Welcome to the 2021 Greenup Eidsvold Station Sale Team.

The sale will be on Thursday September 16, 2021, commencing at 12 pm at the Eidsvold Saleyards.

This 2021 team offers 120 Santa Gertrudis bulls, of which 104 are Classified 'S' bulls and 97 are poll/PS.

We thank our clients who continue to send positive feedback about the bulls' performance in getting calves in their first and second mating seasons and the long working life of the bulls.

We take pride in the standards we set for preparation, fertility, and structure. These standards result in bull returns/breakdowns that are well below 0.5% over the last decade, that is less than 1 bull breakdown per 200 bulls sold.

It is a fine balance of showing our bulls' potential and maintaining their structural integrity and semen quality. We are having a good winter season at Cardowan and Eidsvold, and with the added benefit of irrigation at Belvedere we can offer bulls that are prepared for sale on oats and are ready to work.

It is a terrific time to be a beef producer and the industry's patience has been rewarded. This week the EYCI closed at a record high of 1003.44c/kg, a phenomenal 250c/kg higher than July 2020.

Rick took over the Eidsvold herd in 2006, exploiting the large pool of genetics of the Eidsvold and Greenup herds to apply heavy selection pressure on the animals, and breed cattle that he believes are functional, fertile and ideal for major markets. Fifteen years on we are pleased with the progress that has been made to combine and expand the best traits of both herds and offer a line of cattle with commercially relevant traits, coupled with tropical adaptation that enable the genetics to suit the northern climate as well as perform exceptionally well in feedlots and temperate environments.

This year 40 percent of the sale team are sons of new release sires. This draft includes a strong line of twelve bulls by Rosevale Ned Kelly, purchased from the Rosevale sale in 2018 for the top price of \$47,500 and nine sons of Dangarfield Admiral (Quarterback). New release sires include sons of Rowanlea Atomic (P), Eidsvold Station Debonair D48 (P), Dangarfield Tycoon (P) and Greenup Fitzgerald F144 (PS).

Consistency across the draft is a prominent feature of the 2021 sale team, as well as the tropical coats across the sale team, ensuring suitability for breeders in ticky country and sub-tropical climate. The team is bursting with muscle, fertility, growth, and the renowned Greenup Eidsvold Station easy-doing constitution.

Bulls to suit domestic and export markets exhibit explosive growth and easy finishing ability to suit domestic trade and live export breeders. The Greenup Eidsvold herds remain breed leaders for scrotal size, retail beef yield and eye muscle area, a reflection of the fertility, muscling and growth that underpins the herd.

Constitutional superiority and fertility are achieved through genuine pressure on the female herd, that does not include masking and compensation by management.

The country our bulls are bred on underpins the herd's doing ability and is the reason our bulls thrive north of the Flinders, across arid rangelands of Australia, and excel in feedlots and fertile scrub.

**JBAS Status: Greenup Eidsvold Station herds are WA eligible, and classed as JBAS 7.**

The sale will be livestreamed and interfaced with AuctionsPlus. Due to COVID-19 we welcome private, pre-sale inspections, at your convenience. Full catalogues are available at [www.greenup.com.au](http://www.greenup.com.au) or contact us or your agent for a hard copy. Free delivery is offered to major selling centres and on-property wherever feasible.

We hope to see you at the sale and wish you all the best for the season and beyond.

Rick, Alice, Ruby, James & Rory

# GREENUP GUARANTEE BULLS DONE RIGHT

Greenup Eidsvold Station supplies hundreds of bulls annually to the Northern Australian Beef Industry to repeat clientele, over 95%.

We stand behind our bulls and all bulls are backed with the Greenup Guarantee for fertility and temperament.

Greenup Eidsvold Station bulls and their progeny are thriving across the arid rangelands of northern Australia, from the Pilbara, to the Kimberley, the Gulf, outback Northern Territory and the far western reaches of Queensland.

