## INTRODUCTION

On Wednesday 1 September 2021 we are excited to offer 70 Q bulls to be sold from Hillgrove, Boorowa. In addition, we will also be offering 50 commercial P cows with calves at foot by Dunoon Prime Minister P758.

Whilst COVID restrictions continue to challenge communities and industries across Australia, we are positive about the very strong cattle market both domestically and globally.

In July, the Eastern Young Cattle Index (EYCI) broke through the 1,000 cent barrier and at the time of writing is sitting at a record level of 1,003.5 cents. Demand for feeder steers also continues to climb, driven by restocker demand and a strong seasonal outlook throughout the south east of the country. Experts expect the domestic cattle market to continue to strengthen through until November but longer term there seems to be strong global demand and affected supply from heavy hitters like Brazil and Argentina.

Interestingly, this time last year, we reported seeing Australian and US beef prices creeping towards parity. Fast forward 12 months and Australian beef is once again claiming the crown of most expensive in the world. US beef production has rapidly stepped up and met the demand that Australia has not been able to meet into China. Although we are challenged by two governments at logger heads we will continually be brought back to China as they are the worlds largest protein importer and we are an exporting nation. As Australian farmers we will either be selling products to them or we will be filling the gaps left by other selling to China.

We are now nearing the end of what has been an exceptionally cold and wet winter in Boorowa. As I heard someone prophesise this week – you need a winter to get a spring. A winter it has been and it should be one hell of a spring.

The Mount Feedlot at Forbes continues to operate in a challenging environment. The pendulum has swung heavily in the breeder's favour and feedlotters are being faced with heavy full priced cattle with gains also challenged by the wet conditions. The operational costs of feedlotting has increased dramatically in the last year where we have seen Angus feeder prices increase from \$1500 to \$2600. At current feeder prices the economics of Angus beef is not far behind that of Wagyu beef when you run Angus through a mid-fed program.

### DUNOON PRIME MINISTER P758

In August last year we purchased 2020 top priced Angus bull, Dunoon Prime Minister P758, in a syndicate with Gilmandyke Angus and Ascot Angus. Dunoon Prime Minister weighed 1,020 kilograms as a two year old and ranks in the top 10 per cent or higher for all Angus indexes, carcass weight, gestation length, foot claw and scrotal size. He rates in the top 15 per cent or higher for eye muscle area, intramuscular fat and all growth traits.

We have since joined around 500 of our females to Prime Minister. At the time of writing, the first of his calves have just been born at Hillgrove.

The first two arrived 18 days early, weighing in at 25 and 28 kilograms respectively.

50 commercial P cows with calves at foot by Dunoon Prime Minister will also be offered at this year's sale. We are planning for them to be offered as PTE cow with Dunoon Prime Minister calf at foot.

We are excited about the addition of Prime Minister's exceptional genetics to our stud and commercial programs.

### NOW, TO THE CATTLE...

This year we are offering 70 Q bulls which are two years old and are a uniformed line of bulls which have not been fed any hard feed. They have recently come onto crop but have enjoyed a good season on pasture. The bulls are in working condition with some being used in our Autumn joinings at Breakfast Creek and at Hillgrove.

Overall we are pleased with their EBV performance which we remained focused on to help us achieve a premium in our beef business.

During the year bulls have been used in our own stud and Breakfast Creek herd in both AI and natural joinings. Bulls used include lots 1 to 24 and you will see these marked in the catalogue.

We continue to focus on high performing cattle and this year's offering features:

- 35 bulls below breed average for birth weight
- 42 bulls above breed average and 31 bulls in the top 20% for 400 day weight
- 44 bulls above breed average for EMA
- 61 bulls above breed average and 33 bulls in the top 20% for IMF
- 64 bulls with a 600 day weight larger than the mature cow weight

If you would like to inspect the bulls before the sale please contact myself or David. The bulls were videoed on Tuesday 27 July, where they were in forward condition but still have some growing to do through the month. The short videos are available throughout website, along with links to the relevant information on the Angus Australia website.

Whilst we remain in very uncertain times with COVID restrictions, we do hope that we will be able to welcome you to join us for the sale in person. If not, the sale will be run through Auctions Plus and we will continue to do everything we can to make the virtual experience of purchasing a bull as informative and comprehensive as possible.

