Introduction

Ian and I welcome you to our third annual Seifert Belmont Red Sale.

Our bulls are born from a herd with exceptional fertility.

We are particularly proud of our females who continue to naturally re-breed, especially on the back of two of the driest years on record. Our genetics are produced from a tough, unpampered cow herd where all cows are managed under a single sire mating program for a nine or a twelve-week restricted joining period, on native pastures, and every female must wean a calf every year.

They are never treated for tick or fly to maximise natural resistance and are rarely handled.

With a meagre 225mm of rain in the drought of 2019 followed by only 110mm for the eleven months from February 2020 to March 2021 (after we had removed the bulls from mating), our pregnancy rates remain extremely high.

Despite those dry conditions, this year at Wonga, the #18 yearling mated females were tested 95% in

calf. They have just weaned their second calf and will have their third calf at rising four years old.

At Flag Springs, our mature cow herd (4-15 years old) was 93.2% PTIC with 92.7% pregnant in the first two cycles, and first calf heifers delivered a 98.5% pregnancy rate after their second joining.

Single sires, including yearling bulls at fifteen months of age, were used at a bull: cow ratio of up to 1:70.

These results are in line with our benchmarked performance in the recently completed Northern Beef Genomics research project where our heifers are ranked in the top 5% for early puberty and the Cash Cow project where we our first calf lactating heifers return rate was 45% better than the median (2009).

These profit-making genetics are available in the young bulls in our sale where you will get phenomenal fertility combined with winning growth, carcass, environmental adaptation, and docility attributes.

Not surprisingly, 73 of the 90 bulls on offer are at or above the 50th percentile for the export \$index, 66 of the 90 at and above the 50th percentile for 600-day growth, 47 for eye muscle area, 68 for scrotal size and 53 for days to calving.

To top it off, 44 bulls are homozygous (PP) polls.

Last year, we sold sixty bulls to average \$9600, ranging from \$5,500 to \$17,000, and it was apparent that supply was insufficient for demand. It is always a tricky decision determining how many bulls to offer each year but given the obvious demand for Seifert Belmont Reds, this year we have decided to put forward ninety top-notch young sires and an excellent draft of ten young PTIC heifers.

We are proud of the progress the Belmont Red breed in general, and our herd in particular, has made. We have every confidence in this draft and are sure they will make a valuable contribution to your herd and your profitability.

Ian Stark and Jeanne Seifert

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

Sale Details

Ian and I welcome you to our 3rd on-property Seifert Belmont Red Sale at our home 'Wonga' 490 Jolimont Rd Jandowae Q 4410. Sale day is Monday 2nd August 2021. The Helmsman Auction will commence at 12.00 noon and close at approximately 2.00 pm. It will be held concurrently on-line on Auctions Plus. Bidding online on Auctions Plus will be available from Friday 9.00am 30th July. There will be no reserve on any bull.

If you are unable to attend the sale, and intend to bid online, please ensure you are registered to bid with Auctions Plus at least several business days prior to the sale. The instructions are on the page opposite, and Auctions Plus can be contacted on 02-92624222 and studsales@auctionsplus.com.au or Hugh Courts on 0481 998 006.

All bulls will have video footage on the Auctions Plus site one week prior to the sale.

If you wish to bid by phone, please arrange this prior to the sale, by contacting Elders agent Michael Smith 0428 541 711, Anthony Ball 0428 275 499, Blake Munro 0428 862 469, or your own agent. There is mobile phone coverage on the sale site as well as WIFI. The password will be available at sign in.

HELMSMAN AUCTION EXPLANATION

The Helmsman system combines the best features of both an auction system, and sale by private treaty.

The Helmsman style of Auction operates much like 'Auctions Plus' in that all animals are 'on the market' at the same time. You can place genuine bids on any number of bulls, at any time, during the sale, and it allows ample time to lodge a bid.

You also have time to continually re-assess your choices during the sale, and even go back to view the bulls in their pens, without pressure to make an instant decision.

It gives you the opportunity to take home bulls you want, irrespective of lot order. For example, having been out-bid on lot 25, your first choice, you can move back to your second choice bull earlier in the catalogue, for example lot 7.

When buying multiple bulls, Helmsman gives you the flexibility and time to average your purchase costs, in order to meet your budget.

