BURRAWANG EWE SALE GUIDE

Scanned in-lamb Ewes

We are pleased to offer this selection of quality ewes; each ewe was scanned in lamb on Thursday, July 8th to a specific one of our specially selected Burrawang sires (refer to Joining Sires section below for more information). The number of foetuses detected at scanning is indicated as a single or twins within each lot listing, as is the date on which the ewe was inseminated.

Burrawang contracts scanning services from a professional scanner. The ewes are scheduled to be rescanned prior to sale. All care is, and will be, taken to provide accurate information about each ewe's pregnancy status however, we cannot guarantee lambing results.

Animal Health and Bathurst Burr

To ensure the animals are healthy, all of them received Glanvac® 6 in 1 vaccination at tailing, weaning and at prescribed regular intervals including on February 15th, 2021, at which time the ewes also received weight appropriate doses of Cydectin® Long-Acting drench and of Multimin. Ewes on offer received a dose of Campyvax on March 8th and as recommended, again on April 12th, 2021.

Burrawang flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring Feb 28, 2022.

Burrawang's OJD status is MN1; clear of OJD with certificate NS18176

Any purchased ewes to be delivered to South Australia, will be shorn prior to pick up or delivery to remove any Bathurst Burr.

Pre-Sale Viewing

You're welcome to come to Burrawang (Ootha, NSW) to see the selection of ewes on offer. Please contact Mal Brady on 0428 500 027 by Saturday 5pm on July 17th to arrange a viewing. Viewing can be scheduled for Monday, July 19th or Thursday, July 22nd between 9am and 4pm. Travel to and from Burrawang must comply with current Covid regulations.

Post Purchase Pick Up or Delivery Arrangements

All purchases must be picked up from Burrawang West Station no later than 5pm on Tuesday, July 27th. All due care will be taken for the safety and health of your purchased ewes prior to pick up however, to protect your purchase, you may wish to consider insuring your ewes from the conclusion of the sale on July 23rd.

Direct pick-up arrangements are to be made through Mal Brady, who can be reached by mobile on 0428 500 027.

Delivery can be arranged by contacting Stephen Smith of Dick Smith Transport Dubbo, who can be reached by mobile on 0428 636 236.

Lot Order

Ewes are presented in individual lots beginning with Dorpers followed by White Dorpers. Within each breed, lots are organised according to class types beginning with T5 Studs, followed by T4 Studs, and concluding with T3 Commercials.

Ewe Typing and Weight

All ewes on offer were classed on June 28th, 2021, by well experienced, internationally qualified inspector, Philip van Schalkwyk. The result of Mr Van Schalkwyk's classing is indicated as T5 Stud, T4 Stud or T3 Commercial in accordance with the internationally recognised Dorper Breed Standard. Weight shown for each sale ewe was recorded as of July 8 2021.

Breeders' Comments

Burrawang's Stud Master, Wicus Cronje, has provided a comment about each ewe. His assessment is contained in Breeders' Comments within the Lot listing and as commentary on each Lot's video.

Wicus is internationally recognised as one of the world's most experienced dorper breeders, inspectors, and judges. He is a qualified inspector of The Dorper Breeders Society of South Africa and of Dorper Sheep Society of Australia and has over 40 years of experience as a dorper breeder in both countries.

DSSA Registration and Transfer

Except where noted in the Breeders' Comment of some Lots, all ewes can be registered with Dorper Sheep Society of Australia.

Super Breeder Dams

One of the many significant production advantages provided by Dorpers, is the rate at which the breed can reproduce. As non-seasonal breeders, Dorpers can produce at a faster rate than seasonal breeders. To ensure our stud flock performs at the rate expected of the breed, most of Burrawang's stud production is based on natural, multiple sire, group joining; much like commercial joining. We use DNA testing to verify parentage.

This allows us to validate how well each ewe naturally performs. To maximise production, the ability to reproduce quickly is important, but so is the ewe's ability to raise her lambs. We track both capabilities along with other qualities and performance measures.

