www.superborders.com

SuperBorders is the brand name for Border Leicester Rams that are of high genetic merit for a first cross production system. The official **SuperBorder** yellow ear tags allow **SuperBorder** rams to be easily identified.

To qualify as a **SuperBorder** a Border Leicester ram must be above the 50th percentile for the breed based on the BLX index (Border Leicester Cross Index). The 50th percentile index value is calculated based on the 15th of August LAMBPLAN run each year. It is used to determine **SuperBorder** rams for that selling season. The BLX Index has been developed for production systems using Border Leicester sires crossed to Merino dams to produce first cross progeny. BLX balances maintaining mature size with significant improvements in early growth and reproduction. A higher BLX index targets animals that are more profitable in this production system.

The cut off for the 2020 drop is 120.5. Everything on or over this index is a **Superborder** for the 2021 sale

Not all rams sold by **SuperBorder** members are necessarily **SuperBorder** quality, but are bred by committed, registered breeders striving for genetic gain. **SuperBorder** rams must be structurally sound and of good breed type.

The **SuperBorders** group is made up of a number of studs across 5 states who work together in meeting market requirements for objectively measured maternal genetics in the Australian Lamb Industry. **SuperBorders** members are industry leaders with longstanding involvement in research, trials and industry resource flocks.

First cross lambs sired by 100% **SuperBorder** rams may be sold as 'Bred from **SuperBorders**'. Special yellow pen cards and **SuperBorders** ear tags are available to identify these animals when sold in physical sales. Virtual yellow sale cards are also available for **SuperBorders** progeny sold on online sale platforms. Please speak with us if you would like either of these marketing materials.