- On arrival all intending buyers need to register at the bid card table and receive a bid card with their buyer number.
- All animals are on display in pens for inspection prior to, and during, the sale.
- When the sale commences, all the bulls are on the market simultaneously.
- To bid on any bull, if you are registered with AuctionsPlus you can operate on your own device (mobile phone or tablet) by logging into the sale via the AuctionsPlus platform. Alternatively you can bid manually by writing the lot number, bid price and your buyer number on the auction slips of paper provided at the registration table and handing to one of the runners.

- Bids are recorded by buyer number and will be written up on the large Auction bid board in the shed near the bull pens.
- The 'upset' (minimum) price will be recorded on the Auction bid board.
- You may open bidding at the 'upset' price, and contest bids in multiples of no less than \$1000. There is no upper limit on the size of the bid.
- You can bid on any number of bulls at once and can see at a glance whether your bid still stands or has been overbid.
- If your "first choices" of bulls go beyond your budget, you can still bid on any other bulls in the sale.
- A bid, once submitted and recorded, can't be retracted, and the person submitting such a bid will be responsible for it until it is overbid.
- The sale will remain open for about 1 ½ hours. After this, at the discretion of the presenter, a bid registered in the last 2 minutes will result in a 2-minute time extension. Further bids will trigger the same process until a full 2 minutes "no bid" period concludes the sale.

DIRECTIONS

There is a map on the 2nd last page of this catalogue (MAP)

PRE-SALE INSPECTIONS

Bulls and heifers are available for inspection from 7.00am on Sale Day, and at any other time by arrangement – just give us a call or email to organise a time.

HEALTH

All bulls have been vaccinated with 5in1, and for Vibriosis, Bovine Ephemeral fever (3-day sickness), tick fever and are tested PI negative. These vaccinations will require a booster shot in the summer of 2022 if you choose to keep them up to date.

All bulls are pedigreed, registered and Breedplan recorded. 'Wonga' is tick free, and all bulls are clear to go to tick free areas. Seifert Belmont Reds are JBAS 7 and WA eligible under the new regulations 2021.

FERTILITY

All the bulls have passed a semen test, including semen morphology and motility by John Chapman of SEQ genetics. Full details will be available in the supplementary sheet on the day.

RAW DATA AND VIDEOS

A video of each bull, and a supplementary sheet with raw data including recent weight, scrotal measurement, semen morphology and motility, and ultrasound live carcass scanning, will be available on our website www.seifertbelmontreds.com a week before the sale, and on Auctions Plus, and on the supplementary sheet on sale day.

Sale Details continued...

SEMEN AND GENETIC INTEREST

Seifert Belmont Reds will retain a half interest in any semen sold from bulls in this sale. Retaining a semen interest provides Seifert Belmont Reds with the option to collect semen for our own use, but also to potentially market semen to the best effect through our network of contacts. Retaining semen interests in sale bulls enables us to offer for sale our best bulls and enables the bull owner to jointly revenue share in any future success in marketing semen. Very few bulls ever sell a lot of semen, and in most cases it is later in life after progeny have proven the merit of the bull. We put a great deal of resources and intellect into our breeding program, which means we can sell our best bulls with the knowledge we can access semen in the future. If required, we reserve the right to access bulls at a mutually convenient time and place, and at our cost. If a bull is re-sold by a purchaser, Seifert Belmont Reds retained interests persist with the new owner.

Cloning - Seifert Belmont Reds retain exclusive cloning rights on all animals sold – No animal may be cloned without written consent from Seifert Belmont Reds.

GUARANTEE

All breeding cattle sold by Seifert Belmont Reds are fertile and structurally sound to the best of our knowledge. We warrant that every bull is fertile and capable of natural service at the time of the sale and is guaranteed fertile for twelve months from sale day. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 12 months, we will: 1. Provide you with a satisfactory replacement if available, or 2. Issue you with a credit equal to purchase price minus salvage value, that may be used to purchase any animal in future Seifert Belmont Red sales. 3. Please note the intent of the 1year guarantee is to cover the bulls for structure and fertility, not injury. Seifert Belmont Reds will require a veterinary report.

IDENTIFICATION

All bulls have a yellow management tag with their breed register identification number (ID), and an NLIS tag, in their right ear. All bulls are branded with their year number and breed register ID. Both the animals lot number and breed register ID, are noted in the sale catalogue. The pens will be in lot number order.

