Outside Agent Rebate

The Vendors agree to allow a rebate to outside Agents introducing their client in writing 24 hrs prior to the sale and settling on their behalf within 7 days of the sale.

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. this gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** - Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is 6.
All bulls have been tested negative to Bovine Pestivirus and vaccinated against Vibrio, Bovine Pestivirus and 7 in 1.
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
- **Intending buyers please note-** Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** - Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Personal transport** - we can arrange transport to and from “Glen Ayr” please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation-**
Warrigal Gardens B & B
 Baradine - 02 68431765
Acacia Motor Lodge
 Coonabarabran - 02 68421922
Camp Cypress
 Baradine - 02 68431035
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for an errors or omissions in this catalogue.
 - GST will be added on the fall of hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale

LOCATION MAP

FROM NARRABRI

Go to Wee Waa then towards Pilliga. Go past the Cuttabri Wine Chanti about 5km and take the turn left towards Gwabegar. At the cross roads in Gwabegar turn left towards Baradine. Travel approx 18 km and just before Kenebri turn left onto Wangmanns Rd travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONABARABRAN

Travel to Baradine until you get to a T section. Turn Left towards Coonamble and before the railway line turn Right towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmanns Rd the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

FROM COONAMBLE

Travel to Baradine until you get to the railway line. Turn Left after the line towards Pilliga. Travel 20km as you are coming out of Kenebri take Wangmanns Rd the dirt road to your right, travel 2km down this road and as you come out of the dog leg in the road Glen Ayr is on the Right.

Our Address: 212 Wangmanns Rd Kenebri NSW

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy, All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

Welcome to our 13th Annual On Property Sale and thank you for taking the time to view our 2021 catalogue. 90 Bulls on offer including 60 Shorthorn bulls which are the pick from over 100 retained for sale in 2021 and 30 Charolais bulls.

Our goals have always been simple *“provide cattle that add value and profitability throughout the supply chain”*. Easy care cattle for the cow calf producers, cattle that have rapid growth in the feed yard and cattle that have excellent carcass characteristic and eating quality for the processor and consumer.

About the Bulls

I am happy to be able to say the bulls this year have been prepared with no grain. We were fortunate enough to have forage sorghum for them over summer and they have been running on grazing oats since the first week of June to sale. We took ownership of the Charolais bulls at weaning, enabling both Shorthorn and Charolais bulls to have had the same management.

We are confident this is the most even and functional line of Shorthorn bulls we have offered at Futurity and are confident of their capabilities when compared with other shorthorns or other breeds. The bulls will pass on their excellent genes for calving ease, fertility, longevity, growth, and carcass quality and they are a very docile group. The bulls have been run in one contemporary group for all their data recording. Bulls with **PP** have been tested homozygous polled and will only breed polled calves, even when joined to a horned cow. **EPD's with shading are in the Top 30% of the shorthorn breed.**

The line of Temana Charolais bulls this year are performance recorded and are an ideal fit for many crossbreeding programs and a few stud sire prospects amongst the draft. The Charolais bulls are displaying the soft fleshing, medium frame and easing finishing, typical of the Temana breeding. In the draft are 18 polled and 10 red factor bulls.

We encourage viewing of the cattle prior to the sale if possible. We believe this is an investment in your business. Seek to find the best combination of genetics, performance data and physical attributes to improve profitability. Your investment now will reap rewards in the future. We would like to assist in advising you on the purchase that will be most profitable for your operation so please ask if you would like any assistance.

We will be hosting a Beef Technology and Bull walk day on **Wednesday 4th August**. All sale bulls will be on display, and we invite you to come along and enjoy our hospitality.

Kind Regards
Jason, Kylie, Riley and Jess

REFERENCE SIRES

FUTURITY MASTERPLAN M314

Colour: Red Ident. No.: JJJM314

Sire: YAMBURGAN HECTOR J423 (P) Red

Dam: LAKE HAWDON APPROVAL F57 (P) Red

We selected Master Plan M314 to use on heifers as a yearling due to his curve bending data set, doing ability, volume, and an incredibly quiet disposition. This young sire has exceeded our expectations on the progeny he is breeding, they definitely have more volume and capacity than their contemporaries, faultless temperaments and amazing birth weight to growth ratios. We continue to use this young sire on both heifers and cows.

IGS EPD's as of 28/06/21

YAMURGAN ANZAC L278

Colour: Roan Ident. No.: YY L278

Sire: YAMBURGAN OSSIE E65 (P) Red

Dam: YAMBURGAN MAYFLOWER F82 (P) White

We purchased for \$42000 in 2017 due to his superb structure, feet, disposition and profitable data set. He is breeding easy care cattle with plenty of growth and carcass quality. We have used Anzac on heifers and cows with success and believe his progeny will have excellent maternal function.

