

The Grove.

Australia's Premier Performance Shorthorn Herd

38th Annual On-Property Bull Sale

'Myall Grove', Condamine, Qld

Thursday 16 September 2021, 1pm

Congratulations

Quinn Family, Essex Grazing

MIDDLEMOUNT & CHARTERS TOWERS

An amazing pen of steers made up predominately of their Charbray steers with a couple of Shorthorn/Charbray cross steers to round out the winning pen of 10.

THE GROVE AND ESSEX STEERS PERFORM IN

100 Day Carcase Competition Beef 2021

The Grove has Highest Average MSA Index of all steers killed in Queensland 64.66 and the 4th highest from all around Australia.

The entries from southern Australia highlight the ability of those areas to have slightly higher index's across the board due largely to a kinder climate and slightly lower ossification.

The Grove.

Australia's Premier Performance Shorthorn Herd

38th Annual On-Property Bull Sale

At 'Myall Grove', Condamine, Qld

Thursday 16 September 2021, Commencing 1pm

★ **OPEN AUCTION** ★ LOTS 1 - 28 28 Specially Selected Performance Recorded 2yr Old Shorthorn Bulls PG. 9

★ **HELMSMAN AUCTION** ★ LOTS 29 - 103 75 Specially Selected Performance Recorded 2yr Old Shorthorn Bulls PG. 16

LOTS 104 - 120 17 Specially Selected Performance Recorded Yearling Shorthorn Bulls PG. 39

Through strenuous genetic selection and evaluation we are placing ourselves in the higher end beef market space.

Welcome

Welcome to The Grove's 38th Annual On-Property Bull Sale.

Sitting here writing this welcome, I looked back at last year's welcome and am amazed by how some things have changed for the better, despite COVID19 and having different lockdowns still occurring with regular monotony as the States change batons as to who has had an escape! The planets have definitely aligned for beef producers in Australia, and the ECYI is closing in on the \$10 level. We have never seen these returns for our young animals and the size of our national herd would tend to suggest we will continue to see very good prices into the future.

Selling cattle at present is an easy task and one can be forgiven that anything with four legs and a pulse is all we need to deliver to partake in these record prices. I guess that as a seed stock producer we hope everyone has received a little of the pie, but we want you to keep your sights focussed on the fact that as supply builds, the processors will be more selective and it is imperative to maintain your goals of hitting the grid specs with high compliance percentages to maximise your returns.

At The Grove we have not waived from our breeding goals of breeding fertile

cattle that share the ability to be turned off at numerous points along the supply chain with the inherent capability to produce a quality carcass at any point to suit your management and/or conditions at that stage. We believe the consumer is definitely heading more down the HGP free path, and whether this is right or wrong in our eyes, we feel we must produce an animal with the genetic traits to allow this production type. Where this does differ to an animal that needs HGP's to meet target markets is the ability for the non-HGP animal to continue to gain on feed, grass or grain, without hitting the proverbial brick wall. Anyone that has fed 100 Day cattle for the HGP free market and has encountered the cattle that stop gaining but not consuming at the 70-day mark will understand the economic hit one takes.

We have repeatedly highlighted The Grove's genetics' in the public arena to have the genetic traits required to achieve these goals. We won both Champion and Reserve Champion Pen in the inaugural HGP Free class of The Paddock to Palate competition in 2019, followed up by the Champion MSA index pen in the same class in 2020. We also were very competitive in the HGP treated classes with a 3rd overall in the 2020 100 Day class and 4th overall in the 70 Day class.

In 2021 we entered cattle into the Beef Australia Carcass competition and placed 7th over all in the 100 Day fed section. Most importantly to us though was the fact we achieved the highest MSA Index score of any cattle killed in Queensland and had the fourth highest average Index out of the 82 pens entered. The Groves steers had an average MSA index of 64.83 compared to an average of 60.54 for the 29 pens killed in Queensland abattoirs. That 4.29 difference in average index represents a 7% advantage which can mean real dollars where the index level is the cut off point for a rate increase on the grid.