AGENT REBATE

A rebate of 4% is offered to outside agents introducing approved buyers in writing no later than 24 hours prior to the sale, and who accompany their buyer to the sale, and who settle on their behalf within 7 days of the sale. A 2% is offered to all licensed agents introducing buyers in writing at least 24 hours prior to the sale.

PIC

Our PIC number is QDWB0155

INSURANCE

Ownership passes at the fall of the hammer. Insurance can be arranged on the day through Elders or your agent.

REGISTRATION TRANSFERS

Upon request by the purchaser, Seifert Belmont Reds is happy to transfer the Belmont Australia breed registration of bulls, free of charge.

REFRESHMENTS/LUNCH

Complimentary morning tea and lunch will be provided, as well as beer and wine at the end of the sale!

SAFETY RECOMMENDATIONS

COVID 19 recommended best practice will adhered to at the sale.

All bulls will be penned in groups according to lot numbers. We are confident all bulls offered for sale are quiet and of sound temperament. However, sale day brings different conditions and bulls are subjected to unusual levels of pressure. Even the quietest bull can be unpredictable. Visitors entering pens do so at their own risk and children are forbidden in pens. Our station hands, and the Elders agents, will be available to walk bulls up to the rails or around pens if you wish.

DELIVERY

Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week - every care will be taken, but no responsibility will be accepted. We are offering FREE delivery to the sale yards at Charters Towers, Rockhampton, Roma, and Dalby. For all inquiries about organising transport, please contact the Elders agent, or Ian on 0439632113 for advice.

ACCOMMODATION

The town of Jandowae is a 20-minute drive from 'Wonga' and accommodation is available at AOK Jandowae accommodation park 104 High St, Jandowae ph: 46685071; The Exchange hotel 41 High St, Jandowae ph 4668 5139; Jandowae hotel motel 32 High St, Jandowae 4668 5206.

There are many motels in Kingaroy, Dalby or Chinchilla which are all only about 1 hours' drive to 'Wonga'.

DISCLAIMER

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the Vendors nor the Selling Agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

BULL PREPARATION

Questions often arise about bull preparation and 'grain' feeding. Seifert Belmont Reds is about genetics. We maintain the most important thing to remember when buying a bull, is that you are essentially buying the vehicle for a set of testicles, and the genes within them. What a bull eats before a sale is not heritable and is genetically irrelevant. The most important question is - what are in his genes? Was he born in a herd where management, or where genetics, are in control?

The only consideration given to the bull himself should his soundness i.e., his ability to serve the maximum number of females possible. Obviously focus should be on physical traits including: sheath length and angle (pendulous, heavy and downward facing, or angled forward and above his knees?), prepuce (everted, droopy and always out, or rarely visible and able to be quickly retracted?); semen test (has he passed morphology and motility?); libido (can he serve only 30 cows or 100 cows?); feet and legs (good feet, and legs well angled for many years of walking and mounting?); adaptation (will he hack heat, humidity, ticks, fly's without any intervention or 'special care'); temperament (has he been 'shown' or handled, petted, and fiddled with, to make him quiet, or is he naturally quiet?): assumed length of breeding career (can he work from 14mths old and still be going at 10 years old?).

Our male genetics are born from extremely environmentally adapted, super fertile females, that wean a calf every year, without any 'propping up', spike feeding, or early weaning. In addition, every Belmont Red at Seifert Belmont Reds is breedplan recorded (not just a select few or 'the best') and run in large contemporary groups, which guarantees the most accurate EBVs possible.

Keeping this in mind, we also accept that people need to "like what they see" and as part of marketing our product, we do supplementary feed our sale bulls when required, to present them in fit, not fat, sale condition. The most important distinction is that our bulls are backed by high integrity data, providing heritable genetic traits, generated by a herd run under 'survival of the fittest' selection pressure principles.

From late May, the sale bulls have been on forage oats. Prior to that from April, they were on Dolichos lab lab and had access to a bull pellet in 'Advantage Feeder' bins - however their intake of the pellet was negligible, at about 1kg/hd/day (about 1/10 the recommended intake). Prior to grazing forage crops, they were on leucaena and grass, and had access to pellets at various times on and off during the droughts as needed, to meet their protein and energy needs.

