN analysis prior to sale day in her contemporary group. She is a moderate framed, high yielding carcass heifer than we would breed bulls from without hesitation. She has been parent verified and tested **HOMOZYGOUS POLLED**.

COMMENTS: One of best producing RIO D15E daughter's as can be seen in her heifer calf. Medium framed, fine hair coat, awesome udder and teats, will be sound for years to come. Always raises a calf that could be sold as a vealer! One of the best individual milkers in the GLENLEA Stud! **EBV's show Top 20% of breed for Low BW, well above average growth, top 15% EMA, IMF% and MILK with positive Fat Cover!** Her dam sold at 11 years old in our 2017 sale for \$6750 to Bauhinia Park Charolais Emerald Qld, The Holzwart Family and still an active registered female in their herd in 2021! We should be adding this cow to the donor herd, not selling her, she is definitely a donor class cow. As I said in the welcome at the beginning of this catalogue, every female in the sale we would be happy to have stay in the herd.

Rejoined from 3/10/20 to 17/12/20 to GLE P38E

COMMENTS: A young 2016 drop "JANET" cow, that has loads of volume and doability, medium frame, strong polled head, good bone and structurally very sound, medium hair type. Her dam is one of our highest earning donors with progeny sales and embryo sales of almost \$40,000 in 2020! Great fertility, 6 weeks reduced calving interval as a first calver from 2019 to 2020. She has a neat udder and ideal sized teats. **EBV's indicate Low Birthweight, above average growth, her carcass data shows well above average carcass yield which give her progeny overall shape and buyer appeal.** Sired by the widely used Merit Roundup, noted for his calving ease, added testicle size in sons and overall meat yield. She would suit southern markets very well, combining Low BW with early maturity and overall meat yield.

Rejoined to GLE P38E (see joining sires)
from 3/10/21 to 17/12/20 and then with GLE
K80E 18/12/20 to 31/1/21 (see reference sires)

COMMENTS: Another very eye appealing JUST RED daughter. She was a twin the other was removed and hand raised. Fine haired red coat, growth, softness, great carcass and body capacity, wide topline, with strong polled head and muzzle. A very well know cow family back her up genetically. We really like this heifer, would be competitive on the halter in 2021/22. **EBV's are top 20% growth, all positive carcass traits with top 15% fat Cover and IMF%. HOMOZYGOUS POLLED**

COMMENTS: Big strong female outcross bloodlines, coming from one of Palgrove's oldest cow families. We purchased the entire Hunter View stud a few years ago. They have fitted in very well to the GLENLEA herd and we have some outstanding progeny. H6E is a good framed long bodied female, perfect udder and teats, has a medium hair type and strong polled head. Has done an outstanding job raising her heifer calf Lot 12A. Her Sire Montezuma, has around 200 registered progeny in Australia, noted for easy doing daughter's with volume and good mature weight and sons with depth and softness. He is top 5% for Fat Cover, top 15% for IMF%. Her 2019 bull will be in our sale team for Roma 2021 being a full brother to her 2018 bull, who sold for \$7000.

Joined to GLENLEA JUST RED (P) R/F 1/9/20 to 31/12/20 calf will be a full sibling to lot 12A.

COMMENTS: A daughter of GLE Z8E one of our leading donors, having earned nearly \$40,000 in progeny and genetic sales in 2020 alone! A moderate framed, high yielding cow with a perfect udder and teats, medium hair type that slicks off in warmer months. Sired by the widely used Rangan Park Pinay bull, this female has a lot of French bloodlines, including Pinay, Gaugain and Genk. Her 2018 bull was an extra thick, high yielding carcass, polled bull sired by reference sire "Lethel", and was our top price bull at Agrow 2020 at \$8500. Her 2019 calf was another very similar type bull and sold as a yearling out of the paddock for \$6000 in spring 2020. Minnie vale stud own a daughter of this cow and rate her very highly in their cow herd, producing well and great doing through the drought.

Joined to **GLENLEA JUST RED (P) R/F 1/9/20** to 31/12/20 calf will be a full sibling to lot 14A.

COMMENTS: Big volume, powerful daughter of Rangan Park Redemption E42, Brisbane interbreed champion bull 2011. Bone, capacity, medium framed heavy cow, plenty of carcass mass, and still very easy doing with added fat cover. Dam is from one of Palgrove's oldest and well known cow families. **EBV's top 10% for all growth traits, with Fat cover and IMF% top 20%.** This cow would breed progeny best suited northern markets, however with the range of genetics we have in the breed mating to low BW, early maturing sires, progeny would suit southern markets also. Due August.

Rejoined to GLE P38E (see joining sires) from 3/10/21 to 17/12/20 and then with GLE K80E 18/12/20 to 31/1/21 (see reference sires)

ABOUT LOT 16 TO 37

These females are first calvers with a couple of second calvers in the group. These have been all run on the coastal properties leading up to calving and have been on grass only. Nearly all will be calved by sale day, with most already calved at time of writing. Lot 35,36 and 37 had a later joining and are not due till May, so will be fine to transport, any that are very close to calving on sale day can stay and calve prior to transport at no cost under usual terms, all due care, but no responsibility. These represent a selection of our replacement females with a range of types, bloodlines and performance data.

Inspections by appointment at anytime to view the cattle. We are happy to give any advice and answer any question on any of these lots objectively as possible. Sight unseen sales have been a cornerstone of our marketing for 30 years! But today with videos of all lots and detailed performance data selection is easier than ever before.

Rod Upton with Glenlea Charol 35th purchased as a heifer in 2014.

Testimonial from Rod & Jill Upton *Won-Canya Farms, Beaufort VIC.*

We have been buying Glenlea females to build our herd for the last 10 years. Never once have we seen the females before they arrived at home, all have been purchased sight unseen with the advice and guidance of Roderick.

Every purchase has exceeded our expectations 100% of the time.

In the last few years Roderick has been helping us plan our joining's as we mostly use A.I. The gain in quality we have seen from his research and planned mating's rather than just random joining's has been a game changer for us.

The progeny we have coming through the herd now are, in our opinion, equal to anything we see from all the major studs in type and performance and we couldn't be happier or more excited to see our next drop of calves.

sire prospect for 2021, **GLENLEA**
QUINTUS (P) GLE Q64E joining
sire from 1/12/20 to 1/3/21

COW COMMENTS: LED FEMALE. HOMOZYGOUS POLLED.
Lots of power in this young female. Growth, great carcass, plenty of fat cover, good bone and frame, strong polled head and jaw, broad muzzle, perfect udder and teats, great milker. Bomb proof temperament which she has inherited from her Dam and grand dam. Sired by "LOUIS" reference sire. Her dam is our leading GLENLEA HILTON daughter (also sire of reference sire OW Glenlea North (P)) who will join our donor herd in 2021. A female that would make a great foundation to build a herd around. Definite Donor of the future. **EBV's show all above average growth with top 5% EMA, and all carcass traits positive.**

CALF COMMENTS: CALF AT FOOT, HOMOZYGOUS POLLED.
Glenlea Josie 7th (P) GLE R68E is a stunning daughter of Glenlea Kenworth (P) reference sire. Homozygous Polled with Growth, extra yield, extra fat cover and eye appeal to compete in the showing. Very hard to breed these Elite females and this unit is as good as any in this sale and any in our paddocks! **A great set of preliminary EBV's that put her genetically at the top of the breed.** Set yourself up to breed elite charolais cattle throughout the decade with these elite 3 in1 units.

