2021 Alumy Creek Angus Bull Sale

Welcome to our 31st Annual on property and online Angus Bull Sale.

We are all tired of hearing what an unprecedented year 2020 was—but how good was its finish and the start of 2021. Many areas have experienced a great grass/flood season—a very promising change to years of drought and fires. Fortunately the both the importance and value of agriculture plus food security continues to be sharply focused in the greater community. The world continues to recognize the need to feed populations and beef production continues to shine- the future very bright according to the analysts with commodity cattle bringing record sale yard prices and supply and demand pushing stock values to epic levels as producers across the country demonstrate their confidence by taking the opportunity to future proof their profits and rebuild their herds with quality premium genetics.

This year we are pleased to offer a **terrific draft of 51 quality bulls**. The draft is an exciting selection of powerful, **thick, heavily muscled carcass bulls** with many of them **calving ease curve bending bulls very suitable for heifers** or cows. This group of bulls presents very well having only known tough seasons until our break late in November last year and being testament to the easy doing high feed efficiency productive genetics we select for in our Angus cow herd. The bulls **are long bodied and strong topped with deep spring of rib, added thickness and consistent natural muscling**. The AI sires of these bulls are some of the best genetics available within the Angus breed globally and in Australia. Colin inspected many the US sires and we continue to be an early adopter using outcross genetic bulls early in their breeding career with many seeing heavy use as superior sires as time progresses.

We always select to breed quality Angus cattle that can produce a profit under commercial conditions with market flexibility to target the domestic, heavy grassfed or grainfed markets. Because we retain the sisters to the bulls we sell, the mature cow size of our cattle must be sustainable in our grazing environment, which is crucial to maintain performance during tough seasons. We also apply stiff selection pressure for fertility, our heifers must calve as 2 year olds unassisted and must go back in calf quickly to produce a calf each and every year. Clients comment on the consistency, quality and performance of their Alumy Creek sired replacement females. All the bulls in the catalogue will produce this valuable type of easy keeping, high fertility replacement females bred to work hard bringing in a good calf every year. These are the quality profit traits to rebuild your cow herd after the past few seasons.

We believe in using temperament, structure, EBVs and genomics as equal tools in the selection box for balanced sustainable cattle breeding and we don't just add the EBV numbers or single trait select. Our selection focus produces cattle that can achieve extra performance kilos on grass in the paddock with the carcass potential to also excel in the feedlot.

We continue to embrace new technology with the sale bulls again **all tested with the Zoetis HDi50K DNA genomic testing and all sire verified** so have confidence with your purchase. The bulls have excellent TACE results, many with top 1–10% EBVs for the multiple traits we have selected for over the past 30 years—**Calving Ease, Short Gestation Length, fast Growth, big Eye Muscle Area and heavy high quality Carcase Wt with high Feed Efficiency and Retail Yield**. These breed rankings are measured against all the performance recorded Angus cattle in Australia and New Zealand, confirmation that our bulls carry the genes for profitable performance even though our environment doesn't always allow them to express their full potential. Our bulls present in strong forward paddock condition, ready to go out and work well for you.

The 2021 sale draft again includes an outstanding selection of bulls by the calving ease, big muscle maternal and carcase specialists including the sire of our 2019 sale topper Baldrige Compass, as well as KCF Bennett TheRock, and LD Capitalist 316 all great over heifers or cows. This year sees more sons by the sire of the 2020 sale topper, the moderate birth weight yet very powerful high growth high efficiency muscle and feedlot sire Freys Opportunity and Vision Unanimous both perfect to power up and add quality profit to bos indicus or Euro cow herds and two new exciting but unfortunately now deceased sires—both impressive calving ease yet curve bending heavy muscled carcase bulls Rock Creek Rancher and EF Prime Quarter.

Wish we could get more Rancher semen for our heifers and sourced the last of the Prime Quarter semen along with Texas Angus who were also impressed with his progeny's performance. Check out the comments on each reference sire which appears under their TACE figures. All of the reference sires are quality maternal herd builders should you wish to retain female replacements from the sale draft bulls for herd rebuilding.

Our quality draft of locally bred raised Tenterfield tough bulls will be offered for sale online AuctionsPlus and on property at 1pm Friday 28th May 2021 at Coldawinda, Tenterfield NSW, just 10 minutes south of the Qld border on the New England Hwy. Photos and videos are available online or the bulls are available for inspection at Coldawinda, Scrub Road, Tenterfield from 10 am on sale day or by prior arrangement with Colin on 0429 431 900 or any of the agents.

As per usual phone bidding is also available through the agents and the bull sale will interface with Auctions Plus for those bidding Covid Safe from the comfort of their lounge room. Please call us if you would like a chat about any of the bulls. Take care and stay safe.