FUTURITY MIGHT AND POWER M234 (P)

Colour: Red Little White Ident. No.: JJJM234

Sire: FUTURITY EDGED IN STONE K148 (P) (AI) Red Little White

Dam: FUTURITY STARS RUBY G62 (P) Red Little White

Might and Power was sold to the Carlton stud SA in 2018 for the top price of \$30000. We have used Might and Power with good success. He is producing cattle with tremendous growth, carcass merit and flawless dispositions.

REFERENCE SIRES

FUTURITY EDGED IN STONE K148 (P) (AI)

Colour: Red Little White Ident. No.: JJJK148

Sire: YAMBURGAN ZEUS H140 (P) Red

Dam: FUTURITY CHICARGO'S ENIA C38 (P) Red

What a super sire Edged in Stone has turned out to be for us. His progeny speaks for themselves with their consistency of quality. We have never had a sire that produces so much maternal function in the way of calving ease and doing ability combined with carcass data that is surpassed by few in the breed. This is the last year of Edged in Stone son's so I encourage you to get one if you haven't before. His daughters are producing very well with several bulls in this years draft out of them.

FUTURITY NEXT LEVEL N326 (P) (HBR)

Colour: Red Ident. No.: JJJN326

Sire: FUTURITY EDGED IN STONE K148 (P) (AI) Red Little White

Dam: FUTURITY OSSIE MARY ANN G81 (P) Roan

Next Level was sold to Wynyard stud for \$20000 in our 2019 sale after being used to cover AI's in spring 2018 as a yearling. We used and continue to use Next level due to his capacity, doing ability, carcass merit and longevity genes. The bulls in this year's draft have inherited his capacity and doing ability.

JSF SKYFALL 135E (P) (HBR)

Colour: Roan Ident. No.: MUSA426348

Sire: JDMC BIG SKY 15X (P) White

Dam: JSF ADELAIDE 126Y (P) Red

This is the first draft of bulls from outcross genetics JSF Skyfall 135E. The bulls have excellent growth rates, are very easy doing and have excellent carcass shape. JSF Skyfall 135E sired the top price female in last year's sale selling for \$8500 to Yanco College.

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPD'S

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

UNDERSTANDING THE IGS EPD SUITE

FAT

Reported as inches of back fat relative to the average.

Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores.

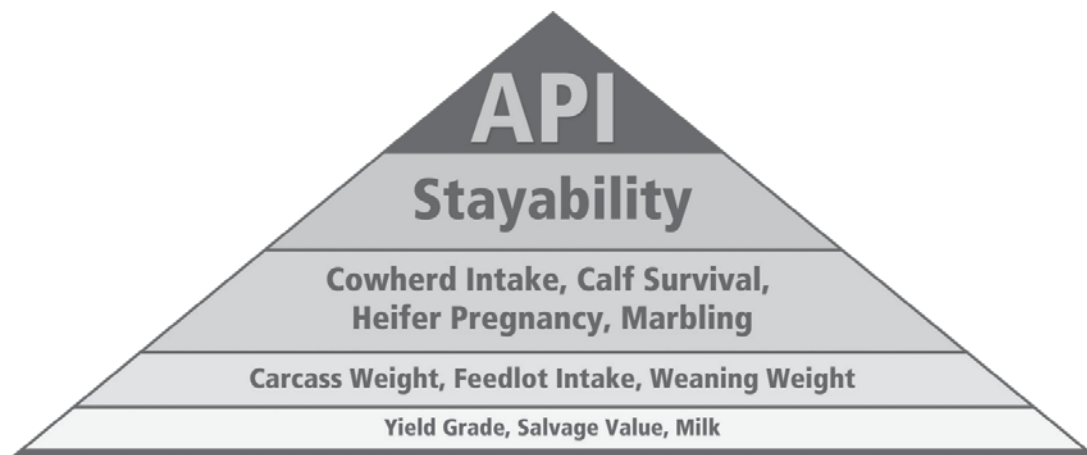

Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

SHORTHORN LOTS

Progeny testing and Performance recording

With the aid of genomic technology and carcase data collection through the JBS Thousand Guineas program Futurity has embarked on a period of accelerated genetic gain. Thank you to the commercial producers and JBS who partner with us in our progeny testing program. The program has allowed us to improve our carcase accuracies and identify bulls out of the program with high carcase merit, and then disseminate these higher accuracy genetics back through the herd.

We have a genuine commitment to objectively measuring all cattle born at Futurity to the highest level. All calves are DNA profiled, birth weighed, weighed for growth, scan and carcase data, docility scored and measured for female longevity. ***We are proud of our integrity & credibility in this field.***

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.

Stress Less Bull Delivery - Freight Rebate

Let us take the stress and expense out of your bull deliveries. Deliveries can be arranged to the purchasers property at \$100 per bull up to 400km or NSW borders on major routes and to Roma QLD. This will only apply if freight is arranged by Jason.

While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. Bull insurance coverage is recommended.