This year's draft of bulls are once again a very commercially focused set of young sires. They represent our breeding philosophy very well and we have full confidence in them helping you produce cattle which will add to your bottom line. They have all been inoculated for Ephemeral Fever (3 Day), Vibriosis, Lepto (7 in 1), Pestivirus, Botulism and 3 Germ (Tick fever). They have been crush-side examined by Dr Jemma Postle and Dr Kim Kelly, including morphology testing. It is interesting to note that Dr Kim Kelly, a specialist within the morphology testing world, believes that testicle sizes of 35-38cm are responsible for the best morphology testing results that she has processed.

This year we have GDL and Nutrien acting on our behalf as selling agents and. We are very pleased to be working closely with their teams and highly recommend you making contact with your local representative to assist you in anyway to attend or purchase your bull requirements.

We sincerely thank you all for your support and trust you travel safely on your way home.

Kind Regards
The "Myall Grove" Morgan Families

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Your Investment

The bulls on offer at our 38th Annual On-Property sale are selected from a herd of 1300 fully performance recorded cows. These cows are all run under the same conditions and are mated annually in single sire mobs. They are preg tested at weaning and any empty cow or cow failing to bring a live calf to the yard at weaning are culled; no questions, no exceptions. The cows are individually assessed for temperament and structure (including udder) at branding when we mother up every calf. Any cow noted as unacceptable at this point leaves the herd at weaning time.

Heifer Management

Our heifers are all artificially inseminated in a two-round programme with no cover bull used. The sires selected to be used over the heifers are from a selection of our own future young sires, and sires from within the PHA group. These PHA sires are selected to assist with linkage within the group and also to help our group identify the next generation of future sires to drive the genetic gain within. The heifers are calved down with all calves weighed at birth. Again, heifers failing to deliver a positive pregnancy status or a live calf to weaning are removed from the herd for "greener pastures."

Weaning

Calves are weaned at a period largely determined by seasonal conditions. We have weaned down to 2 months however that is an exception rather than a rule. Generally we try and wean at 7-8 months of age, however can see real benefits in reducing this to 5-6 months. Calves are all weighed at weaning and roundyard docility scored. They remain in the yard for 7-10 days where they are all fed silage and thus are bunk trained for life. At this time they are drenched and vaccinated and we have found a programme of adding Vitamin ADE and B12 injections is very beneficial to their health in this period which places great stress on their immune systems.

All the cows are weighed at weaning time to allow a Mature Cow Weight EBV to be calculated. This EBV does not take into account the cow's condition score which we believe is a very important component that needs building into this trait.

From here the bulls all leave the yard and remain in one contemporary group for as long as the subsequent feed allows. At a minimum we try to ensure they stay in this one group until a 400 Day Weight has been collected and Scrotal Circumference has been measured. The heifer portion are all trucked to another property where they remain in the one group until a 400 Day Weight is taken and

Important Sale Information

1. No dipping is required for purchases as property is situated in clean area.
2. The Grove is confirmed free of brucellosis (CF) and is TB free (monitored negative).
3. All bulls have been evaluated for structural and reproductive soundness, and semen tested by our veterinary surgeon Dr Jemma Postle.
4. All bulls are fully inoculated for Vibrio, 7-in-1, 3-day sickness (BEF), Pestigard and blooded for Redwater.
5. All bulls have been scanned for EMA, IMF% and Fat Depth.
6. The sale is GST exclusive; (i.e. 10% will be added to the knockdown price).
7. Insurance representatives will be available on sale day. We strongly recommend insurance for bulls awaiting delivery.
8. Morning tea and lunch provided at the sale.

selection is undertaken for which heifers will be joined. Those not to be joined are then fattened for the MSA market or fed through for the 100 day Jap Ox market. We are finding we can hit market specifications for both of these markets with or without the use of HGP's.

Ultrasound Scanning to Generate Carcase EBVs

This is undertaken at a time when the animals are carrying enough condition to enable the variation between animals to be at its greatest. Having that variation amongst the large contemporary groups ensures the best outcome of quality information being fed into BREEDPLAN to create the Carcase EBVs we require to drive genetic gain within our herd.

