

ANGUS YEARLING BULL & GENETICS SALE

HIGHRENT FULL CIRCLE

Friday 20th August 2021
AUCTIONS PLUS ONLY

Start time 1pm

**30 Yearling Bulls
Embryos**

AuctionsPlus™

Highrent Angus

Based largely on Kilburnie bloodlines, with added emphasis on structure. Our aim is to produce high performing, commercially focused animals.

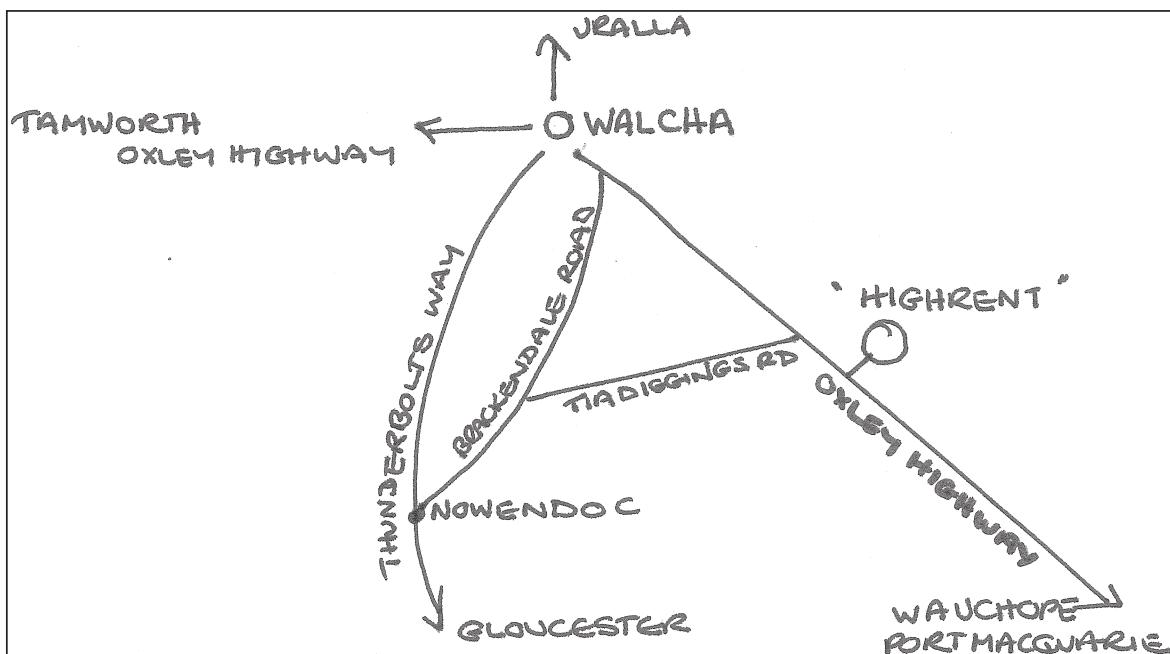

Full Circle

Full Circle has its origins in Kilburnie and Eaglehawk Studs and aims to produce fertile, functional cattle.

Pre Sale Inspections at "Highrent" 12524 Oxley Highway, Walcha NSW 2354

HOW TO FIND US

'Highrent' 12524 Oxley Highway, Walcha NSW 2354 is approx. 38.5 kms from the centre of Walcha along the Oxley Highway travelling towards Port Macquarie on the left.

AUCTIONS PLUS SALE ONLY

Friday 20th August 2021

PRE SALE INSPECTIONS

"Highrent" Walcha

Monday 16th August 9.30am – 3.00pm

Friday 20th August 9.30am – 12.00am

Please note that there will be NO bidding facilities on property

WELCOME TO OUR INAUGURAL SALE

HIGHRENT ANGUS

- 20 YEARLING BULLS
- APR & HBR
- EU
- JBAS 7

FULL CIRCLE

- 10 YEARLING BULLS
- HBR
- EMBRYOS
- JBAS 6

Blue shading refers to the Top 20% of the breed

All animals have been independently scanned and structurally assessed by Roger Evans on 30 June 2021 (information available on supplementary sheet)

Bulls have been vet checked by both Joanna Bacon BVSc - Walcha Veterinary Clinic and Dr Udo Mahne BVSc - Embryo Life.