Within the pedigree tree of some Lots, italicized blue text appears to indicate that the dam is a known "Super Breeder". This designation is based on natural joining only so does not include artificial joining, such as Artificial Insemination or Artificial Insemination for Embryo Transfer, to represent the ewe's abilities most accurately. To be designated as a "Super Breeder", the ewe must have lambed each time she was joined and raised all lambs born. In addition, she must meet at least one of the following criteria: had multiple births in 2 or more consecutive years, had 2 multiple births and a single birth in 3 consecutive years, joined and lambed three times within 18 months, or joined and lambed twice within 12 months.

Not all dams in the catalogue have had the opportunity to become a "Super Breeder" so lack of designation as such, does not necessarily indicate underperformance.

Joining Method

To provide assurance of the joining sire for each ewe on offer, ewes in this sale were artificially inseminated (AI) to one of several BURRAWANG sires. AI date and joining sire for each ewe, is reflected in the individual lot listings.

JOINING SIRES

BURRAWANG DORPER 170915 6GUN

An eye-catching, stylish, high quality Dorper ram, 6GUN is big, strong, and amazingly easy moving. He breeds very appealing offspring with good balance, length, and a lot of muscle.

6GUN'S genetics are exceedingly rare outside of South Africa; his bloodline is 100% Cronje Dorpers (the longest continuously operating dorper stud in the world). He is a proven sire who has earned extensive use in our stud breeding programs as he consistently breeds structural correctness into his ewe and ram offspring, most notably and unusually regarding feet and hooves. He is considered one of Australia's top breeding rams.

BURRAWANG DORPER 170915 6GUN
Joining Sire for Lots 3, 10, 12, 14, 29, 31, 43, 48,
62, 63, 70

BURRAWANG DORPER 172409 RODEO

2020 Australian Senior and Grand Champion Dorper Ram, RODEO is a good example of how carefully selected genetics pool together. Photos cannot do justice to this ram...he is even more impressive in the flesh. RODEO is extraordinarily sound with a perfect topline, especially for the length of his body and the amount of meat he carries. He is a very well-balanced animal with a great head and remarkable outer twist.

RODEO and his offspring tick all the right boxes for growth and meat production, structural integrity, and free-flowing movement. He is a "photocopier" of a breeding sire, creating extraordinarily consistent offspring.

BURRAWANG DORPER 172409 RODEO
Joining Sire for Lots 4, 7, 9, 16, 26, 30, 39, 41, 42,
57, 68, 74

BURRAWANG DORPER 191247 BEDROCK

With a pedigree like BEDROCK's, which draws on the Cronje/Mickey Phillips strengths via sire GREATMATE, complimented by those of maternal grandsire BLINKI's (Cronje/Global), it should come as no surprise that this is such a special ram. Structurally, he is unbelievable with an incredibly good topline and strong head. He walks like a dream and has a genuinely nice temperament. Superior meat production capacity is evident in the depth of his brisket, his good sprung of rib, deep flank, and width right through his body from shoulders to well-developed loins and broad rump.

Everything about BEDROCK suggests much can be expected from him in terms of breeding performance and quality and consistency of offspring. His first joining produced plenty of lambs which were born in Autumn 2021.

BURRAWANG DORPER 191253 COWBOY

COWBOY is the spitting image of his sire RODEO, the 2020 Australian Senior & Grand Champion Dorper Ram. His impressive muscling and depth throughout his long body, a great sprung of rib and strong head are eye catching. He is well-balanced and carries his muscle easily. Structurally, he is an exciting ram who stands perfectly and moves with an easy gait. He promises a bright future for the dorper breed.

His first drop of lambs hit the ground in April 2021 and confirm, not only his prowess, but his ability to consistently throw true to his breeding. A pedigree dominated by the best of Cronje and Mickey Phillips bloodlines working magic.

BURRAWANG DORPER 191247 BEDROCK
Joining Sire for Lots 1, 2, 6, 8, 11, 13, 15, 17, 18,
21, 24, 27, 28, 32, 34, 36, 40, 44, 47, 50, 51, 53,
54, 55, 58, 60, 64, 66, 67, 69, 71, 73, 75, 76, 77,
78, 79, 80, 84, 91, 92, 93

BURRAWANG DORPER 191253 COWBOY
Joining Sire for Lots 5, 20, 22, 25, 33, 37, 38, 45,
52, 56, 65, 86, 87, 89

BURRAWANG DORPER 200265 GREAT GUN

One of BURRAWANG's youngest sires, GREAT GUN is living up to his powerhouse pedigree! The son of GREATMATE and a 6GUN daughter, this young ram is an extraordinary example of quality who displays all the elements for money-making meat production. His exceptionally long body and rump, impressively well-developed muscling over his shoulders, back and loins, deep flank, and good sprung of rib are nicely complimented by good body fat.