Rejoined to our leading HOMOZYGOUS POLLED Stud sire prospect for 2021, GLENLEA QUINTUS (P) GLE Q64E joining sire from 1/12/20 to 1/3/21

COW COMMENTS: LED FEMALE. One of only 2 "SILVERSTREAM HOLSTER" daughters in the sale. An E.T. daughter of Rebbly J1E Donor dam, see lot 3. Broad muzzled, strong head and jaw, fine hair type, excellent balance of yield and fat cover with moderate framed early maturing body type. Good volume, Low BW female with an excellent udder and teats, great milker doing an outstanding job on her first calf. Full sister to GLENLEA PISTOL (P) stud sire for ALLEDNAW STUD purchased privately in 2020. Sire "HOLSTER" really doesn't any introduction to Charolais breeders in Australia, sons have sold to \$40,000. An ideal female for southern markets and will no doubt become a donor in the future. **EBV's Top 20% Low BW, Top 15% growth spread with lower mature weight, reflecting that moderate frame and mature size, top 15 % fat cover, with above average EMA and IMF%**

CALF COMMENTS: CALF AT FOOT. GLENLEA REBBY 26th (P) GLE R70E this heifer calf is very special. Growth, thick, soft and great carcass, broad strong polled head, fine coat type, stands so square on her feet, loads of eye appeal. Sired by GLENLEA KENWORTH (P) reference sire. **EBV's are very similar to her mother, top 20% Low BW, all above average growth, Top 5% IMF and Top 15% Fat Cover.** A special 3 in1 package that doesn't get offered for sale very often, don't miss out!

to 17/12/20 then with Glenlea
Quintus (P) (see joining sires)
18/12/20 to 1/3/21.

COW COMMENTS: LED FEMALE. Purchased as a calf at foot of her dam from the 2018 ALLEDNAW female sale. Early maturing smooth made and very balanced, length, medium frame, perfect udder and teats, neat polled head, plenty of fat cover and gentle nature. The only "Lethel" daughter old enough to calve, and a great indication of the type of females the "Lethel" daughters will become. Dam is a neat, easy keeping cow that has a great production record. EBV's show below breed average BW Top 20% EMA and Beef Yield with moderate growth curve reflecting her early maturity.

CALF COMMENTS: CALF AT FOOT. Glenlea Venture R49(P) is a low BW LT Venture son, early maturing, moderate framed, thick bodied. He may grow out to be suitable as a stud heifer bull! EBV's are top 10% of breed for Low BW, Top 5% for MILK and Fat Cover with above average Growth, EMA and IMF%

Rejoined to reference sire
"LOUIS". 20/11/20 to 1/3/21

COW COMMENTS: This female that has frame, performance, perfect udder, ability to lay down fat cover, fine hair type, excellent structure, great feet, smooth neat shoulder and great neck extension, lots of eye appeal. Sired by "Grandiose" reference sire. Out of a strong cow family, this female will produce an outstanding calf by "LOUIS" (reference sire), as the Grandiose X Louis has worked very well. **EBV's top 15% milk, above average 200,400 and 600 Day weight, EMA, IMF% and Beef Yield**

CALF COMMENTS: **CALF AT FOOT.** GLE R69E. **HOMOZYGOUS POLLED** is an eye appealing heifer with plenty of growth sired by reference sire "NORMAN" a Low BW calf, she will make an excellent breeding female. **EBV's have well below breed average BW, Top 5% MILK with Top 15% 400, 600 Day weight and carcass weight with all positive well above breed average carcass traits.**

COW COMMENTS: Janet 107th is a deep bodied, big volumed, early maturing female that will produce outstanding progeny, like her Donor Dam, Grand dam and all the Janet cow family going back 40 plus years. She is the first calf from lot 1C in this catalogue. Great hair type, perfect udder set up, great type with extra overall yield and extra fat cover. Sired by JC LAANNISTER (P) reference sire, as are the next two magnificent females, what a group to put together to add to or start a stud herd. Lannister's progeny are moderate framed, but with leading growth (weight) as they have such tremendous body thickness and are such easy doing types. Which is exactly why we purchased him. **EBV's are breed leading, moderate BW with top 1% IMF, Top 5% all growth traits, Top 15% EMA and Top 20% Fat Cover.**

She will calve before sale day to "MUSCLES" reference sire. Details with supplementary sheet.

COW COMMENTS: LED FEMALE. The first calf born from donor dam Glenlea Isabella 2nd(P) lot 2B in this sale. Length, medium frame, early maturity, very fine hair type, good footed, excellent udder and teats, perfect temperament. Calved at two years of age with a nice "Muscles" bull calf last year. He will sell this spring as a yearling for certain. Isabella was champion junior heifer at the Lismore Heifer Classic in 2018 at her only showing. Her cow family is as well known as any in the breed, with an exciting mating that will no doubt be a high value calf! **EBV's are top of the breed, moderate BW with Top 1% for IMF%, Top 5% for all growth traits, Top 15% for EMA and Milk.**

Due to calve prior to sale to exciting new sire OW Glenlea North (P) (see reference sires)

PHOTO: Isabella 3rd at 12 months of age.

COW COMMENTS: Beautiful deep bodied female. Early maturing, moderate frame, great overall carcass, medium hair type, excellent udder set up. Dam is an outstanding Donor female out of one of our strongest cow families, Charol 105th was her first calf, as all these 3 Lannister heifers were, 1st calves all out of donor cows! both lot 21 and this female were set to calve at 3 years, they did not have the opportunity prior to this as we planned on offering them at this sale, with the show heifer, Lot 22 calving at 2 years old. Very hard to offer these females, but we strive to offer herd improvers and these 3 certainly fit that brief! Putting them together as a line would be a very smart purchase. Jump starting your herd with 48 years of Glenlea breeding and selection. **EBV's like her sister's in previous two lots are excellent. Top 5% in all Growth traits, EMA and IMF% with Top 15% milk.**

CALF COMMENTS: **CALF AT FOOT.** GLE S20E. Sylisht, good bodied heifer calf.

COW COMMENTS: LED FEMALE. A classy female, a polled Honorable daughter out of Full French Ijoufflu cow, that we flushed late in her life. Long bodied, good frame, fine hair type, great topline, has softness and fat cover better than her EBV's would indicate, will breed some powerful progeny. We think a lot of this female and from a Full French cow family tracing back to original "Desire" cow at Palgrove. Predictability plus in this female. **EBV's show Top 15 % 200 day, Top 20% 600 day and mature weight growth traits, with above average EMA and Beef Yield.**

She will calve before sale day to "MUSCLES" reference sire. Details with supplementary sheet.

COW COMMENTS: Our second daughter by Holster, this out of our Cigar/Rebby donor H14E. Lovely medium framed female, great balance of muscle and softness. Full brother is a sire, Glenlea Pluto (P)(see joining sires). Great footed, fine hair type, lots of volume and perfect udder and teat structure. With her type, EBV's and pedigree, she will breed very high value progeny throughout the 2020's. Young females of this class are rarely sold, we can offer these quality females due to the depth in our herd developed over 5 decades. Don't miss her! **EBV's very balanced across the spectrum, with breed average BW, Top 15% 200 Day weight, Top 25% 400 and 600 Day Growth and Beef Yield.**

She will calve before sale day to "MUSCLES" reference sire. Details with supplementary sheet.

