GUILFORD

POLL HEREFORDS

Welcome to Guilford. Our 47th annual sale will be held on Friday 9th of April at 1.30pm, offering 39 bulls. This is a change of date from our usual first week of May. It is planned that the change will be permanent, however, the date will vary slightly from year to year depending when Easter falls.

This year we will once again be using the Helmsman sale system, and we hope this will allow buyers the opportunity to purchase bulls in their order of preference regardless of the catalogue order. The sale will again this year be interfaced with AuctionsPlus, allowing buyers who cannot make it to the sale to bid online. To bid you must be a registered AuctionsPlus user and must register preferably 24 hours prior to the sale. Phone bidding through an agent on site is also available. For buyers not able to physically make it to the sale to inspect the bulls we will have photos and videos of all bulls available on the website and through AuctionsPlus. We will endeavour to have as much information as possible on our supplementary sheet which should be available on our website no later than 6/4/2021. Agents and ourselves are also happy to give detailed descriptions of any bulls via phone and answer any questions you may have. Anyone buying bulls sight unseen can rest assured that their purchases are fully backed up by us, and we will do as much as possible to make sure that they are satisfied with their purchases. Pre sale day inspections of the bulls are welcomed and can be arranged by appointment.

In the store saleyards, Guilford cattle are well sought after by finishers due to the extra weight gain and doing ability they offer. Herefords Australia informed us that the price our weaner steers achieved at Bothwell weaner sale in 2016 was the National top price for Hereford weaners for the 2016 Autumn weaner selling season, and it was also believed to be an all breeds top price as well. This result is a product of the growth, milk, muscle, and doing ability we have bred into our herd and shows that the genetics at Guilford are equal to any found across Australia.

The bulls have all been run as one group from weaning until December 16th, and then split into two groups (Lots 1-20, and lots 21-39) with identical feed conditions.

We are pleased with this years bulls with very good type and performance running right through the catalogue, and we offer them with confidence.

If you are looking for easy care cattle with proven commercial performance, then we look forward to assisting you on the 9th of April or pre sale inspection by appointment is welcome any time before. If we can be of any assistance before or on sale day please do not hesitate to ask.

The Davie Family.

Sale Information

Guilford is located on Torhill Road approximately 13kms from Ouse and 23kms from Bothwell.

Pre-sale inspection of cattle is welcome and can be arranged by appointment with the vendors.

Sale Day inspection from 10:30am. Helmsman sale starts at 1.30pm.

Bull weight sheet available on sale day. Or available on our website by 6/4/2021

Free delivery to Melbourne, King Island, and Flinders Island on bulls sold at auction for \$4000 & over.

Bulls will be delivered free locally and to major connection points. Eg. Bridgewater, Powranna.

Vendor terms for 1st September payment are available to buyers approved by the agents.

Insurance is recommended and can be arranged for transit and/or periods up to 12 months cover.

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

A rebate of 5% commission will be available to all outside agents who attend the sale with or on behalf of their client, and introduce clients in writing at least 12 hours prior to the commencement of the sale.

A rebate of 1% commission will be available to all outside agents not in attendance but introducing clients in writing at least 12 hours prior to the commencement of the sale.

The sale will also be interfaced with AuctionsPlus, to bid you must be a registered AuctionsPlus user and must register preferably 24 hours prior to the sale.

Sale venue has Telstra coverage and phone bidding can also be organised by contacting the selling agents.

Transport and accommodation available through the agents.

Limited refreshments available at sale.

We will comply with any Government regulations and procedures surrounding COVID-19.

Health.

All bulls have been ear notch tested PI negative for Pestivirus (BVDV).

The bulls have also been vaccinated with 5 in 1 vaccine and annual boosters are recommended. Last done 28/1/2021

Property has transitioned to a Johnes Beef Assurance Score (J-BAS) of 8, had been in the BJD MAP since 2000.

Property is EU accredited.

Sale Information

Guarantee.