INTERPRETING POLL DNA TEST RESULTS

| Result | Interpretation | Animals Appearance |
|--------|------------------------|---|
| PcPc | Homozygous Poll (PP) | Predominately Polled (occasional scurs) |
| PcPf | | |
| PfPf | | |
| HPc | Heterozygous Poll (PH) | Polled or Scurred |
| HPf | | |
| HH | Horned (HH) | Horned |

BBSE BULL BREEDING SOUNDNESS EVALUATION

Under the BBSE Bull Breeding Soundness Evaluation run by the ACV the following is stated.

Motility For Live Rate: Fail under 30%
Pass is given for 30 to 59%
Tick is 60% or higher

Morphology: Fail under 50%
P level pass is 50 to 69%
Tick for 70% and over

The standards for Crush-side Semen and Sperm Morphology.

Crush-side Semen evaluation and laboratory evaluation of Sperm Morphology are strong indicators of whether a bull is fertile or sub-fertile. If a physically-normal bull is rated as having passed these evaluations, he is expected to be fertile, ie, if mated, he can impregnate (pregnant at day 42 of gestation) by natural service at least 60% and 90% of 50 normal, cycling, disease-free females within 3 and 9 weeks, respectively.

The ACV has 2 pass levels for semen evaluation.

The highest level -Tick - indicates that the bull is fertile with respect to the category assessed and has 60% or higher progressively forward motile sperm. Further, it is very likely that the semen of this bull will be fertile after freezing. The lower level - P - was introduced to indicate that a bull may be fertile under natural mating, but it is likely his semen is not suitable for freezing.

The P level is given to bulls with between 30 and 59% motile sperm in Crush-side Semen evaluation. Bulls have to pass thresholds for eight Sperm Morphology categories and 70% or higher normal sperm, as assessed by an accredited sperm morphologist, to gain a tick for this assessment category.

For a P-level pass, this includes having between 50% and 69% normal sperm.

It is possible that physically-normal, P-level bulls, and especially those close to the lower threshold, may be shown to be less than fully fertile when mated. Such bulls are acceptable under multiple-sire mating, but veterinary advice should be considered before single-sire mating of such bulls.

IMPACT SIRE

SEIFERT TEDSTAR SEI090377

'IMPACT SIRE' - In our opinion SEI090377 Seifert Tedstar "Teddy" is the best belmont red ever bred. He remains a leader in many traits and his outstanding genetics underpin much of our herd. Fortunately, over time we have been able to capitalise on his superior genotypic and phenotypic merits, and go on to breed even better sons and daughters. The first eight of the following 18 reference sires listed below are related to Teddy.

Reference Sires continued...

'OUT-CROSS AND OUT-SIDE SIRE'

To keep our genetic pool diverse, we keep several pedigrees within our herd genetically segregated and unrelated to 'Teddy'. This ensures we have varied out-cross genetic options available, to use across our female groups. In addition, every couple of years we introduce outside genetics with the same aim.

SEIFERT BELMONT REDS SEI170033

This dark red homozygous poll bull with a great phenotype, was by an extremely high growth sire SEI140039, who is still going strong at the age of 8yo, in a commercial herd in Marlborough. He has 12 sons in the sale: lots 9 56 66 30 31 26 3 13 55 57 60 76.

A homozygous poll, and one of our favorites, we took this beautiful bull to BEEF where he developed a habit for licking people. He is as quiet as a lamb. He unfortunately lost weight when we got back from BEEF when he was bullied after the cohort was mixed up for several weeks. Despite this, his figures tell the true story which is great growth - in the top 10%.

A bull with superb figures - almost all on the 'right side' of the EBV graph. He is especially strong in growth EBV's being in the top 5%-10%, combined with desirable negative days to calving and above average scrotal size. On top of this he has EMA and carcass traits in the top 5%-10% which puts him near the top of the draft at 5% on the export \$index.

A very stylish homozygous poll, he is an ideal bull to put over heifers with his BW EBV in the top 30%, plus favorable negative days to calving, high fats and marbling. Combined with low MCW (mature cow weight), he will breed moderate fertile replacement females. He has a small spot in his left eye which should disappear over time. His vision is fine, and he is accompanied by a vet certificate to support this.

