WELCOME

Welcome to Innisfail for the 13th Annual Kywarra Bull Sale. The 25 yearling bulls on offer are well grown thick and soft commercial bulls that represent our program well. They are without doubt an even line of bulls and we are proud to present them to you.

Our 2020 sale, after being forced, at last minute, to be held online due to Covid, was a complete success and we are very pleased to be partnering with Callow Livestock and Auctions Plus to continue our future annual bull sales in this format.

There are 3 new AI sires included in this draft of bulls. These proven bulls have bred well and offer some outstanding genetic combinations. To further increase the accuracy of the breeding potential of our bulls we have had them genomically DNA tested. This data has contributed to the EBV's displayed in this catalogue.

Kywarra bulls are run commercially. They are not fattened for sale or foot trimmed. With our bulls what you see is what you get. Our cows are also run on strict commercial principles. Our heifers calve at 2 years and are expected to rear a calf every year after in tightly controlled joining's. All females are strictly culled on fertility, type and structure with no second chances.

I would like to thank all those who have supported us and our program. Please feel free to contact us for any further information. We have watched these bulls grow from the day they were born. No one knows them or their individual breeding potential better than us. Please feel free to ask.

Kind Regards,
Colin Bannerman.

SALE INFORMATION

SALE LOCATION

Kywarra Angus is situated 6km south of Blayney, on the Mid Western Highway adjacent to the CTLX Carcoar saleyards.

INSPECTIONS

Cattle will be yarded in pens at "Innisfail" from 10am sale day, or inspections can be arranged any time prior to the sale by appointment with the vendors.

MORNING TEA & LUNCH

Morning tea and lunch will be available at both days, for a gold coin donation with proceeds going to Blayney Preschool.

HEALTH

All bulls have passed independent vet inspections. All bulls have had 5 in 1, Vibrio and Pestigard vaccinations. They have been tested negative for BVDV (Pesti Virus).

INSURANCE

We recommend successful purchasers insure their bulls.

CARTAGE / TRANSPORT

Bulls will be delivered free by Kywarra within 250km's of Blayney. Delivery will be carried out at the earliest convenient time for both parties.

RECESSIVE GENETIC CONDITIONS

All bulls have been DNA tested to determine their status in relation to recessive genetic disorders. All bulls are tested free or pedigree free of all known recessive conditions. Please feel free to contact KYWARRA for further discussion or visit the Angus Australia website for a comprehensive report on recessive genetic conditions (www.angusaustralia.com.au).

CARING FOR YOUR NEW KYWARRA BULL

Always be considerate to your new bull and handle them with respect and kindness. Handle them quietly, walk them rather than rushing them, treat them with care and in a gentle manner and they will do likewise. A bull leaving KYWARRA is leaving the security of a large mob and will arrive in a strange environment at the purchaser's property. Unload him and **make sure he has a steer or cow as companion straight away**. Bulls should not be left in unfamiliar yards alone.

A young bull can move in with older bulls and settle well, but remember, being the youngest, he will get the last of any feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed. Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle the cows quickly and efficiently.

KYWARRA bulls are used to being handled by stockmen on motor bikes. Most of the fences are electrified and the bulls treat them with respect.

DISCLAIMER: People entering upon this property for any purpose whatsoever including attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft, loss or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by negligence, deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners, their employees, contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied no responsibility is accepted for any errors which may have occurred.

The KYWARRA Guarantee

KYWARRA bulls are fully guaranteed for fertility and structural soundness and have been independently assessed for both. If a bull should prove infertile or breaks down structurally for any reason other than accident or negligence within 12 months from the date of purchase we will replace the bull with another close match. If a suitable replacement is not available we will credit the purchase price of the bull, less salvage value, for use at the next KYWARRA sale. Any claims must be accompanied by a veterinary certificate. Please note this guarantee is not a replacement for sound management and due care, but instead a commitment to you, the purchaser, that we stand by our product. We have done all we can to ensure bulls are in good working order. Be assured you can buy a KYWARRA bull with confidence.

SALE DAY SAFETY

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are risks associated with cattle handling.

**Visitors enter the cattle pens at their own risk.
Children must not enter the pens.**

People entering the yards are at risk of injury. Be especially alert for bulls fighting. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them.

Do not crowd the bulls or loiter inside the pens and please don't enter the pens unnecessarily.

2021 SALE FORMAT

Bulls are available for inspection on our open day, Sunday August 29th from 10am till 4pm. They are also available for inspection at any other time by appointment.

The bulls will also be yarded on Sale day, Monday September 6th from 10am for inspection. The sale will commence at 12pm and is to be conducted online with Auctions Plus only.

All bulls will be on the market simultaneously, you can bid on any bull(s) at the same time during the sale. This allows you more time to consider your options, have a second look at the bulls or consult the vendor, during the sale.

If you intend to bid whilst at Kywarra, you must be registered with Auctions Plus and be able to bid on your mobile device (*please refer to page 17*). Callow Livestock will be in attendance on the 6th and can assist you with bidding if you do not have a suitable mobile device.

Invoices will be sent direct to purchasers from Callow Livestock.

CALLOW LIVESTOCK

PTY. LTD.

Proud independent, family owned livestock business operating for the last 26 years.

Delivering relevant industry information and accurate market signals to maximise profit in your business.

Vendor Advantage

Producer networks & groups | Expanded market options | Risk management | Flat rate \$/hd commission

Marketing Services

Market intelligence | Targeted turnoff | Market access | F1 Wagyu specialists | Source livestock

Consultancy

Deliver technical information | Genetic selection | Female classing | Farm visits to tailor production advice

**LEVEL 1
Auctions Plus
Assessor**

Join the established network of Producers and Producer Groups - strong relationships that are beneficial to all stakeholders in the supply chain.

We would like to sincerely thank visitors, bidders and successful purchasers for your support and friendship.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Other	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	ABI	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
	DOM	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
	HGRN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
	HGRS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ids.....
.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au
