Conditions Apply
(See Sale Details page 4)

5% REBATE

To outside agents
(conditions apply refer page 4)

YEAR 1:

(until conclusion of first breeding season)

Commercial Buyers: 100% Unconditional Guarantee for Feet & Fertility.

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

Commercial Buyers: 66% Unconditional Guarantee for Death & Accidental Injury.

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

Stud Buyers: 100% Guarantee for Feet & Fertility ONLY.

Guarantee does NOT cover accidental injury or death by misadventure. Stud Stock Insurance will be available Sale Day and is strongly recommended.

YEAR 2:

(until conclusion of second year breeding season)

66% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

* Guarantee does not apply to injury or disease.

YEAR 3:

(until conclusion of third year breeding season)

33% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 33%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 33% = \$1,320 Credit (ex GST).

* Guarantee does not apply to injury or disease.

.....
* In all cases, commercial buyers and stud buyers, the guarantee covers the purchase value of the bull, without interest, costs and damages (if any).

* The salvage value is retained by purchaser.

* A veterinary certificate must be supplied by the purchaser upon request.

In addition to the above guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear-notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

AUCTIONS PLUS

Photos and details of all sale bulls will be available online on the Auctions Plus and Angus Australia websites. Sale Day there will be a live interface on line to allow for off site bidding

CATERING

We are delighted to welcome back the Rosewhite CWA after an enforced COVID break! Please come and enjoy the legendary morning tea and beef lunch they turn out!

PRE-SALE INSPECTION

Private inspections prior to sale day by appointment are welcomed. Bulls will be yarded for inspection by 10am on sale day.

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated.

Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS AND GENOMICS

The majority of bulls in this catalogue have been parent verified and have genomically enhanced EBVs.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

WELCOME

Good times for long-time Alpine clients the Ferguson family from Bowmans Forest who won the Best Presented Pen for the sale at the Gordon Sinclair Memorial Sale, Wangaratta, Friday 20 August 2021. Nice cap Craig!

The 2021 Alpine Angus Spring Bull Sale offering 60 HBR & APR Bulls will be held at the Alpine Sales Complex, Rosewhite on Wednesday 22 September at 1pm.

Alpine Principal Jim Delany 'These are exciting times for the Beef Industry – the market and seasonal conditions of the last year have seen record prices for many Alpine clients in the sale yards. Our clients have also observed how investing in the right genetics really does pay off as backgrounders return and pay a premium to source their progeny due to their performance.'

Anyone wishing to inspect the Alpine sale line up pre sale day can do so on Sunday 19 September at the Alpine Sales Complex Rosewhite. All sale bulls will be yarded from 11am–3 pm with a BBQ beef lunch and refreshments available.

Alpine Manager Chris Oswin 'We are presenting 50% more sale bulls this Spring compared to last year. This outcome has been years in the making and is driven by our commitment to ensure value is delivered for our clients whilst the same high quality is maintained.'

For many years now the Alpine Angus program has been consistently investing in genetics that push the boundaries with growth spread and calving ease as these traits are the most important to put extra

dollars in Alpine's client's pockets. Of course we use Breedplan as a selection tool but we also put as great an emphasis on getting length, capacity and growth. We try to use genetics we know can breed true to type and deliver calving ease and a big growth spread from moderate birth to 600 day plus good temperament.'

The Alpine Spring Bull Sale lineup reflects the Alpine breeding philosophy so well. Sale average EBVs deliver breed average birth to 400 and 600 day weights in the Top 25% for the Angus Breed as well as outstanding structure.

The sale lineup features sons of AI Star Sires Baldrige Beast Mode B074, Baldrige 38 Special and GAR Ashland – all AI sires from famous US Seedstock herds and out of one renowned and productive female lines. They also deliver stellar EBVs and Indexes alongside their outstanding phenotype.