The variation amongst the heifers is generally much greater than their male siblings as they tend to lay cover at an earlier age. This practice sees clear sire lines rise to the top in their various traits and again is highlighted by the heifers' data.

Your Future Sire's Background

So at this point your bull has come from an initial group of some 600 male calves born for that year. They have stayed in their contemporary groups and been measured for all the above traits and have been genetically described as accurately as possible through the integrity of quality data input into BREEDPLAN. These same traits are all measured by other members of PHA which gives our group real confidence in the figures allocated to each animal.

From this point the mobs are generally split into mobs of approximately 125 each being sorted into Sale and paddock bulls. From here the emphasis is on Structure and Temperament. As the bulls mature and gain weight their structural strengths and weaknesses are highlighted. The final judgement on structure is made by Mr Bob Gahan prior to the sale. He grades every bull on structure and if he is uncomfortable with their overall structure the bull is withdrawn from sale.

Their temperament is observed at every yarding and the older and slower I become the harder we are on this trait. What this means is that from the docility roundyard test until sale day, the bulls are removed

from the mob if we do not feel safe in the roundyard with them. This does not mean we are able to scratch and pat them, it means we feel safe around them in normal handling practice. We do not attempt to make our bulls "people" quiet by spending long periods of time with them so hopefully what you see is how they will breed. They receive the same handling as our heifer calves, allowing their true temperament to surface.

Once They Arrive at Your Place

Our bulls are run in large groups and probably the first time they have ever been split from their mates is on a truck trip to your property. So we encourage you to have some companion cattle in the yards waiting for him to settle in with, as his travel may have made him anxious and agitated.

Our bulls have been mustered and handled with horses, bikes and utes and have been worked with dogs (all be it not very good ones), so they should be accustomed to most methods of handling.

Bull/Cow Ratio

Under average seasonal conditions a rising two year old should manage to cover 40 cycling cows. Older bulls, if fit and mobile, can generally handle a few more.

Observation During Mating

It is highly recommended that you monitor your bulls during mating on a weekly

basis. Ensure they are on four feet and if a cow is cycling then observe the bull mounting and doing the job. This does take a little time yet it is time very well spent. Any cows observed being served should be noted so that in three weeks time if she is being served again you know there could be a problem.

In a single sire mob it is much easier to observe issues, yet on the flip side, much more vital to note as he does not have the advantage of having another bull cover his inability to perform.

When joining in multiple sire groups be aware that the older bulls in the mob are going to be more dominant as they are generally higher up the pecking order. In an ideal world try and join them with their mates from the same sale as there will be less likelihood of injury, or second best is to join them with bulls all of the same age.

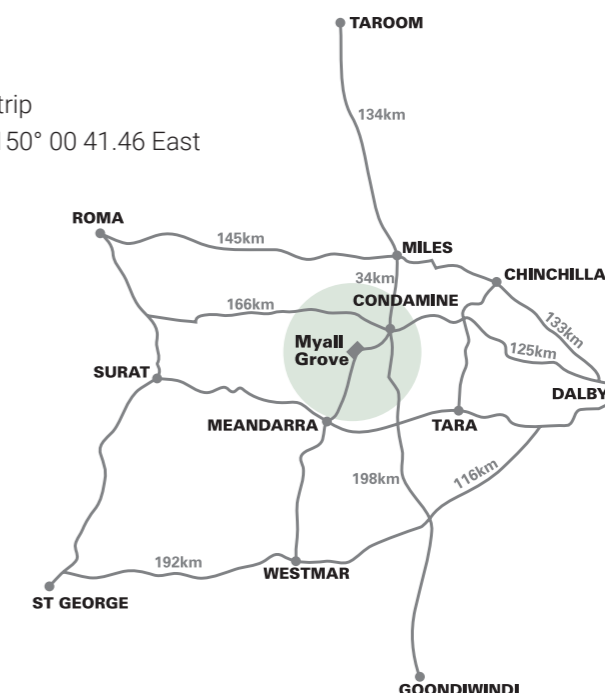

At Season's End

We endeavour to pull all the bulls out in as short a period as possible so that they can be drenched and put in the sire paddock at the same time. This allows them to find their personal space early on without having it disrupted every time a new sire is put into the paddock. Again, adequate room and feed supply will let them settle much more quickly which reduces injuries.