**Sam Burton Taylor**  
**August, 2021**

## NOTICES

### COVID SAFETY PLAN

We encourage you to read our full COVID Safety Plan - which is available on our website and will be displayed at the sale.

In line with current NSW Health guidelines, all visitors are required to:

- sign in using our QR Code
- wear a mask in line with NSW Health guidelines
- maintain social distancing of 1.5 metres from others at all times
- not attend if feeling unwell or have experienced fever, cough or other flu like symptoms in past 14 days.

We ask that all visitors complete the pre-registration at the bottom of the sale page on our website, or by emailing your name, purchasing entity, address and mobile number to [info@kennyscreek.com.au](mailto:info@kennyscreek.com.au). Virtual attendance via Auctions Plus is available, and encouraged where physical attendance is not possible.

### HEALTH AND SAFETY OF VISITORS

Visitors enter the pens at their own risk. Children under 16 and people with reduced mobility or who require the use of aids are requested not to enter pens.

Under normal conditions all animals are considered to be docile in temperament, however on sale days conditions are different, and stress levels may be heightened, causing animals to behave unpredictably.

While we do not expect any issues it is important that visitors are aware of their surrounds, remain alert at all times, and acknowledge the risks associated with the sale.

### SALE CATALOGUE

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information provided in this catalogue before relying on such information.

### PARENTAGE

We have tested all bulls in the sale to the highest available parent verification standards offered by Angus Australia. All Q bulls have been successfully sire or parent verified by genomic testing.

### REGISTRATION AND PRIVACY INFORMATION

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by the vendor and Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form on their website and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the storage and disclosure of such information.

### SEMEN RIGHTS

Kenny's Creek retains the right to collect semen for in-herd use from any bulls sold in the sale at our expense and at the convenience of the purchaser.

## THE KENNY'S CREEK CONNECTION

### CONNECTION TO COMMERCIAL PRODUCTION VALUES

- We purchase Kenny's Creek female bloodlines from clients for joining.
- We run our own 1,000 cow commercial Angus herd which provides a benchmark on performance.
- We are our own bull client. Each year 30–40 of our bulls are used internally as back up to our fixed time Artificial Insemination (AI) program. AI is done using our own custom collect semen.
- We manage a commercial feedlot (The Mount, Forbes), allowing us to purchase clients' feeder steers and match data from feedlot performance to genetics and EBVs.

### CONNECTION TO INTERNATIONAL MARKETS

- We travel nationally and abroad to analyse the best genetics and new cattle technologies, giving us insight into world cattle and beef markets.
- KC Natural is a processor, exporter, wholesaler and retailer – giving us unique insight into each level of the supply chain.
- We gather feedback on carcase performance to link to Kenny's Creek Angus genetic programs.

### CONNECTION TO OUR BULL CLIENTS

- Our deep understanding of the industry helps us to understand and tailor genetics to our clients' herds.
- We focus on the results of clients' breeding strategies by being an active participant in the marketing of livestock and purchasing through our buy back program.

KENNY'S CREEK

## PERFORMANCE AND ANIMAL HEALTH

### HEALTH STATUS

**BioCheck Biosecurity Plan:** The Kenny's Creek Angus herd at Hillgrove, Boorowa has been assessed and tested under the BioCheck Biosecurity Plan and is rated as J-BAS 7.

**Pestivirus:** Pestivirus is an endemic viral disease in Australia. There is serological evidence of pestivirus in over 70% of beef herds in NSW. The Kenny's Creek pestivirus management plan involves exposing all weaner cattle to the virus. All exposed animals have a lifetime immunity. Refer to our website for further information. All bulls have been tested negative to pestivirus.

### INDEPENDENT ASSESSMENT BY CHRIS SAUNDERS FROM PRECISION BREEDING

All of our bulls have independently evaluated for structural soundness and fertility, in particular:

1. Semen tested
2. Scrotal palpated
3. Structurally assessed

### HEALTH MANAGEMENT

After you have purchased a low risk bull it is important to manage him correctly to ensure a long, effective working life. Ensure you vaccinate your bulls annually with 7 in 1 and vibrio vaccine. All Kenny's Creek Angus bulls have had their initial two vaccinations and now only require annual vaccination.

Monitor the body condition of your bulls and maintain a condition score of 3. Young bulls require good nutrition. Don't allow your bulls to become overly fat, as fat bulls have a greater risk of injury and also achieve poorer conception rates.