All bulls sold are guaranteed fertile. This condition is valid for a period of 12 months after date of sale and if the vendor receives notification of infertility, not caused by injury, together with a certificate from a registered veterinarian on or before that date. In the event of an animal failing to breed, a credit equal to the full purchase price minus salvage value will be given at the following sale or by negotiation with the vendors. Any bulls for which claims are made must be delivered free of charge by the purchaser to any place mutually agreed upon.

Genetic Testing

All sale bulls have had a LD Genomic test completed. The Genomic information from this test is used to enhance EBV data and accuracy, verify the sire of all bulls, test for any genetic conditions, and also identify bulls that are homozygous poll. Homozygous poll animals are identified with (PP) after their name. (P) indicates a poll animal that carries a recessive horn gene. (S) indicates an animal has scurs.

If mated to horned cows, these bulls that carry two copies of the poll gene (PP) could genetically dehorn up to 100% of their progeny. These bulls would be of assistance to breeders with horned females that wish to accelerate genetic dehorning in their herds. This may help them achieve the requirements of some QA programs which aim to minimise dehorning. Generally, strong poll herds do not need to focus on the gene due to the dominance of the poll gene (P) to the horn gene (h).

Handling your new bull.

Most of our stockwork is done using horses and dogs. The cattle are also familiar with quad bikes and vehicles. In the yards the cattle are handled quietly and confidently. All sale bulls have been evaluated for temperament and are quiet and easy to handle under these conditions. However we recommend that when your new bull arrives home, have some steers or cows in the yards when you unload him to help him adjust to his new environment, especially if a solo purchase.

Liability.

Although accidents at sales are rare, people attending do so entirely at their own risk.

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Online catalogue with photographs & video of all sale bulls and some sires available at www.guilford.com.au

Please bring this catalogue to the Sale.

BREEDPLAN EXPLANATION

Breedplan is a performance evaluation programme that describes the genetic profile of bulls for a number of commercially important traits. This profile is given as an Estimated Breeding Value (EBV), expressed as a figure (+/-) relative to the breed benchmark of zero (0) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan from other herds.

AVERAGE 2021 GROUP BREEDPLAN EBVs FOR 2019 DROP CALVES.										
Bwt	Milk	200	400 wt	600 wt	CWT	EMA	Rump	RBV%	IMF%	SS
+4.1	+17	+33	+55	+78	+52	+3.6	+0.8	+0.8	+0.5	+2.1

GL - Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate easier calving & increased growth after birth.

BWT - Birth Weight EBV (kg). The lower the birth weight EBV, the lighter is the birth weight potential of the progeny.

Milk - Genetic milk EBV (kg) reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.

200 WT - 200 Day Weight EBV (kg) indicates the relative weight advantage of a sire at 8-10 months of age.

400 WT - 400 Day Weight EBV (kg) indicates the relative weight advantage of a sire at yearling age.

600 WT - 600 Day Weight EBV (kg) indicates the relative weight advantage of a sire beyond yearling age.

CWT - Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA - Eye Muscle Area EBV (sq.cm) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. Bulls with positive (+) EBVs for this trait are expected to produce more muscular progeny than bulls with negative EBVs.

Rump - More positive EBVs indicate more subcutaneous fat and earlier maturity. Bulls with negative EBVs for this trait are expected to produce relatively leaner progeny than bulls with positive EBVs

RBV% - Retail Beef Yield Percentage EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield.

IMF% - Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on target markets, positive values are generally more favourable.

SS - Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality & quantity. Positive EBVs indicate higher fertility. SS is also positively associated with female fertility.

Accuracies - The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance information on the animal or its relatives. Accuracy of less than 75% should be considered low.

Quebec is a very good bull by Legs, and his dam & grand dam are 2 of the top cows in the herd. His dam had lot 3 in last years sale and another good Fahrenheit son in our 2019 sale. We have a Fahrenheit son, from the grand dam we have retained and used in the stud the last 2 joinings. Quebec has an excellent set of EBVs which really tick all the boxes, moderate birth, top 5% for 200, 400 & 600 Day wt, top 10% for scrotal size, Rump fat and IMF%.

HYF DLF IEF MSUDF.
