SALE LOCATION

292 Trafalgar South Road
Trafalgar South - Victoria

PRE-SALE INSPECTION

The bulls are available for pre-sale inspection from 11am on sale day. Prior inspections are welcome by private appointment. Sale Day will run in line with current Covid-19 guidelines.

AUCTIONSPLUS

The auction is fully interfaced live with AuctionsPlus for those interested buyers who can't make the sale. Please register your interest early to avoid disappointment.

HEALTH OF SALE CATTLE

All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibriosis, Pesti Guard (BVD), and drenched prior to the sale.

ABSOLUTE ANGUS GUARANTEE

All sale bulls have been DNA Tested and Sire Verified, and independently structurally assessed by Liam Cardile, Beef Excel, to maximize the quality of stock on offer at the sale.

All sale bulls have also been independently inspected by Dick Whale, Breeder Genetics. Dick will be available on Sale Day if you would like any further information on any of the sale bulls. Genomics information on all sale bulls will also be available at the sale.

To the best of our knowledge the bulls offered are in sound working order as at the time of sale. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 12 months, Absolute Angus will:

1. Provide you with a mutually agreeable replacement if available, or
2. We will issue a refund equal to the purchase value minus any salvage value, or
3. Issue you with a credit equal to purchase price minus salvage value to purchase an any animal from Absolute Angus within a 2-year time frame.

Please note in some cases a veterinary report may be requested. Normal care and good husbandry practices must be observed as a replacement, or a credit, is not available if a bull is simply injured or dies for any other reason. The guarantee is for the value of the bull without interest, costs, or damages.

INSURANCE

We recommend you insure animals against injury, for transit and potential loss of use in the first joining season. Please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. An insurance service will be available on sale day.

SAFETY

All sale bulls are generally quiet to handle under normal conditions however care must be taken during sale day as crowd pressure may change their behaviour. Please use caution and be alert. All visitors enter the cattle display yards at their own risk. Children are not permitted to enter the bull display yards.

DELIVERY OF SALE BULLS

Absolute Angus provide a free delivery service within a 100-kilometre radius from the sale location. Further travel distances can be arranged by negotiation. Please fill out your delivery and insurance instructions.

OUTSIDE AGENT REBATE

A 2% rebate is paid to outside agents, introducing a buyer, and settling within 7 days.

DISCLAIMER

Absolute Angus has taken great care in ensuring the information provided in this catalogue is accurate however we take no responsibility for the accuracy and/or interpretation of the information in this sale catalogue.

WELCOME TO OUR 4TH SPRING BULL SALE

We are very pleased to be offering 30 rising two-year-old and 30 yearling bulls this spring.

The main sire lines represented in this sale offering include for the two-year-old group; Landfall New Ground N90, Ardrossan Honour K341, Ardrossan Edmund K165 and Rennylea L519.

These will be the last sons from Ardrossan Edmond and Honour sires to be offered at sale however we have retained many daughters from these 2 bulls in the herd

Ardrossan cattle are phenotypically and structurally excellent producing some great females for the stud, while the sale bulls up for auction are big strong bulls with power behind them along with calving ease and growth.

In the yearling section, we are pleased to offer sons of Landfall Prominent P317, Sitz Stellar, Baldrige Beast Mode B074, GB Fireball 672 & Murdeduke Quarterback Q011, along with progeny from the Te Mania Berkley line.

One of the sale highlights and we believe an exciting opportunity for breeders, is the introduction of progeny from dam VTMZ45 for the first time. This cow is a full sister to Te Mania Emperor's dam, VTMZ74.

Te Mania Berkley yearlings and KMK Alliance progeny are in the draft so keep an eye on these bulls. Adding another level of interest are the Beast Mode progeny out of Te Mania Emperor's full sister, VTMG251.

It's a real family affair and a good representation of the Lowan bloodline with this group.

Landfall New Ground N90 keeps on proving himself and now is one of the leading go-to sires in Australia. We are very proud of how this sire is having a positive influence on the Angus breed.

Eight of the yearling bulls are sired by Landfall Prominent P317, with one of his sons recently selling for \$42,000, the 2nd top price at the 2022 Landfall Angus Spring bull sale.

Prominent P317 has an outstanding data set. He is one of the leading sires in the Angus breed for calving ease, growth, carcase weight and his docility sits in the top 1%.

The sale bulls have gone through a very tough year of wet and cold weather but have pulled up well and are ready to work.

We continue to improve our genetics pool adding Milwillah Shadow S775 to our elite sire team this month.

Shadow S775 is a full brother to Milwillah Nardoo N155, the top priced bull at Milwillah Angus in 2019.

Shadow has moderate figures excelling in growth. A bull to look out for whose progeny will be offered at future sales.

Buyers looking to improve their herds with leading traits such as calving ease, growth fertility, carcase weight and fat cover will have a range of bulls to choose from on sale day.

Working along the Absolute Angus team is a high calibre team of livestock professionals including Elders Stud Stock, Alex Scott & Staff, and Outriders Media.

Thank you for your continued interest in Absolute Angus and we look forward to seeing you on sale day.

Please get in touch for private inspections of any of the sale team prior to auction.

Anthony Pisa

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “Sign Up” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “Dashboard” and then select “Request Approval to Buy”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF. LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning .

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

AFTER PURCHASE TIPS

ARRIVAL

MATING NEW YOUNG BULLS

MANAGING OLDER HERD BULL

DURING MATING

NORTHERN AUSTRALIA

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

ADAPTATION

The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.