The variation in climatic conditions (temperature extremes) and grazing conditions in Central and Northern Queensland can have a large effect on the quality of semen the bull produces. It is recommended that after you purchase a new bull and relocate him to a new grazing environment that you have his semen examined prior to joining.

### MONITORING NEW BULLS

Any new bulls being joined for their first time are at a greater risk of achieving poor conception rates due to injury or infection. It is therefore important to monitor new bulls closely.

What to look out for:

- Lameness.
- Swelling in the area of the penis or testicles.
- Penis unable to be exteriorised from the sheath.
- Inflamed or reddened penis.
- Bulls attempting to mount but not serving.
- Any signs of systemic disease i.e. lethargic.
- Cows still in estrus towards the end of the joining period.

In well managed herds we expect 60–70% of conception to occur in the first 3 weeks. It is extremely important to monitor new bulls during this period. Cows joined to new bulls need to be inspected 2–3 times per week for the first 3 weeks then weekly thereafter.

It is important to remember that problems can develop during the joining period. Some of these problems cannot be prevented, so early detection is the only way to minimise their impact.

### FEET AND LEGS

Great attention is paid to both the feet and legs of animals as part of the Kenny's Creek breeding program to ensure their longevity and working lifespan. It is important to note that no feet are ever trimmed and any identified animals with structural issues are removed from the breeding herd.

### TEMPERAMENT

Temperament has been assessed constantly across the whole herd over the last 20 years. All working bulls are selected in part for their libido and fertility attributes and as such require an understanding management approach to their handling.

## THE KENNY'S CREEK PROGRAM

The selection and breeding program at Kenny's Creek is driven by a systems based approach that at its heart has a rigorous and non-emotional approach to genetic selection. Our key motivation is to produce trouble free performance bulls for our clients.

A brief summary of the key points of our approach is as follows:

### SIRE SELECTION

Kenny's Creek is at the forefront of utilising structural information about our breeding herd, with each animal assessed rigorously. We have developed systems to analyse the data collected and rank the performance of sire and cow lines, enabling us to react early to structural issues inherited by sire lines.

Our sires are comprehensively examined, including progeny, dams, granddams, sisters and any other family members available. Through tightly

researched breeding principles and high accuracy parents, we aim for a low cull rate in bulls presented for sale – we believe this means more predictable progeny for our clients' herds.

Once sires have passed this assessment we then look at EBVs, either on Angus Breedplan or multi-breed Breedplan, keeping in mind some of our clients sell steers to the domestic market and some look at the Long Fed index. We are not a "one-index" breeder.

### INDEPENDENT ASSESSMENT

All our bulls have been independently evaluated for structural soundness and fertility. The detailed methodology for these assessments is set out under 'Performance and Animal Health'.

### OUR GUARANTEE

To the best of our knowledge all bulls are in sound working condition at the time of the sale. If, during the next 12 months, a bull becomes infertile or breaks down, provided it is not caused by injury or disease contracted after leaving Kenny's Creek Angus, we will:

- replace the bull with as close a match as possible; or
- grant a full credit (less any salvage value) for any purchase at Kenny's Creek Angus sales.

### BUY BACK PROGRAM

Each year we buy back heifers, finished cattle and feeder steers from our Kenny's Creek Angus clients. Our objective with the buy back program is to provide premium prices to our bull clients. In the last financial year we have purchased 1,000 breeding heifers and 13,200 feeder cattle.

## Kenny's Creek quality offering well received

A QUALITY line of well-presented Angus bulls was met by demand from both stud and commercial cattlemen during the Kenny's Creek Spring Bull Sale at Hillgrove, Boorowa, last Thursday.

Overall the Burton Taylor family sold all but one of their 78 bulls for a top of \$22,000 and average of \$9206.

Kenny's Creek L217 P4 fetched the \$22,000 high-price, selling to the Gialombardo family of LA Angus, Carrick near Goulburn.

Weighing 1010 kilograms at 25 months, he was sired by Kenny's Creek Proceed L217 and out of the Kenny's Creek Jemma M605 female.

Sam Burton Taylor of Kenny's Creek said the bull pre-

sented well to buyers and he was so athletic for the weight he was carrying. Boasting short gestation length and high growth, all his indexes were in the top 10 per cent.