Cow ready to join.

COW COMMENTS: LED FEMALE. Adawna 6th is from a relatively new cow family at Glenlea that is breeding great cattle. Adawna 6th is medium framed, long bodied, has extra Fat Cover, great feet, great temperament, fine hair type with ideal sized teats for longevity. Her first calf is an excellent Low BW bull and will feature in one of our sales in the spring. Her Dam is a donor and has produced heifers that have sold to \$9000. EBV's show her top 5% Milk, Top 10% for Fat Cover, Top 20% of breed for Low BW, above average growth for all traits.

CALF COMMENTS: CALF AT FOOT. GLE S5E is a moderate BW, Red Factor, Polled son of Glenlea Just Red (P) (reference sire) only a young calf but already showing his quality with plenty of substance with softness, will be an easy bull to sell or may grow out to be a stud sire. Born 14/1/21

COW COMMENTS: Outstanding 1st calver. Good frame, great carcass, depth of body, perfect feet, fine hair type, great udder development and teat placement. Dam is a big strong female, a blend of French and USA bloodlines by breed legends and out of the "Janet" cow family. One of only two "Jeddi" females in the sale and both are outstanding, "Jeddi" was used as an impact carcass sire and left some excellent carcass bulls and thick, well-muscled, great uddered females. **EBV's show Top 5% EMA and beef yield, Top 15% Milk Low BW at Top 25% of breed, all growth traits above average.**

Due to calve to "Muscles" (reference sire) before sale day, calf details in supplementary sheet prior to sale.

Cow ready to join.

COW COMMENTS: Any breeder would be happy with this 1st calving unit here. Great carcass, medium frame, perfect udder, lovely nature, excellent structure and feet, very fine hair, great eye appeal. She has calved at 26 months with no special treatment in the sub-tropical environment when we normally calve at 30 to 36 months, great doability and she will grow out into a wonderful cow! Dam is a great old Gobongo cow that has stood the test of time and various environments, with an excellent recorded calving interval. Sire by "Louis" (reference sire). EBV's show Top 10% Fat Cover, Top 20% Milk, EMA and IMF% with below breed average BW and balanced growth curve.

CALF COMMENTS: CALF AT FOOT. GLE S2E, Very eye appealing, polled heifer calf by "Muscles" (reference sire), Low BW, extra carcass and softness will be a stud replacement heifer for certain! Born 4/1/21

Cow ready to join.

COW COMMENTS: This female is the first of 4 by Glenlea Emblem (P) a very early maturing, easy doing bull, used in the Hunter View herd. Glenlea purchased the whole herd when the owner's property was sold. Nikola is a moderate to medium framed young female, perfect udder, very easy doing softer type, very gentle nature, very good structure and feet, fine hair type. Dam is from a leading cow family, that traces back to an outstanding Appeal cow from Palgrove. Wyoming Wind, TR Red Smoke all bloodlines stacked with Calving Ease and Extra Fat cover appear in her immediate pedigree. This is exactly the type of female we would join to high performance sires like Glenlea Honorable (P) R/F we invite the successful purchaser to discuss breeding options with us. **EBV's show Low BW in Top 15% of breed, along with Fat Cover and IMF%, Milk Top 20%.**

CALF COMMENTS: **CALF AT FOOT.** GLE S6E. a very neat, low BW, Polled, Red Factor son of Glenlea Just Red (P) she is doing a great job with him as her second calf. Will be an easy bull to sell or may have merit as a stud heifer bull! Born 15/1/21

COW COMMENTS: Festoon 1st is a deep bodied, early maturing, moderate framed 1st calver. Great udder and easy doing, a very easy-care type of female. Fine hair type, excellent structure and feet. Just like the previous lot we consider her ideal to join to high performance impact sires, discuss this with us. Her Dam's has an Outcross pedigree tracing back to the "Festoon" cow family, one of Palgrove oldest. **EBV's are very balanced across the board, reflecting the middle of the road type, high quality female she is.**

CALF COMMENTS: **CALF AT FOOT.** GLE S4E an excellent type of bull calf showing thickness and softness with Low BW, sire by "Muscles" (reference sire) Born 11/1/21

Cow ready to join.

COW COMMENTS: Elsa is an early maturing, moderate to medium framed female with great carcass, excellent udder and milk, fine hair type, typical "LOUIS" daughter. Elsa 38th Dam was an outcross, sired by Myall Yamma and out of the Elsa cow family which is another of our long-established cow families. EBV's have EMA, Fat cover and IMF% in the Top 20 to 25% of breed, very hard to have big EMA, with positive Beef yield, Fat cover and IMF% as they are opposing traits, but "Louis" is producing just that, always adding overall yield, big EMA and with breed leading Fat Cover and IMF%.

CALF COMMENTS: CALF AT FOOT. GLE S7E a well put together polled bull calf, with plenty of thickness. Born 8/1/21

ABOUT LOT 38 TO 40

These embryos are from the pick of our Frozen embryos. Full siblings to high sellers. Here is your chance to buy the best from the Glenlea program and have calves with your prefix on them. When it comes time to exhibit, join or market them, we are here to help anyway you would like.

Normal terms and conditions with the sale of frozen embryos - see sale conditions at front of catalogue. Never done an E.T. program? We have recipient cows we could transfer them into for you and deliver a pregnant cow for you to calve at your place!

GLE Q2E at 14 months. Purchased March 2020 for \$5000

GLE Q2E at 25 months. February 2021

GLE Q10E at 14 months. Purchased March 2020 for \$11,000

GLW Q2E at 25 months. February 2021

Testimonial from Neville Wildes

Wildes Pastoral, Aberdeen NSW.

"We started our stud a few years ago with a desire to build a great Charolais herd, we made purchases of females and bulls from various well known studs, but it wasn't until Roderick came to visit, after I called to discuss some of his cattle for sale that progress was made, he was the only stud breeder who had taken the time to come to my property and discuss my herd.

With Roderick's advice and sales network I sold a line of average heifers that I had bought and got a premium for them, then bought a line of recipient cows and undertook an E.T. program with embryos purchased from Glenlea. The difference in the progeny from the other Charolais I had was like night and day and we will continue this program into the future.

Additionally I purchased two Elite Red Factor heifers (pictured) from Rod at the Charnelle invitational Sale in 2020 that have grown out to become my most outstanding heifers and are due to calve shortly. Later in 2020 I invested in more Elite females from his private online sale.

Rod comes to the farm and assists me with A.I. and E.T. Programs, plans mating's and helps market all my Charolais progeny. His knowledge and assistance just makes running the stud herd in every respect so much easier.

COMMENTS: Full sibling embryos to Glenlea Pheonix (P) GLE P41E. Glenlea's highest selling bull 2020 at \$25,000.

Dam is one of the outstanding females we acquired as part of a JV program with back in 2012/13. Growth, volume, carcass, soundness and milk she has it all. This cows progeny and genetic sales in 2020 exceeded \$40,000. With the strength of one of the most recognized cow families in Australia.

