**POLL DORSET STUD**

**5TH ANNUAL RAM SALE**

23rd September 2021, 12.30pm

Inspections from 11.30am

COVID Safe event

Interfaced with AuctionsPlus

“MORVAH PARK”  
1224 Moonee Swamp Rd, Deniliquin  
[www.sabersheep.com](http://www.sabersheep.com)

Steve and Linda would like to welcome you to our 5th Annual Production Sale. Saber Poll Dorset sheep stud was founded in 1958 and has been breeding flock rams ever since. This year marks 63 years of breeding Rams. Steve and Linda took over the management of the stud in 2011 from Steve's father Rod. Rod remains involved with the stud as a mentor and we are thankful for his assistance and knowledge of breeding sheep.

We have continued to invest heavily in Genetics and are pleased with the early growth, quick maturing lambs and muscling which we are seeing in our flock. While maintaining good structure and confirmation is paramount, our focus is shifting to improving the eating quality of Australian lamb. We continue to be members of Meat Elite Australia a collaborative group of Poll Dorset breeders from across Australia who are committed to giving clients a genetic edge with sires, when producing prime lambs for the sheep meat industry. Meat Elite genetics deliver a 21% faster genetic improvement than the average for terminal sire groups. Meat Elite have a strong involvement with sheep CRC through research projects.

Our aim is to be able to assist our clients with their breeding objectives by providing quality rams that are objectively measured and can improve your operation's productivity and importantly profitability. This goal is achieved through participation of carefully selected breeding programs.

This season has seen some much needed rain over the winter months with the catchment dam levels increasing to near full. providing the opportunity to finish our rams off without any supplementary feeding. We are hopeful that the coming Spring will see more rainfall across the catchment allowing for summer plantings again within our region.

While we have all faced challenges during 2021 with the ever persistent Covid-19, it has continued to provide our business with learning opportunities. We continue to explore opportunities to run our business in the online environment. Whilst many of us have not had the opportunity for face to face contact with many of our loved ones we are thankful for technology providing the opportunity to remain connected. We are all better prepared this year to face the sale season with interfaced auctions, face to face and online where possible. May the rains continue through spring to help finish the winter crops and lamb markets remain strong. We thank you for your ongoing support and attendance at today's sale and wish you well for the season ahead.

Yours faithfully

Steve and Linda Fawns

## Understanding LAMBPLAN ASBVs

- An ASBV of 0 is the average of the 1990 drop.
- Note: A useful rule of thumb for converting ram ASBVs into lamb production differences is to simply halve the ASBV (as rams contribute half the genetics of the lamb).
- Accuracy - published as a percentage, is a reflection of the amount of effective information that is available to calculate the ASBV. All ASBVs are now published with accuracies. The higher the percentage, the closer the ASBV is to the true breeding value of the animal. Breeding values without accuracies are Flock Breeding Values (FBVs) and can only be compared within the flock.

**For more information contact Sheep Genetics**  
**Ph: 02 6773 2948 Fax: 02 6773 2707**  
**info@sheepgenetics.org.au www.sheepgenetics.org.au**

Sheep Genetics is a joint program of Meat & Livestock Australia Limited ABN 39 081 678 364 and Australian Wool Innovation Limited ABN 12 095 165 558

## Carcase Plus

Carcase Plus was retired in March 2020 and replaced with the Terminal Carcass Production index.

Terminal Carcass Production (TCP)

The TCP index is for a prime lamb production system where terminal sires are joined to ewes of a Merino/maternal breed or cross. The TCP index focuses on increasing weight and muscle while reducing carcass fat. These are changes which contribute to higher lean meat yield. TCP also has emphasis on modest improvements in eating quality.

Typical trait changes for the TCP index include:

- increasing post weaning weight
- increasing carcass eye muscle depth
- decreasing carcass fat depth
- increasing dressing percentage
- increasing lean meat yield
- slightly improving eating quality.

Sheep with better eating quality will have higher ASBVs for intramuscular fat (more marbling) and lower ASBVs for shear force (better tenderness).