Offering yearling bulls for the first time in 10 years proved to be a positive move for Kenny's Creek with all 20 yearling Q-drop bulls sold to a top of \$16,000 and an impressive average of \$10,700.

Kenny's Creek Mojo Q43 was the \$16,000 top-priced yearling, and second high-seller of the sale, purchased by the Blyth family of Dolocumbia, Adelong.

Sired by Landfall Mojo M45 and out of Kenny's Creek Bara N81, all his indexes were in the top 5pc of the

breed or above, with number of individual traits also in the top 5pc including: 200-, 400- and 600-day weights, eye muscle area, carcass weight.

Mr Burton Taylor said the yearling draft consisted of bulls that were the result of embryo transfer programs and offered buyers a lot of new genetics.

"They were terrific figured bulls, with low birth weights up to high 200-, 400- and 600-day growth traits, and great carcass figures," he said.

Two bulls were picked up by Yamba Angus stud at Orange, including Kenny's Creek Kodak P38 for \$15,000 and a yearling, Kenny's Creek Payweight Q477, for \$12,000.

A number of large volume buyers featured including JW Blacker Farms at Lake Cargelligo, DJ and JK Curtis of The Wilgas, Trundle, James Henwood of Barkalapur, Wagga Wagga, and Peter Stewart, The Falls, Neville.

Heifer bulls were well supported, according to Mr Burton Taylor.

Auctioneer Luke Whitty of selling agents Kevin Miller, Whitty, Lennon and Co stud stock, said the quality of the bulls was outstanding.

"They were very consistent right through all the two-year-old bulls, and they displayed great carcass attributes, great muscling, with softness and figures to match," Mr Whitty said.

Josh Crosby of KMWL stud stock, Elders agent Ben Seaman, Goulburn, and Sam Burton Taylor of Kenny's Creek Angus, with the \$22,000 sale-topper purchased by LA Angus, Carrick. Photo: Hannah Powe

"In particular the yearling Q bulls really were a real stand out and sold like hot cakes. They were very popular and I think they will offer yearlings again in the future." Mr Whitty shared auctioneering duties with fellow KMWL agent Liam Murphy. — HANNAH POWE

## Kenny's Creek heifer to \$19k

BY HANNAH POWE

ANGUS studs chasing maternal lines and figures drove prices to a \$19,000 top and allowed for a full clearance at the Kenny's Creek Angus Female Sale at Boorowa, last Thursday.

Overall the Burton Taylor family sold all 99 lots for a total sale average of \$6934, with their Q-drop heifers demanding attention from buyers.

A syndicate of Angus breeders including Knowla Livestock and JRGV Angus both of Moppy, Aarden Angus, Corowa, and Waitara Angus, Trangie, joined forces

to secure Kenny's Creek Bara Q423 for \$19,000.

The 14-month-old daughter of Rennylea Edmund E11 was out of Kenny's Creek Bara L101, and presented a credible data set which had her in the top one per cent of the breed for all selection indexes, as well as top 5pc or higher for eight traits and top 20pc for another three traits.

Jack Laurie from Knowla and JRGV said they selected the Q423 heifer for her length, width and overall balance combined with a data set and cow family that speaks for itself.

Greg White of Robrick Lodge Thoroughbreds Pty

Kenny's Creek co-principal Sam Burton Taylor and daughter Billie, 7, with auctioneer Luke Whitty, KMWL, with the \$19,000 high-priced female. Photo: Hannah Powe

Ltd, Parkville, paid the second top price of \$16,000 for Kenny's Creek Ninah Q428. By HPCA Intensity and

from Kenny's Creek Ninah K309, at 14 months she sat top 10pc for all growth traits. Mr White purchased three

lots for a \$14,333 average.

In the breakdown, 70 cows and calves topped at \$15,000 and averaged \$7028, while 29 yearling heifers topped at \$19,000 and averaged \$6706.

Sam Burton Taylor of Kenny's Creek said they were really pleased with the results, which saw females sold to some great studs throughout the eastern states.

"The Q yearling females sold really well," Mr Burton Taylor said. "They were a good representation of our breeding going forward."

Sara Park Angus and Dudley Angus at Glen Innes paid the top money of \$15,000 in the cow section for a donor

female in Kenny's Creek Bara L120. Sired by GAR Prophet out of Kenny's Creek Bara J246, she sold with a calf at foot by GAR Ashland.