Sire has extensive information on progeny in this catalogue. "Just Red" is simply the most consistent producer of outstanding progeny that we have bred or used in 48 years.

This combination could produce an outstanding show female and donor, or your next herd sire, for certain you will get Polled Red Factor calf /calves, from the very top of the Glenlea program.

COMMENTS: Full sibling embryos to Glenlea Pluto (P) GLE P38E joining sire and Feature female lot 25 Glenlea Rebby 23rd(P).

Dam is one of our highest earning cows ever, one of the outstanding females we produced as part of a JV program with back in 2012/13. Frozen embryos have sold to \$2300 at the National Sale in 2018. Her earnings have exceeded \$45,000 for progeny and genetic sales, with a 2 daughters retained and several more pregnancies on the way we will have plenty more yet. Rebby is from another of Australia's most prominent and great producing cow families originating from the now dispersed Gobongo Herd. If ever there was a safe purchase of frozen embryos this is it. Doability, early maturity, overall softness and carcass shape, perfect udder, produces outstanding calves to any sire.

Sire needs no introduction, Holster in my opinion, is the leading sire to come to Australia from the Silverstream program in NZ to date, better than his sire in pretty much every department, we have had some outstanding progeny from multiple Dam's that have been sold to very high prices.

PHOTO: Rebby H14 at 9 years close to calving.

COMMENTS: Full sibling embryos to Glenlea Q-brick (P) sold to Minnie Vale in 2020 at 16 months of age for \$15,000.

Dam is a maternal sister to the great breeding bull GLENELA HONORABLE (P) R/F. Great Doability, Deep bodied, early maturing, loads of carcass and Fat cover and Milk, all with moderate BW. Another of Australia's most renowned cow families this time originating from the dispersed Fernvale herd. A feature Heifer in the Charnelle invitational Sale is a Homozygous Polled natural daughter of this Donor Dam.

Sire is Silverstream Holster (P). Not much more can be said about this sire. This combination is proven to be outstanding, could base an entire stud around a daughter from this mating, or an entirely new cow family in an established stud.

PHOTO: Chiffon J10 at 5 years, half way through pregnancy.

PHOTO: Chiffon J10 at 8 years old in calf 6 months

ABOUT LOT 41 TO 55

These cows and calves, mostly 3 in 1 units have all been run on coastal properties, just west of Coffs Harbour on grass only and are presented in working paddock condition feeding big calves. If these cattle were at west of the range they would have higher body condition. Exception is Lots 43,44 and 45, these three have been at our Dorrigo property, and have higher body condition due to the more nutrient rich pastures of the Dorrigo plateau. A selection of bloodlines and exciting joining sires make these proven breeders very attractive to add to your herd, the matron cows are all very sound and will continue to produce for several years as many of our herd matrons have from previous sales. If they are still in the Glenlea Herd as mature females it's because they are good!

Glenlea Pluto (P) joining sire in this sale.
Full sibling to embryos in Lot 39.

Glenlea Pheonix (P) R/F sold for \$25,000 at our 2020
Clermont Bull Sale. Full Sibling to embryos Lot 38.

Glenlea Rebbby 16th (P) 15 month old. Homozygous Polled.
Daughter of Dam Lot 39 Embryos. Mid winter 2020.

Glenlea Estella 16th (P) 10 month old. Homozygous Polled.
Daughter of Dam Lot 38 Embryos. Mid winter 2020.

Glenlea Chiffon 24th (P) 15 month old. Homozygous Polled.
Daughter of Dam of Lot 40 embryos. January 2021

Glenlea Q-brick (P) sold for \$15,000 at 16 Months
to Minnie Vale Charolais. Full Sibling to embryos Lot 40.

COW COMMENTS: One of the highest performance females in the sale! Good frame, extra length, good bone, fine hair, strong polled head, great feet. Perfect neat udder and teats. Dam CHAROL 72nd (P) is a leading donor and was top priced female at our 2019 sale at \$12250, she has produced stud sire OW Glenlea North (P) a reference sire who has progeny in this sale. Sire is RP RIO BRAVO D15E (reference sire) a sire that we have used extensively and is a has 10 traits on BREEDPLAN in top 1% to 5% of the breed with close to 300 registered progeny in 27 herds. He is the sire of several of our leading females and donors. **EBV's for CHAROL 6th have her in the top 5% of the breed for all growth traits and carcass weight. Top 10% for Milk, IMF% and Top 20% for Fat Cover. All this with breed average BW and she is HOMOZYGOUS POLLED.** A powerful breeding female with an exceptional bull calf at foot.

CALF COMMENTS: **CALF AT FOOT.** They don't come much more powerful than this calf, massive carcass and growth, great bone, fine hair, strong polled head and Homozygous Polled. Sired by "Louis" reference sire his carcass data will be breed leading, a definite stud sire prospect that we should not be selling, but we wanted to offer a special lot to start off these mixed age cows. We will reserve the right to collect semen from this bull at purchaser's convience for in herd use. **HOMOZYGOUS POLLED**

COW COMMENTS: This is another powerful HOMOZYGOUS POLLED female. Good frame, extra length, heavier bone, very fine hair type, strong big feet, perfect udder and teats. Dam is great producing "Forged from Steel" daughter, will extra length and good frame. Sire has been used extensively in the now dispersed Waterfall herd, and left outstanding females like N14. EBV's are start with below bred average BW, well above average for all growth traits, with Milk Top 10% of breed and all positive carcass traits above breed average! With such an outstanding heifer calf by "Louis" we had to rejoin to him.

CALF COMMENTS: CALF AT FOOT. GLE R52E Outstanding "Louis" heifer calf, HOMOZYGOUS POLLED, with excellent growth, she has eye appeal, loads of carcass, fine hair type, a heifer that would be in our 2021/22 show team for certain. A heifer from the top of the herd, and will become a leading female in anyone's herd. **HOMOZYGOUS POLLED**

COW COMMENTS: Real matron of the herd here, has a great production record. Was originally purchased at a calf at foot with her Dam for \$18,500. She has produced 3 bulls and two heifers for Glenlea, including the calf at foot when we purchased her in 2017. We have had sons selling to \$9000 and Daughters to \$8000. Big strong female, long bodied, very sound, perfect udder, has several years of production to come. Arguably the best calf she has produced currently at foot, a fantastic son of "Kenworth" reference sire. A full sister was sold in our Elite private heifer sale last year for \$8000 at 10 months of age. **EBV's show a moderate BW with reasonable growth, with all positive and above breed average carcass traits.** This lot has been running at our Dorriggo property, better country than coastal grazing and cows present in better condition.

CALF COMMENTS: **CALF AT FOOT.** GLE R61E Powerful Polled Red Factor Bull calf, stud sire prospect, moderate BW, breed average or better for all growth traits, great overall carcass, every trait above breed average, her 2018 son is joining stud cows in the Mawarra stud in Scone NSW.

