

KAROONDA HEREFORD STUD

Annual Sale
Tuesday 23rd March 2021

LOT 5 - KAROONDA WARHEAD

BULLS AVAILABLE FOR INSPECTION BEFORE THE SALE

Give us a call and come for a visit, we are more than happy to show you around the bulls and the females that stand behind them!

All 2021 sale bulls are Sire Verified, Vet Checked and tested PI Negative.

Steering you in the right direction!

Autumn 2019 drop steers (stablemates to the sale bulls) processed through the Never Ever program in November, all steers were in the top 25% for MSA Grading with almost half being in the top 10%

Karoonda Herefords invite you to Gelantipy for our annual Bull Sale

23rd MARCH 2021

Inspection Commencing 9:30am

Sale Commencing 1:30pm

***Lunch and refreshments provided, a small donation to the Bush
Nursing Centre appreciated.***

Peter Godbolt - 0457 591 929

Directions:

Karoonda Park is located in Gelantipy 40 minutes north of Buchan on the Gelantipy Road.

Inspection

Viewing of cattle can be arranged at any time by appointment and from 9:30am on the morning of the sale.

Herd Health

*All Karoonda bulls were checked by Dr D. Harms, Main Street Vet Clinic, Bairnsdale on the 22 December 2020 and come with veterinary certificates for breeding soundness.

*** Vaccination**

- Sale bulls vaccinated with Piliguard in November 2020 and as calves
- 7 in 1 vaccinations, minimum of 3 vaccinations
- Tested PI negative and vaccinated with Pestiguard - 2 shot program, we recommend an annual booster to ensure coverage.

Carcase Data

Karoonda's bulls will be weighed and scanned by Geoff Moncrieff prior to the sale and figures will be available on a supplementary sheet.

Delivery

Bulls purchased are held free of charge until time of transport and bulls will be transported free of charge to local areas. We will endeavour to have bulls delivered promptly after the sale and appreciate your understanding as we organise loads to various regions.

Rebate

2% Rebate to outside Agents introducing buyers in writing or by phone at least 12 hours prior to the sale or who attend the sale and buy on the behalf of their client. No verbal instructions, please fill out buyers slips.

Accommodation

Accommodation and meals are available at Karoonda Park please contact Lauren on (03) 5155 0250 or Judi on (03) 5155 0220. We welcome people to stay either the night before or after our sale.

Catalogue

We endeavour to make sure that all information provided in the catalogue is accurate and relevant, but no responsibility is accepted for any errors which may have occurred

Guarantee

Karoonda guarantees the fertility of all sale bulls for a period of one year from the date of sale. If Karoonda receives notification of infertility (not caused by injury) and a relevant certificate from a veterinarian an arrangement can be made to replace the bull. Purchasers will receive a credit equal to the purchase price minus the salvage value.

Conditions of Sale

Terms and conditions will apply as displayed at buyer registration on sale day. Insurance whether it be total cover or transit insurance is recommended. While we will do our best ensure all purchases arrive in top condition, at the fall of the hammer the animal purchased is the buyers responsibility.

Karoonda recommends insuring your purchases.

Disclaimer Notice

People entering the property for any purpose whatsoever, including attendance of cattle auctions, do so at their own risk. We are not liable to you for personal injury or death suffered by you and/or for the theft, loss of or damage to any personal property caused or contributed to by our or their negligence, deliberate act or unlawful conduct. "We", "Us" or "Our" refer to the owners, their employees, contractors, agents and each of them.

BREEDPLAN INFORMATION

Breedplan is a performance evaluation programme that describes the genetic merit of bulls for a number of commercially important traits. This genetic merit is given as an Estimated Breeding Value (EBV) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan EBVs from other herds. When comparing bulls, the EBV of each bull can be compared against the breed benchmark of zero (0), or against the current breed average EBV which are shown at the end of this entry.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Days to Calving EBVs are estimates of genetic differences between animals in time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. The Days to Calving EBV promotes those cows that calve earlier in the season compared to those that calve later, while penalising those cows that do not calve. Lower, or more negative, Days to Calving EBVs are generally more favourable.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses. Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indexes – Selection Indexes indicate the possible extra dollars earned per cow joined in self replacing herds targeting a particular market.