Large volume buyers were JA and DM Flemming of Wagga Wagga who bought 14 for a top of \$7000 top, twice, and average of \$5429.

First-time buyers Col Flanagan and Pat Ebert of Prime Angus, Benalla, Vic purchased 10 females through Ryan Morris of Glasser Total Sales Management for a top of \$12,000, to average \$7400.

Kevin Miller, Whitty, Lennon and Co were agents, with auctioneers Luke Whitty and Liam Murphy.

## THE CHECKLIST

- ✓ CALVES WEIGHED AND TAGGED AT BIRTH
- ✓ WEIGHED AT 200, 400 AND 600 DAYS
- ✓ COWS WEIGHED FOR MATURE COW WEIGHT
- ✓ GENOMIC TESTING FOR PARENT VERIFICATION, PRODUCTION TRAITS AND RECESSIVE GENES
- ✓ INDEPENDENTLY ASSESSED FOR STRUCTURE, LEGS, FEET, SHEATH AND TEMPERAMENT
- ✓ BULL SOUNDNESS EXAMINATION CONDUCTED BY PRECISION BREEDING – CHRIS SAUNDERS
- ✓ JBAS-7 BIOSECURITY PLAN
- ✓ BLOOD TESTED NEGATIVE FOR PESTI VIRUS. ANNUAL PESTIGUARD VACCINATED (ANNUAL VACCINATION RECOMMENDED)
- ✓ 7-IN-1 VACCINATION
- ✓ VIBRIOSIS VACCINATION (2 INITIAL + 1 PRE SALE) AND SOLD WITH A LIFETIME ANIMAL HEALTH RECORD
- ✓ ALL BULLS HAVE THREE FORMS OF IDENTIFICATION – TAG, NLIS AND FREEZE BRAND
- ✓ KENNY'S CREEK GUARANTEE
- ✓ SOCIETY TRANSFER IF REQUESTED

## STRUCTURAL ASSESSMENT

### KENNY'S CREEK STRUCTURAL PROGRAM

The 2021 Kenny's Creek Spring sale bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Kenny's Creek sale bulls were assessed by Chris Saunders of Precision Breeding on 2nd July 2021.

### Dunoon Prime Minister P758 in hot demand with over 1000 doses sold

Hannah Powe

🐦 @Hannah Powe

19 Jul 2021, 8 a.m.

Beef News

When a "rare find" walks into the sale ring at any auction in any breed, buyers can't help but dream and want in on the action.

Creating a whirlwind of excitement at last year's Dunoon Spring Angus Bull Sale in August was a bull that did just that, make people think of the future.

Dunoon Prime Minister P758 is a bull that turned heads offering a unique package of phenotype, type and figures, a combination of traits that sparked interest and had him named the \$140,000 top-priced Angus bull and top-priced bull sold in New South Wales in 2020.

The elite sire in the making purchased by Jim and Jackie Wedge, Ascot Cattle, Warwick, Qld, the Bateman family, Gilmandyke Angus, Orange and the Burton Taylor family at Kenny's Creek Angus, Boorowa, set the season high as several stud buyers went toe-to-toe before the syndicate laid the final blow to ABS Australia who was the underbidder.

## COMMERCIAL COWS AND CALVES TO BE SOLD

---

### 50 THREE YEAR OLD COMMERCIAL COWS AND CALVES

- Three year old P cows with calves at foot from our commercial herd at Breakfast Creek Station
- All calves are sired by Dunoon Prime Minister P758 and they are the first commercial calves to be offered for sale
- To be sold as five lots with bidding on site or on Auctions Plus. Assessment to be completed mid August
- To be sold at 1pm on 1 September prior to Lot 1 of the bulls
- Sires of the P cows (AI) include:
  - NDIL123
  - NDIL463
  - NDIH16
  - NDIJ62

# UNDERSTANDING THE TRANS TASMAN ANGUS CATTLE EVALUATION

TACE (TransTasman Angus Cattle Evaluation) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand. TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing TACE research and development is supported by Meat and Livestock Australia.

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- the breed average EBV
- the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

## CONSIDERING ACCURACY

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV. The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

## DESCRIPTION OF ANGUS BREEDPLAN EBVS

EBVs are calculated for a range of traits within the TransTasman Angus Cattle Evaluation, covering calving ease, growth, fertility,

maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided below.