Purebred PTIC Belmont Red Heifers

This year we are offering 10 purebred first calf heifers PTIC to some outstanding sires. The heifers are presented quite literally in paddock condition - straight off grass.

Their (approximate) due date, and the sire of their expected calf, is noted in each heifer's description.

THE SIRES OF THE CALVES ARE LISTED BELOW:

SEIFERT BELMONT REDS SEI180021

A polled (PH) son of 'Teddys' – exceptionally quiet and with stellar EBVs almost all on the 'right side' of the graph. He is in the top 10% on the domestic \$index.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

- (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
- (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors, agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
- (b) When used in these terms the expressions "companion animals" means all animals originating from a property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
- The following applies in interpreting these terms and conditions:
 - The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
 - plus any fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - plus any GST added in accordance with clause 12.
- (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

- Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
- The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
- A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
- The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
- In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
- The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interests of the vendor and need not give reasons for doing so.
- A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
- The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
 - the purchaser's name; or
 - the bid card number which identifies the purchaser; or
 - the name of the person on whose behalf the successful bid was made; and
 - the Property Identification Code (known as the "PIC") of destination.
- The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
- The vendor warrants that the:
 - vendor has (or will have) the right to sell the livestock at the time of delivery; and
 - buyer will obtain title on completion of the buyer's obligation under these terms and conditions.
- If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
- The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in a written agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
- No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
- Cattle sold on a live/weight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
 - Cattle sold on a live/weight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
 - All livestock other than cattle sold on a live/weight basis are at the risk and expense of the buyer upon the fall of the hammer.
- Subject to this clause the sale is complete on the fall of the hammer.
 - The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
 - delivery is taken by a representative of the buyer;
 - departure of the animal from the purchaser's delivery pen; or
 - one hour after the last animal is:
 - in the case of pre-sale weighing, sold; or
 - in the case of post-sale weighing, weighed.
 - During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
 - If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
 - This sub-clause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, through delivery to and from the scales, to the buyer's delivery pen and on to the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This sub-clause does not apply if the agent makes an announcement to that effect prior to sale.
- Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
 - Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
 - Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be

- supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner the female was pregnant on that date.
- (d) For cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard account to the purchaser's account on the NLIS database no later than midnight on the day of the sale.
- (e) Where livestock have a food safety or market eligibility status derived from the NVD and/or the NLIS/ERP database, the agent will inform the buyers by pre-sale catalogue in conjunction with vendor branding and/or announce the status prior to the offering of those lots.
- If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
 - does not acquire title to the livestock;
 - holds the livestock as bailee only for the vendor;
 - must act in a fiduciary capacity in its relationship with the vendor;
 - must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
 - is responsible for the safety and well being of the livestock;
 - may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
 - must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
- The buyer agrees that:
 - clause 20 creates a registrable security interest under the Personal Property Securities Act 2009 (PPSA);
 - the buyer acknowledges the rights of the vendor (and/or the agent) clause 23 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
 - the livestock are collateral for the purpose of the PPSA;
 - to the extent permitted, the buyer waives any right the buyer has under the PPSA to receive notices;
 - the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to these terms and conditions; and
 - if payment is not made in accordance with clause 15, but delivery is made to, or possession obtained by, the buyer or its representative, interest may be charged at the rate usually charged by the agent for overdue accounts on any amounts which remain owing at any time.
- The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.6 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- Title to the livestock does not pass to the agent or a nominee of the agent unless the agent, by written notice to the vendor, notifies the vendor that it is to be transferred to the agent or a nominee of the agent.
- The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
 - when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
 - when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
 - do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
 - appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
 - by this clause 23, other than as it expressly provides; or
 - by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
- The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
 - In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
 - Regardless of whether or not a sale has occurred the agent may, but is not under obligation to do so, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
 - The vendor, the agent and the buyer agree to comply with their several duties under the Australian Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and treat livestock in accordance with any other or additional requirements of animal welfare legislation specific to the State or States in which livestock are consigned, managed, received, transported and treated in the course of the auction process.

