Explanation of Ewes Upgraded through Suffolk Appendix

Please note there are a selection of Suffolk Ewes that are noted in the comments as “Upgraded through the Appendix”. These sheep are now 15/16th Suffolk and will be inspected for inclusion in the Suffolk Flock Book prior to sale, as per ASBA regulations.

Explanation of Composite Ewes

Since 2009 , we have been running a Black Composite program, crossing Suffolk’s & Hampshire Downs to produce varying percentages of Suffolk & Hampshire genetics to suit our individual clients needs & maximize crossbred vigour in their progeny.

In this catalogue we have a selection of Black Composite ewes, ewe lambs & a ram lamb for sale that are 87.5% Suffolk blood.

These sheep if mated back to Suffolk, will produce progeny that are registerable as Suffolk’s through ASBA appendix grade-up regulations. Feel free to contact Peter for more details.