Colin, Lisa and family

Sale details

COVID-19 CHANGES: The sale will operate under the **CURRENT COVID-19 REQUIREMENTS** on the day and be subject to change. Please follow any current Public Health Orders and do not attend the sale in person if you feel sick or are awaiting test results. Please stay at home, embrace the digital age and participate online or over the phone with your agent of choice. All persons attending on property will be required to register and record contact details. Hand sanitizing with social distancing will be observed both in the pens and during the auction. **WE STRONGLY RECOMMEND PRESALE INSPECTIONS AND BIDDING ONLINE OR OVER THE PHONE TO MANAGE ANY COVID19 HEALTH RISKS.**

SALE DATE AND PRIOR INSPECTION TIME:

The sale will commence at **1pm on Friday, 28th May 2021**, on property and online with Auctionsplus. Cattle will be penned by 10am on Sale Day and we strongly recommend presale inspections which are by arrangement via the agents or vendor. **There will be no set open day this year—please phone Colin or the agents if you wish to inspect. If you buy online or over the phone sight unseen we happily stand behind the description of our bulls on offer.** All lots can be viewed online at AngusAustralia, Auctionsplus or www.alumycreekangus.com.au

REFRESHMENTS: As usual **all weather undercover open shelter** is available but the current COVID-19 regulations will dictate the sale catering. Subject to change **Covid Safe REFRESHMENTS** will be available at this year's sale.

SELLING SYSTEM: Sale of animals will be conducted under normal auction terms and conditions and will be interfaced online with AuctionsPlus.

Please **register and complete the buyers training with AuctionsPlus at least 24 hours presale and log in early** if bidding online. Your livestock agent will assist and **PHONE BIDDING IS AVAILABLE if you prefer**—please contact any of the agents to organize. Your PIC must be supplied to the selling Agents to obtain a buyer's number. Successful purchasers must give written advice regarding transport arrangements, with cattle are available for delivery at the conclusion of the sale. The agents will assist with your transport requirements. All animals are sold exclusive of GST.

INSURANCE: Is available from the agents on the day. We strongly recommend insurance on your purchases.

DIRECTIONS: 'Coldawinda' is located 4kms south east of Tenterfield at 420 Scrub Road. Turn East off the **New England Hwy at Clifton Street**, on the Southern End of Tenterfield. Travel one block to turn right at the T section onto **Scrub Road**. Travel **4kms** on bitumen with 'Coldawinda' on the Right.

HERD HEALTH: All sale bulls are **tested negative PI** (Persistently Infected) and vaccinated against **Pestivirus** with **Pestigard** vaccine. They are fully vaccinated with **7 in 1** (for **Clostridial** and **Lepto**), **Vibrio** and **3 Day Sickness** vaccine only requiring annual boosters. **Johnes Disease:** Alumy Creek Angus has over 20 years negative tests as a MN3 herd in the old JDMAP. We currently claim a JBAS 7. Our bulls are eligible to enter all states without further testing except WA—the same as other cattle from NSW where individual permit application would be required. **Cattle Tick:** Alumy Creek Angus is located in a cattle tick free area. Bulls can easily be held and blooded if required by arrangement. **Parasites:** Bulls were treated with Fasinex and Cydectin in May 2021.

MANAGEMENT: All Alumy Creek bulls carry a freeze brand for easy ID in the paddock. Alumy Creek sale bulls are quiet, well-mannered cattle used to being handled on foot, with dogs, ATVs and vehicles. They are rigorously screened for their temperament, but sale day places extra stresses on the bulls and this is no guarantee they will not misbehave under the pressure of sale day.

FERTILITY: All bulls have passed a physical examination and microscopic crush side semen test.

GUARANTEE: All bulls are sold with a six month guarantee as a calf getter valid for six months from the sale date. The vendor must receive written notification together with a certificate from a registered veterinarian stating the nature of the infertility before the expiration of that period. Animals injured or lost as a result of accident, negligence or any disease, are not covered by this guarantee. Vendor liability relating to fertility claims will not exceed the purchase price of the animal and are limited to a credit equal to the purchase price less the salvage value which may be utilized at a future Alumy Creek sale. Talk to us if you think you have a problem.

SIRE VERIFICATION and DNA HDi50K TESTING: All bulls have been **sire verified** (SV) and **genomic HDi50K** tested. They can be used to breed registered calves without further testing. The performance recording and genomic results are single step incorporated into TACE Breedplan to produce Estimated Breeding Values (EBVs). Many bulls are in the elite top 1-2% of the Australian/ New Zealand drop for Angus and Angus x seed stock. All bulls in the sale are free untested (FU) for the cattle defect genes AM, NH & DD except Lot 37 NKEQ080 who is AMC and therefore more suitable for crossbreeding in non-angus commercial herds. Talk to Lisa if you need more information.