Figure 1 illustrates which traits are in the index and how much they contribute to the overall balance of the index. The longer the bar, the greater the impact on the index, and the greater impact on the profitability of the production system. Figure 1: The traits in the TCP index and how they contribute to the overall balance of the index

# LAMBPLAN terminal indexes

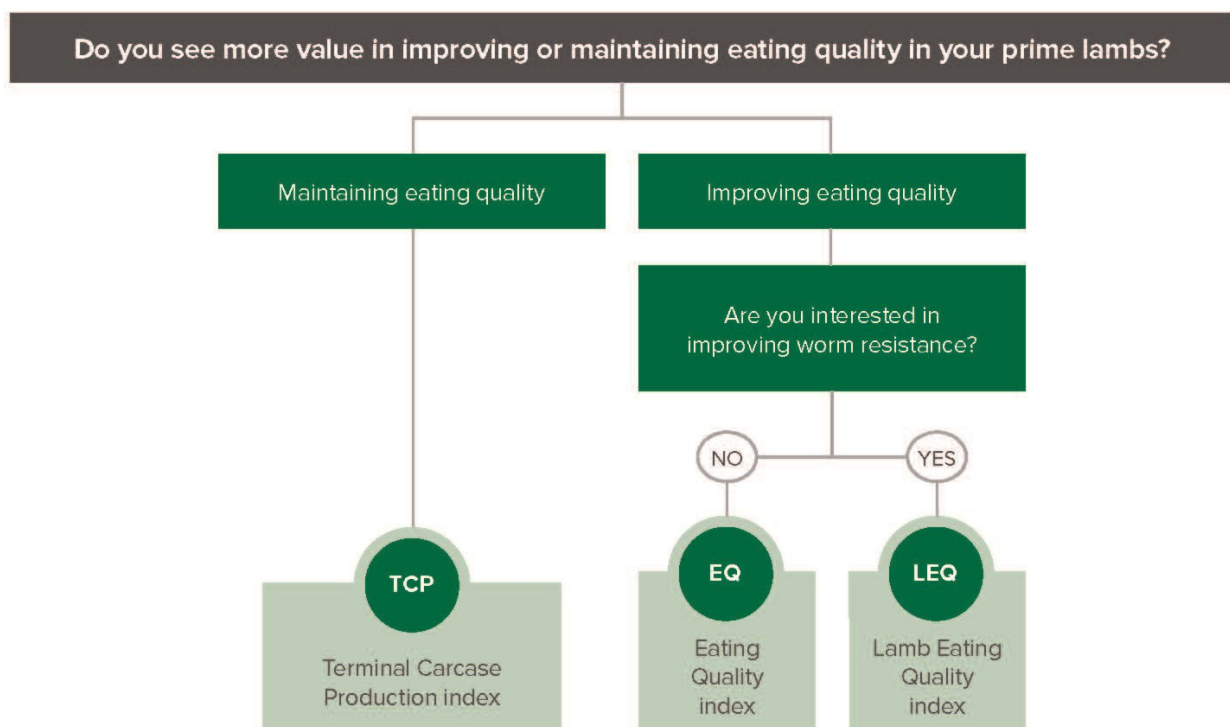

## A ram buyer's guide

Indexes help producers select animals for use within a breeding program when there are a range of traits of economic or functional importance, so that genetic gain in one trait is not made in isolation from other traits.

Using indexes in your ram purchasing decisions allows you to make balanced genetic progress towards more profitable sheep. A ram with a higher index will produce progeny that are more profitable in that production system.

### Choosing the right index

The following flowchart helps producers determine the best index for their terminal production system:

### How to use the chosen index to assist in purchasing decisions:

#### Before the sale:

1. Rank animals in the sale on the value of your chosen index.
2. Consider the individual ASBVs which are important to you to create a short list of rams to look at on sale day.

#### At the sale:

3. Look through your short list of rams to find the ones that meet your structural and type requirements.

## INFORMATION ON SALE RAMS

**All rams in this catalogue are Autumn and Spring drop 2020. We follow a strict vaccination program with all sheep being vaccinated as lambs with Gudair and Rams being vaccinated every 6 months with 6 in 1. Rams have been vaccinated with Glenvac 6 in 1 with B12 prior to Auction. Rams are vet checked prior to sale.**