CHAPTER THREE -

VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

- This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are

- slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor Levy.
- The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
 - pass DAFF and other regulatory authority requirements and inspections at the time of slaughter; (DAFF refers to Federal Government Department of Agriculture, Fisheries and Forestry);
 - are of merchantable quality;
 - carry an NLIS device in accordance with State law;
 - in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in the National Vendor Declaration, the livestock will have those characteristics or will be fit for the particular purpose or market; and
 - all information in any National Vendor Declaration provided by the vendor is true, complete and correct in all material respects.
- In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
- However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
- In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
- Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
 - the buyer will be entitled to delay payment for the price of all livestock in that lot; or
 - the vendor has the option, at the vendor's cost, of collecting the companion animals and returning them to the vendor's property; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
- The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
 - any error, by the auctioneer, of transcription of information from the National Vendor Declaration completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
 - any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
 - any failure by the auctioneer to disclose prior to bidding, and in the pre-sale catalogue, that the vendor has failed to provide a National Vendor Declaration that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

- This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor Levy.
- Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by the relevant government department. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the certificate issued by the relevant government department, existed prior to the fall of the hammer.
- A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
- Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - a certificate is issued by the relevant government department which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
 - the certificate is received by the selling agent either in its original form or by fax by 5:00pm on the 7th day after the fall of the hammer; and
 - if the condemnation is due to chemical residue the certificate follows testing in a laboratory approved by the relevant government department which establishes maximum residue limits in excess of the Australian limit.
- Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of the following:
 - bruising,
 - fever,
 - partial condemnation, or
 - emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY STATE LEGISLATION NSW Legislation

Property, Stock and Business Agents Act 2002 Warnings Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- to abstain from bidding; or
- to bid to a limited extent only; or
- to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmanian Legislation

The auctioneer must not appear to acknowledge a dummy bid. A buyer must not give, agree to give or offer a gift or other consideration to a person for abstaining from bidding and a person must not accept any gift or consideration for abstaining from bidding.

A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or to do any other thing which may prevent free and open competition.

Western Australian Legislation - Auction Sales Act 1973 s31 NOTICE

It is an offence to:

- induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- abstain or agree to abstain from bidding as a result of such a promise;
- knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

EBV INDEX - Explanatory Notes

Estimated Breeding Values (EBVs)

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values). EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared. EBVs are reported in the units in which the measurements are taken (e.g. kilograms for the weight EBVs). Thus a value of +12 kg for 400 day weight means the animal is genetically superior by 12 kg at 400 days compared with the genetic base of the relevant cattle population. On average, half of this difference will be passed on to the animal's progeny.

Gestation Length: Provide an estimate of genetic differences between animals in gestation length. They are expressed in days. Lower or more negative Gestation Length EBVs are considered to be more favourable.

Birth Weight: Estimates of genetic differences between animals in calf birth weight. They are expressed in kilograms (kg). Small, or moderate, Birth Weight EBVs are more favourable.

200 Day Growth: Estimates of the genetic differences between animals in live weight at 200 days of age due to their genetics for growth. They are expressed in kilograms (kg) and are a measure of an animal's early growth to weaning. Larger, more positive, 200 Day Growth EBVs are generally more favourable.

400 Day Weight: Estimates of the genetic differences between animals in live weight at 400 days of age. They are expressed in kilograms (kg) and are an important trait for breeders turning off animals as yearlings. Larger, more positive, 400 Day Weight EBVs are generally more favourable.

600 Day Weight: Estimates of the genetic differences between animals in live weight at 600 days of age. They are expressed in kilograms (kg) and are an important trait for breeders targeting the production of animals suited for heavy weight grass or grain fed markets. Larger, more positive, 600 Day Weight EBVs are generally more favourable.

Mature Cow Weight: Estimates of the genetic differences between cows in live weight at 5 years of age. They are expressed in kilograms (kg). Animals with higher, more positive Mature Cow Weight EBVs would be expected to produce progeny with a higher mature weight than animals with lower Mature Cow Weight EBVs.

Milk: Provide an estimate of the maternal contribution of a dam to the 200 day weight of her calf. In the case of sires, this estimates the maternal contribution that his daughters will make to the 200 day weight of their progeny. The Milk EBV is expressed in kilograms and indicates the expected difference in the weight of the calf at 200 days due to the maternal contribution of the cow. Larger, more positive, 200 Day Milk EBVs are generally more favourable, depending on the environment.

Scrotal Size: Provide an estimate of the genetic differences between animals in scrotal circumference at 400 days of age. Scrotal Size EBVs are expressed in centimetres (cm). Larger, more positive, Scrotal Size EBVs are generally more favourable.