HEALTH AND SAFETY OF VISITORS: COVID-19 social distancing and frequent hand sanitizing must occur. Visitors enter the pens of their own risk. **Children under 16 years old and dogs are strictly not permitted at the sale.** The bulls are known to be of good temperament under normal conditions. However sale day is not 'normal conditions'. If you enter the pens, take note of your surrounds and be conscious of your safety. Do not crowd the bulls, or loiter in the pens. Please use common sense and be alert at all times. Do not be alarmed, but it is critical that visitors pay attention to the risks associated with cattle and the day.

SALE CATALOGUE DISCLAIMER: All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However neither the vendor, the selling agents nor Angus Australia make any representations about the accuracy, reliability or completeness of any information in this catalogue, including but not limited to pedigree, DNA information, EBVS and Index Values, and do not assume any responsibility for the use or interpretation, accuracy or completeness of the information included in the catalogue, nor for the outcome (including consequential loss) of any action taken based on this information. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with an IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.
 PV: both parent have been verified by DNA
 SV: the sire has been verified by DNA
 #: DNA verification has not been conducted

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Other	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	ABI	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
	DOM	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
	HGRN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
	HGRS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

 Global super sire inspected by Colin in 2016 as the best Angus bull he saw. A proven calving ease sire, elite curve bender with calving ease, growth performance, maternal and carcass quality. His low birthwt progeny have great type, natural thickness, muscle shape, superior structure & are functional easy fleshing cattle. Use his sons with confidence over heifers. His daughters in production are moderate, efficient ideal deep body types with beautiful udder shape & attachment. Capitalist 316 sons have topped southern Aust 2021 sales & sold to \$240K at SAV Angus 2021 Bull Sale in the US. Dont miss his sons at **Lots 2, 9, 15, 16, 17, 18, 20, 33, 34, 39 & 42.**

 We still love TheRock sons & daughters. They continue to combine it all in an easy calving, low birthwt, curve bending heavy growth package. Super quiet, great structure with bonus carcass value. Add real muscle & powerful type back into your angus herd, not just numbers & you will love TheRocks too. If you need a bull to tick all the boxes check out TheRock sons at **Lots 7, 11, 12, 27 & 38.**

 Opportunity offers powerful Angus type, trait leading growth, carcass wt, yield & the added profit driver- feed efficiency. With less than 50 calves in Australia & 70% in our herd over 3 seasons, there has been consistent calving ease & moderate birth wts of 33.5 kg, 34kg & 35 kg av each year. US data with 300+ progeny confirms this - his Aust EBVs predict low calving ease & high birth wt have not been our experience. We know our Opportunities have good calving ease & moderate birth wts, & happily recommend their use on cows, especially to powerup Bos Indicus or Euro X for a quality heavy efficient black hided product. Opportunity sired the top seller last year and also the top marbling scan bull & heifer this year. Sire of **Lots 5, 6, 8, 28, 29, 30, 45 & 50.**

 Unanimous offers consistent proven genetics, excellent soundness with easy finishing all in a well structured powerful breed type package. His sons have great spring of rib & capacity for tough seasons with added great hindquarter setup for female replacements. The one son this year at **Lot 44.**

TERMS AND CONDITIONS OF SALE

- Terms are strictly cash or approved cheque on the day of sale, unless prior arrangements have been made with the Auctioneer before the fall of the hammer.
- Subject to the reserve price, the highest bidder shall be the purchaser.
- In the event of a disputed bid, the auctioneer shall be the sole arbitrator and his decision shall be final.
- The auctioneer may refuse to accept any bid, which, in his opinion, is not in the best interest of the vendor and shall have the right to refuse any such bid without giving any reason.
- Where the vendor reserves the right to bid at the auction in respect of a lot and instructs the auctioneer to make more than one bid on his behalf, the auctioneer shall, prior to submitting the lot for sale by auction, announce in a clear and precise manner the number of bids reserved by the vendor in respect to that lot.
- A bidder shall be deemed to be a principal unless, prior to the bidding, he has given to the auctioneer copy of written authority to bid for or on behalf of a person.
- The last price called by the auctioneer shall be the amount at which the lot has been sold.
- A bid cannot be made or accepted after the fall of the hammer.
- All lots will be at the purchaser's risk immediately after the fall of the hammer and no responsibility will be incurred by the auctioneer or vendor for their safekeeping. No exceptions shall be taken to any of the lots on delivery the whole having been open for inspection by the purchaser prior to the sale and on no account will any allowance be made.
- Every person on the auction premises before, during and after the sale shall be deemed to be there at his own risk and with notice of the conditions of the premises. Such person shall have no claim against the auctioneer or vendor in respect of any injury sustained or any accident, which may occur from any cause whatsoever.
- All cattle will be sold GST exclusive. GST will be added to the purchase price.

A 2% Outside Agents Rebate is available to Licensed Agents introducing purchasers in writing 24 hours prior to sale and settling on their behalf within 7 days of invoice.

Buyer's option to opt out of disclosing personal information to Angus Australia

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers

DO NOT consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Signature: Date:

Please forward this completed consent form to: **Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350.**
