# Sale Information

## **BIDDING**

All bidding will take place on AuctionsPlus. Prospective bidders and purchasers must register with AuctionsPlus, or contact their local agent before the commencement of the sale.

## **REGISTRATION**

All cattle are sold as herdbook registered and are eligible for transfer at vendor's expense. Please advise transfer details on your registration of buyer's number.

## **TRANSFERS**

All animals sold must be transferred within thirty days of the sale to the purchaser. It is the vendor's responsibility to have any bulls sold to a current Stud member, DNA typed, and sire verified at point of transfer.

## **BUYING ORDERS & PHONE LINKUP**

A person nominated by you to act on your behalf will diligently execute buying orders. Bidding by mobile phone will be available.

## **CONTACT**

John Settree 0408 297 368

## **INSURANCE**

Insurance is recommended and will be available on sale day through attending representatives.

## **REBATE**

A 1% rebate is to be paid to outside registered agents attending with and settling on behalf of their clients within 7 days of receipt of invoice.

## **GST**

All bids are made on the understanding they are exclusive of GST, that is GST is to be added to all prices gained on the day. Health Status: J-BAS status is shown for every lot indicating the Bovine Johnes status of sale animals. At all times intending purchasers should consult with their local LLS District Veterinarian for health conditions applying for importing livestock into the district and crossing state borders.

## **EMBRYO LOTS**

All Embryos must be collected before sale date. 4 embryos constitute 1 lot of any joining to sire and or dam. Vendor to guarantee 50% conception if done by mutually agreed technician between vendor & purchaser. Lots are to be offered on a per embryo basis. A copy of the flush sheet indicating the freezing technique must also be included with the entry form. Both the sire and the dam used in a flush to produce embryos for sale must be Red coated animals (R.A.S.A) and Herdbook registered.

## **WARRANTIES:**

1. Females catalogued as unjoined are warranted fertile to natural service within 12 months of date of sale; the purchaser is to have the right to a full refund of the purchase price of the female (excluding any costs and expenses of the purchaser) on submitting a veterinary report after the expiration of 12 months to the effect that the purchaser has been unable to get the female in calf to natural service. The veterinarian must state that in his/her opinion there is no evidence that the female suffered any injury or illness since being sold to the purchaser, which could have affected her breeding ability. The veterinarian must also state that in his/her opinion there is no evidence that the female has been subjected to embryo transfer procedures. The veterinary report (together with a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the first anniversary of the sale date.

2. Bulls under 14 months must be sold as being able to serve and settle after reaching 14 months of age. The buyer is expected to provide reasonable care and feeding. Should the bull prove to be a nonbreeder, the buyer shall notify the seller within four months after the bull reaches 14 months of age. The seller shall then have six months to prove the bull to be a breeder. In no case shall the buyer be responsible for more than the selling price. Any issues arising from the sale of the younger cattle will not be the responsibility of the sale committee or either society. Bulls over 14 months in

the National Sale are to be sold as fertile and capable of natural service. The purchaser is to have the right to a full refund of the purchase price of the bull (excluding any costs and expenses of the purchase) within 3 months of the date of the sale subject to submitting a veterinarians' report stating that the bull is infertile or incapable of natural service. The veterinarian must also state that in his/her opinion that bull has not suffered any injury or illness since being sold to the purchaser, which could have affected his breeding ability. The veterinary report (together with the Statutory Declaration by the purchaser to the effect that the substance of the report is believed by the purchaser to be true and correct) must be forwarded to the vendor within 14 days of the date being three months after the sale date. All bulls have passed a semen test and passed a Veterinary Inspection within four weeks of the sale.

## **REFUND RESPONSIBILITY**

The responsibility to refunds based on conditions warranties lies with a particular vendor(s) of the lot(s). While the agents will assist in facilitating a refund if all conditions are met, the agents are not responsible for providing the refund regardless of the vendor's situation.

## **DISCLAIMER**

All reasonable care has been taken by the breed societies and the designer to ensure information is correct at the time of publication, however we take no responsibility for the accuracy, reliability or the use of this.

# Explanatory Breedplan Notes

## USING BREEDPLAN INFORMATION TO PURCHASE SUPERIOR CATTLE

BREEDPLAN allows the objective measurement of beef cattle to be transformed into estimates of genetic merit called Estimated Breeding Values (EBVs). EBVs should be used in conjunction with other selection tools like bull breeding soundness exams and structural assessments. The methodology behind BREEDPLAN has been around since the 1950's and has been continuously developed since then. BREEDPLAN itself has been around for almost 40 years and is used by 100+ breed associations in 15 countries. It is a proven technology with extensive scientific research and knowledge behind it.

