

## 23rd Annual On Property Lambplan Ram Sale 'Springvale' 349 Adams Lane Greenethorpe 2809

Thursday 2nd September 2021  
Sale starts 1 pm Sharp

### Poll Dorsets Lots 1 - 147 White Suffolks Lots 148 - 203

Welcome to the 23rd Annual Felix Rams On-property Lambplan Ram Sale.

Due to the rapidly changing COVID situation, the sale will also be simultaneously interfaced on Auction Plus. All rams will be sold individually and in catalogue order. White Suffolks will be penned at the front of the shed to allow inspection to continue while the Poll Dorsets are being sold.

COVID-safe measures will be in place. To reduce the COVID risk masks may have to be worn in the shed. We have a QR code check in. Please do not attend if you have travelled to a hot spot in the last 2 weeks, have been in contact with someone suspected of having coronavirus, or have any symptoms of the virus. If this means you are unable to attend, please contact Isaac or Rodney (or the agents) for alternatives.

#### Animal Health / QA

MN3 and 2<sup>nd</sup> Generation Approved Vaccinated for Ovine Johnes Disease - Certificate No NS 211002, Ovine Brucellosis Accredited Free - Certificate No. CW 86/15

All lambs are vaccinated with Gudair at marking, Eryvac x 2, and the rams have been given a full vaccination program with Glanvac 6 in 1, the last vaccination 8/07/21 and were drenched with Triguard 8/07/21

Felix Rams is a closed flock, and the sheep are declared to be footrot and lice free. A Sheep Health Statement will be displayed, and available if required. LPA NVDs will be provided with all rams.

#### Lambplan averages for the 2020 drop (all asbvs and indexes Lambplan run 01/08/21)

**BWT** "birthweight" – lower birthweight values will produce lighter birthweight lambs

**PWT** "postweaning weight" - a higher pwt value ram will produce faster growing progeny

**PFAT** "postweaning fat" – the more negative the value for pfat, the leaner the progeny will be

**PEMD** "postweaning eye muscle depth" – rams with positive values for pemd will have more muscle especially in the high value loin area and hind quarter, and better overall carcase shape.

**PWEC** "postweaning worm egg count" – a lower (more negative) value for pwec indicates the progeny will have lower worm egg counts and be more resistant to developing a worm burden

Indexes are designed to help meet different breeding objectives and programs. They are simply a guide to assist in selection, however when doing so producers must consider their own breeding objective. This will involve considering your current ewe base, the environment they are run in and the target market for their progeny. Rodney and Isaac are happy to discuss this at any time.

**Trade \$ Index** optimizes fat at 0, with no emphasis on birthweight

**Export \$ Index** optimizes fat at -1.5, with no emphasis on birthweight

**Terminal Carcase Production (TCP)** aims to improve growth and muscle and maintain eating quality. TCP does not include birthweight, and has emphasis on negative fat

**Lamb Eating Quality (LEQ)** improve growth muscle worm egg count, eating quality and yield. Does not include birthweight or fat.

At Felix Rams all the important data for these rams is collected before they are 7 months of age – reflecting what you aim to do in your prime lamb enterprise. The rams are run commercially in large management groups mainly on dryland lucerne based pasture, so their performance is what you will see in your paddocks. What you see is what you get. Our aim is to breed sound rams to efficiently produce outstanding prime lambs.

Our commitment to accurate data collection and effective management groups and their use in estimating the breeding value of rams is second to none.

*Rodney, Liz, Isaac and Val Watt*

**NB Ram breeders.** The minimum price for a ram to be individually registered as a stud ram will be \$3000. Not all rams are available for individual registration.
