MATERNAL COMPOSITES

RAM SALE

200 RAMS FOR SALE

1.00PM THURSDAY 27 JANUARY 2022

On Property and live on AuctionsPlus. Inspection from 10am

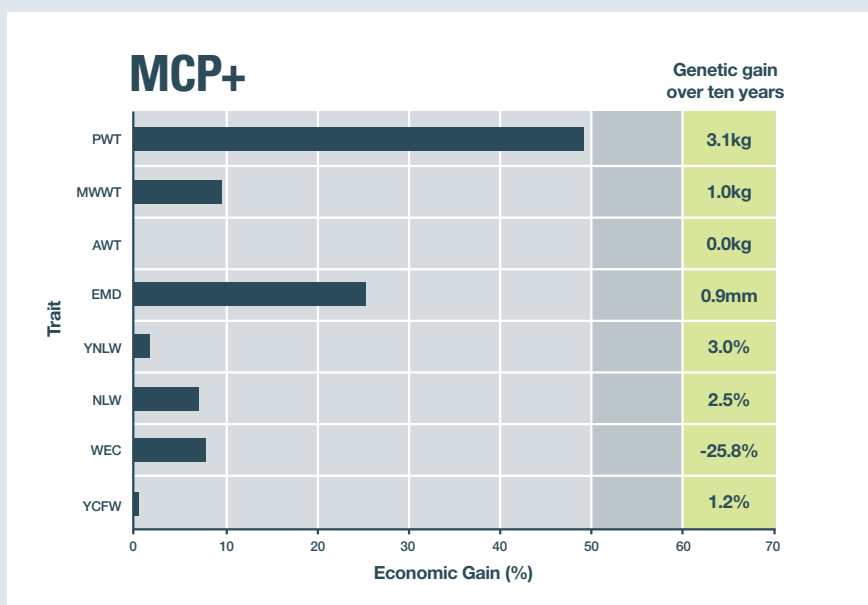

All rams well above industry average MCP+ index
Outside agent rebate applies

LAMBPLAN Maternal Indexes

Maternal Carcase Production+ (MCP+)

The Maternal Carcase Production + (MCP+) index is similar to the Maternal Carcase Production (MCP) index, with the addition of both wool and worm egg count. This index targets self-replacing production systems where maintaining adult weight and fleece weights are seen as important at the same time as improving carcase traits. A slight increase in clean fleece weight is expected. This index aims to reduce WEC as it is assumed in the index most enterprises are located in high rainfall areas and/or high input management systems. The contribution of each trait to economic gain is expressed in the graph along with the predicted genetic gain over 10 years.

For more information contact Sheep Genetics

COMMERCIALY PROVEN

Welcome our fourth on property sale. We are delighted to be offering 200 Maternal Composite Rams for auction.

We are extremely pleased with this year's line-up of rams and have introduced several new and exciting reference sires to our breeding program. Our aim continues to be commercially focused, producing more kgs per hectare is the main profit driver of our operation. In our business kg per hectare is king!

Why Salway?

- Highly fertile ewes with excellent mothering ability, which means better lamb survival
- Early maturing ewe lambs can be joined at 7 months, resulting in faster return on asset
- High lambing percentages = more kg per hectare
- Self Replacing System – eliminating the high capital cost of buying in ewes and reduced biosecurity risks
- Structurally assessed/scored and vet checked rams that are all well above the industry average for maternal carcase production.

We pride ourselves in presenting you with the maximum amount of accurate information on the rams offered for sale. Outlined in the catalogue is structural scores, along with definitions, measurements that we use such as MCP+ index and ASBVs, and a full list of reference sires.

We would not have a sale without the fantastic team around us. Sincere thanks to Jacob and Tu and for the hard work that they put in daily, Nutrien Boulton's for your invaluable assistance throughout the year and the Walcha Hospital Auxiliary for helping with catering.

If you would like more information or help with ram selection, please do not hesitate to get in contact with us. We'd love to hear from you!

Rob and Anna Mulligan

Phone 0427 773 914 or 02 6777 3914

SALE INFORMATION

SALE COMMENCES

1.00pm on property and on AuctionsPlus.

SELLING SYSTEM

Sale of the rams will be conducted on site and interfaced live with AuctionsPlus. Rams will be sold individually.

GST

All animals are sold excluding GST.

REBATE

2% rebate to outside agents registering RAM BUYERS in writing 24 hours prior to the sale and settling on their behalf within seven days of invoice.

SEMEN RIGHTS

Rams sell with 100% semen marketing rights. Salway reserves the right to collect semen for within flock use from any rams in this year's catalogue. Done at vendors expense and the purchasers convenience.