Also in the lineup are 13 sons of Karoo Main Event M367 the sire of Alpine's own home bred AI Sire Alpine Main Event Q192 sold to Genetics Australia at the Autumn 2021 Bull Sale. Once again Main Event has stamped his sons with his full-bodied phenotype

Alpine continue their close association with WA Angus stud Coonamble offering

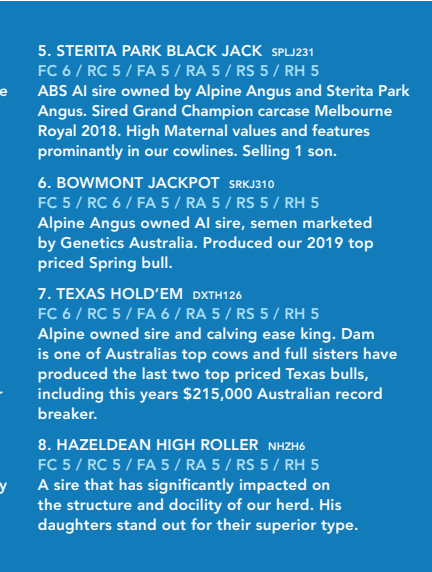

the first draft of 7 Coonamble Navigator N435 sons in the sale displaying once again their sire's dense and heavy muscled body type.

Alpine manager Chris Oswin 'Every effort is made to ensure Alpine Bulls go to work in peak working condition. Both physically through Semen testing pre sale as well as being, independently structurally assessed. In addition all Sale Bulls have been parent verified and have been genomic tested to verify their EBVs. The fall of the hammer at our sales represents the beginning of a relationship with our clients – a comprehensive After Sale guarantee plus our "can do" attitude means we have our client's back should something go awry.'

If the Sale Preview on Sunday 19 September is not convenient, pre-sale inspections can be arranged by appointment with Chris. This affords those who cannot be there Sale Day to make their selections and either bid themselves online via Auctions Plus, via their agent, or by arrangement with Alpine's Sale Agents Dan Ivone Paull & Scollard, Myrtleford or Mick Curtis Rodwells, Euroa.

**All the best,
Jim Delany, Principal
Chris Oswin, Alpine Manager**

THE ALPINE ANGUS LEGACY

1. KAROO KNOCKOUT NENK176
FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5
Fantastic herd sire that stamps his cattle with incredible depth and thickness. This Spring son has already topped Hazeldean QLD sale and 2nd top at \$58,000 at Texas Bull Sale. Part owned with Texas Angus and semen marketed by Agri Gene. Selling 4 sons.

2. ALPINE EQUATOR L004 CGKL004
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Equal top priced bull in Autumn 2017 selling to Jock Hislop. Son topped the 2020 JB Angus Bull Sale. From the Tracey cow family and a maternal sister produced QLD top price Angus bull at \$110,000. Selling 3 sons.

3. ALPINE ELEVATOR M268 CGKM268
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4
\$18,000 top priced bull at 2018 Autumn Bull Sale, selling to Wes Hall from Tasmania. Coonamble Elevator son used in our AI & ET programs. Selling 3 sons.

4. KAROO MAIN EVENT NENM367
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
\$25,000 top priced bull 2018 Karoo sale, from arguably their best cow family. First class structure scores and son Q192 purchased by Genetics Australia as a semen sire in our Autumn Sale. Selling 11 sons.

5. STERITA PARK BLACK JACK SPLJ231
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
ABS AI sire owned by Alpine Angus and Sterita Park Angus. Sired Grand Champion carcass Melbourne Royal 2018. High Maternal values and features prominently in our cowlines. Selling 1 son.

6. BOWMONT JACKPOT SRKJ310
FC 5 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5
Alpine Angus owned AI sire, semen marketed by Genetics Australia. Produced our 2019 top priced Spring bull.

7. TEXAS HOLD'EM DXTM126
FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5
Alpine owned sire and calving ease king. Dam is one of Australia's top cows and full sisters have produced the last two top priced Texas bulls, including this year's \$215,000 Australian record breaker.

8. HAZELDEAN HIGH ROLLER NHZH6
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
A sire that has significantly impacted on the structure and docility of our herd. His daughters stand out for their superior type.

9.

10.

11.

12.

13.

14.

9. ALPINE LEADER Q238 CGKQ238

FC 6 / RC 5 / FS 6 / RS 5 / RS 5 / RH 5

Top priced bull 2021 Autumn Sale. Strong, square made sire astutely selected by the Ferguson family, Murrumgee.