Days to Calving: Estimates of genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. Days to Calving EBVs are expressed in days and are calculated from the joining records submitted for both heifers and mature cows. Lower, or more negative, Days to Calving EBVs are generally more favourable.

Carcase Weight: Estimates of the genetic differences between animals in hot standard carcass weight (as defined by AUSMEAT) at 650 days of age. They are expressed in kilograms (kg). Larger, more positive, Carcass Weight EBVs are generally more favourable.

Eye Muscle Area: Estimates of the genetic differences between animals in eye muscle area at 12/13th rib site in a standard weight steer carcass. They are expressed in square centimetres (cm²). Larger, more positive, EMA EBVs are generally more favourable.

Rib Fat: Estimates of the genetic differences between animals in fat depth at the 12/13th rib site in a standard weight steer carcass. They are expressed in millimetres (mm). More positive or more negative Rib Fat EBVs may be more favourable, depending on your breeding goals relating to the finishing ability of your animals.

Rump Fat: EBVs are estimates of the genetic differences between animals in fat depth at the P8 rump site in a standard weight steer carcass. They are expressed in millimetres (mm). More positive or more negative Rump Fat EBVs may be more favourable, depending on your breeding goals relating to the finishing ability of your animals.

Retail Beef Yield: Estimates of genetic differences between animals in boned out retail beef yield in a standard weight steer carcass. They are reported as differences in percentage (%) yield. Larger, more positive, RBY EBVs are generally more favourable.

Intramuscular Fat: Estimates of genetic differences between animals in intramuscular fat (marbling) at the 12/13 rib site in a standard weight steer carcass. They are reported as differences in percentage (%) IMF. Larger, more positive, IMF EBVs are generally more favourable.

Flight Time: Estimates of genetic differences between animals in temperament. They are expressed as differences in the number of seconds taken for an animal to travel approximately 2.0 metres after leaving the crush. Higher (i.e. Longer) Flight Time EBVs are more favourable.

Shear Force: Estimates of genetic differences between animals in meat tenderness. They are expressed as differences in the kilograms of shear force that are required to pull a mechanical blade through a piece of cooked meat. Lower, more negative, Shear Force EBVs are more favourable.

EBV Accuracy

The "accuracy" figure produced with each EBV provides an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the more likely the EBV is to predict the animal's true breeding value and the lower the likelihood of change in the animal's EBV as more information is analysed for that animal, its progeny or its relatives.

Interpreting Selection Indexes

The Selection Index value for an animal is effectively an EBV of the animal's profitability in that particular commercial production scenario and market. Ranking seedstock animals on their Selection Index value sorts them based on their progeny's expected profitability for the targeted production system.

Selection Indexes are expressed as "net profit per cow mated". For example, if we compare a bull with an Index of +\$60 with a bull that has an Index of +\$30, we can estimate that the difference in net profit from the progeny of the bulls would be:

$$\begin{aligned} &= \frac{1}{2} \times \text{difference in Index} \\ &= \frac{1}{2} \times (60-30) \\ &= \$15 \text{ per cow mated} \end{aligned}$$

N.B. We need to multiply by $\frac{1}{2}$ because only half the progeny's genes come from the sire.

It is important to note that this difference includes profit across the entire production chain from joining to slaughter and also considers the long term profit generated by a sire's daughters (if a self-replacing Selection Index).

Using Selection Indexes

As a guide to using Selection Indexes, it is recommended that producers complete the following steps:

- i. Identify the Selection Index of most relevance
- ii. Rank animals on the Selection Index
- iii. Consider the individual EBVs of importance
- iv. Consider other traits of importance

Belmont Australia Selection Indexes

There are currently two different selection indexes calculated for Belmont Australia animals.

Domestic Steer Index - Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in subtropical environment) producing steers for the domestic trade. This index assumes that the steer progeny are pasture grown and finished and marketed at 460 kg live weight (240 kg HSCW and 6 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

Export Steer Index - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the export trade. This index assumes that the steer progeny are pasture grown and finished and are marketed at 680 kg live weight (370 kg HSCW and 12 mm P8 fat depth) at 30 months of age. Daughters are retained for breeding.

Disclaimer

The GROUP BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Belmont Australia nor ABRI oversee or audit the collection of this data.