## HOW TO USE EBVS TO SELECT ANIMALS

***It is important to note that the Red Angus and Simmental GROUP BREEDPLAN EBVS contained in this catalogue can only currently be used within each breed and cannot be used to compare across the breeds.***

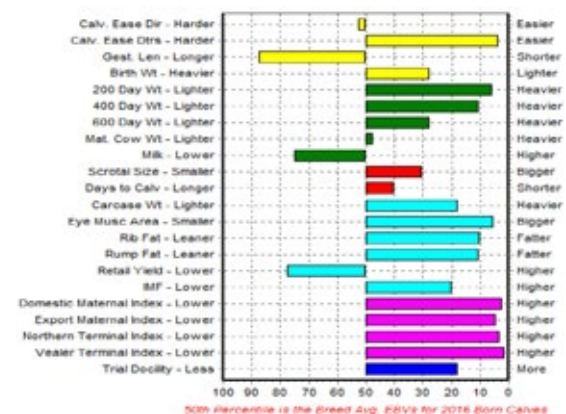

Percentile Band	600 Day Wt (kg)
Top Value	+107
Top 1%	+84
Top 5%	+71
Top 10%	+64
Top 15%	+60
Top 20%	+56
Top 25%	+53
Top 30%	+49
Top 35%	+47
Top 40%	+44
Top 45%	+42
Top 50%	+39

EBVs are expressed in the units of measurement for each particular trait. They are shown as positive or negative differences between an individual animal's genetics and the genetic base to which the animal is compared. For example, a bull with a 600-Day Weight EBV of +50 kg is 9 kg above a breed average of 39 kg. This means that his progeny would be expected to be 5.5 kg (11 kg ÷ 2 as half the genetics come from the cow) heavier than the progeny of a breed average bull.

The breed average can also be found in the percentile tables (Top 50% line). These tables can be used to evaluate where each animal ranks within the breed for each EBV trait. For example, a +50 kg bull would rank

in the top 30 % of the breed for the 600 Day Weight EBV.

Another useful tool is the EBV percentile graph which can be found on the BREEDPLAN Website. It is available by clicking on the graph symbol at the top left of EBV table for any animal. The EBV percentile graph shows which percentile band each animal is in for each trait. For most EBVs, it is desirable to have bars tending to the right-hand side of the graph, though there are exceptions (e.g. Mature Cow Weight) where moderate or the left

hand side of the graph may be preferable. The bars are also colour coded with calving traits being yellow, growth traits green, fertility traits red, carcass traits light blue, other traits dark blue and selection indexes pink.

The Mating Predictor on the BREEDPLAN website can be used to predict the parent average EBVs of the potential offspring from any potential matings. This can be useful when contemplating what potential progeny you might get from purchasing a cow or bull and mating to animals you already have access to. The Mating Predictor can be found at the top of the animal search page of the each breeds BREEDPLAN search web page.

When using EBVs to assist in selection decisions, it is important to place emphasis on those traits that are important to the particular markets and environment the bull is to be used in. Not all EBVs are relevant to each production system and, for some, a low or a moderate EBV may be more valuable than a high EBV. Selection indexes (described later in article) take the hard work out by balancing the combination of EBVs available.

## **EBVS PUBLISHED BY BREEDPLAN**

EBVs are published for a range of traits covering fertility, calving ease, growth, milking ability and carcass merit. The published EBVs are:

- Calving Ease Direct – more positive EBVs are favourable and indicate that 2 year old cows will have less difficulty birthing the progeny of this bull.
- Calving Ease Daughters - more positive EBVs are favourable and indicate easier calving of a sire's daughters at two years of age.
- Gestation Length - lower (negative) EBVs indicate shorter gestation which is associated with lower birth weights and easier calving.
- Birth Weight – lower EBV indicate lighter calves at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers or poorer calving cows of other breeds.
- 200, 400 & 600 Day Growth EBVs – more positive EBVs indicate faster growth to 200, 400 & 600 days of age, respectively.
- Mature Cow Weight EBV – indicates the size of the mature cow and thus how much feed she requires each year. Low to moderate EBVs are generally more favourable in self replacing or maternal production systems.
- Milk EBV - is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, on the 200-day weights of her calves.
- Scrotal Size EBV – more positive EBVs indicate better semen quality and quantity in males and younger age of puberty in females.
- Days to Calving EBV – more negative EBVs indicate a shorter interval from bull-in date to calving and therefore higher cow fertility. This EBV is not

currently available in the Red Angus analysis.