All stud animals tested PI negative.

Highrent bulls have been weighed at birth, plus 200 & 400 day weights recorded within their contemporary groups. They have been Sire Assured and had Genomic testing carried out. They have been tested free of genetic disorders AM, NH, DD & CF. We feel this testing is important to give assurance to buyers.

Full Circle bulls at time of printing are still waiting for genomic results and some genetic testing and sire assurance. This information should be available in the supplementary sheet.

HIGHRENT ANGUS

"Highrent" has been breeding commercial Angus cattle at Walcha, for more than 70 years. For the last 9 years, we have been working with David Murray of Kilburnie Angus to build up a quality herd of ACR & APR cows. Now with the winding up of Kilburnie, we are holding our 1st sale of yearling bulls in conjunction with Udo Mahne, Full Circle Angus.

Our aim is to produce high indexing, commercially focused bulls, bred from a performance base, with emphasis on fertility, growth, carcase quality & structure.

Jo Bacon, Highrent principal, is a veterinary surgeon practising in Walcha, bringing a wealth of local knowledge regarding animal health & stock management. Wayne Bacon, William Bacon & Josh Marchant make up the rest of the Highrent Team.

For our stud venture we have enlisted the aid of Andy & Jo Burwell, whose experience at Kilburnie has been invaluable in preparing for our first sale. Mat Larkings from Nutrien Livestock has also been instrumental in making everything work.

The bulls on offer this year are a mix of Kilburnie & Highrent breeding. Some of the feature sires are: Landfall New Ground, an emerging bull with good carcase, fats & fertility; Landfall Keystone, a well established heifer bull; TeMania Norvel, a heifer bull purchased by David Murray in 2019, and Kilburnie sires P54 (a Twinhearts son) & N70 (a Kodak son purchased by Hazeldean at the Kilburnie dispersal sale).

This is the beginning of our stud venture. We welcome you & hope we can grow & improve together. Our aim is to produce bulls that you want, that will improve the performance & productivity of your herd, so please let us know how things go, and also your thoughts about future goals, & how we may be able to help achieve them.

Yearling bulls can be a challenge, but if managed properly (see notes later in the catalogue) should be good value for money. It can be hard to assess the feet & structure of animals that are still growing and changing, for this reason note the 18 months warranty detailed in the catalogue. Next year we hope to have some 18 month old bulls included in the sale for those that prefer to buy older animals.

Thanks for considering our animals.

JOANNA BACON BVSc

FULL CIRCLE

Full Circle Angus has its origins in Kilburnie and Eaglehawk studs and aims to produce fertile and functional high performing cattle. Our goal is to breed specialised bulls that target a specific market and perform optimally for that part of the industry. To compete in the overall meat industry, we believe that the genetic make-up of a breeding bull needs to be in line with his specific purpose.

As a young boy, Udo developed a deep passion for farming, while he was assisting his father on their 20.000 hectare commercial African cattle farm in Namibia, producing grass fed beef for export to the European Union. The cattle faced some adverse conditions in Africa, competing with wildlife for feed, as well as facing severe droughts. As drought conditions worsened, cow fertility declined, leading to many cows in the herd being culled. The emotional toll of sending some fantastic cows to the slaughterhouse due to reproductive failures, made Udo desperate to understand the underlying reasons for fertility and functionality. His keen interest in cow fertility and the differences in reproductive abilities led him to study veterinary science and become a bovine fertility expert.

When Udo was 27, he started his own Senepol and Boran stud while he was practicing as an embryo transfer veterinarian. Soon after his immigration to Australia he purchased a farm in the South-Gippsland hills in Victoria, one of the most rainfall-secure area's in the country. He established a successful Speckle Park stud, but was more and more drawn to the consistency, predictability and reliability of the Angus breed. In 2019 the family decided to disperse the Speckle Park stud and go the full circle to Angus and expanded the stud operation to a property on the New England.

