NOTES

ASBV Explanation

BWT – Rams with lower ASBV's for birth rates produce lambs with lower birth weight.

PWWT – Rams with more positive ASBV's for Post Weaning Weight produce lambs that grow quicker and reach target weights in a shorter time.

PWFAT – Rams with a more negative ASBV for post weaning fat will produce lambs that are leaner at the same weight.

PWEMD – Rams with a more positive ASBV for post weaning eye muscle depth produce lambs that have more muscle, independent of weight and a higher lean meat yield.

TCP – Terminal Carcase Production is an index for a prime lamb production system where a terminal sire is joined to ewes of a Merino maternal breed or cross. This ASBV focusses on increasing weight and muscle while reducing carcase fat with an emphasis on higher lean meat yield and an improvement in eating quality.

The McCallum families welcome you to our 11th annual combined White Suffolk and Suffolk ram sale.

Our families have been breeding Suffolk sheep since 1954 with the Gum View prefix being the third oldest Suffolk stud in Australia. We commenced breeding White Suffolk sheep in 1989 with a focus of breeding sheep with the well-known hardy characteristics of the Suffolk breed.

The Willochra Studs were founded in 2010 from the Gum View White Suffolk and Suffolk flocks when the KC McCallum & Co partnership was dissolved.

Both Studs continue to invest in new stud sires with suitable genetics to produce progeny to satisfy all market requirements with an ongoing focus on high growth rates and enough cover to finish on either pasture or in a feedlot situation.

This year our rams reflect the current season and we are confident that the 84 White Suffolk and 44 Suffolk rams on offer will meet your requirements.

We thank you for attending our sale today and wish you well with your purchases

Yours sincerely,

Jeff & David McCallum & Families

WHITE SUFFOLK