COW COMMENTS: Deep bodied, medium framed, easy doing cow from Glenlea's Nunciata cow family, one of our oldest and most prolific. This cow was purchased as Red Factor, Polled donor prospect in 2017, from our well recognized cow family with an outcross sire. Has produce outstanding progeny including an E.T. daughter sold for \$8000 at 13 months old in our Elite private heifer sale last year. Her 2018 heifer by Honorable was one of his best daughters we have bred, but lost her. We have other E.T heifers on the ground that we are retaining in the herd. Her 2017 heifer has produced 2 extremely good calves and is offered in this sale at Lot 68, put them together and add whole cow family in two Lots to your herd. **EBV's show moderate BW with good growth, and all positive and above breed average carcass traits. This lot has been running at our Dorrigo property, better country than coastal grazing and cows present in better condition.**

CALF COMMENTS: **CALF AT FOOT.** GLE R72E great heifer calf, polled, thick, stylish and plenty of performance, she will grow into one of her buyer's favorite females. Ebv's have moderate BW with plenty of growth and wonderful carcass figures all positive and well above breed average.

Rejoined to Glenlea Lannister Q405 (P) R/F (Joining sire) 6/12/20 to 31/1/21. LOCATED AT DORRIGO PROPERTY.

COW COMMENTS: A very early maturing female here, moderate framed but with massive volume, so easy doing, very sound in feet, high-capacity udder, her calf always weans as one of the fattest in the mob. Her mum died when she was 3.5-month-old and she suffered a bout of photosensitization but none of that has impacted on her ability to breed outstanding progeny. Note some scaring on body in photo, similar on far side and the edges of ears. Her sire was an E.T bull we bred out of donor Gobongo Isabella D86E (P) R/F, Low BW, early maturing and Milk were his big positives, we used him as a heifer bull. Nunciata's 66th first bull sold for \$6000 in 2020 at Casino Allbreeds sale. A type of female really suited to southern production systems. **EBV's show extremely Low BW, better than top 5% of the breed, she is in fact the 2nd lowest BW cow offered in this sale. Top 2% for Milk, with Top 10% direct Calving ease, around breed average 400- and 600-day weight, with Top 10% of breed for Fat Cover and all positive carcass traits above breed average. This lot has been running at our Dorriggo property, better country than coastal grazing and cows present in better condition.**

CALF COMMENTS: **CALF AT FOOT.** GLE R67E is a very neat, eye appealing Low BW heifer that will be very similar to her mother, great doability, moderate frame, carcass.

20/11/20 to 31/1/21.

COW COMMENTS: Fertility plus, this little lady calved at 19 months of age, unassisted, raised the calf, and rejoined to calve within 10 days the following year with her second calf. Her 3rd calf was on the ground before she was 3.5 years old! Very low BW, moderate framed, extremely easy doing, very gentle nature, and perfect udder, she could be joined to the most powerful sires in the breed and have sensible BW. Ideal for southern production systems. **EBV's are top 2% of breed for Low BW, Top 5% Milk and Fat Cover with reasonable growth.**

CALF COMMENTS: **CALF AT FOOT.** GLE R59E is a standout moderate "Louis" daughter, so soft, very gentle to handle, added carcass that has come from her sire, she will breed some outstanding sale bulls in her lifetime. **HOMOZYGOUS POLLED**

Rejoined to Glenlea Just Red
(reference sire) 1/9/20 to 31/12/20

COW COMMENTS: Moderate, early maturing, feminine young cow, with an outcross pedigree. Perfect udder, excellent feet, fine hair. Dam is from the famous "Ruby" cow family at Rosedale, sired by Palgrove Viagra Son out of an Ijoufflu X Bronwin cow that is another very well-known cow family in Australian charolais. **EBV's show Low BW Top 20% of breed, top 15% Milk with Top 25% Fat cover with a moderate growth curve. With all carcass traits at or above breed average.**

CALF COMMENTS: **CALF AT FOOT.** GLE R47E a very nice HOMOZYGOUS POLLED RED FACTOR Heifer. Perfect structure, with length, great topline, and eye appeal. Only just a little younger than the Elite "JUST RED" daughter featured at the start of the sale! **HOMOZYGOUS POLLED**

(joining sire) from 20/11/20 to
17/12/20 then with "Kenworth"
18/12/20 to 31/1/21.

COW COMMENTS: This matron, is one that has been not used to her full potential, a donor cow she should be and I am sure will be in her successful purchaser's herd, an E.T calf herself out of that herd's number 1 female. She was under different management for several years without her progeny being recorded. We sold her 2017 and 2018 bulls privately as they were purchased as part of the Hunter View herd, her 2019 bull calf will be a feature bull in our 2021 Queensland bull sale in Clermont. Sire is a breed legend with over 740 registered progeny in Australia, Dam is from one of Palgrove's most prominent older cow families.

CALF COMMENTS: **CALF AT FOOT.** GLE R56E is a simply outstanding polled heifer, frame, eye appeal, length, good bone, thick topped, would be selected for our show team for 2021/22 for certain, and will go on to be an outstanding cow and a definite donor prospect.

Rejoined to "Louis"(reference sire)

COW COMMENTS: A mature cow that is not the most impressive female in herself, probably due to being raised in and calving in drought in her early years, but has always produced outstanding progeny. Moderate frame, outcross pedigree, fine hair type, good overall carcass shape and very sound, perfect udder. Her Dam was from the "Digit" cow family, one of the oldest at Palgrove. Her 2019 bull is impressive and will make our sale team this year. We thought enough of this cow to repurchase her from a client who got into real trouble in the drought, along with a handful of other females, after they purchased her out of our 2017 sale, when she had an exceptional "Honorable" heifer calf at foot. She is registered as polled, but has scurrs.

CALF COMMENTS: **CALF AT FOOT.** GLE R58E another outstanding polled "LOUIS" heifer! Extra overall carcass, eye appealing, good bone, with this heifer and rejoined to Louis this unit could be real value for money.

Rejoined to Glenlea Just Red
(P) R/F from 10/1/21

COW COMMENTS: Grace is in her prime, having produced some exceptional daughters, good frame, long bodied, good fat cover, fine hair, great udder. One of only 3 "Forged from Steel" daughters in the sale. Dam was one of the best of the Jackson females purchased as foundation females for the Waterfall herd. We had not intended to join these summer calving females, but K27 is the exception, she was at a different property and so has been exposed to "JR". **EBV's show her Low BW and calving ease, being Top 10% of breed for Direct Calving ease, top 15% for Low BW and MILK. With reasonable growth.**

CALF COMMENTS: **CALF AT FOOT.** GLE R82E is a very good bull calf, possibly the best son of "Kenworth" in the sale, great carcass development and weight for age, strong polled head and fine hair.

COW COMMENTS: A deep bodied, very good producing female in her prime! Very easy doing, medium framed, extra overall carcass shape, great milker. We think a lot of this female and hard to part with her and great bull calf. Her dam is from a cow family originating in W.A, so outcross bloodlines, who was brought across and exhibited and sold at Sydney Royal, lots of French influence in dam's pedigree. Sire is "Dinga" who has been a great breeding bull and Sydney champion on 2010. **EBV's Top 15% for direct Calving Ease and Milk, with low BW and good growth curve.**

CALF COMMENTS: **CALF AT FOOT.** GLE R77E a great polled, red factor bull calf showing lots of carcass, growth and eye appeal. Another son of "Kenworth" (reference sire) a bull that has produced so constantly with every cow and heifer we have joined him too.

