## **Welcome to the 2021 Glen Holme Dohne sale**

We are a family owned business committed to the sheep industry. Our breeding objective is to provide proven, robust genetics to maximise productivity and profitability for our clients.

Our concentration on a balance of attributes maintains conformation and robustness whilst providing the optimum quantity of quality wool.

The most important test of Glen Holme genetics takes place in the flocks of our clients. We take great pleasure hearing from you when you achieve significant gains in your business.

Independent evaluation continues with five of our sires through AMSEA trials in Victoria and NSW. Our applications to enter trials in SA have been unsuccessful. Results from 2019 drop at Balmoral have shown Glen Holme 162503 out performs all merinos in that trial. Our stud continues to influence the Dohne flock in Australia with sales to Western Australia and NSW of link sires or semen from our best performing sires.

We take great care with the collection and presentation of data for our sheep, and equally great pride as we watch the improvement of your commercial flocks when we get to class ewe hoggets.

We completed a genomic project this year which will eventually benefit all Dohne breeders. This was voluntary on our part and we gratefully acknowledge some kind assistance from Allflex and the ADDBA. Once Dohne genomics are referenced and validated, there will be an opportunity to DNA test young animals and have more confidence with the predictions of performance including late in life, and hard to measure traits like Eating Quality.

For the first time, we are offering Stud Dohne ewes at our auction.

Thank you for your continuing support.

## GLEN HOLME DOHNES

Our rams have undergone careful production measurements, data collection and analysis to provide ASBV's (Breeding Values), as well as classing from an independent classer, and are presented as registered Dohnes. This gives you, the purchaser, confidence that the ram you buy is expected to perform according to the breeding values assigned.

Progeny at Glen Holme are recorded for Body Weight, Fat and Muscle, Greasy Fleece Weight, Fibre Diameter, CV of FD and graded for visually assessed traits. Each trait is recorded as a deviation to the average of all Australian Dohne Sheep in 2000 and provided as ASBV's for the following;

PWT: Post Weaning Body Weight (kg)

YWT: Yearling Body Weight (kg)

PEMD: Post Weaning Eye Muscle Depth (mm)

PFAT: Post Weaning Fat depth (mm)

YCFW: Yearling Clean Fleece Weight (%)

YFD: Yearling Average Fibre Diameter (micron)

YSL: Yearling Staple Length (mm)

Dohne Plus (+) Index: is the combined ASBV performance of measured traits for the Dohne breeding objective.

(Additional ASBV figures are available on the Sheep Genetics website)