- Carcass Weight EBV – more positive EBVs indicate a heavier carcass weight at 650 days of age.
- Eye Muscle Area EBV – more positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.
- Rib and Rump Fat EBVs – more positive EBVs indicate more subcutaneous fat and earlier maturity.
- Retail Beef Yield EBVs – more positive EBVs indicate higher yielding carcasses.
- Intramuscular Fat EBVs – more positive EBVs indicate higher levels of intramuscular fat and better MSA grading scores.
- Docility EBV - more positive EBVs indicate a higher proportion of progeny with acceptable temperament. This EBV is not currently available in the Red Angus analysis.

## **EBV ACCURACY AND TRAITS OBSERVED**

Percentage accuracies are presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The actual traits observed for each animal can also be viewed when the animal is searched on the BREEDPLAN website. The higher the accuracy %, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

In general, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs, the animal with higher accuracy could be the safer choice, assuming other factors (e.g. structure) are equal.

## **SELECTION INDEXES**

Ranking animals on their Selection Index value sorts them based on their progeny's expected profitability for the targeted production system. This takes the confusion out of looking at all of the EBVs and deciding how important each is to your farming system. Australian selection indexes rank animals based on their net profitability per cow joined.

## RED ANGUS SELECTION INDEX DESCRIPTION

**SUPERMARKET** – Estimates the genetic differences between animals for a herd targeting the domestic supermarket trade and retaining daughters for breeding.

**VEALER** – Estimates the genetic differences between animals for a herd targeting vealer production and retaining daughters for breeding.

**NORTHERN\_STEER** – Estimates the genetic differences between animals for a herd in Northern Australia with Bos indicus cows targeting grass finished steers for export.

For more detail on the Red Angus Selection indexes, go to

## SIMMENTAL SELECTION INDEX DESCRIPTIONS

**DOMESTIC MATERNAL INDEX** - Estimates the genetic differences between animals for a herd in Southern Australia (e.g. Angus cows) targeting the domestic supermarket trade and retaining daughters for breeding.

**EXPORT MATERNAL INDEX** - Estimates the genetic differences between animals for herd in Southern Australia (e.g. Angus cows) targeting the export trade and retaining daughters for breeding.

**NORTHERN TERMINAL INDEX** - Estimates the genetic differences between animals for a herd in Northern Australia (e.g. Brahman cows) targeting the export trade.

**VEALER TERMINAL INDEX** - Estimates the genetic differences between animals for a herd in Southern Australia (e.g. Angus cows) targeting the vealer trade.

For more detail on the Simmental Selection indexes, go to <http://breedplan.une.edu.au/tips/Interpretation%20Australian%20Simmental%20Selection%20Indexes.pdf>

# Judge Profile - PJ Budler

PJ Budler was raised on a 5th generation cattle operation in South Africa. At age 15 he founded BonHaven Beef Cattle. Between 1996 and 2012 he grew BonHaven to 1,500 registered females on properties in 3 Southern African countries. The Hereford, Angus, Red Angus, Braford and Brahman herds achieved much success winning numerous National Shows and setting auction records on the continent.

In 2012, PJ relocated to Texas, USA, where he is the International Business Manager for Trans Ova Genetics. This position, together with running the annual “Champion of the World” Competition, judging shows, speaking at events and doing cattle consulting has taken him to 48 US states and 93 different countries thus far.

He has judged 58 different cattle breeds in 33 countries. In 2017 PJ became the first ever cattle judge to judge a National Show on all 6 continents.

Morgan is a moderate bull from our supermum Robyn (dam of Redgums 'On a Mission') and by Jillangolo Linkman; sire of last year's top selling female at the National. He has the stamp of Linkman with his big wide head, depth of front and reliable feet and legs. He has genetics from top studs Red U-2, Andras, Roundemup, Trevone Park, and IBR. He's a silky mover, quiet to handle and can pass on his dam's beautiful wedge and udder. 7in1, Pestiguard & Vibrovax.