The feedback we get about how the bulls handle the heat, the distances to water and the work, reaffirms that the tough environment in which the 1800 stud females are run - the native pasture, the steep hills and granite Ironbark country - enables selection for superior constitution.

Our herds are WA eligible and JBAS 7

Greenup Eidsvold Station Bulls are bred and prepared for a long & productive life.

Our business success hinges on our clients' outcomes and their success, measured by:

1. Calves weaned and total kg produced per mated cow per year
2. Females re-breeding annually in arid, low-protein environments
3. Less costs by using fit, fertile bulls that walk far, work hard and last.
4. Turning off cattle earlier

with more weight

5. Premium prices.
6. High weight gains and feed conversions
7. Carcase and eating quality traits
8. Improving c/kg by expanding market options

The outcome is functional, fertile herds that perform well in tough country, and provide the supply chain with rapid growth & ability to finish export or domestic cattle between 12 and 24 months of age.

Our objective is to produce reliable seedstock that have predictable performance and proven fertility.

A simple philosophy "to breed profitable cattle for self-replacing commercial herds, which perform in all environments and within all major markets" remains at the heart of Greenup Eidsvold Station values.

Greenup Eidsvold Station runs in excess of 6000 head of Santa Gertrudis cattle, in the Burnett region of Queensland.

## KEEPING IT SIMPLE

The beef industry is demanding & requires reliable bulls that perform predictably.

The Greenup Eidsvold Station breeding program is underpinned by six decades of selection and the longest running objectively performance recorded herds.

Greenup Eidsvold Station are Breedplan herds.

We measure thousands of data records each year and use this data for ground-truthing subjective appraisals and to ensure we produce seedstock that is

demonstrably improving commercially relevant traits.

Our bulls are bred on the tough Ironbark forest country of the Great Dividing Range, under demanding, low-protein conditions. This environmental pressure ensures we continue to select for easy-doing cattle with exceptionally high constitution.

So whether you are a numbers person, or just want bulls that you can trust to do a job for you in any environment; you can be assured that they've qualified for the Greenup standard.

## THE DIFFERENCE

Industry relevance lies at the heart of our breeding values.

We understand what's important to the bottom line and we embed those priorities into our breeding objectives to produce low cost, high-return, self-replacing herds, that serve the whole supply chain for major domestic and export markets.

The bulls are raised to work straight-away, for longer, so our clients get more bangs for their buck.

All bulls must pass our criteria for conformation, temperament, semen morphology, scrotal size, growth and muscling, while retaining softness.

We take pride in the standards we set for preparation, fertility, and structure.

These standards result in bull returns/breakdowns that are well below 0.5% over the last decade, that is less than 1 bull breakdown per 200 bulls sold.

# Not everything that can be counted counts. And not everything that counts can be counted.

Albert Einstein

## Balanced Breeding

Greenup Eidsvold Station is one of largest data sets of objective performance records in Australia. We pride ourselves on this legacy, and provide data on traits that are objectively measured and most importantly - repeatable. Data must serve a commercial purpose and the outcomes must be reliable and predictable. We do not provide data on traits which are not repeatable and heavily prone to inconsistencies and vast swings (eg semen morphology), environmental noise and the consequential inaccuracies and high standard deviations (eg +/-9 days for DTC of 50% accuracy). We advise strongly for moderation when considering all traits and for breeders to be wary of selecting for unintended correlations. For example: Days to calving is possibly selecting for shorter gestation length and by consequence, smaller and lower-thrift calves - a major cause of post partum mortality in northern beef herds. A balanced, consistent breeding program will always prevail over time.

## Breedplan Explained

Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

### Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

### Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

### Growth

200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny

taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

### Carcase

Eye Muscle Area EBV (cm<sup>2</sup>) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

### Selection Indices

Selection indices can and possibly should be developed for each individual enterprise, however for convenience a Breed Society Index has been compiled based on common breeding objectives and some assumptions of breeding criteria. However not all operations are the same and will NOT want to place the same emphasis on each criteria, therefore these breeders should not use the Society Indexes but instead construct their own using Breed Object.

