## *"Remolea Online Opportunity Female Sale"*

The Females in this offering are the result of 59 years of breeding registered Poll Hereford. Remolea Poll Herefords was founded in 1962 by Hilary and the late Kevin O'Leary. Today Remolea Poll Herefords is owned and operated by Hilary and Terry O'Leary and their respective families.

We are located on the flood plain of the Condamine river, within the Darling Downs region. We are fortunate to have a variety of farmlands, comprising of both dark, deep black soil river flats and timbered grazing lands. We run our herd under the toughest commercial conditions as we feel this is imperative in maintaining a fertile, efficient and profitable enterprise. Our cows are exposed to a variety of seasonal conditions from droughts to flooding rains. We feel this assists in climatizing our breeders to a multitude of climates and/or conditions that this country has to offer.

Through embracing new technology, along with standard procedures and the high importance placed upon phenotype features; Remolea Poll Herefords strive toward the improvement of performance across all sectors of the beef industry. Traits listed below are considered imperative toward herd improvement:

- Confirmation
- Fertility & Mothering Ability
- Temperament
- Eye Pigment & Setting
- Skin & Hair
- Doing Ability

Throughout this process, no expense has been spared in seeking desired genetics to improve profitability, efficiency, and all things performance. Sought after genetics have influenced our herd to have an impact on the bottom line on the commercial cattlemen and a positive impact on the beef industry.

We thank you for your interest in our females offered within this 2021 opportunity; and wish you all the best with your purchases. If you have any queries or questions prior to sale time; or thereafter please do not hesitate to get in contact with the Remolea team.

*Patrick O'Leary*  
*Remolea Poll Herefords*
