## Invitational Bull Sale

*Offering*  
**48 Bulls**

**Friday 27th August 2021**  
**11am**

**DALBY SALEYARDS**

*RayWhite.*

 **AuctionsPlus<sup>®</sup>**

**Qld Built Bulls are built to perform in all environments. It is essential that the bulls that we produce have good doing ability. They need to be able to perform in the good times when there is plenty of feed available to them. It is even more important that they have a low maintenance input to enable them to continue to survive/perform well in the heart of droughts.**

# Exton Angus

## Invitational Bull Sale

The Exton Angus Invitational Bull Sale is a product of many years of development. We breed well-balanced cattle and are passionate about continually our herds, to produce animals with traits that we feel are the most important for an overall economic business.

We produce Queensland built bulls which are docile, structurally correct and easy going cattle with the ability to perform in any environment. The last few years have been tough – drought is a part of rural life. We produce cattle that are able to perform in the good times, as well as the bad. Quality over quantity is important to us.

Exton Angus, based at Haden Qld (40km north of Toowoomba), was established by Tim and Vicki Schmaling in 2012.

Having grown up in a commercial beef farming family, Tim has always had a passion for cattle and genetics. As a young family with two boys, Jacob 6 and Luke 4, we enjoy supporting our local communities in many ways, but mostly through displaying our cattle at local shows and events.

Our main aim is to breed well-balanced cattle. We are passionate about continually improving our herd, to produce animals with traits that we feel are the most important for an overall economic business. These traits include docility, structural longevity, doing ability/easy doing and overall performance.

# Vendors

**Oakvale Angus** was established in 1997 by Eliza Borchardt nee Newcombe in NSW and is now operated with her husband Scott based at Tara Qld (110km west of Dalby).

Eliza has been exposed to many factors of the beef industry from a very young age after following her families stud, Narrawolga Angus for many years before branching out on her own.

Eliza had the opportunity to study at the University of Illinois after winning the Angus Youth National Judging Competition. Carcase and eating quality are always a high component for us when breeding. We aim for this each year without jeopardising structure, fertility and general performance of our stud and commercial cattle.

**U8J Cattle Co** and **Square Mile Angus** represent 3 generations of quality cattle production and performance. The Roberts, Salter and Tyler families are passionate and committed to high quality, sustainable and future focused agriculture. Our breeding focus is on docility, red meat yield, sound structure, high quality beef and overall doing ability. Quality systems are extremely

important to us. We have a current J-BAS 7, as well as a line of sale bulls that are independently semen tested (including morphology). We are proud of the cattle we present and always stand by our values and our product.

**Coal Creek Angus** at "Jacaranda Hill", Esk (Qld) was established 14 years ago, however prior to this they were angus producers in Tasmania for 15 years. Although AI and embryos have been used for reproduction from the beginning, it is more recently that cattle have been registered with Angus Australia. Coal Creek grow their own crops for feed and hay, with a strong focus on

soil biology and multi-species pastures to ensure optimum health and efficiency of their herd.

# RAY WHITE LIVESTOCK TOOWOOMBA

Working with you to achieve the *best results*

## About us...

**Wade and Mal** have a combine experience of over 50 years in the livestock industry.

With a good understanding of the challenges faced by our local graziers, we are able to offer you the best of service and will always go the extra mile to ensure you achieve the best results. Times might be changing but we're still here.

**Our services** include a hands on approach to achieve the best result for you and your livestock as well as weekly selling of all types of livestock into various saleyards on the Darling Downs and Brisbane Valley..

We are also accredited for AuctionsPlus assessments for all of your digital marketing and selling needs.

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Birth	<b>CEDir</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>CEDtrs</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>GL</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	<b>BW</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	<b>200 Day</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	<b>400 Day</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	<b>600 Day</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	<b>MCW</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	<b>DtC</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	<b>SS</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	<b>CWT</b>	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	<b>EMA</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>P8 Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>RBV</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	<b>IMF</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Other	<b>NFI-F</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	<b>Doc</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	<b>Foot Angle</b>	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	<b>Claw Set</b>	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	<b>ABI</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
	<b>DOM</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
	<b>HGRN</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
	<b>HGRS</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# **SALE INFORMATION**

## **Animal Health & Guarantee:**

Vendors are J-BAS 6 (except U8J Cattle Co — J-BAS 7). Bulls vaccinated for 7 in 1, 3germ, Vibrio, 3 day sickness.

All bulls offered for sale have been semen motility and morphology tested.

All bulls are guaranteed breeders. Any claim against the breeding ability of an animal purchased should be accompanied by a Veterinary Certificate.

## **Supplementary Sheets:**

Scan data (completed 26/08/2021), sale weight, scrotal size measurements, motility and morphology results will be available on the supplementary sheets.

## **Inspections:**

Inspections are welcome at any time prior to the sale by arrangement with vendors or agents. Bulls can be viewed from 9am on sale day.

## **GST:**

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.

## **Rebate:**

4% rebate is available to outside agents introducing potential purchasers in writing prior to the sale.

## **Risk & Liability:**

All Livestock will be sold under the Livestock and Agent assoc. Any person attending this sale do so entirely at their own risk. The vendors, selling agents, its members, subsidiary of relation corporations, officers, agents, employees and its principles, for themselves and for those whom the act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever, which may occur.

## **Sale Catalogue Disclaimer**

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendors nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

Hes an easy fleshing maternal type of a bull with proven older genetics through his sire N41. His dam and his granddam played a huge role in our breeding program - we have used two of his maternal brothers in our herd.

A highly muscled, super chilled powerful bull to start off the Oakvale Angus sale run. We have bulls to suit everyones needs as you will see through our lots. From day one Quarter Back has been the standout of the drop, topping the scales at weaning & has never looked back. A naturally thick, high performing well muscled bull that will add weight & performance to any breeding program. Out of a high performing cow line that is perfectly footed & still producing at the age of 13.

Quarter Master is a growthy, upstanding bull with great presence whos free moving to cover the distance. Strong across the topline, deep through the barrel region & carries that muscle expression all the way through. Combine this with a good set of figures, gives you an impressive all-rounder thats not to be missed.

# DISCLAIMER AND PRIVACY INFORMATION

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ident's.....

from member.....(name) do not consent to Angus

Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)