For 18 years, Udo travelled from one stud farm to another, observing and analysing successful stud operations while flushing over 7000 superior donor cows and transferring more than 50.000 embryos. He realised that fertility is strongly influenced by feed and nutrition. The productivity of a cow is strongly connected to its environment, and certain types of cattle perform better because they are better suited to handle the environmental conditions. The Full Circle breeding program is dedicated to help you maximise your profits and achieve your targets.

Please come and talk to us at the inspection days on the 16th and 20th of August at Highrent, Walcha.

UDO, ADRIANA, JULIA AND MATTHIAS MAHNE

ANIMAL HEALTH

In the New England it is necessary to feed young bulls in order for them to achieve sufficient weight gains to be used as yearlings. It also shows us the genetic growth and weight gain potential of each bull.

Many of our clients want to know which bulls will have the ability to breed calves that will grow well from weaning to 400 days. There is no better way to prove this than to show the bull buyer that the bull can do it himself.

Since weaning in March/April these animals have been fed a balanced mix of DDG ,weaner pellets and hay while on good quality pasture. For the last 6 weeks we have reduced access to the pellets. Yearling bulls should be good value to buy, as long as they are looked after appropriately for the first joining season. (Please see guidelines for yearling bulls).

All bulls have received

2 x Pestigard Vaccine (Last shot on 21/5/2021)

2 x 7 in 1 vaccine (Last shot on 14/06/2021)

2 x Vibrio vaccine (Last shot will be given on 10/08/2021)

They were given Piligard vaccine as calves and Bovishield vaccine just prior to weaning. Regular injections of 5in 1and VitB12/Selenium have been given, and the last shot will be given 10/08/2021.

All bulls in the catalogue have tested negative for Pesti (PI) to ensure no persistently infected animals are present. They received a dose of Exit Fluke on 21/05/2021, Easydose lice treatment on 21/05/2021 and Ivomec on 16/05/2021.

MANAGEMENT OF YEARLING BULLS

If managed well, yearling bulls should have on average, a longer working life than older heavier bulls.

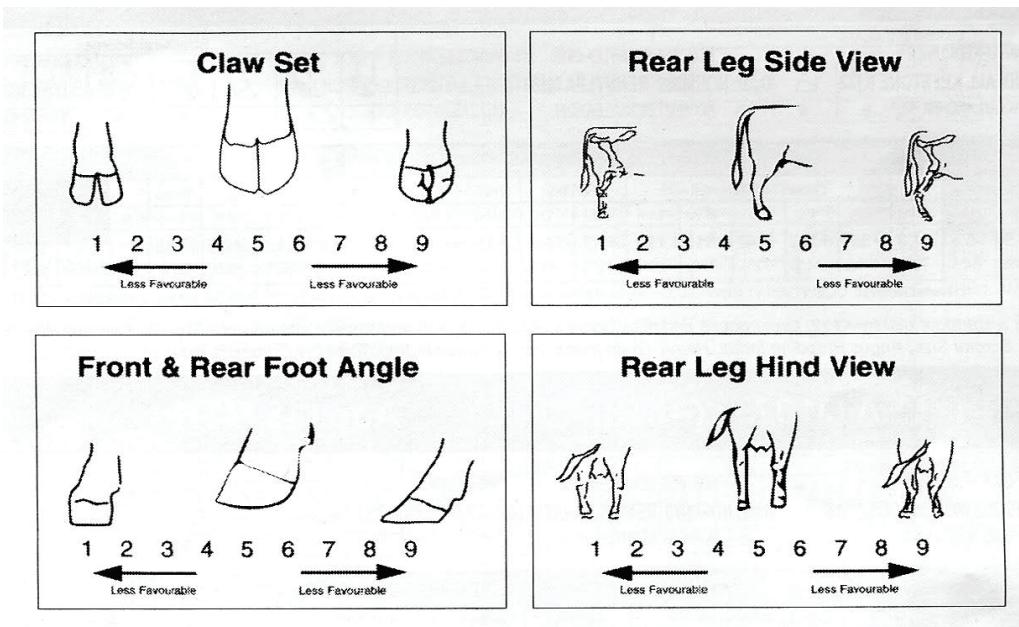

A few basic rules apply:

- Yearlings bulls need to be well grown (Average weight pre joining should be about 500kg or greater)
- They need to be sexually mature, indicated by scrotal circumference \geq 32cm, with good testicular tone.
- Joining is best done in single sire mating groups of no more than 30 cows, or groups of 2-3 yearling bulls of similar size with groups of 50 -80 cows.
- With all joining, especially single sire groups, swapping bulls for the last 3 weeks of mating is strongly recommended.
- Socializing bulls into their joining groups before introduction to the cows, will help to reduce fighting and injuries.
- Regular monitoring at least twice a week is recommended especially during the 1st 3 weeks of the joining period. Things to look out for are any sign of lameness, penile swelling or damage, illness, repeated efforts to serve without success and evidence of numerous cows still cycling well into the joining period. Usually if you think there may be a problem, there is one. Prompt action to remove suspect bulls, will give them the best chance of injuries resolving, and cause minimal disruption to your calving patterns. (Best to discuss individual issues with your vet)
- After joining, yearling bulls should be put on good pasture, which will allow them to continue to grow.
- Older bulls should be monitored to ensure they do not get too fat during this period.

FEET AND STRUCTURE

All breeding cattle sold on this Sale are structurally sound to the best of our knowledge. The Bulls have also been independently assessed and scored by Roger Evans from Bovine Scanning Services (Accreditation no. 1018).

The diagram explains what the numbers mean. Score 5 is ideal, but scores between 4-7, should be acceptable in most commercial operations. In our operation any animals outside this range get culled. The actual scores for the bulls, along with the raw data from scans for IMF & EMA, will be available in the supplementary information sheets.

FERTILITY

Highrent and Full Circle Angus have taken utmost care to ensure all sale animals at the time of sale are sound breeding animals. All bulls are guaranteed breeders and have been inspected and physically examined by Veterinarians, Dr. Jo Bacon and Dr. Udo Mahne for fertility and health.

STRUCTURAL AND FERTILITY GUARANTEE

Highrent and Full Circle are giving a structural guarantee on their yearling bulls for 18 months. If an animal breaks down for reasons other than injury, misadventure, disease, mismanagement or negligence, we will provide you with a satisfactory replacement (if available) or issue you with a credit equal to the purchase price minus salvage value.

This credit may be used to purchase any animal at a future Highrent & Full Circle Sale. Any claims can be discussed with Veterinarians Jo Bacon or Udo Mahne and might need to be accompanied by a certificate from an independent registered veterinarian in the unlikely event of a difference in opinion and a unresolved

AUCTIONS PLUS

Buyers please be aware this sale will be held Online at www.auctionsplus.com.au

To find the sale click on Auctions, then scroll down the Upcoming auctions page

Friday 20th August to find the Highrent & Full Circle Sale.

You must be a registered bidder to buy on Auctionsplus, you must also be registered 24 hours prior to the sale.

Nutrien Boultons will have bidding facilities in our office during the sale for any buyers who do not have a buyers log in.

Please note: this sale will be open for one hour. At 2:00pm a 60 second timer will appear at the top of the screen. When there is a bid on any lot, the timer will reset, if there are no bids within a 60 second period and the timer hits zero, the auction will conclude. Please bid early to avoid missing out.

Bull deliveries will be conducted the following week, please contact Mathew Larkings on 0427002427 at the conclusion of the sale to discuss delivery of your purchase. +

DISCLAIMER

The vendors have taken care to provide information that is correct to the best of their knowledge at the time of publication. However, neither the vendors nor the selling agent make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. It is advised that you seek independent verification of any information contained in this catalogue before relying on such information.

ADVICE DISCLAIMER

The vendors are willing to provide assistance to those seeking guidance and our opinion on cattle. However, the final decision is that of the purchaser. The vendors will not be responsible for the final results and performance of the cattle.

INSURANCE

Buyers need to be aware that breeding livestock involves a certain amount of risk and can be unpredictable at times. Formal possession, future risk and expenses pass to the buyer at the fall of the hammer. It then is the buyer's responsibility to insure purchased sale animals for injury, fertility or misadventure.

We recommend buyers organise insurance with their agent immediately after the Sale, before putting them on a truck. Nutrien Insurance Tamworth, Stuart Balcombe 0428 411 424.