 JINDELLISTON PARK COWBOY (AI) (MAF)  
 SCHIPPS RED VALE G69  
 SCHIPPS RED VALE X28

Tremendous performance and style in this young bull. Heaps of fleshing and structurally correct. His sire from Triple M has done a great job for us and has worked particularly well over our Ada females. Should find stud use to improve growth, milk and marbling.

Mt Charlie Master Blaster (MCFR1) is an outstanding, technically correct young bull with impeccable genetics. His grand-dam is a multi-interbreed winner (2018), his dam was Supreme Red Angus exhibit at Beef Week (2018) and Melbourne Royal (2019) and his sire was a Sydney Royal junior champion. Strong-topped, long-bodied, with plenty of thickness, terrific sire appeal and excellent temperament.

Quack, a full brother to GJBPQ004 carries impressive bloodlines . If you want thickness this one has it all with what I'd call a pretty impressive wrangler butt. Quack is a very soft early maturing bull with an exemplary temperament and great movement. If you want that high priced vealer or extra body in your future cow herd, this guy will provide it.

This bull is bred down from one of my favourite cow lines by Bywong Park Samuel N2. He is heterozygous black and homo polled. Has a great temperament and is deep bodied bull with good feet and structure. He shows a good muscling pattern with added softness and carries himself well. He has been vet assessed and semen tested. He has had the following vaccinations 7 in 1, vibrio vaccine, pestiguard, multi min and top line drenched.

Rebel will be 13 months on sale day. Rebel has defied the odds by being a Homo Polled Bull by Mt Ararat Pioneer (Pp) whose dam W Kathie B111 (H) is horned. Rebel's dam line has plenty of horned genetics throughout also. This makes for an unusual and desirable package. He is quite a rarity in the cattle world and will be very sought after for his combination of qualities. This red bull has quite a few splashes of white on him which makes him a real standout. He has great pigmentation with perfect conformation. A real herd improving sire, guaranteeing 98% polled calves. Fully vaccinated for everything including tick fever x 2.

Ripple will be 13 months on the day of the sale. Sire Mt Ararat Pioneer. Half brother to Quantum out of our Champion cow Mt Ararat Jane who is a prolific producer. This fella will make a herd sire - with all his attributes you can't go wrong. Perfect conformation and a real showy animal. He will grow into an amazing bull, like his half brother he will clean up in any show ring. If you miss out on Quantum this could be the next best thing. Fully vaccinated for everything including tick fever x2.

If you have missed out on a Captain Scream bull this season, then here is your opportunity! This young bull has a unique blend of thickness, muscle, depth and capacity while still retaining softness. Out of a herd building female, Riddick is an outstanding sire prospect which exemplifies all of the characteristics you would expect from this outcross genetic package. Recommended for mature cows only.

# 11 YOUNG BULLS FOR SALE

All have passed Veterinary Soundness Examinations and Semen Quality Test.

We are Bass 8 rated

All bulls are fully vaccinated including Tick Fever, twice.

All Bulls have passed our strict temperament guidelines.

All broken to tie up and handle with ease.

**Mt Ararat PIONEER (Pp)**

Sire of two young bulls in this sale.

## OFFERING 2 PIONEER SONS

One young bull **Mt Ararat Rebel (PP)** is Homo Polled and stunning.

*Rebel's genetics also are more than amazing. Read carefully.*

Pioneers other young bull is a half brother to Quantum, with all the same qualities.

This year we are offering 11 Quality young bulls two by **Mt Ararat Pioneer (Pp)** Brother to Woonallee **Los Angeles (P)(ET)(AI)**, Woonallee **Las Vegas (H)(ET)(AI)** and our own sale topping **Mt Ararat Phoenix (Pp)(ET)(AI)**, and eight by our Sire Woonallee **Nightcap (PP)(AI)**

**EACH BULL HAS SIRED A HOMO POLLED BULL WHICH ARE PART OF OUR SALE OFFERING**

(OFFERED IN THIS SALE)  
**Mt Ararat Quantum (Pp)**  
25 MONTHS OLD 1070KG

This is the best bull we have ever offered for sale at Mt Ararat. He's got the lot!

We have shown **Quantum** twice this year for two Supreme Exhibits. Judges have described him as a *Faultless Bull*

*It is not often you find a perfect bull, this is the closest thing I have seen to one. With EBV's to match.*

This is the best bull we have ever offered for sale at Mt Ararat. He's got the lot!