Acc	47%	45%	56%	49%	49%	48%	52%	43%	42%	36%	39%	36%

COW COMMENTS: Good frame and big volume female with strong polled head, fine hair type, great feet and great udder like all the "JIMMY" daughters. Dam is a full sister to stud sire Glenlea High Guy (P) who has several daughters in this sale and two in our donor herd. Sire Glenlea Jimmy is a Reference Sire. This female is a larger female than the rest of the "Jimmy" daughters but still has very low BW calves and her EBV's reflect this. **EBV's are Top 5% for milk and Fat Cover, Top 10% for Low BW and IMF% while still being above breed average for all growth traits.**

CALF COMMENTS: **CALF AT FOOT.** GLE S12E Very thick, square, polled bull calf. Sire is OW GLENLEA NORTH (P) (Exciting new Reference Sire).

Acc	53%	59%	74%	67%	69%	67%	57%	59%	60%	54%	65%	54%

COW COMMENTS: An excellent daughter of well known, Ascot Eldorado. Medium framed female with extra softness that she passes onto her progeny, fine hair type, very sound feet and perfect udder. Dam is Donor with 39 registered progeny and is a full sister to widely used A.I. sire Ascot GOLDRUSH (P), so from a very high producing cow family originating with Branch View Madonna (P). She has had great 3 bulls for us, with her 2019 calf being in our team for our October Clermont sale. Her next calf to "North" will be very exciting as his extra overall carcass and power will combine perfectly with her extra softness and Low BW. **EBV's are exceptional Top 1% for both EMA and Fat Cover, very rare as opposing traits. Top 5% 200 days, Top 10% 400- and 600-day weight and carcass weight.**

Will calve prior to sale to OW GLENLEA NORTH (P) (Exciting new Reference Sire)

COW COMMENTS: This female has produced two lovely daughters and an outstanding bull calf! Her 2018 daughter by Glenlea Honorable (P) R/F is being retained. Medium framed, perfect udder, fine hair type, with extra visible softness in her body type. Sired by leading Moongool Sire "Gunsmoke". In her prime of life she will have many quality calves for her new owner, and perfectly suited to join to high performance bulls, like Glenlea Honorable (P) R/F we happy to discuss our joining recommendations for any female. **EBV's have below breed average BW with Top 5% IMF%, Top 10% 200- and 400-day weight and all positive carcass traits.** HOMOZYGOUS POLLED

COW COMMENTS: Deep bodied, very docile, great feet, great udder and milk production, fine hair type, and strong polled head. sired by "STEEL" his females are outstanding producers. Dam was a foundation Jackson female for the now dispersed Waterfall herd, that traces back to the IDEAL" cow family at Palgrove. We are retaining her first daughter born in 2017 and her 2018 bull will feature in our pen of 3 Bulls at Clermont Show in May 2021. **EBV's show Top 20% for Low BW with breed average growth and positive EMA.**

CALF COMMENTS: **CALFAT FOOT.** GLE S15E is a very square, thick, eye appealing heifer by Glenlea North (P) exciting new reference sire, I am sure we should be keeping the calf but she will become one of her new purchasers' favorite heifers no doubt! Calf born 2/2/21.

Acc	58%	58%	71%	61%	62%	63%	59%	56%	55%	47%	52%	46%

COW COMMENTS: One of the highest beef yielding females in our whole program! Massive carcass, perfect udder, Hugh volume in medium framed, early maturing type. Strong polled head, perfect feet, very fine hair type. G24 presents as a Full French Polled female in body type. Dam was one of our leading Donors with 25 registered progeny in her lifetime, with embryos still in storage. Sire is trait leading reference sire, with a large influence throughout this catalogue. Full brother was our top selling bull at 2013 bull sale at Guyra NSW at \$10,000. A real matron of the herd with several years of production left yet. **EBV's are at top of the breed, Top 5% for all growth traits, carcass weight, and IMF%. Top 10% EMA and top 15% Fat cover and Milk, all that with moderate BW and so she bends the growth curve and the carcass traits as well!!**

CALF COMMENTS: **CALF AT FOOT.** GLE S8E by Glenlea Just Red (P) R/F is a stunning, very square, thick Red factor polled Heifer that is potentially Homo polled. She has the class, even at this young age, to base a Red Factor program around, a great unit to produce sale topping bulls for any market! Calf born 19/1/21.

COW COMMENTS: Great Gobongo matron that has produced progeny with extra muscle to any sire we have joined her to. Medium framed, great udder, very fine hair type, gentle nature, her only daughter until her calf born this year was sold in our 2019 sale to Aserlay Farms in QLD. Sired by a powerful breeding bull that we admired when he was a 2-year-old. Her Dam was from the long dispersed Mandalong stud most well-known cow families, the Oregon females. **EBV's strong carcass data in the top 20% of the breed with growth just below breed average, with moderate BW makes her ideal to breed to high performance sires of the breed and her heifer calf at side is showing that off perfectly.**

CALF COMMENTS: CALF AT FOOT. GLE S9E is a polled daughter of exciting new sire OW Glenlea North (P). deep, square, great bone and wide topline and with added eye appeal that's often called the X factor! I think her best calf and the purchaser of this female is getting a great cow, with several calves left in her yet plus an outstanding heifer to go straight into the front paddock mob! Calf born 24/1/21.

COW COMMENTS: Powerful Pinay matron with all French bloodlines going back to the leading Donor cow Roslyn U87 who has 44 registered progeny. Long bodied with loads of carcass, and very sound. These herd matron cows are very safe buys as for them to stay in the herd, they have met production criteria year after year. Pinay needs no introduction with 1100 registered progeny in Australia. Dam was a high seller at National sale in 2004. **EBV's are above breed average for all growth traits, with top 1% for EMA and Beef Yield, which is she exhibits in the overall power in her body type.**

CALF COMMENTS: **CALF AT FOOT.** GLE S11E Polled, Red Factor heifer, sired by Glenlea Just Red (P) R/F, outstanding calf that will grow into a great cow, we are offering a full sister at Lot 120, E3E's last year's calf so you can see what the calf will grow out to be.

COW COMMENTS: This matron has produced outstanding bulls, sale toppers on several occasions. Classic Charolais type cow, big volume, big footed, fine hair type, great udder and bomb proof temperament. Her sire was a blend of Impeccable and Aga Kha, foundation bloodlines of the breed in Australia, her dam was a member of the Carol cow family one of our oldest. E16 pedigree is loaded with French Bloodlines. EBV's show growth traits around breed average, with above breed average EMA and Top 15% Beef Yield.

Due to calve prior to sale to Glenela Just Red (P) R/F a mating we are excited to see the result of.

PHOTO: A rising 2 year old son of Lot 67 sired by "Lethel" (Reference sire) sold for \$8,000 at Agrow 2020.

COW COMMENTS: Outstanding young Red Factor female, big volume, loads of carcass, perfect udder, fine hair, broad muzzled and bomb proof temperament. Her first heifer sold for \$6000 at our Elite private heifer sale last year, her 2020 bull calf will be one of our lead sale bulls for Autumn 2022. We purchased M63 as a calf at side of her dam in 2017. Sire was a heavily used in the Allednaw herd leaving extra thick, early maturing progeny and many of their current herd are daughters of this bull. Dam was purchased by Glenlea as a donor prospect cow we have sold daughters to \$9000. Grand Dam was purchase as a calf at foot from Glenlea way back in 2007, the Nunciata cow family is one of Glenlea's oldest and best. **EBV's Top 10% of breed Beef Yield, Top 15% EMA, top 25% growth**

Due to calve prior to sale day to Glenlea Just Red (P) R/F. very exciting mating that should produce a dark red polled calf! We are happy to calve her down at no expense to purchaser under usual conditions.

