Simultaneous Auction Information:

In a simultaneous Auction all lots are able to be bid on at once. After the first hour of the sale a timer will start at 60 seconds, the timer resets when there is bidding activity on any lot in the sale. Every time someone places a bid on any lot, the timer resets to 60 seconds. The amount of time the timer resets to gradually decreases until bidding activity stops for long enough for it to count down to zero. At this point all lots in the sale are closed. If you were the winning bidder on any lot in the sale and it hadn't met reserve you have one hour of priority negotiation time where the vendor cannot sell the lot to anyone else. After this time the vendor is free to sell the lot to whoever they please.

If you are not confident with the Auctions Plus system talk to your agent or our agents and they will be more than happy to facilitate your bidding for you.

Preparation

The NT Senepols bulls have been prepared in a rocky hill paddock where they have had ad lib access to Rhodes Grass dominated pasture, Riverina 14% Stud Cattle Pellets, and Sorghum Hay for approx. 120 days pre sale. (longer prep due to using some of these animals for display at Beef 2021) Prior to this they were on and off drought rations from weaning interspersed with periods on grass prior to going on full sale preparation.

Data

The bulls will be scanned by Paul Kenny a week prior to the sale. A supplementary sheet will be generated and circularised as soon as it is available via email and online. It will feature:

weights, P8 and Rib Fat Scans, EMA, Semen Motility and Scrotal Circumference. Yearling Scrotals for most lots are printed in the catalogue.

- Vibrovax Vaccine