# LOT G15

# KJHT POWER TAKE OFF X BST TULLATOOLA ROBIN'S DOLL

VENDOR: POWE FAMILY

DOB:

IDENT:

4 embryos. The cross speaks for itself. An absolute show champion of a bull, and a cow that has not been shown herself but has bred around 10 champions across the country. This match is sure to breed a winner, or better yet, a quality producer that breeds on for generations to come.

PURCHASER:

PRICE

# LOT G16

# RED DAMAR TRUMP C512 x RED JCC ROXIE 20S

VENDOR: POWE FAMILY

DOB:

IDENT:

4 embryos. Trump has paved his way in the show ring with multiple championships but has also sired champions in the ring and in the paddock throughout Canada and America. He is a Power Eye 151X son from a Mulberry 26P daughter. The trump daughters we have are phenotypically stunning. Roxie 20S is our Canadian donors we secured in 2016 with the help of Blairs.Ag. She is a moderate framed female with tremendous length, femininity and soundness, balance and all-round good skin and hair type which we really like. The udder quality of Roxie 20S daughters are impressive with great teat size and placement with a great amount of milk.

PURCHASER:

PRICE

# LOT G17

# RED LAZY MC COWBOY CUT 26U x GOONDOOLA GOLD G4

VENDOR: POWE FAMILY

DOB:

IDENT:

4 embryos. We love our Gold females and we really love this cross. Gold G04 had a natural Cowboy Cut heifer calf in 2017 and we liked her that much we wanted more. That natural calf, Goondoola M24 was the 2019 supreme interbreed female of Blayney Show, the Sydney Royal senior champion and her first calf was equal top-priced bull of the 2020 Red Angus National. She is moderate, near faultless in her structure and she milks the house down. Progeny of this cross are just functional and productive.

PURCHASER:

PRICE

# LOT G18

# RED CORNER CREEK CASH 2R x GOONDOOLA MISS KRANBERRY K10

VENDOR: POWE FAMILY

DOB:

IDENT:

4 embryos. Your chance to get into a Miss D/Mulberry daughter. Kranberry K10 is a feminine yet powerful, long bodied cow that is breeding performance and good feet into her progeny. Hannah exhibited a similar cross heifer, Goondoola Navy N02 at the 2018 Angus Youth National Roundup and won reserve champion bred and owned exhibit.

PURCHASER:

PRICE

# LOT G19

# RED TOWAW ORAZI CALIDAD 130Y x BST TULLATOOOLA VERA D177

VENDOR: POWE FAMILY

DOB:

IDENT:

4 embryos. A different mating here, introducing new genetics out of Argentina to the mix. We liked Orazi Calidad's rib shape, muscle mass and the overall substance of the bull. Vera D177 is a daughter of the renowned Red Towaw Indeed 104H sire, she is moderate and deep bodied with so much width. She milks the house down with a milk EBV of +16 that sits her in the top 5% of the breed. She is a maternal sister to the BST Mr Beef A25 bull that has sired both Miss D G02 and Gold G04.

EYEP:

Talk about neat package genetics. P006 is perfect in her phenotype & extreme in her angularity, attractive yet bold in her rib shape & wide hip structure. We have been in love with this female & cannot wait for her progeny in production. If you are looking to add the freshest new genetics & most highly marketable genetics to your program keep an eye out for P006 at 2022 Simmental Feature Breed in Sydney Royal Easter Show as our Cow & Calf Pair! Although we cannot forget about this sire of this mating MADER WALK THIS WAY 224B he is a breeding sensation. His sons and daughters have topped sales in Canada and are always in high demand with a \$76,000 Daughter at FNL, \$30,000 daughter at Border City, and a \$55,000 son in the Sunny Valley bull sale. His sire Cobra needs no introduction and is known for increasing foot and udder quality in his offspring. His Dam, Iron Sugar is a consistent donor that is powerful, strong uddered, complete made and has had a positive impact on the industry with progeny in both sexes. He truly has one of the best EPD profiles in the business with accuracy proven over multiple calf crops. Every production category is above breed average, with WW and YW in the top 2%. WTWs ability to constantly sire the best cattle and increase marketability is truly remarkable and we are proud to offer him to the industry in Australia. Embryos stored at Holbrook Genetics.

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.