COMMENTS: Classy female! Moderate framed, early maturing, good growth, fine coated, easy doing, excellent udder with good overall carcass and plenty of fat cover. A young female that has produced an excellent calf with her whole life in front of her. Dam is Donor cow who we have sold heifer progeny to \$9000. Sire has produced a number of high selling progeny across Australia in last year or two. Friesia 1st is HOMOZYGOUS POLLED and we are retaining her 2020 heifer calf. We think calf from this mating will be special, Homozygous by pedigree and Red Factor! **EBV's top 15% of breed for growth traits, moderate BW with all positive and well above breed average carcass traits**

Will calve after sale.

from 20/11/20 to 31/1/21

COW COMMENTS: Big strong polled female, long bodied, good bone, fine hair type and excellent udder. Her calf got a bad case of scours and we had to take him off her and we will retain this calf, offered PTIC. Sire has been a bull that has left a line of very productive high-performance daughters. Dam is a powerful female sired by the impact sire Glenlea Big Gun (P) R/F. EBV's top 15% growth traits with all positive carcass traits at or above breed average.

ABOUT LOT 71 TO 73

Full Flushes in our leading Donors. Full terms and conditions can be found in the sale conditions at the front of catalogue. Full access to our exclusive A.I. sires for these flushes.

NEVER DONE E.T. PROGRAMS?? or not practical due to location to get specialist E.T. technicians? We can provide recipient cows and transfer embryos for successful purchasers, and deliver pregnant recipients, call us to discuss the process and costs. This is a great value for money way to access leading genetics.

The Dockrill family are an integral part of Glenlea Beef and provide a range of services, from feeding and showing our cattle, preparing bulls for our range of bull sales, marketing photos, clipping and video taking, production and editing. Additionally an increasing amount of private bulls directly from their Casino, NSW property .

All the rest of the Glenlea Beef team thank them for all their support, input and hard work without which Glenlea Beef could not operate in the way it does currently.

COMMENTS: A young donor that we first flushed in 2020, after she produced an outstanding daughter, P27 who is a feature in this sale at Lot 18. Outcross bloodlines on the Dam side to most other Glenlea donors. We are confident this female will produce many outstanding progeny and she is one of our rising stars, your chance to get in early!. Massive volume and carcass, great bone, very fine hair type, perfect udder with plenty of Milk, strong polled head and broad muzzle, perfect feet all with a medium frame. Phenotypically zero faults. Her second calf will be a feature bull at our 2021 Clermont Bull Sale. Sire is a leading producer, with very strong maternal traits leaving many outstanding females in the now dispersed Waterfall herd. Dam is from the Estella cow family with a large French influence from sires on the dam side, pedigree has some of the greats of the breed. **EBV's Top 5% Mature cow weight, Top 10% of breed for 400- and 600-day growth, Milk and IMF% with above average EMA and Fat Cover.**

L44 will calve in February to Glenlea Just Red (P) R/F and we will be flushing her in May 2021. Purchasers responsible for all flushing and program costs, including semen as per sale conditions.

PHOTO: L44's first calf GLE P27E at weaning 2019. She is offered at Lot 18 in this catalogue with calf at foot and rejoined.

COMMENTS: Rebby 14th is an outstanding donor cow that was the result of JV program. She has generated over \$50,000 in progeny and embryos sales. A daughter of “Cigar” one of the best producing sires ever imported from the USA. Dam is a prolific Donor who has 33 registered progeny in 7 leading stud herd across the country! Her Grand dam has 47 registered progeny! H14 is a third-generation donor cow, she currently has 13 registered progeny with more pregnancies on the way, and her next natural calf which will be born before this sale. **EBV's that really express as a great doing moderate framed female that combines perfectly with the highest performance bulls in the breed.** We have retained a daughter who is a donor herself. Another daughter, is feature in this sale at Lot 25 with a calf at foot. A natural yearling heifer (sired by GLENLEA HONORABLE (P) R/F) sold for \$9000 privately in 2020. Outstanding full brother to lot 25 “Pluto” pictured at 24 months. H14 has a record of producing big flushes, producing two flushes of 19 and 20 freezable embryos in 2019. Great value way to access leading genetics.

H14 will calve in February to Glenlea Just Red (P) R/F and will be Flush in May 2021. Purchasers responsible for all flushing and program costs, including semen as per sale conditions.

COMMENTS: Estella H26 is one of our most powerful polled donors. Part of the same JV program back in 2012 as previous lot. In 2020 she was the dam of our highest priced bull sold at Auction Glenlea Pheonix (P) R/F for \$25,000 and we sold her 10-month-old natural calf (see photo below) for \$9000. We have a number of pregnancies on the way and embryos in storage. A maximum performance female with massive volume and perfect structure. Her progeny and embryo sales now exceed \$50,000. *Her EBV's are top 1% of the breed in all growth traits, milk at +20 and carcass weight with impressive EMA and Beef Yield.* Sired by one of the most used French bulls in the modern era, IMPAIR and out of one Australia's most well-known cow families the Estella's, her Dam has 23 registered progeny and Grand Dam 30 progeny, who is also the Dam of Palgrove Viagra (P) A.I. Sire. H26 has been flushed several times for an average of 9 embryos each time.

H26 is due to calve to Glenlea Just Red (P) R/F in June and will be flushed in August 2021. Purchasers responsible for all flushing and program costs, including semen as per sale conditions.

PHOTO: Estella H26 at 9 years of age - 6 months in calf.

PHOTO: Estella H26 at 7 years with a 3 month old calf at foot, on coastal country.

ABOUT LOT 74 TO 128

These heifers are an outstanding line, could buy them all and have a fantastic stud herd of Charolais females.

Lot 74 to Lot 79 have been run at our Coffs Harbour properties. Guest vendor Calmview all born on their Lismore properties, has had their joined and unjoined heifers at "PINEDOCK", Casino with James and Jane Dockrill and were joined in the paddock there. All the Glenlea unjoined heifers were born on the coast and in mid spring 2020 were moved to a property just west of Guyra on the Northern tablelands, the exception being Lots 89 and 90 which have been run at our Dorrigo property since weaning.

Glenlea Pistol (P) - GLE P55E. Pistol is an E.T. son of Lot 3C. Sired by Silverstream Holster (P). Sold to Allednaw Charolais in 2020 as stud sire, and sire of Lot 4A. Photo at 20 months and 850kg.

Glenlea Quartermaster (P) (R/F) - GLE Q44E. 2019 natural calf of Lot 3C. Sired by Glenlea Honorable (P) R/F. Sold to Charnelle Charolais as stud sire at our 2020 Clermont Bull sale for \$18,000. Photo at 19 months and 900kg.

Homo Polled.

COMMENTS: This heifer offers an opportunity to secure pedigree that oozes Charolais type and class. Her Sire has been breeding exceptionally well. His daughters are very consistent with perfect udders and type. The Dam is wide based, big volume cow that is very maternal. This heifer is easy doing with lots of volume and substance. She has eye appeal and pedigree to match.