GREAT GUN's growth rate is remarkable. Structurally, he is very well-balanced, he stands nicely on all fours and walks beautifully. We are very much looking forward to his first drop of lambs due to arrive in the next few months!

BURRAWANG DORPER 200265 GREAT GUN
Joining Sire for Lots 19, 23, 35, 46, 49, 59, 61, 72,
81, 82, 83, 85, 88, 90, 94

BURRAWANG WD 151420 PIET

2019 Australian Supreme Champion PIET is a magnificent ram and an exceptional breeder. Several of his offspring have been selected for use as sires in BURRAWANG's stud breeding. Many of his ewe offspring are performing well and creating outstanding results as part of our stud flock.

PIET has an extraordinarily strong head, is well balanced and breeds animals with excellent growth rates. He and his offspring scan exceptionally well in EMD (eye muscle depth) and shape; testament to the amount of meat he carries and that he breeds into his offspring.

Proven to survive and thrive with easy fluid movement, this ram's bloodline is well established in old, high quality South African genetics, most notably Kotze via The DOC.

BURRAWANG WHITE DORPER 151420
Joining Sire for Lots 107, 108, 109, 112, 115, 123

BURRAWANG WD 190525 FOSTERS

The outstanding quality of his head tells the story of quality and good breeding. FOSTERS has an amazing presence and good temperament.

FOSTERS' sire LOCO produced several of BURRAWANG's white dorper sires. On FOSTERS' dam side, grandsire CASPER was another prolific producer whose offspring topped their peer group in growth rates.

FOSTERS is extremely well balanced and, from end to end, is a standout. He has a particularly good, high quality head. His body is long, deep, and wide and he has well developed loins with an exceptionally long rump. The depth, quality, and muscle length of his hindquarter along with his ability to walk so easily, are hugely impressive. We are keen to measure what our eyes tell us about this sire's first offspring soon to be weaned!

BURRAWANG WD 191427 TRUMP

At just 9 months old TRUMP became the 2020 Australian Grand Champion White Dorper Ram. His striking carcass quality is the result of purposeful breeding designed to capture the outstanding meat producing capacity of animals on both sides of his bloodline. Blessed with a mix of Tien Jordan and THE DOC in his sire TARZAN's pedigree, and of KEG on his dam's side, TRUMP is a very masculine ram with exceptionally strong muscling in his shoulders, throughout his deep barrel and flank, and across well-developed loins and a long rump. At the same time, he has plenty of good body fat. Structurally, TRUMP is very correct on his feet and moves beautifully.

TRUMP's first lambs were born in Autumn 2021 and already demonstrate the same outstanding growth rate and carcass quality as TRUMP did even as a lamb.

BURRAWANG WHITE DORPER 190525 FOSTERS
Joining Sire for Lots 95, 102, 104, 127

Breeder's Comments: 6GUN's son, PISTOL is an aggressive joining sire as demonstrated by the number of ewes on offer in this sale; 23. This twin, T4 stud ewe is a good representation of PISTOL's breeding. She is very safe in the front, walks smoothly and easily, has a high quality head, deep body, deep flanks, a good topline, enough meat and good body fat.

Breeder's Comments: This young ewe, sired by THOROUGHbred on an OLD MATE daughter, is one of those ewes that has the structural integrity, growth rates, capacity and good body fat that you want and need in a meat sheep operation. She cannot be studded because she has too much colour on her rear end but what a treasure she will be to any commercial operator!

Dam	BURRAWANG DORPER 181150 PISTOL BURRAWANG DORPER 190028 MGDam DORPER DAM	
Breeder's Comments: With her very deep, long body, deep flank, great outer twist and amount of meat, this twin ewe from PISTOL on a CAPTAIN dam, could have been a stud for her meat production capacity. Her pasterns could be better but she is a very good T3 commercial ewe who is not registerable as her maternal granddam is unknown.
