

## MONTEREY SALE NOTES

1. All Monterey cows, calves and bulls are tested negative for BVDV (pestivirus).
2. All cows are pregnancy tested in calf, to calve by or earlier than, their 2020 calf.
3. Both bulls are fully vaccinated with 2x Vibriovax, 2x Pestiguard, 2x 7in1, and semen tested.
4. None of our entries, except for one, are washed, clipped or brushed prior to photos. They are pictured as they are, naturally, in the paddock.
5. Lots 5&6 are sired by Monterey Fortress, not the bulls listed in the catalogue. This will result in their milk EBV's being much higher, in line with how they present. All calves are DNA'd to their sire.
6. Cattle purchased can be left at Monterey at no charge until transported.
7. Interstate buyers please note – we organise and coordinate transport and paperwork. We will pay half the freight on lots \$5000 and over to Melbourne, Wodonga and Finley.
8. Monterey has JBas8 status in a JD free state - cattle are free to travel anywhere in Australia.

Please note – Due to unforeseen circumstances, none of our entries were videoed or entered in the virtual show. We regret not being able to participate and wish all other vendors all the best with the show.