## BIRTH

**Calving Ease Direct (%)**: Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers. Higher EBVs indicate fewer calving difficulties in 2 year old heifers.

**Calving Ease Daughters (%)**: Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age. Higher EBVs indicate fewer calving difficulties in 2 year old heifers.

**Gestation Length (days)**: Genetic differences between animals in the length of time from the date of conception to the birth of the calf. Lower EBVs indicate shorter gestation length.

**Birth Weight (kg)**: Genetic differences between animals in calf weight at birth. Lower EBVs indicate lighter birth weight.

## GROWTH

**200 Day Growth (kg)**: Genetic differences between animals in live weight at 200 days of age due to genetics for growth. Higher EBVs indicate heavier live weight.

**400 Day Weight (kg)**: Genetic differences between animals in live weight at 400 days of age. Higher EBVs indicate heavier live weight.

**600 Day Weight (kg)**: Genetic differences between animals in live weight at 600 days of age. Higher EBVs indicate heavier live weight.

**Mature Cow Weight (kg)**: Genetic differences between animals in live weight of cows at 5 years of age. Higher EBVs indicate heavier mature weight.

**Milk (kg)**: Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam. Higher EBVs indicate heavier live weight.

## FERTILITY

**Days to Calving (kg)**: Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. Lower EBVs indicate shorter time to calving.

**Scrotal Size (cm)**: Genetic differences between animals in scrotal circumference at 400 days of age. Higher EBVs indicate larger scrotal circumference.

## RECESSIVE GENETIC CONDITIONS

The genetic status of an animal is subject to change and will be re-analysed and adjusted each week as DNA test results of relatives are received. **For information on recessive genes visit [www.angusaustralia.com.au](http://www.angusaustralia.com.au).**

## KENNY'S CREEK COW FAMILIES

---

### BARA FAMILY

Started with the purchase of K150 in 1991, she was a 1990 drop calf. K150 grew into a moderate framed cow, very docile, fertile and trait leading carcass. Showing tremendous longevity and living until nearly 22 years of age. Now she is +4.3 Calving Ease and +2.1 IMF with 91 registered progeny in 6 herds. Some standout daughters are U72 with 14 progeny, Q120 with 66 progeny, Y120 with 22 progeny and A341 and D147. The Bara family continues to impress these traits now.

### FINKS MISS FAMILY

Embryos were imported from Fink Beef Genetics, Kansas USA in 2001. The donor cow was Finks Miss 8315 and the sire was GAR Precision 1680. From these embryos there were 8 daughters. Kenny's Creek used X56 as a donor cow resulting in 12 progeny. Other females from these embryos are X34, purchased by Welcome Swallow, X44, purchased by Old Bundemar and X51, purchased by Bill Cornell and St. Paul's Angus. Our top priced cow in 2014 was D118 purchased by Moore Park Livestock, Glen Innes. The Finks Miss family has a very consistent phenotype and extra thickness and body depth.

### MITTAGONG FAMILY

V254 purchased from Te Mania in 2004, she was a productive donor cow having 87 progeny in 5 herds. Her daughters have been donors at Sterita Park, Te Mania and Paringa. Daughters have bred on particularly well, like C27 with 28 progeny, who was sold in 2014 to Redbank Angus. Sons of V254 have regularly topped bull sales. The Mittagong family breeds exceptional phenotype and strong maternal dams.

### **PATRIOT FAMILY**

Gets its name from sire Lord Patriot, the corner stone cow was T97 with 55 progeny. Other donor cows have been W37 with 62 progeny and X320. The Patriot cow line is one of the bigger framed cow families at Kenny's Creek.

### **SATURN FAMILY**

Started with Scotch Cap OB45 embryos purchased from Ardrossan Angus. V82 was the most proficient donor of this family with 63 progeny. A couple of daughters carried on as donors, C711 has 28 progeny and was sold to Bannaby Angus in 2011. Her flush sister C715 had 48 progeny. The Saturn family is a moderate frame line with very good maternal and carcass qualities.

### **WILCOOLA FAMILY**

Kenny's Creek purchased T138 from Ardrossan, a big framed matron by O36 x Q82. T138 was born in 1998 and her IMF EBV still stacks up well at +3.2 with 28 progeny recorded. The Wilcoola family are typified by large framed cows with good udders and rib angle.