### Domestic Index

Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing, commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

### Export Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

Breedplan figures cannot be compared between breeds

Only Santa Gertrudis GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

## Greenup Fitzgerald F144 (PS)

Classification: S

Pollscur

Soc ID: 291188

Fitzgerald has been a breed leader for ten breeding seasons. He offers growth with easy doing ability and he handles our tough forest country like it's scrub country. Fitzgerald's EBVs place him in the Top 1% for growth and scrotal size and Top 5% for Eye Muscle Area (EMA). He provides an ideal combination of the attributes of fertility, growth and most of all, constitution - this package is wrapped up with an incredibly docile temperament.

Classification: S

Homozygous Poll

Soc ID: EID17MN864

Neon (AI) (PP) is a homozygous poll son of Dangarfield Tycoon. He is not half corgi - his tail was chewed off by dingoes as a weaner. He is a trait leader for Domestic index and top 5% for 400 day growth, eye muscle area, retail beef yield and carcass weight. Good skin, a trim sheath and 96% normal semen, made this bull an ideal sire to carry on the Tycoon line. His dam, ES K189 had two calves in two years.

Eidsvold Station Neon N864 (AI) (PP) is represented by Lots 11, 31, & 66

**Our Annual Sale lasts for about two hours.**

**Those two hours are the culmination of around 60,000 hours of managing our stud and commercial herds by this amazing, hard working team of people, who are dedicated to the accurate collection and recording of data, animal husbandry, stock handling, land management, farming and property development.**

**To our team:**

**We thank you and acknowledge your skills, effort, ultimate care and attitude.**

## SALE INFORMATION

### AuctionsPlus

Online bidding is available only to registered users. Registration is free - visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register. Please register at least 48 hours prior to the sale. Microsoft Silverlight is required to connect to AuctionsPlus sales; first time users are advised to visit the Downloads section of the AuctionsPlus website to ensure Silverlight is installed. Demonstration Auctions may be viewed in order for new users to become familiar with the system. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

**Breeding Soundness:** All bulls have passed a breeding soundness examination by veterinarian Stacey Rae, Monto Veterinary Services.

**Semen morphology:** All bulls have passed a semen morphology test

**Health** All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

**Ticks:** All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

**Buyers Inspections:** Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

**Supplementary Sheets:** Supplementary sheets will be on our website: [www.greenup.com.au](http://www.greenup.com.au) and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat.

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

## PRE-SALE INSPECTIONS

Prior to sale day, all bulls are depastured on oats at 'Belvedere' and can be inspected anytime.

Belvedere is situated on the Kerwee-Mt Perry Road, 10 minutes north of Eidsvold township.

To arrange inspection, contact Rick on 4164 4260 or his mobile 0427 644 260.

## DIRECTIONS TO EIDSVOLD SALEYARDS

Eidsvold Saleyards are on the Southern side of town just off the Burnett Highway. Take Hollywell Road at the BP Petrol Station.

### Guarantee

Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
- Gross negligence or willful misconduct on the part of the purchaser;

In the event of an animal failing to breed, we agree that;

- The animal may be replaced with an animal of comparable value;
- Credit shall be given in the sum of the full purchase price, less salvage value;
- The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

**Insurance:** Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

**Outside Agents:** The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale and is paid on previous eligible introductions. Rebate will not apply to existing Greenup Eidsvold Station clients, if unsure, please check with us beforehand. Settlement by the outside agent on the purchaser's behalf must occur within fourteen days of the sale. Commission will not apply to stud sires transferred to members of the SGBAA.

**Delivery:** Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

**Risk & Responsibility:** Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

**Terms & Conditions of Sale:** All lots will be offered under the ALPA Livestock Terms and Conditions of Sale.

**Disclaimer:** The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.