Joined to Palgrove Nifty PK N485E Homo Polled. His sire is Pleasant Dawn Chisiun. Nifty is low birth weight at -3.1. Paddocked on 29/08/20. Preg test details sale day.

COMMENTS: Another outstanding young polled red factor heifer from the heart of the Calmview herd where maternal bloodlines run deep. With genetics of Impair and Platinum Ultra in the Dam's parentage you won't find better female traits. **Crossed with full French sire to produce a set of EBVs well above average for growth.** Eye Impair is a red factor heifer and is an ideal type of Charolais female that has all the P's – Polled, Performance, Pretty, Practical.

Joined to Palgrave Nifty PK N485E Homo Polled. His sire is Pleasant Dawn Chisiun. Nifty is low birth weight at -3.1. Paddocked on 29/08/20. Preg test details sale day.

Acc	40%	39%	52%	43%	42%	43%	36%	36%	36%	29%	33%	28%

COMMENTS: A great bodied heifer to lead off this draft of outstanding ready to join heifers. Extra carcass is evident in this heifer coming from both side of her pedigree. Her sire, "Kenworth (P)" reference sires. Dam had her 2019 bull sell for \$7500 at our Clermont bull sale in 2020, and is a meduim framed cow with a great udder and she keeps producing the good ones! Bardot 2nd will breed some high selling bulls in her lifetime for certain, a heifer that we wanted to keep (like many in the sale), but decided to match her up with her ¾ sister, Lot 90 to make a great pair to start this section of the sale. She will become a favorite for her purchaser. EBV's are well above average across all growth and carcass traits. This heifer has been running at our Dorrigo property. Hence has a more hair in the cooler climate.

Acc	32%	36%	55%	52%	59%	53%	30%	46%	48%	41%	55%	42%

COMMENTS: The first "Howler" daughter to be offered, and a beauty she is, just very appealing in every way. Long bodied, good overall Beef Yield, medium framed, she will produce some great progeny for her new owner. All these "Howler" daughters are nearly all out of first calvers, where weaned early 3 to 4 months old and straight after fire burnt out the property they were running on, they have not had it easy, but have grown into Stud heifers worthy of the Glenlea name. Dam is an outstanding "Hilton" cow, one of our best, with loads of growth and milk. EBV's growth traits Top 5 to 10% of breed, along with carcass weight, with EMA and IMF % positive.

Acc	45%	47%	71%	59%	63%	61%	42%	44%	53%	44%	59%	46%

COMMENTS: A deep bodied easy doing, 'Charol' heifer. Sired by "Kenworth" and Line breed to RP Rio Bravo D15E, reference sire. Dam is feature lot, 10B. Moderate framed, great temperament, fine hair, great teat placement and will become a favorite for her new owner as her Dam has for us. **EBV's Top 15% Low BW, Direct Calving ease and Milk! Just on breed average growth and Top 10% EMA with other carcass traits above breed average. HOMOZYGOUS POLLED**

EBV	-20.2	+1.9	+4.1	+20	+38	+56	+3	+0.6	+32	+3.1	+0.5	+0.0
Acc	42%	52%	69%	56%	62%	59%	37%	48%	51%	43%	57%	44%

COMMENTS: One of the youngest heifers in this section of the sale. Such a gentle nature, with no special handling, great bone, that will support her frame and weight as a mature female. Her dam has joined the donor herd this year, and this heifer will grow out to become a massive cow, one of only 3 honorable heifers in the sale. If you want power then this is it, she hasn't had any extra feeding, was a late calf, weaned early and battled through a tough winter in 2020, but the good judge's will recognize her potential. Most suited to northern markets. **EBV's top 5% all growth traits and carcass weight and EMA. And still with above average Fat cover.**

PHOTO: Glenlea Pluto (P)
GLE P38E at 24 months 980kg

COMMENTS: Pluto is a powerful bull from every aspect, strong overall type and polled head, good frame and bone, very sound large feet. His maturity pattern is why we like him so much, his overall carcass yield was there at weaning, yearling and as 2-year-old, he just kept growing and stayed the same shape. He is our leading son of Silverstream Holster (P) born in 2018 and out of leading Donor Dam, Rebbly 14th. She has generated over \$50,000 in progeny and embryo sales, offering two genetic lots at Lot 39 and Lot 72 from this Donor. **EBV's Top 15% 200-day weight with well above average 400- and 600-day weight.** His overall Beef Yield is very evident and based on experience we feel this bull's carcass figures will increase as his progeny data is added. His raw scans for EMA were the highest in his group. This is not unusual as progeny data is what "proves" the EBV's.

PHOTO: Age 22 months, a few days out from his first mob of females. Feb 2021.

COMMENTS: Powerful Dark Red sire that we admire for his great thickness, depth of body, and big pelvic capacity. Medium framed, big strong feet, fine hair type. The natural doability this bull has is what we strive to produce, his progeny will survive and hold in the tough times and gain fast on grass or in the feedlot. His sire, Lannister is producing high performance progeny, with overall carcass and easy finishing, while moderating frame at the same time. Q405 dam's is a big powerful feamble, Dark Red coat color, sired by impact Red Factor sire Glenlea Big Gun (P) out of a leading Red Factor "NOLANA Cow family" Donor from the 2000's. **EBV's have all his growth traits and carcass weight and IMF% in the top 1 to 5% of the breed, EMA Top 15%.**

PHOTO: Glenlea Quintus (P)
GLE Q64E at 15 months 750kg

COMMENTS: The most exciting white son of Glenlea Honorable we have bred to date. Exceptional growth, exceptional softness, exceptional temperament, exceptional fine hair, exceptional overall power! We breed Charolais to add growth and carcass yield in cross breeding programs, often the ability to fatten progeny quickly is lost, chasing that extra muscle.... Not with Quintus he has it all and so will his progeny! His sire is renowned in the breed, his dam is one of our leading next generation donors, and combining two of Glenlea's greatest cow families the "CHAROL" and "NOLANA". Off the chart EBV's including top 5% Milk EBV. Quintus is her second natural calf; he is the complete sire package, and is HOMOZYGOUS POLLED. Quintus EBV's Top 5% of breed for all growth traits and IMF%, Top 10% EMA and carcass weight with top 15% Fat Cover.

PHOTO: Glenlea Quarterback (P) R/F
at 16 months 720kg

COMMENTS: An exciting Low BW, carcass bull. Moderate to Medium framed, deep bodied with loads of yield and still easy finishing type. Strong polled head and jaw, broad muzzle, perfect feet, very fine hair, a great type of sire, that is Red and Homozygous Polled. His sire is so well known in the breed and progeny are highly sort after. His Dam has earned over \$35,000 in progeny and embryo sales in 2020 alone and is one of our most valued donors. Quarterback's EBV's are well below breed average for BW, with top 20% direct Calving ease, above breed average for all growth traits and EMA with top 5% Beef Yield. Perfect to use over North American sired heifers. Semen is available from Quarterback, call Christie at UCBS, Allora QLD 0448292707 or talk to us direct at Glenlea.

Four Glenlea Just Red Daughters, Lot 48 calf at foot, Lot 8A, Lot 7A and Lot 12A, 6 to 7 months