10. ALPINE BEAST MODE P171 CGKP171

FC 6 / RC 6 / FS 5 / RS 5 / RS 4 / RH 5

Top priced bull 2020 Spring Sale, out of an excellent Hold'em daughter. Strong maternal pedigree and excellent Birth to Growth spread will see P171 used in our AI program.

11. ALPINE LEADER P216 CGKP216

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4

Strong bodied, moderate Birth Coonamble Leader son. Top price bull from 2020 Autumn Sale, selling to Mark Ham, Freshwater Creek.

12. ALPINE HERO CGKN042

FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

Coonamble H176 son with excellent muscle expression, who was equal top priced bull in our 2019 Autumn Sale, selling to John Canavan, Mansfield.

13. COONAMBLE NAVIGATOR WDCN435

Herd sire from the cow family that produced Coonamble Z3 and Ardrossan Admiral. Navigator's first two sons averaged \$20,000 this year at Coonamble sale. Full brother to AI sire Coonamble Nic Nat. Selling 8 sons.

14. ALPINE MUZZA CGKM245

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Retained by Alpine for his excellent structure and type and a full ET brother to M268. Their dam is one of Coonamble's top cows. Pictured a week after running with 45 cows. Selling 4 sons.

15. ALPINE JACKPOT N329 CGKN329

FC 6 / RC 5 / FA 5 / RA 5 / RS 4 / RH 5

Long, correct Bowmont Jackpot son who was top priced bull at our 2019 Spring Bull Sale selling to the Ferguson family, Murrumgee.

16. ALPINE MAIN EVENT Q192 CGKQ192

FC 6 / RC 5 / FS 5 / RS 5 / RS 5 / RH 5

Main Event son out of a ripping Hold'em daughter, Q192 was one of the high sellers in our Autumn sale purchased by Genetics Australia as a semen sire.

* The percentile bands represent the distribution of EBVs across the 2019 drop Australian Angus and Angus-influenced seedstock animals analysed in the Mid August 2021 TransTasman Angus Cattle Evaluation .

SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

Accuracy (%) – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or its progeny, or relatives) then the accuracy of its EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

Calving Ease DIR (%) – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

Calving Ease DTRS (%) – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

Gestation Length (Days) – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Wt (kg) – Estimates of the genetic differences between animals in calf birth weight.

200-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight (kg) – Estimates of the genetic differences between animals in cow weight at 5 years of age.

Milk (kg) – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size (cm) – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight (kg) – Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age.

Eye Muscle Area (cm²) – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat (mm) – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass.

Rump Fat (mm) – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass.

Retail Beef Yield % (RBY%) – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass.

Intra-Muscular Fat % (IMF%) – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

Trial Net Feed Intake (NFI) – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

Following a review last year a whole suite of new Selection Indexes were introduced with the December 2014 Group Breedplan run. The objective with the new Indexes was to bring them into line with the changes in cattle markets over time.

Angus Breeding Index – estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcass weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Heavy Grain Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcass weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Heavy Grass Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcass weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

- Main Event is a free moving, long, clean fronted calving ease bull with impeccable structure.
- Closely related to Knockout, Main Event was our \$26,000 top priced selection from the 2018 Karoo bull sale. His combination of low birth, coupled with high performance, perfect feet and flawless structure was too good to pass by.
- Upon arrival at Alpine he was assessed by Ian Moreland as straight 5's for structure with the added comment that he ranked amongst the soundest bulls he had assessed that year.
- Main Event offers a wonderful combination of calving ease, low Birth, 400 Day Wt around the top 10% of the breed and good carcass traits.
- Stems from arguably Karoo's most successful female line, Karoo Doris Y137. Full brother in blood to Main Event, Karoo Realist N278 was a high seller in the 2019 sale and is now a semen sire with Breeder Genetics.
- Main Event's first sons sold extremely well in Autumn and included CGKQ192, purchased by Genetics Australia as an AI sire.

- 7th highest sire for calves registered with Angus Australia over the last two years.
- Was a standout amongst Karoo's K bull crop in our opinion. Deep, thick, well muscled with tremendous growth and excellent movement.
- Produces big scrotal, wide, deep, thickset cattle with plenty of doing ability, performance and softness.
- Big Scrotal, good Growth & EMA and high fat.
- Knockout sons are phenotypic standouts and recent results include the second top price bull at \$58,000 at the Australian record breaking Texas Angus sale and \$38,000 top price at the recent Hazeldean Northern Performance bull sale, where Knockouts were also the high selling sire group. Both of these sales featuring over 150 bulls!