Disclaimer: The Vendors, Family, Sale Staff and representatives accept no liability for accidents that may occur, although these are rare at cattle sales. Any person attending does so at their own risk. While all care has been taken in the preparation of this catalogue, The Grove accepts no responsibility for any errors or omissions contained in this publication.

The largest performance recorded herd of Shorthorn genetics in the world.

Performance Recording

The Grove is the largest performance recorded herd of Shorthorn genetics in the world.

We firmly believe our ongoing commitment to performance recording and R&D, and maintaining large contemporary groups is allowing us to make the genetic gain that we have achieved. The integrity of the data being collected is paramount if we are to make rates of gain which will see us be competitive with other protein sources.

Accuracy (ACC)

(%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

Accuracy Range – Less than 50%:
Low accuracy.

EBVs are preliminary and could change substantially as more performance information becomes available.

Accuracy Range 50 - 74%:

Medium accuracy, usually based on the animal's own records and pedigree.

Accuracy Range 75 - 90%:

Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.

Accuracy Range 90% and above:

High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

The EBVs Explained

CED and CEM: Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

The Calving Ease Direct EBV (CED) for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

The Calving Ease Maternal/Daughters EBV (CEM) for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

GL: Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI records.

Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

BW: Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age.

The lower the value, the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age.

Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age.

This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MCW: Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

MILK: Milk EBV (kg) is an estimate of an animal's milking ability.

For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

SS: Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

DC: Days to Calving EBV (days) indicates the fertility of the daughters of the sire. It is the time interval between the day when the female is first exposed to a bull in a paddock mating to the day when she subsequently calves. A negative EBV for days to calving indicates a shorter interval from bull-in date to calving and therefore higher fertility.

CWT: Carcase Weight EBV (kg) is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

EMA: Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcase data, adjusted to a standard 300kg carcase.

This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

Animals with relatively higher EMA EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcase weight than will animals with lower EMA EBVs.

RIB and RUMP: Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300kg carcase.

These EBVs are indicators of the genetic differences in fat distribution on a standard 300kg carcase.

Animals with relatively lower fat EBVs are expected to produce leaner progeny at any particular carcase weight than will animals with higher EBVs.

The Selection Index

This year you will note we do not have an overall \$ Index Selection value in our genetic description. BREEDPLAN has updated the PHA Herdbook to a newer version and in this process has really tightened the spread on our IMF trait and increased the spread on calving ease.

As a group we did not believe these changes in values, when built into our previous MSA B2 index, reflected the path forward for our herds to help us and our clients achieve the genetic gain in today's marketplace. So we apologise for not having an index value this year but hopefully this will be rectified soon.

RBV: Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300kg carcase.

Animals with larger EBVs are expected to produce progeny with higher yielding carcasses.

IMF: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

The Grove 2020 Bull Sale

Megs and Maddie ready for all the action at The Grove 2020 Bull Sale

Use these tables as a guide to compare individual animals with the current genetic level of the Performance Herds Australia group.

July 2021 Performance Herds Australia Breedplan Percentile Bands For 2019-Born Calves

Use this table to assess exactly how an individual animal's EBVs rank within the PHA group for each performance trait.

Clyde Hoffman successfully using The Grove Shorthorn bulls in a Cross-breeding program at Rockhampton

22 Years of Paddock to Palate Success

HIGHLIGHTS FROM 1999 - 2021

The results achieved over the 23 years of entering cattle in the RNA's feedlot/carcase and now Paddock to Palate competitions have been very rewarding for The Grove.

The reason we think this competition is so relevant is that it's unbiased - all the cattle are entered into the feedlot on the same day and fed the same

ration under the same conditions. The results provide a good benchmark on where our cattle are sitting in the industry, which is important to know.