Southern Self-Replacing Index – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding.

Southern Baldy Terminal Index – Estimates the genetic difference between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos taurus (eg. Angus) females where all progeny are slaughtered.

Hereford Breed Averages - EBV's for Australian 2018 Born Calves

INDEX VALUES S S-R +\$124 N S-R +\$110 SB +\$125 NB +\$91

Accuracy

A trait EBV will only be published if the accuracy of the specific trait is greater than 20%. Each trait for an animal can then be compared to the breed average, to see how the individual animal compares with the rest of the breed. Accuracy below 50% tend to be based on little information & will have a greater chance of variation as more data becomes available.

HORN STATUS	
H	Horned Animal - All horned cattle are dehorned at birth
H#	Horned Animal with poll genetics in the first six generations
PP	Homozygous Polled Animal - Carries two poll genes all offspring will be polled
HP	Heterzygous Poll - Carries Horned and Poll Gene, horn status of offspring will depend on cows horn status
S	Poll animal with Scurs - Small unattached horn.

Thought of the Day - Never act rashly ... Take STOCK of the situation first.

LET ME BEND YOUR EAR & SEE IF I CAN MAKE YOU SMILE

You might be a farmer if

If you know the value of a 5-gallon buckets and you've never thrown one away that was not busted

You plan family trips on rainy days

You offer to take your family to lunch ... because you need some thing from the farm/ machinery store in town.

If the equipment in your shed is 10 times more valuable than what is parked in your garage

Your idea of neighbourhood watch is someone calling to let you know your cattle are out or a cow is calving.

You learned to drive a tractor or feed out hay long before you got your license.

If you can tell the difference between a bull and a heifer from a distance

If family picnics are most commonly shared on the tailgate of a ute during planting or hay season

If regular social conversation with your closest friends involves rainfall, equipment repairs, stock prices, or herbicides

If spending time alone with your wife in the evening means she is holding the flashlight while you fix something

Your idea of a babysitter is putting your child in the tractor seat to fall asleep.

You own a ton of hats (mostly free) but continue to wear the same one or two of them.

Hydrotherapy for your dog involves a trip to the nearest dam.

Your tractor has been used for scaffolding, road maintenance and garden renovation.

If you have ever worn pajamas and gumboots to do a midnight check on poddy calves, disturbed chooks or barking dogs.

Reasons why farm utes are not the best cars to steal.

- * It's difficult to drive fast with fencing tools, ropes, chains and buckets in the back.
- * The large round bale in the tray makes it difficult to see if you are being chased.
- * Top speed may be 80km/hour.
- * The Border Collie / Kelpie in the back looks protective.
- * It's hard to commit a crime while everyone is waving at you, knows where you have visited and where you are heading.

We used K. Woodbine lightly over heifers for our Autumn joining when he was 14 months old. It was a testament to his temperment that I was able to walk him out of the group of 30 bulls he was running with and walk him back to the yards for joining. I was 7 months pregnant at the time so my top speed was not very fast.

Need someone who knows insurance?

You need to know James.

Insure with WFI and you'll deal directly with an insurance specialist who will take the time to understand your insurance needs.

For insurance with a personal touch you need to know James.

James Gilmore

0418 587 688 | 1300 934 934

james.gilmore@wfi.com.au

To see if our products are right for you, always read the PDS from the product issuer, Insurance Australia Limited AEN 11000016722 AFSL 227681 trading as WFI (WFI). This flyer doesn't take into account your objectives, financial situation and needs. You should consider these matters and the relevant Product Disclosure Statement (PDS) before you act on any advice. You can get a copy of our PDS from our website at www.wfi.com.au or by calling 1300 934 934. If you purchase any WFI product we will charge you a premium, plus any taxes and charges, based on your risk profile and circumstances. James Gilmore (AR 407279) is an Authorised Representative of WFI.