- Coonamble Navigator is a super thick, wide topped Discovery son out of a leading Coonamble dam.
- Navigator was our pick as a yearling from of an outstanding set of ET brothers. A brother Coonamble Nic Nat was purchased by Murdeduke Angus as one of the 2019 Coonamble high sellers and is an AI sire for Agri Gene, while a 3rd brother from this flush – Coonamble Next Step – has been retained by Coonamble.
- Navigator was used by Coonamble over a small mob of Spring heifers before crossing the Nullabor with two of his sons from this joining averaging \$19,000, despite being amongst the youngest in the sale.
- The 7 bulls by Navigator in this year's sale are out of first calf heifers. He produces light born calves that grow out to be super thick with impressive constitution and muscle definition.

0.0	+0.9	+1.0	+\$102	+\$103	+\$98	+\$106

- Muzza is a well fleshed, moderate birth, easy keeping Elevator son displaying true breed character.
- His two full flush brothers achieved the top and fourth top price in our 2018 Autumn Bull Sale. We retained Muzza due to his excellent combination of superb structure and type, heifer joining potential and growth.
- Not surprisingly he was assessed as straight 5's for feet and structure.
- Progeny are well made and docile with plenty of growth potential.
- His dam WDCJ15 has produced stud sires and sale toppers for Coonamble. She is a daughter of Bangadang Lowan A61, a female that has had a significant impact on the Angus breed and is the damline of among others Coonamble Hector H249 and Coonamble Junior J266, both sires that have been heavily represented in our past sales.
- His full brother and top priced bull of the 2018 sale also has 2 heavy bodied sons in this sale!

-0.4	0.0	+1.8	+\$148	+\$136	+\$153	+\$145

- Like Beast Mode, 38 Special is a high-quality son of Baldridge Isabel Y69, that takes Birth to Growth and explosive performance EBVs to a whole different level.
- Our 38 Special calves have been born light and grow quick and look like they stand on pretty good feet.
- We used 38 Special after inspecting his calves at Hoover Angus in Iowa, where he has produced sale-topping progeny over the last few years.
- A testament to the quality of his dam, is that in the 2020 Baldridge Sale, Y69 daughters produced the three highest priced bulls from an offering of 360.
- We have retained a powerhouse 38 Special son in CGKR005.

MAINTAINING & MONITORING BULL HEALTH

VITAL TOOLS TO MAXIMISING LIVE CALVES BORN: TOP BEEF PRODUCERS NEVER SET AND FORGET!

All Alpine sale bulls have been semen tested and physically examined for penile and testicle abnormalities by Haydn Shipard of Agri Gene. From our point of view the QA program for our bulls is designed to ensure we have done everything we can for them to be in optimum condition for their FIRST joining after they leave Alpine.

Once your Alpine Bull arrives at your farm the baton passes to you! This is because Bulls face a range of variables throughout their working lives – but it is important to know they at their greatest risk of problems in their FIRST joining season.

Bull injuries, disease, accidents, general herd health and dumb ass bad luck play a role in the success of a joining program. Closely monitoring your bull(s) and cow herd during as well as pre joining is essential to avoid a 'train wreck' come pregnancy testing – which can involve big losses in \$ terms and a big drag on farm cash flow.

There are four key tools to maximise bull performance and pregnancy rates year after year:

The first is to maintain the annual vaccination program for pestivirus, vibriosis and leptospirosis for the rest of a bulls working life.

The second is to get ALL of your bulls checked prior to joining by the appropriate industry experts for your bulls' semen quality as well as allowing a physical evaluation of their working parts to make sure all is in order. This will help to identify any bulls that have issues due to a past or current infection or a physical injury not obvious to the naked eye.

Unfortunately if bulls are not checked issues relating to the above are sometimes only discovered as a result of a poor calving or pregnancy test results. This is the 'train wreck' we need to avoid! In our experience with our many Alpine clients there is a DIRECT correlation between those clients achieving consistently better preg test results and the pro active management of the beef producer themselves – those who do all of the above

on a consistent year by year basis are well ahead of those who don't – both in terms of job satisfaction and \$ Profits.