CATALOGUE

View on AuctionsPlus, Sheep Genetics website, Ram Select, Salway Facebook page, via email or as a hard copy. Please don't hesitate to get in touch with us if you would like assistance with ram selection.

LUNCH PROVIDED

The Walcha Hospital Auxiliary will be cooking lamb burgers and providing delicious cakes and refreshments throughout the day.

COVID Safe protocols will be in place.

AuctionsPlus

AUSTRALIAN SHEEP BREEDING VALUES (ASBV'S) EXPLAINED

An ASBV's is an estimate of the genetic potential a sheep has to pass on to its progeny. ASBV's are available for a range of economical important traits and are designed to be used in conjunction with visual selection. The appearance and performance of an animal is a combination of its genes and the environment in which it is raised (e.g. the amount and quality of feed, single or twin or twin birth type.) ASBV's account for these environmental effects, allowing the comparison of sheep based on the genes they will pass on to their progeny. It is important to remember when selecting sheep you are choosing the genes, not the environment.

Reference – Lambplan ASBV's www.sheepgenetics.org.au

BIRTH WEIGHT (BWT)

Rams with more negative BWT ASBVs produce lambs which are lighter at birth (kg). (BWT ASBV's estimate the genetic difference between animals in live weight at birth). Use low or negative BWT for maiden ewes.

WEANING WEIGHT (WWT)

Estimates the genetic difference between live weights at 100 days. Rams with a more positive ASBV for weaning weight (WWT) will, on average, produce lambs with faster growth to weaning (kg).

WEIGHT (PWWT)

Post weaning weight estimates the genetic difference between animals (kg). The higher the ASBV figure the better for superior later growth of lambs.

ADULT WEANING WEIGHT (AWT)

Adult weaning weight at two years (kg).

FAT (PFAT)

Post weaning fat depth at approx. 225 days (mm). Rams with a more negative ASBV for post weaning fat (PFAT) will produce progeny that are leaner.

EYE MUSCLE DEPTH (PEMD)

Post weaning eye muscle depth at approximately 225 days. Rams with more positive ASBV's for EMD will produce progeny that have more muscle and yield more lean meat (mm).

SCROTAL CIRCUMFERENCE (PSC)

Post weaning scrotal circumference (mm) Rams with larger testes will sire more daughters and wean a higher percentage of lambs.

NUMBER OF LAMBS WEANED (NLW)

Number of lambs weaned (%) Rams with more positive NLW ASBV's will produce daughters that wean a higher percentage of lambs.

YNLW

Number of lambs weaned % for a one year old ewe.

WEC

Worm egg count (%) – Rams with more negative WEC ASBVs produce progeny who have a higher genetic potential to resist worm burdens. Lower WEC ASBVs are desirable.

MWWT

Maternal weaning weight (kg) – Rams with more positive MWWT ASBV's will produce daughters that wean heavier lambs.

RUN DATE

ASBVs have been generated from the 15 November 2021 run.

SHEEP STRUCTURAL ASSESSMENT

SHEEP STRUCTURAL ASSESSMENT

All rams have been independently structurally assessed by Tim Lawrence of Advanced Livestock Services (02) 6775 5783 or 0419 147 419.

HOW TO USE THE VISUAL SHEEP SCORES

Structural assessment uses a 1 – 5 scoring system

- A score 1 is very good
- A score 2 is good with the animals showing slight variation from the ideal
- A score 3 is average with animals showing greater variation from the ideal
- A score 4 is poor
- A score of 5 is very poor

Note: Score 4 and 5 are not catalogued

FP Front Pasterns

FC Front Claw

BC Back Claw

SV Side View

BL Back Leg

BP Back Pasterns

FL Front Leg

SIDE VIEW

- A score of 1 is very straight
- A score of 2 is animals showing slight variation from the ideal
- A score 3 is ideal
- A score of 4 is animals showing slight variation from the ideal
- A score of 5 is very sickled
These animals will not be catalogued

Note: Scores 1 and 5 are not catalogued

SKIN ASSESSMENT

Score 1 Short staple, dense

Score 2 Some length, slightly open

Score 3 X bred type

Score 4 Longer staple, open

Score 5 Long, open, strong wool

HOW TO GET TO 'SALWAY'

From Walcha head east on the Oxley Highway towards Port Macquarie for approximately 4km. At the top of the three-lane hill, turn right onto the Brackendale Road.

'Salway' is approximately 33.5km from this turn off. The road is tar, then gravel, there is a steep tar hill down to McLeods Creek, after this bridge 'Salway' is the first property on the right with pine trees and stone entrance. The woolshed is approximately 2km from the mail box.

Rob and Anna Mulligan

'Salway' 3346 Brackendale Road