We think The Grove's consistent success over many years validates that our breeding program is on target for what we are trying to achieve.

Livestock Auction Terms & Conditions of Sale

CHAPTER ONE - PRELIMINARY

- (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
(b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
(c) A buyer is bound by these terms and conditions by bidding at auction.
(d) **Competition and Consumer Act (Cth) 2010**
It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
 - price-fixing; or
 - restricting outputs in the production and supply chain; or
 - allocating customers, suppliers or territories; or
 - bid-rigging; or
 - collusive bidding.Large fines and other sanctions may be imposed for unlawful conduct.
- (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
(b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
- The following applies in interpreting these terms and conditions:
 - The following words have the following meanings:
Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;
Livestock means animals auctioned pursuant to these terms and conditions; and Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
 - plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - plus any GST added in accordance with clause 12.
 - These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

- Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
- The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
- A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
- Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
- In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
- The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.
- A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
- The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
 - the purchaser's name; or
 - the bid card number which identifies the purchaser; or
 - the name of the person on whose behalf the successful bid was made; and
 - the Property Identification Code (known as the "PIC") of destination.
- The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
- The vendor warrants:
 - That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
 - That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.
- If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
- The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
- No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
- (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
(b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
(c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
- (a) Subject to this clause the sale is complete on the fall of the hammer.
(b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
 - delivery is taken by a representative of the buyer;
 - departure of the animal from the purchaser's delivery pen; or
 - one hour after the last animal is:
 - in the case of pre-sale weighing, sold; or
 - in the case of post-sale weighing, weighed.
- (a) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
(b) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
- (a) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This subclause does not apply if the agent makes an announcement that that effect prior to sale.
- (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that

the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
(c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.
(d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
(e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
(f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by presale catalogue and/or announce the status prior to the offering of those lots.
- If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
 - does not acquire title to the livestock;
 - holds the livestock as bailee only for the vendor;
 - must act in a fiduciary capacity in its relationship with the vendor;
 - must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
 - is responsible for the safety and well being of the livestock;
 - may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
- The purchaser agrees that:
 - Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
 - the Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
 - the Livestock are collateral for the purposes of the PPSA;
 - to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
 - the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract
- The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the del credere agent of the vendor at law.
- The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
 - when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
 - when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
 - do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
 - appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
 - by this clause 23, other than as it expressly provides; or
 - by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
- (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
 - In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
 - Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.
 - The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and

handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

- This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
- The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
 - pass government and other regulatory authority requirements and inspections at the time of slaughter;
 - are of merchantable quality;
 - carry an NLIS device in accordance with State law;
 - in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
 - all information in any document provided by the vendor is true, complete and correct in all material respects.
- In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
- However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
- In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
- Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
 - the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
 - the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
- The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
 - any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
 - any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
 - any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

- This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
- Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.
- A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
- Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
 - the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
 - if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.
- Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- to abstain from bidding; or
- to bid to a limited extent only; or
- to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices. The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or to do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE.

It is an offence to:

- induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- abstain or agree to abstain from bidding as a result of such a promise;
- knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.

I HEREBY ACKNOWLEDGE THAT I AM THE PURCHASER OF THE FOLLOWING LOTS:

I further acknowledge my agreement to be bound by the Terms and Conditions of Sale displayed at auction and read by the Auctioneer prior to sale. In particular I acknowledge that:

- The full purchase price is payable on the fall of the hammer + 10% GST.
- The Auctioneer reserves the right to withhold delivery until cheques tendered in payment have been cleared by the purchaser's bank.
- Without prejudice to or without in any way releasing me from my foregoing obligation I agree to pay interest on the outstanding purchase price from the date hereof to the date of payment at the rate calculated in accordance with condition 21 (b) of the Terms and Conditions of Sale.
- Excepting those conditions and warranties implied by the Trade Practice Act or any applicable state legislation which cannot be contractually excluded and excepting conditions and warranties expressly contained in the Terms and Conditions of Sale, all express or implied conditions, statements or warranties, statutory or otherwise, are excluded from this sale.