Obviously employing the services of an industry expert to perform these bull tests is another cost. However we strongly recommend that you view this not as a cost but as an investment! We are confident you will get a very significant return in \$ terms over time by putting in place the process outlined above and by employing the right outside expertise.

Industry experts we recommend who could help include the services of specialists like Haydn Shipard or Ian Moreland, of Studcare Genetics. Both Haydn and Ian offer on farm fertility evaluation of bulls and we highly recommend their services – between them they have a combined 70 plus years experience in this field!

Glen Page from Zoetis is also happy to discuss any issues in regards to Vaccination programs and of course your local vet is another handy resource for any of the above.

The third strategy in each joining period is to try and observe each bull you have successfully serving a cow.

The fourth and final strategy is to focus on the cow herd. The majority of cows should be pregnant in the first cycle of joining (approx. 60–70%), so large numbers of cycling females after the first 3–4 weeks of bull introduction is most likely a KEY indicator of potential problems and should get alarm bells ringing.

There are a number of different strategies to help minimise the risk of bull breakdown during joining. These include multiple sire groups, rotation of bulls through different mobs, as well as the introduction of fresh bulls. Each of these have their own pros and cons and it gets down to personal preference and confidence levels. If you think you have a problem please don't hesitate to use Alpine Manager Chris Oswin as your first port of call – Chris is only too happy to help with trying to identify the problem and help you to identify the solution options available to you.

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The 2021 Alpine Spring Sale bulls were independently assessed by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw
 RC: Rear Claw
 FA: Front Foot/Pastern Angle
 RA: Rear Foot/Pastern Angle
 RS: Rear Leg Side View
 RH: Rear Leg Hind View

Ian Moreland, *Studcare Genetics*

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

Talk to your local Rodwells expert...

Give us a call for more information about our services and products

There are many ways to participate in the Alpine Spring Bull Sale.

BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine 3-year Bull Guarantee (Conditions apply).

- **PREVIEW SUNDAY 19 SEPTEMBER**
Preview the sale lineup on Sunday 19 September 10am–4pm.
- **PREVIEW BY APPOINTMENT**
Preview the sale lineup by appointment with Chris Oswin mobile 0427 562 254.
- **ATTEND THE SALE**
Attend the sale on 22 September in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.
- **BID ONLINE YOURSELF**
Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! www.auctionsplus.com.au
- **BID ONLINE WITH ASSISTANCE**
Bid online with assistance from your local agent at their office.
- **BID VIA PHONE HOOKUP**
To arrange to bid via phone hookup, please contact either GTSM Auctioneer Michael Glasser 0403 526 702 or Stock Agents Dan Ivone 0427 480 548 (Paull & Scollard) or Mick Curtis 0428 953 222 (Rodwells)

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

Please remember, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force.

OUR GUARANTEE

All Alpine bulls for commercial clients are guaranteed for up to three years from the date of sale. See p. 2 for details and conditions. Every effort has been made to ensure our bulls leave Alpine in top working order.

AFTER SALES SERVICE

Our 3 year guarantee is designed to deliver the best quality assurance. The sale of a bull we regard as the beginning of a relationship with our clients rather than the end of a 'deal'. We also believe we have a vested interest in helping our clients breeding programs in any way we can.

If you have any problems with your bulls or any other aspect of your breeding program we invite you to make contact with us regarding your concerns as soon as possible. We endeavor to keep a supply of back up bulls at all times in order to meet our guarantee obligations and as a service to clients whose bulls are accidentally injured.

ARRIVAL OF YOUR NEW BULL

Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench. In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be a routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working—condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease

free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2 year old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- they may not have built up immunity to IBR (the cattle form of herpes—making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their ranking with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- and pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.

Replace any suspect bull immediately. If you think there is or might be a problem please do not hesitate to contact us immediately as we can help you investigate the problem and if available provide a replacement bull so your joining is uninterrupted by any unforeseen event.

If you have to replace a bull, it is always wise to get the problem bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling.

In addition to the Alpine Guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

Our thanks to the Angus Society for their contribution to this article.
